ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED DURING THE MONTH OF JULY, 1920.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Absorbing and purifying composition. J. C. Tate. No. 1,346,349; July 13; v. 276; p. 264.
Acetates, Manufacture and production of cellulose. J. O. Zdanowich. No. 1,347,801; July 27; v. 276; p. 666.
Acid and cyanids, Making hydrocyanic. M. E. Mueller. No. 1,347,518; July 27; v. 276; p. 609.
Acoustic device. G. B. Thomas. No. 1,345,717; July 6; v. 276; p. 77.
Adding-machine. J. T. Hurley No. 1,345,781; July 6; v. 276; p. 89.
Adjustable bracket. G. G. Blandford. No. 1,345,344; July 6; v. 276; p. 4.
Advertising device. F. Vogelzang. No. 1,346,775; July 13; v. 276; p. 348.
Advertising-frame. F. Newhouse. No. 1,346,969; July 20; v. 276; p. 445.
Advertising or amusement device. C. H. Leggett. No. 1,346,219; July 13; v. 276; p. 237.
Advertising specialty. C. Kolin. No. 1,346,658; July 13; v. 276; p. 324.
Aerial ropeway. H. F. H. Shields and J. P. Roe. No. 1,347,763; July 27; v. 276; p. 659.
Aeroplane. A. Albérico. No. 1,346,107; July 13; v. 276; p. 216.
Aeroplane. B. Hood. No. 1,347,952; July 27; v. 276; p. 696.
Aeroplane. H. A. Robinson. No. 1,345,885; July 6; v. 276; p. 110.
Aeroplane. C. R. Wilson. No. 1,345,726; July 6; v. 276; p. 78.
Aeroplane construction. H. G. Hooper. No. 1,347,040; July 20; v. 276; p. 459.
Aeroplane-drive. H. F. McNutt. No. 1,346,327; July 13; v. 276; p. 260.
Aeroplane safety device. L. Kovacs. No. 1,346,214; July 13; v. 276; p. 236.
Agricultural implement. J. W. Scott. No. 1,345,964; July 6; v. 276; p. 126.
Agricultural-implement blade. E. A. Schmutte. No. 1,346,261; July 13; v. 276; p. 246.
Agricultural-implement seat. J. C. Brian. No. 1,345,830; July 6; v. 276; p. 98.
Air and non-condensable gases, Apparatus for exhausting. A. E. L. Scanes. No. 1,346,980; July 20; v. 276; p. 447.
Air-brush plant, Portable. C. A. Murphy. No. 1,347,790; July 27; v. 276; p. 664.
Air-compressor. B. D. Thompson. No. 1,345,973; July 6; v. 276; p. 128.
Air-compressors, Dust-arrester for. J. R. Ricketts. No. 1,345,405; July 6; v. 276; p. 16.
Air-diffusion machine. V. Slater. No. 1,346,471; July 13; v. 276; p. 287.
Air or water, Apparatus for the determination of vertical velocities in or of. C. Schoute, F. A. van Heyst, and N. E. G. Meyer. No. 1,345,556; July 6; v. 276; p. 45.
Air or water pressure tank. J. F. Brown. No. 1,347,934; July 27; v. 276; p. 692.
Air-separator. W. A. Gibson and C. E. Needham. No. 1,346,015; July 6; v. 276; p. 136.
Air transport systems, Blowing-tank for compressed-. H. A. Kimber. No. 1,348,010; July 27; v. 276; p. 708.
Air-washer. E. J. Kratochvil. No. 1,345,681; July 6; v. 276; p. 69.
Aircraft for receiving and delivering mail and merchandise, Apparatus on. E. C. Hanson. No. 1,347,157; July 20; v. 276; p. 481.
Aircraft, Gun-mounting for use on. R. Allen. No. 1,348,072; July 27; v. 276; p. 721.
Airplane. T. L. Eggleston. No. 1,347,084; July 20; v. 276; p. 468.
Airplane. J. D. Hill. No. 1,347,857; July 27; v. 276; p. 678.
Airplane. A. R. Smith. No. 1,346,472; July 13; v. 276; p. 288.

Automobile-alarm.
Lock and burglar-alarm.
Alcohol from liquids, Process and apparatus for extracting. F. Fehr. No. 1,345,437; July 6; v. 276; p. 21.
Alkali-metal hydrates, Producing. H. W. Charlton. No. 1,346,002; July 6; v. 276; p. 133.
Alkali metal minerals, Decomposition of. E. Bergve. No. 1,346,365; July 13; v. 276; p. 266.
Alloy of iron, chromium, and titanium, and the production thereof. H. C. Sicard. No. 1,346,343; July 13; v. 276; p. 263.
Alloys, Producing chromium-containing. F. A. Fahrenwald. No. 1,346,187; July 13; v. 276; p. 231.
Alternating-current motor. V. A. Fynn. No. 1,345,538; July 6; v. 276; p. 42.
Ammonia to nitric acid, Oxidizing. A. Henwood. No. 1,347,158; July 20; v. 276; p. 482.
Ammonia to nitric acid, Oxidizing. A. Henwood. No. 1,347,159; July 20; v. 276; p. 482.
Ammonium chlorid, Method of and apparatus for recovering. M. E. Mueller. No. 1,346,967; July 20; v. 276; p. 445.
Ammonium salts, Purification of. V. Bredlik. No. 1,346,106; July 13; v. 276; p. 216.
Ammunition-carrier. A. A. Lethern. No. 1,345,864; July 6; v. 276; p. 105.
Ammunition-hoisting apparatus. A. T. Dawson and J. Horne. No. 1,346,302; July 13; v. 276; p. 254.
Amusement device. P. J. Coburn. No. 1,346,634; July 13; v. 276; p. 320.
Amusement device. A. McK. Waters. No. 1,345,647; July 6; v. 276; p. 62.
Amusement device. J. C. Welch. No. 1,346,576; July 13; v. 276; p. 308.
Amusement device, Spiral-guide. G. W. O'Dole. No. 1,347,968; July 27; v. 276; p. 699.
Anchor-post. A. L. Melvin. No. 1,347,865; July 27; v. 276; p. 679.
Andiron-grate, Combination. J. R. Campbell. No. 1,347,935; July 27; v. 276; p. 693.
Angle-indicator, Automatic. J. R. Lackland. No. 1,346,547; July 13; v. 276; p. 303.
Animal-exterminator. J. W. Van Meter. No. 1,347,310; July 20; v. 276; p. 512.
Anti-aircraft, Apparatus for regulating the firing of. J. L. Routin. No. 1,345,707; July 6; v. 276; p. 74.
Anti-aircraft-control system. J. L. Routin. No. 1,345,697; July 6; v. 276; p. 72.
Anti-aircraft fire control. J. L. Routin. No. 1,345,701; July 6; v. 276; p. 73.
Anti-aircraft fire-control apparatus. J. L. Routin. No. 1,345,705; July 6; v. 276; p. 74.
Anti-aircraft gunfire control. J. L. Routin. No. 345,698; July 6; v. 276; p. 72.
Anti-aircraft gunfire control apparatus. J. L. Routin. No. 1,345,703; July 6; v. 276; p. 74.
Anti-aircraft gunfire-control system. J. L. Routin. No. 1,345,700; July 6; v. 276; p. 73.
Anti-aircraft tracker. J. L. Routin. No. 1,345,704; July 6; v. 276; p. 74.
Antifriction-buffer. L. Larsen. No. 1,347,389; July 20; v. 276; p. 527.
Antisetting device. A. M. Griffey. No. 1,346,954; July 20; v. 276; p. 442.
Arbor, Expanding. E. Hottinger. No. 1,346,890; July 20; v. 276; p. 429.
Arbor, Expanding. C. F. Sherman. No. 1,346,917; July 20; v. 276; p. 435.
Arbor-press. K. R. Wilson. No. 1,346,868; July 20; v. 276; p. 425.
Arch-support. S. Darling. No. 1,346,444; July 13; v. 276; p. 282.
Armband. A. L. Herrmann. No. 1,346,374; July 13; v. 276; p. 268.
Armchair and bed, Combined. E. Jantsch. No. 1,346,206; July 13; v. 276; p. 234.
Arrow. I. L. Davis. No. 1,346,639; July 13; v. 276; p. 321.
Asbestos, Bleaching. C. L. Hill. No. 1,346,316; July 13; v. 276; p. 257.
Ash receiver and sifter. P. H. Childress. No. 1,346,809; July 20; v. 276; p. 413.
Assorting and distributing machine, Product. F. H. Ballou. No. 1,346,438; July 13; v. 276; p. 281.

Astronomical instrument. E. Meltner. No. 1,346,412; July 13; v. 276; p. 275.
Auto-bumper. T. L. Robertson. No. 1,348,053; July 27; v. 276; p. 717.
Auto-chassis. G. L. Kline. No. 1,347,337; July 20; v. 276; p. 517.
Auto-pedals lock. F. P. Maize. No. 1.346,098; July 6; v. 276; p. 152.
Automatic brake. V. Barningham and S. G. Ashby. No. 1,346,628; July 13; v. 276; p. 318.
Automatic decelerating device. J. F. Layng. No. 1,347,784; July 27; v. 276; p. 663.
Automatic regulator. H. R. Davies. No. 1,346,181; July 13; v. 276; p. 230.
Automatic sprinkler. F. T. Gentile. No. 1,345,592; July 6; v. 276; p. 52.
Automatic switch. C. W. Eisenmann. No. 1,348,098; July 27; v. 276; p. 726.
Automatically-operated support. S. E. Sudbury. No. 1,346,773; July 13; v. 276; p. 347.
Automobile accelerator. C. L. Mitchell. No. 1,347227; July 20; v. 276; p. 495.
Automobile-alarm. G. M. Campbell. No. 1,347,495; July 27; v. 276; p. 605.
Automobile-alarm. W. R. Moran. No. 1,345,387; July 6; v. 276; p. 12.
Automobile attachment, Life-saver. M. Doujak. No. 1,346,486; July 13; v. 276; p. 290.
Automobile-bumper. L. Baumgartl. No. 1,346,478; July 13; v. 276; p. 289.
Automobile-bumper. W. J. Millard. No. 1,348,030; July 27; v. 276; p. 712.
Automobile-bumper. J. H. Sager. No. 1,345,553; July 6; v. 276; p. 45.
Automobile-bumper. J. H. Sager. No. 1,345,554; July 6; v. 276; p. 45.
Automobile bumper and fender, Combined. S. E. Horne. No. 1,347,699; July 27; v. 276; p. 646.
Automobile direction-indicator. J. Sobocinski. No. 1,345,562; July 6; v. 276; p. 47.
Automobile-fender. P. Fedorow. No. 1,347,624; July 27; v. 276; p. 631.
Automobile-heater. M. C. Moody. No. 1,348,032; July 27; v 276; p. 712.
Automobile-jack. J. W. Paxson. No. 1,347,228; July 20; v. 276; p. 495.
Automobile-jack, Automatic. L. M. Fisher. No. 1,345,842; July 6; v. 276; p. 101.

Car-seat, Pedestal. F. Smolar. No. 1,346,386; July 13; v. 276; p. 270.
Car signal, Motor-. N. T. Brown. No. 1,347,246; July 20; v. 276; p. 499.
Car-stake. M. Markkula. No. 1,346,836; July 20; v. 276; p. 418.
Car-step, Auxiliary. S. P. Fairchild. No. 1,345,668; July 6; v. 276; p. 66.
Car truck, Street-. T. A. Brewster. No. 1,345,528; July 6; v. 276; p. 40.
Car underframe, Railway-. W. P. Murphy. No. 1,347,963; July 27; v. 276; p. 698.
Car underframe, Railway-. W. P. Murphy. No. 1,347,964; July 27; v. 276; p. 698.
Car-unloader. H. D. Pratt. No. 1,346,681; July 13; v. 276; p. 329.
Cars, Brake mechanism for motor-. W. Dieter. No. 1,347,736; July 27; v. 276; p. 653.
Cars, Disk wheel for motor-. J. M. E. Franc. No. 1,345,759; July 6; v. 276; p. 85.
Cars, Insulation for refrigerator-. J. F. O'Connor. No. 1,345,391; July 6; v. 276; p. 13.
Cars, Street-indicator for. L. C. Kasbaum. No. 1,347,545; July 27; v. 276; p. 615.
Cars, System for numbering motor-. J. L. Catlett. No. 1,346,808; July 20; v. 276; p. 413.
Cars, Wheel-attaching device for mine-. F. H. Gibbs. No. 1,346,193; July 13; v. 276; p. 232.
Carbon disks, Means for grinding and slotting. H. Blount. No. 1,345,743; July 6; v. 276; p. 81.
Carbon-sheet holder. W. S. Freeman. No. 1,347,692; July 27; v. 276; p. 644.
Carbureter. E. Feroldi. No. 1,347,150; July 20; v. 276; p. 480.
Carbureter. F. B. Hays. No. 1,346,201; July 13; v. 276; p. 233.
Carbureter. T. Linga. No. 1,345,546; July 6; v. 276; p. 43.
Carbureter. F. A. Ost. No. 1,347,052; July 20; v. 276; p. 462.
Carbureter. H. L. Thompson. No. 1,345,516; July 6; v. 276; p. 37.
Carbureter attachment. G. F. Shields. No. 1,347,297; July 20; v. 276; p. 509.
Carbureter-lock. W. C. Evans and S. M. Bancroft. No. 1,345,841; July 6; v. 276; p. 101.
Carbureter-regulator, Automatic. J. T. Young. No. 1,346,734; July 13; v. 276; p. 339.
Carbureter, Vacuum-feed. P. P. Gilles. (Reissue.) No. 14,912; July 13; v. 276; p. 354.
Carbureters, Auxiliary air-valve for. M. E. Schrader. No. 1,347,795; July 27; v. 276; p. 665.
Carcass-scraping wheel. J. W. Kohlhepp. No. 1,347,639; July 27; v. 276; p. 633.
Card, License-. C. H. Cornell. No. 1,346,005; July 6; v. 276; p. 134.
Card, Statistical-record. W. H. Bassett. No. 1,346,162; July 13; v. 276; p. 226.
Carpet and rug cleaner, Blower and suction. F. P. Moore. No. 1,346,044; July 6; v. 276; p. 142.
Carpet-beater. J. E. Hanson. No. 1,347,949; July 27; v. 276; p. 695.
Carriage. A. K. Meinecke and A. Wild. No. 1,347,517; July 27; v. 276; p. 609.
Carriage, Infant's. G. O. Johnson. No. 1,346,963; July 20; v. 276; p. 444.
Carrier: *See*—
Ammunition-carrier. Spare-rim carrier.
Casket-carrier. Tire-carrier.
Hay-carrier.
Carrier apparatus. L. W. Chism. No. 1,347,496; July 27; v. 276; p. 605.
Carrier system. L. W. Chism. No. 1,347,497; July 27; v. 276; p. 605.
Carton, Display-. J. V. Horr. No. 1,347,273; July 20; v. 276; p. 505.
Carton-packing mechanism. A. W. Harris. No. 1,345,926; July 6; v. 276; p. 118.
Cartridge, Dummy. R. E. Reardon. No. 1,347,659; July 27; v. 276; p. 637.
Cartridge, Hydraulic-joint. E. Rimailho. No. 1,346,722; July 13; v. 276; p. 337.
Cartridge-magazine. O. V. Payne. No. 1,347,755; July 27; v. 276; p. 658.
Case: *See*—
Display-case. Shaving-brush case.
Packing-case. Show-case.
Casein solution and making same, Stable. H. V. Dunham. No. 1,347,845; July 27; v. 276; p. 675.
Cash-carrier box. M. A. Pond. No. 1,346,676; July 13; v. 276; p. 328.
Casket-carrier, Collapsible. J. A. Raymond. No. 1,347,466; July 20; v. 276; p. 542.
Casket lock, Burial-. F. Lundberg. No. 1,345,451; July 6; v. 276; p. 24.
Caster. P. R. Nack. No. 1,345,622; July 6; v. 276; p. 57.
Caster. W. H. Noelting. No. 1,346,240; July 13; v. 276; p. 241.
Caster-connecting device. R. J. Ellsworth. No. 1,346,641; July 13; v. 276; p. 321.
Caster-socket. C. S. Barnard. No. 1,345,908; July 6; v. 276; p. 114.
Caster-socket. W. H. Noelting. No. 1,346,239; July 13; v. 276; p. 241.
Casting curved tubular bodies, Core for. G. W. Bungay. No. 1,347,575; July 27; v. 276; p. 621.
Casting-machine, Centrifugal. J. B. Ladd. No. 1,347,582; July 27; v. 276; p. 623.
Castings, Making. Z. Jeffries. No. 1,347,481. July 20; v. 276; p. 545.
Castings, Method of and apparatus for making and handling. C. K. Prince. No. 1,347,552; July 27; v. 276; p. 616.
Catamenial bandage. A. T. Van Alstyn. (Reissue.) No. 14,924; July 20; v. 276; p. 548.
Cement-applying machine. A. Smolker. No. 1,345,512; July 6; v. 276; p. 36.
Cement-mixing machine, Rubber-. C. C. Mosher. No. 1,347,650; July 27; v. 276; p. 635.
Cement-stave machine. S. E. Anderson. No. 1,346,779; July 13; v. 276; p. 349.
Chain, Antiskid-. M. Mager. No. 1,346,226; July 13; v. 276; p. 238.
Chain, Eyeglass-. A. Scott. No. 1,346,559; July 13; v. 276; p. 305.
Chain-fastener. C. A. Morehouse. No. 1,346,046; July 6; v. 276; p. 142.
Chain, Harness-trace. E. P. Belz. No. 1,346,439; July 13; v. 276; p. 281.
Chain, Link. F. C. Witt. No. 1,345,818; July 6; v. 276; p. 96.
Chain-repair link. L. A. Weiss. No. 1,347,725; July 27; v. 276; p. 651.
Chains, Making. F. Müller. No. 1,346,507; July 13; v. 276; p. 294.
Chair: *See*—
Barber's chair. Convertible chair.

Concrete reinforcement. P. M. Cabell. No. 1,345,663; July 6; v. 276; p. 66.
Concrete-road-building machine. W. D. Ham. No. 1,345,925; July 6; v. 276; p. 118.
Concrete-road forms, Anchor and support for. C. D. Sheppard. No. 1,348,060; July 27; v. 276; p. 719.
Concrete roof construction. G. A. Hurst. No. 1,346,752; July 13; v. 276; p. 343.
Condenser. K. Baumann. No. 1,347,436; July 20; v. 276; p. 537.
Condenser and making same. W. Dubilier. No. 1,345,754; July 6; v. 276; p. 84.
Condiment-holder. P. P. de Aguiar. No. 1,346,007; July 6; v. 276; p. 134.
Cone-baking machine. G. O. Robinson. No. 1,346,338; July 13; v. 276; p. 262.
Cone machines, Pastry-feeding mechanism for pastry. C. F. Betz. No. 1,347,073; July 20; v. 276; p. 466.
Confectionery-machine. E. J. Brach. No. 1,348,081; July 27; v. 276; p. 722.
Connecting-rod. J. Kindervater. No. 1,347,104; July 20; v. 276; p. 471.
Connector. T. Y. and L. R. A. Becker. No. 1,345,982; July 6; v. 276; p. 130.
Contact. T. B. Rider. No. 1,348,052; July 27; v. 276; p. 717.
Container. C. H. Congdon. No. 1,346,298; July 13; v. 276; p. 254.
Container. F. Goertz and R. Whitcomb. No. 1,345,359; July 6; v. 276; p. 6.

Container. F. Goertz and R. Whitcomb. No. 1,345,360; July 6; v. 276; p. 7.
Container and dispensing device. C. J. Rothermel. No. 1,347,231; July 20; v. 276; p. 496.
Container, Collapsible. R. W. Shulters. No. 1,345,511; July 6; v. 276; p. 36.
Container, Collapsible. S. L. Walker and J. M. Laurenson. No. 1,346,731; July 13; v. 276; p. 339.
Container-holder. J. Hula. No. 1,345,857; July 6; v. 276; p. 104.
Container, Toilet-accessory. M. J. Harding. No. 1,346,541; July 13; v. 276; p. 301.
Containers, Sealing-closure for. W. P. White. No. 1,345,722; July 6; v. 276; p. 77.
Containers, Sifter-top for. J. T. Wilcox. No. 1,345,975; July 6; v. 276; p. 128.
Contribution-box, Registering. F. W. Lancaster. No. 1,348,012; July 27; v. 276; p. 708.
Control apparatus. C. C. Whittaker. No. 1,347,880; July 27; v. 276; p. 682.
Control apparatus. T. C. Wurts. No. 1,347,885; July 27; v. 276; p. 683.
Control system. G. Bright, G. H. F. Holy, and H. K. Hardcastle. No. 1,347,890; July 27; v. 276; p. 684.
Control system. R. E. Hellmund. No. 1,347,905; July 27; v. 276; p. 687.
Control system, Selective. A. U. Särnmark. No. 1,347,715; July 27; v. 276; p. 649.
Controller, Automatic. A. McKibben. No. 1,345,383; July 6; v. 276; p. 11.
Convertible chair. J. J. South. No. 1,345,513; July 6; v. 276; p. 36.
Convertible chair. S. Singleterry. No. 1,347,127; July 20; v. 276; p. 475.
Conveyer. J. Raymond, Jr. No. 1,345,634; July 6; v. 276; p. 60.
Conveyer, Ash-. A. Girtanner. No. 1,346,950; July 20; v. 276; p. 441.
Conveyer, Pneumatic. L. C. Vanderlip. No. 1,346,144; July 13; v. 276; p. 223.
Conveying apparatus. E. L. Stuart. No. 1,346,990; July 20; v. 276; p. 449.
Conveying mechanism. A. B. Hazard. No. 1,346,314; July 13; v. 276; p. 257.
Cookers, Baffle-plate device for electric fireless. M. Murphy. No. 1,346,666; July 13; v. 276; p. 326.
Cooking device. I. L. Bayless. No. 1,345,824; July 6; v. 276; p. 97.
Cooking device, Cold-pack. C. S. Kepler. No. 1,345,601; July 6; v. 276; p. 54.
Cooking utensil. R. Pfeffer. No. 1,348,048; July 27; v. 276; p. 716.
Cooking utensil. A. F. Wittekind. No. 1,347,428; July 20; v. 276; p. 535.
Cooking-vessel attachment. H. Ray. No. 1,347,971; July 27; v. 276; p. 700.
Cooking-vessel cover. E. Olson. No. 1,345,457; July 6; v. 276; p. 25.
Cooling system. W. W. Muir. No. 1,346,331; July 13; v. 276; p. 260.
Copy-holder. A. N. Woodruff. No. 1,345,978; July 6; v. 276; p. 129.
Core-box. E. W. Clark. No. 1,347,081; July 20; v. 276; p. 467.
Core-box, Adjustable. E. W. Clark. No. 1,347,080; July 20; v. 276; p. 467.
Corn and callus treating device. H. E. Schindler. No. 1,347,557; July 27; v. 276; p. 617.
Corn gathering or harvesting machine. W. Smolley. No. 1,347,559; July 27; v. 276; p. 618.
Corn-husking cylinder. O. Adams. No. 1,346,931; July 20; v. 276; p. 437.
Corner rack and shelf. N. B. Winter. No. 1,345,977; July 6; v. 276; p. 129.
Corset. C. H. Schopbach. No. 1,347,180; July 20; v. 276; p. 486.
Corset, Maternity-. C. Munter. No. 1,345,620; July 6; v. 276; p. 57.
Cotter-pin extractor. A. Nyhus. No. 1,347,287; July 20; v. 276; p. 507.
Cotton-mixing apparatus. S. Kido. No. 1,346,828; July 20; v. 276; p. 417.
Cotton-picker's sack. A. E. Meyer. No. 1,347,704; July 27; v. 276; p. 647.
Cotton-picking machine. J. B. Tibbs. No. 1,346,282; July 13; v. 276; p. 251.
Cotton-seed meats, Treatment of. C. O. Phillips. No. 1,347,870; July 27; v. 276; p. 680.
Cotton-seed-oil presses, Press-plate for. N. B. Henry. No. 1,348,004; July 27; v. 276; p. 706.
Counter-molding machines, Doffer mechanism for. A. F. Jacquemin. No. 1,346,030; July 6; v. 276; p. 139.
Counter, Store-. F. H. Cole. No. 1,348,087; July 27; v. 276; p. 723.
Countersink, Adjustable. C. O. Bosse. No. 1,346,105; July 13; v. 276; p. 216.
Coupling: *See*—
Car-coupling. Pipe-coupling.
Clothesline-coupling. Shaft-coupling.
Flexible coupling. Universal coupling.
Hose-coupling.
Coupling. C. A. Bailey. No. 1,345,735; July 6; v. 276; p. 80.
Coupling-centering mechanism. H. C. Buhoup. No. 1,345,529; July 6; v. 276; p. 40.
Cradle and bed, Combined. M. F. Flie. No. 1,347,451; July 20; v. 276; p. 540.
Crane. W. S. Vaughan. No. 1,346,068; July 6; v. 276; p. 146.
Crane, Portable jib-. W. H. Purnell and J. A. Butterworth. No. 1,345,881; July 6; v. 276; p. 108.
Cranberries, Device for harvesting. W. F. Loring. No. 1,348,132; July 27; v. 276; p. 732.
Cranes, Running-gear for traveling. B. F. Fitch. No. 1,347,625; July 27; v. 276; p. 631.
Crank-pins and eccentrics and truing-shafts, Means for turning. T. Smith. No. 1,346,271; July 13; v. 276; p. 248.
Crank-pins on engine-shafts, Apparatus for turning. A. Thomas. No. 1,345,415; July 6; v. 276; p. 18.
Crank-shaft. M. J. Schenk. No. 1,347,178; July 20; v. 276; p. 485.
Crate. W. D. Woodruff. No. 1,347,923; July 27; v. 276; p. 690.
Crate, Milk-. D. G. Adair. No. 1,345,979; July 6; v. 276; p. 129.
Crate-press. J. H. Platt. No. 1,345,878; July 6; v. 276; p. 108.
Crown-articulator. L. Cooperman. No. 1,345,433; July 6; v. 276; p. 21.
Crown-setter. S. R. Lewis. No. 1,345,608; July 6; v. 276; p. 55.
Crusher. H. P. Andresen. No. 1,346,871; July 20; v. 276; p. 425.
Crushing-machine. W. G. Stevenson. No. 1,345,715; July 6; v. 276; p. 76.
Crutch and cushion tips therefor. M. Bruyere. No. 1,347,320; July 20; v. 276; p. 514.
Crystal production. R. W. Moore. No. 1,347,350; July 20; v. 276; p. 520.
Cuff-link. A. A. McRae. No. 1,346,039; July 6; v. 276; p. 141.
Cultivator. C. M. Andersen. No. 1,347,926; July 27; v. 276; p. 691.
Cultivator. C. S. Sharp. No. 1,346,512; July 13; v. 276; p. 295.
Cultivator, Tractor-. G. E. Malin. No. 1,347,818; July 27; v. 276; p. 669.
Cultivator, Two-row. J. V. Holstein. No. 1,346,317; July 13; v. 276; p. 258.
Cultivator-wheel adjustment. O. W. Howard. No. 1,346,318; July 13; v. 276; p. 258.
Cultivators, Cotton-chopper attachment for. W. A. Martin and M. P. Roebuck. No. 1,347,646; July 27; v. 276; p. 635
Cup: *See*—
Grease-cup. Oil-cup.
Cups and similar articles, Carton for. S. Bergman. No. 1,346,792; July 13; v. 276; p. 352.
Current-motor. T. H. Walker. No. 1,346,285; July 13; v. 276; p. 251.
Current motor, Alternating-. W. C. Korthals-Altes. No. 1,347,783; July 27; v. 276; p. 663.
Curtain, Automobile panel-. D. G. Townsend. No. 1,345,901; July 6; v. 276; p. 113.
Curtain holder, Automatic vestibule-. C. M. Hoffman and J. Thomisser. No. 1,348,114; July 27; v. 276; p. 729.
Curtain-pole and window-shade bracket, Combined. E. R. Sell. No. 1,347,126; July 20; v. 276; p. 475.
Curtain-pole and window-shade holder. E. Mikolyn. No. 1,346,233; July 13; v. 276; p. 240.
Curtain-rod and shade-roller support. G. E. Alphin. No. 1,345,340; July 6; v. 276; p. 3.
Curtain-rod fixture. G. H. Smith. No. 1,347,525; July 27; v. 276; p. 611.
Cushion for sliding-side cribs. W. B. Foster. No. 1,345,485; July 6; v. 276; p. 31.
Cushion-support. F. W. Bocking. No. 1,345,987; July 6; v. 276; p. 131.
Cuspidor. F. Lipar. No. 1,345,609; July 6; v. 276; p. 55.
Cutlery holder, Dining-. A. Onufryk. No. 1,346,909; July 20; v. 276; p. 433.
Cutlery-renovating machine, Knife-controlling mechanism for. C. H. J. Dilg. No. 1,346,804; July 13; v. 276; p. 354.

Draft-rigging. W. J. Regan. No. 1,346,556; July 13; v. 276; p. 304.
Draft-rigging attachment. G. C. Murray. No. 1,348,141; July 27; v. 276; p. 734.
Drafting-board. S. E. Williams. No. 1,347,426; July 20; v. 276; p. 535.
Drag, Road-. G. H. Allyn. No. 1,347,485; July 27; v. 276; p. 603.
Drag, Road-. J. C. Karr. No. 1,347,336; July 20; v. 276; p. 517.
Drapery-clip. B. H. Meyer. No. 1,345,868; July 6; v. 276; p. 106.
Draw-bar. F. A. Peck and J. E. A. Moore. No. 1,345,899; July 6; v. 276; p. 14.
Draw-board fastener. A. Jaeger. No. 1,348,142; July 27; v. 276; p. 734.
Drawing-board. H. de Clercq. No. 1,346,593; July 13; v. 276; p. 311.
Drawing frames, Adjustable saddle for gill-. W. Holdsworth. No. 1,347,331; July 20; v. 276; p. 516.
Drier: *See*—
Grain-drier.
Drier. S. Waszkiewicz. No. 1,345,523; July 6; v. 276; p. 38.
Dry separator. F. M. Smith. No. 1,346,610; July 13; v. 276; p. 315.
Drying apparatus. F. J. Dow. No. 1,347,473; July 20; v. 276; p. 544.
Drying, mixing, and kneading machine. W. N. Hartshorn. No. 1,345,542; July 6; v. 276; p. 43.
Drill: *See*—
Cigar-drill. Grain-drill.
Drill-bit. W. J. Holland. No. 1,345,854; July 6; v. 276; p. 103.
Drill-head, Rotary. H. G. Johnston. No. 1,348,117; July 27; v. 276; p. 729.
Drill-mounting. R. L. Ambrose. No. 1,345,731; July 6; v. 276; p. 79.
Drills, Machine for forming grooves or flutes in twist-. I. H. Wright. No. 1,346,928; July 20; v. 276; p. 437.
Drills, Mounting for rock-. W. A. Smith. No. 1,347,185; July 20; v. 276; p. 486.
Drilling and oil-well apparatus. R. R. Pollak. No. 1,347,587; July 27; v. 276; p. 624.
Drilling-bit. T. C. Buddington. No. 1,347,774; July 27; v. 276; p. 661.
Drilling bit, Well-. P. G. Midgett. No. 1,346,133; July 13; v. 276; p. 221.
Drilling-machine. W. R. Brown. No. 1,347,614; July 27; v. 276; p. 629.
Drilling-machine. A. Dom. No. 1,347,214; July 20; v. 276; p. 492.
Drilling-machine, Rotary. C. S. Wright. No. 1,347,771; July 27; v. 276; p. 661.
Drinking-fountain. S. R. Curtis. No. 1,346,006; July 6; v. 276; p. 134.
Drinking-fountain. N. F. Green and J. Peterka. No. 1,346,122; July 13; v. 276; p. 219.
Drinking-fountain and faucet, Combination. A. B. Nafziger. No. 1,346,047; July 6; v. 276; p. 142.
Drinking-fountain and feeder for poultry. S. B. Wenger. No. 1,347,425; July 20; v. 276; p. 535.
Driving connection. G. L. S. Kronfeld. No. 1,347,907; July 27; v. 276; p. 687.
Drum, Practice-. H. A. Bower. No. 1,346,588; July 13; v. 276; p. 310.
Drums, Door-locks for revolving. R. F. Settlage. No. 1,346,263; July 13; v. 276; p. 247.
Duplicator. O. Hidalgo. No. 1,347,743; July 27; v. 276; p. 655.
Dustpan. C. A. Hazen. No. 1,346,958; July 20; v. 276; p. 443.

Dustpan. F. J. Morris. No. 1,346,380; July 13; v. 276; p. 269.
Dynamo, Continuous-current. F. Kesselring. No. 1,346,213; July 13; v. 276; p. 236.
Dynamo for lighting and motor ignition. E. F. Girardeau. No. 1,346,821; July 20; v. 276; p. 415.
Ear, Mechanical bone-conductive. J. Prenn. No. 1,346,721; July 13; v. 276; p. 337.
Earth-working machines, Attachment for. L. H. Towner. No. 1,346,432; July 13; v. 276; p. 280.
Educational device. I. Zion. No. 1,346,929; July 20; v. 276; p. 437.
Educational device. I. Zion. No. 1,346,930; July 20; v. 276; p. 437.
Emery, Articulated. H. M. Dawley. No. 1,347,993; July 27; v. 276; p. 704.
Egg-boiling rack. F. J. Vierling, F. R. Bartholomew, and M. H. Smith. No. 1,346,283; July 13; v. 276; p. 251.
Egg-crate filler. I. Perris. No. 1,347,900; July 27; v. 276; p. 688.
Egg-tray C. S. Ewry. No. 1,345,483; July 6; v. 276; p. 31.
Elastic extension device. L. Macheroux. No. 1,345,945; July 6; v. 276; p. 122.
Electric apparatus. H. O. Stephens. No. 1,345,712; July 6; v. 276; p. 75.
Electric-arc furnace. L. Lombardi. No. 1,346,223; July 13; v. 276; p. 238.
Electric-circuit thermostat. J. H. Derby and E. S. Clayton. No. 1,347,735; July 27; v. 276; p. 653.
Electric contact, Adjustable. F. H. Lorking. No. 1,347,391; July 20; v. 276; p. 528.
Electric furnace. E. L. Smalley. No. 1,346,854; July 20; v. 276; p. 422.
Electric heater. C. C. Abbott. No. 1,345,730; July 6; v. 276; p. 79.
Electric heater. W. O. Bunnell and Q. A. Gates. No. 1,346,793; July 13; v. 276; p. 352.
Electric heating device. E. H. Richardson. No. 1,345,696; July 6; v. 276; p. 72.
Electric impulsion-motor. M. E. A. Baule. No. 1,347,002; July 20; v. 276; p. 451.
Electric-incandescent-lighting apparatus. M. Pattay and E. Jaquemot. No. 1,346,671; July 13; v. 276; p. 327.
Electric machine, Dynamo-. A. Kimble. No. 1,345,370; July 6; v. 276; p. 9.
Electric machine, Dynamo-. A. H. Neuland. No. 1,348,037; July 27; v. 276; p. 713.
Electric machines, Brush-rigging for dynamo-. E. F. Andrews and R. E. Acre. No. 1,346,108; July 13; v. 276; p. 216.
Electric machines, Control system for dynamo-. R. E. Hellmund. No. 1,347,903; July 27; v. 276; p. 687.
Electric machinery, Dynamo-. J. H. S. Mawdsley and H. F. Joel, Sr. No. 1,347,647; July 27; v. 276; p. 635.
Electric meter. W. E. Porter. No. 1,345,691; July 6; v. 276; p. 71.
Electric-power system. J. G. Thornburgh. No. 1,345,566; July 6; v. 276; p. 47.
Electric side light. R. S. Giese. No. 1,348,104; July 27; v. 276; p. 727.
Electric steam-iron. S. Kako. No. 1,347,224; July 20; v. 276; p. 494.
Electric switch. M. Guett. No. 1,347,629; July 27; v. 276; p. 632.
Electric switch. E. H. Jacobs. No. 1,347,779; July 27; v. 276; p. 662.
Electric switch. W. J. Newton. No. 1,346,553; July 13; v. 276; p. 304.
Electric switch. G. B. Thomas. No. 1,347,308; July 20; v. 276; p. 512.
Electric switch, Thermo-. A. E. Doman. No. 1,347,686; July 27; v. 276; p. 643.
Electric system. E. P. Larsh. No. 1,347,546; July 27; v. 276; p. 615.
Electrical apparatus. C. M. Petersen and O. J. Boden. No. 1,346,606; July 13; v. 276; p. 314.
Electrical apparatus, Casing. J. Wilkinson. No. 1,347,769; July 27; v. 276; p. 661.
Electrical apparatus, Control device for explosion-proof. C. W. Starker and C. H. Hodgkins. No. 1,347,879; July 27; v. 276; p. 682.
Electrical apparatus, Making cores for. M. Kubo. No. 1,345,786; July 6; v. 276; p. 90.
Electrical appliance. H. P. Hastings and J. J. Dossert. No. 1,345,768; July 6; v. 276; p. 86.
Electrical coil. A. W. Fisher and C. S. Snavely. No. 1,345,484; July 6; v. 276; p. 31.
Electrical condenser. E. A. Bayles and H. Higham. No. 1,346,694; July 13; v. 276; p. 332.
Electrical conductors, Water-tight connection for. R. B. Benjamin. No. 1,345,473; July 6; v. 276; p. 29.
Electrical connection. J. H. George. No. 1,348,128; July 27; v. 276; p. 731.
Electrical connector. M. W. Robertson. No. 1,347,590; July 27; v. 276; p. 624.
Electrical fixture. F. L. Butler. No. 1,347,531; July 27; v. 276; p. 612.
Electrical furnace. R. S. Wile. No. 1,345,976; July 6; v. 276; p. 128.
Electrical indicator. F. W. Temple. No. 1,347,421; July 20; v. 276; p. 534.
Electrical oscillations, Apparatus for propagating and intensifying. J. J. Callaghan. No. 1,347,440; July 20; v. 276; p. 538.
Electrical superheater. S. D. Colvin. No. 1,346,741; July 13; v. 276; p. 341.
Electrical switch. H. R. Stevens and R. L. Rockwell. No. 1,345,899; July 6; v. 276; p. 112.
Electrode for secondary or storage batteries. J. M. Allen. No. 1,347,832; July 27; v. 276; p. 672.
Electrode-holder. R. H. Chadwick. No. 1,347,776; July 27; v. 276; p. 662.
Electrolytic apparatus. W. E. Greenawalt. No. 1,347,088; July 20; v. 276; p. 468.
Electrolytic cell. R. M. Shaw. No. 1,346,849; July 20; v. 276; p. 421.
Electrolytic meter. H. S. Hatfield and G. Hookham. No. 1,346,090; July 6; v. 276; p. 151.
Electrolytic pickling process. J. Coulson. No. 1,347,897; July 27; v. 276; p. 686.
Electromagnet. L. Larsen. No. 1,345,450; July 6; v. 276; p. 24.
Electromechanical propelling and transmitting mechanism. A. F. Clark. No. 1,347,250; July 20; v. 276; p. 500.
Electropneumatic control. G. P. Finnigan. No. 1,346,882; July 20; v. 276; p. 428.
Electrotherapeutic apparatus. J. H. Eastman. No. 1,345,537; July 6; v. 276; p. 41.
Elevator: *See*—
Wood-rod elevator.
Elevator-belt punch. J. A. Packheiser. No. 1,345,395; July 6; v. 276; p. 13.
Elevator-control system. H. C. Randall. No. 1,347,711; July 27; v. 276; p. 648.
Elevator device, Climbing-. J. Hunt. No. 1,348,138; July 27; v. 276; p. 733.
Elevators, Feed-drum for pneumatic. G. and J. Bernert. No. 1,346,293; July 13; v. 276; p. 253.
Elevators, Safety device for. W. J. Springer. No. 1,346,274; July 13; v. 276; p. 249.
Embroidering-machine. J. G. F. Rooker. No. 1,348,054; July 27; v. 276; p. 717.
Embroidering-machines, Shuttle-operating mechanism for. H. Saurer. No. 1,347,232; July 20; v. 276; p. 496.
Emulsions, Making. J. A. De Cew. No. 1,347,734; July 27; v. 276; p. 653.
Enamel, Lacquer. W. F. Doerflinger. No. 1,345,354; July 6; v. 276; p. 6.
Engine: *See*—
Explosive-engine. Quick-combustion engine.
Gas-engine. Rotary engine.
Hydrocarbon-engine. Rotary compressed-air engine.
Internal-combustion engine. Rotary internal-combustion engine.
Internal-combustion rotary engine. Steam turbine-engine.
Oil-burning engine.
Engine construction, Rotary-gas-. G. A. Reynolds. No. 1,345,808; July 6; v. 276; p. 94.
Engine-operation indicator, Marine-. J. McRae. No. 1,345,384; July 6; v. 276; p. 11.
Engine-starter. V. Bendix. No. 1,345,576; July 6; v. 276; p. 49.
Engines and manufacturing same, Sparking-plug for internal-combustion. C. E. Gerbaud. No. 1,347,367; July 20; v. 276; p. 523.
Engines, Carburation device for internal-combustion. W. Morgan. No. 1,347,820; July 27; v. 276; p. 670.
Engines, Charge-forming device for internal-combustion. G. A. Richards. No. 1,345,507; July 6; v. 276; p. 35.
Engines, Cooling system for gas-. H. H. Justice and E. J. O'Brien. No. 1,347,043; July 20; v. 276; p. 460.
Engines, Cylinder for internal-combustion. A. H. R. Fedden and L. F. G. Butler. No. 1,346,535; July 13; v. 276; p. 300.
Engines, &c., Eliminating torsional vibrations in high-speed. F. W. Lanchester. No. 1,346,755; July 13; v. 276; p. 344.
Engines, Fuel-control mechanism for internal-combustion. H. L. Tygard and G. M. Hamilton. No. 1,347,192; July 20; v. 276; p. 488.
Engines, Fuel-economizing device for internal-combustion. W. G. Clayton. No. 1,345,432; July 6; v. 276; p. 21.
Engines, Furnishing explosive mixture to internal-combustion. P. S. Tice. No. 1,348,066; July 27; v. 276; p. 720.
Engines, Making cylinders for internal-combustion. E. E. Allyne. No. 1,347,476; July 20; v. 276; p. 544.
Engines, Means for igniting the charge in internal-combustion. F. and E. Carter. No. 1,345,999; July 6; v. 276; p. 133.
Engines, Piston and piston-rod for internal-combustion. J. C. M. Maclagan. No. 1,346,041; July 6; v. 276; p. 141.
Engines, Piston-cooling device for internal-combustion. W. J. Larson. No. 1,346,407; July 13; v. 276; p. 274.
Engines, Piston for internal-combustion. H. R. Ricardo. No. 1,346,845; July 20; v. 276; p. 420.
Engines, Rotary valve for internal-combustion. C. L. Schwanke. No. 1,346,686; July 13; v. 276; p. 330.
Engines, Starter for internal-combustion. F. E. Fisher. No. 1,346,598; July 13; v. 276; p. 312.

Engines, Temperature-indicating device for cooling systems for internal-combustion/ L. V. Aronson. No. 1,347,317; July 20; v. 276; p. 513.
Engines, Timer for internal-combustion. O. H. Hasselbaum. No. 1,347,370; July 20; v. 276; p. 524.
Engraving-plate holder. J. W. Jenner. No. 1,347,101; July 20; v. 276; p. 471.
Ensilage apparatus, Automatic water-feed for. H. A. Lyon. No. 1,347,392; July 20; v. 276; p. 528.
Ensilage-cutter. F. J. Bullock and W. H. Preston. No. 1,347,493; July 27; v. 276; p. 604.
Envelop. J. Wiski. No. 1,347,609; July 27; v. 276; p. 628.
Envelop, Double. G. M. Stevens. No. 1,347,797; July 27; v. 276; p. 666.
Envelop, Pay-. R. E. Fisher and W. M. York. No. 1,346,372; July 13; v. 276; p. 268.
Envelops and wallets, Card-holder for. A. Bushnell, Jr. No. 1,345,993; July 6; v. 276; p. 132.
Equalizer. J. M. Ellis. No. 1,346,097; July 6; v. 276; p. 152.
Excavating and grading machine. L. A. Krupp. No. 1,347,800; July 27; v. 276; p. 678.
Expander. A. E. Hansen. No. 1,346,957; July 20; v. 276; p. 442.
Expansion-joint. J. A. Bogart, (Reissue.) No. 14,906; July 6; v. 276; p. 153.
Explosive-engine. W. Barber. No. 1,346,805; July 20; v. 276; p. 413.

Steam-generator.
Windmill-operated generator.
Girdle, Foundation-. L. E. Mullin. No. 1,345,800; July 6; v. 276; p. 93.
Glass cylinders, Apparatus for drawing. L. E. Stewart. No. 1,347,131; July 20; v. 276; p. 476.
Glass-furnace. J. R. Scohy. No. 1,347,181; July 20; v. 276; p. 486.
Glass, Internal lock-bait for drawing. J. R. Scohy. (Reissue.) No. 14,911; July 6; v. 276; p. 155.
Glass, Making sheet-. M. J. Owens. No. 1,345,628; July 6; v. 276; p. 59.
Glass, Means for making sheet-. M. J. Owens. No. 1,345,629; July 6; v. 276; p. 59.
Glass-molding machine. H. O. Bisbing. No. 1,347,202; July 20; v. 276; p. 490.
Glass-pane holder. A. Motteau. No. 1,347,706; July 27; v. 276; p. 647.
Glass panel, Imitation beveled. J. A. McAvoy. No. 1,345,792; July 6; v. 276; p. 91.
Glass products, Method and apparatus for the manufacture of pressed-sheet-. F. L. O. Wadsworth. No. 1,346,571; July 13; v. 276; p. 307.
Glass-severing implement. H. M. Brown. No. 1,346,528; July 13; v. 276; p. 298.
Glove and producing same, Knitted. G. Stibbe. No. 1,346,516; July 13; v. 276; p. 296.
Glove and producing same, Knitted. G. Stibbe. No. 1,346,517; July 13; v. 276; p. 296.
Glove-turning machine. D. Baum. No. 1,348,077; July 27; v. 276; p. 722.
Governing and emergency mechanism. D. Cockburn and D. MacNicoll. No. 1,347,208; July 20; v. 276; p. 491.
Governor. W. H. Young. No. 1,346,521; July 13; v. 276; p. 297.
Governor, Fluid-pressure. W. V. Turner. No. 1,346,861; July 20; v. 276; p. 423.
Governors, Means for protecting. R. H. Manson. No. 1,346,228; July 13; v. 276; p. 239.
Grading-machine. E. P. Brown. No. 1,347,008; July 20; v. 276; p. 453.
Gradometer. R. A. Saeger. No. 1,348,055; July 27; v. 276; p. 717.
Grain and hay stacker. J. Habbart. No. 1,346,020; July 6; v. 276; p. 137.
Grain-drier. O. W. Randolph. No. 1,346,335; July 13; v. 276; p. 261.
Grain-drill. A. M. Threewits. No. 1,345,517; July 6; v. 276; p. 37.
Grain-separator. H. E. Behrens. No. 1,346,630; July 13; v. 276; p. 319.
Grain-shocker. G. Innes and J. H. Prall. No. 1,346,542; July 13; v. 276; p. 302.
Grain-shocker. G. Innes and J. H. Prall. No. 1,346,543; July 13; v. 276; p. 302.
Graining. P. A. Gstaldar. No. 1,347,028; July 20; v. 276; p. 457.
Grating. P. H. E. Scherbner. No. 1,346,426; July 13; v. 276; p. 278.
Grating device. S. Santilli. No. 1,346,340; July 13; v. 276; p. 262.
Granular-material and grain purifying machine, Broken-. T. Parkinson. No. 1,348,043; July 27; v. 276; p. 715.
Grease-cup. C. D. Corliss. No. 1,347,472; July 20; v. 276; p. 543.
Grease-cup. S. Dawson. No. 1,345,434; July 6; v. 276; p. 21.
Grease-cup. G. B. Pickop. No. 1,345,953; July 6; v. 276; p. 124.
Grid, Accumulator electrode-. S. Willner. No. 1,347,770; July 27; v. 276; p. 661.
Gridiron. M. A. Ford. No. 1,345,590; July 6; v. 276; p. 52.
Grinder. C. Jackson. No. 1,346,893; July 20; v. 276; p. 430.
Grinder and gummer machine, Combined. G. P. Nabors. No. 1,347,965; July 27; v. 276; p. 698.
Grinder, Lens-. E. D. Tillyer and L. W. Bugbee. No. 1,347,766; July 27; v. 276; p. 660.
Grinding conical rollers, Machinery for. S. G. Wingquist and B. W. Fjellman. No. 1,345,468; July 6; v. 276; p. 28.
Grinding-machine. C. Gabelman. No. 1,345,919; July 6; v. 276; p. 117.
Grinding-machine. F. H. Perry. No. 1,347,656; July 27; v. 276; p. 637.
Grinding-mill. W. G. Stevenson. No. 1,345,714; July 6; v. 276; p. 76.
Grinding-wheel dresser. B. P. Place. No. 1,347,519; July 27; v. 276; p. 609.
Grinding worms, machine for. W. Casnell. No. 1,346,173; July 13; v. 276; p. 228.
Grits-separating machine. J. D. Moore. No. 1,347,114; July 20; v. 276; p. 473.
Ground, Spot-. A. C. Horn. No. 1,347,633; July 27; v. 276; p. 632.
Ground-working implement. R. R. Slipp. No. 1,346,266; July 13; v. 276; p. 247.
Gun. O. V. Payne. No. 1,347,756; July 27; v. 276; p. 658.
Gun. H. F. Rieschick. No. 1,345,551; July 6; v. 276; p. 44.
Gun attachment. O. L. Howe. No. 1,347,509; July 27; v. 276; p. 608.
Gun-barrels, Transport apparatus for demounting and remounting. E. Schneider. No. 1,345,891; July 6; v. 276; p. 111.
Gun-barrels, Transport apparatus for demounting and remounting. E. Schneider. No. 1,345,892; July 6; v. 276; p. 111.
Gun belt, Machine-. V. H. Jennings. No. 1,346,207; July 13; v. 276; p. 235.
Gun belt, Machine-. V. H. Jennings. No. 1,346,208; July 13; v. 276; p. 235.
Gun-brake. E. Schneider. No. 346,560; July 13; v. 276; p. 305.
Gun-carriages, Elastic suspension for wheeled. E. Schneider. No. 1,347,916; July 27; v. 276; p. 689.
Gun for accompanying attacking troops. E. Schneider. No. 1,346,561; July 13; v. 276; p. 306.
Gun for accompanying attacking troops. E. Schneider No. 1,346,562; July 13; v. 276; p. 306.
Gun, Machine-. L. J. Patrick. No. 1,347,753; July 27; v. 276; p. 657.
Gun-sighting device. A. T. Dawson and G. T. Buckham. No. 1,346,303; July 13; v. 276; p. 255.
Gun-trap, Animal. F. E. Davenport. No. 1,347,255; July 20; v. 276; p. 501.
Guns, Apparatus for regulating the firing of. J. L. Routin. No. 1,345,702; July 6; v. 276; p. 73.
Hair-curler. H. Steinacher. No. 1,346,920; July 20; v. 276; p. 435.
Hair foundation. R. and G. Scheanblum. No. 1,347,915; July 27; v. 276; p. 689.
Hair-fringe. M. Muller. No. 1,346,718; July 13; v. 276; p. 286.
Hair-support. B. E. Beadle. No. 1,347,987; July 27; v. 276; p. 703.
Hair-waver. B. A. Sterling. No. 1,347,830; July 27; v. 276; p. 672.
Hairpin. C. R. Nalle. No. 1,347,707; July 27; v. 276; p. 647.
Hammer, Pneumatic. J. Bernhard and A. Meister. No. 1,346,166; July 13; v. 276; p. 227.
Hammer, Rotary. H. M. Plaisted. (Reissue.) No. 14,926; July 27; v. 276; p. 735.
Hammock, Couch-. G. F. Sisbower and L. E. Pittoni. No. 1,346,689; July 13; v. 276; p. 330.
Hand, Artificial. F. C. Beck. No. 1,347,004; July 20; v. 276; p. 452.
Hand-covering. J. N. Reynolds. No. 1,346,683; July 13; v. 276; p. 329.
Handle: *See*—
Saw-handle.
Handle-grip. C. A. Persons. No. 1,345,505; July 6; v. 276; p. 35.

Hangar, Dirigible. G. L. Le Cocq. No. 1,347,815; July 27; v. 276; p. 669.
Hanger: *See*—
Collapsible hanger. Shoe-lace hanger.
Harness. G. A. Bowness. No. 1,345,577; July 6; v. 276; p. 49.
Harrow. M. B. Fernandes, Jr. No. 1,348,100; July 27; v. 276; p. 726.
Harrow. F. E. Sivils. No. 1,345,966; July 6; v. 276; p. 127.
Harvester, Bean-. J. Leck. No. 1,345,936; July 6; v. 275; p. 120.
Harvester, Beet-. W. K. Lewis and D. T. Blevins. No. 1,346,322; July 13; v. 276; p. 259.
Harvester, Beet-. W. B. Smith. No. 1,347,596; July 27; v. 276; p. 625.
Harvester, Corn-. E. G. Barker. No. 1,345,527; July 6; v. 276; p. 39.
Harvesting-machine. E. Baker. No. 1,346,159; July 13; v. 276; p. 225.
Harvesting-machine. W. F. de Brandt. No. 1,346,182; July 13; v. 276; p. 230.
Hat and garment support for foldable seats. F. W. Zeidler and C. Halpern. No. 1,345,729; July 6; v. 276; p. 79.
Hat-bleaching composition. E. J. Stratigos. No. 1,347,721; July 27; v. 276; p. 650.
Hat, Convertible. T. S. Knotts. No. 1,347,338; July 20; v. 276; p. 518.
Hat-fastener. B. Fronek. No. 1,347,267; July 20; v. 276; p. 504.
Hat-linings, Machine for making. G. W. Weiss. No. 1,347,001; July 20; v. 276; p. 451.
Hat-sweatband. J. P. Weis. No. 1,347,528; July 27; v. 276; p. 611.
Hat, Woman's. M. D. McDonald. No. 1,345,547; July 6; v. 276; p. 44.
Haulage system. E. A. Derungs. No. 1,346,447; July 13; v. 276; p. 283.
Hay-carrier. H. S. Nunamaker. No. 1,346,242; July 13; v. 276; p. 242.
Hay-carrier. H. S. Nunamaker. No. 1,346,243; July 13; v. 276; p. 242.
Hay-cocker. G. H. Bennet. No. 1,347,141; July 20; v. 276; p. 478.
Hay-loader. R. A. Crandall. No. 1,348,091; July 27; v. 276; p. 724.
Headlight. A. R. Martin. No. 1,347,394; July 20; v. 276; p. 528.
Headlight. O. Winston. No. 1,346,519; July 13; v. 276; p. 297.
Headlight. O. Winston. No. 1,346,520; July 13; v. 276; p. 297.
Headlight-adjusting device. E. E. Drumm. No. 1,347,537; July 27; v. 276; p. 613.
Headlight attachment, Vehicle. C. B. Rowe and J. Lavercombe. No. 1,347,409; July 20; v. 276; p. 532.
Headlight-dimmer. P. P. Hein. No. 1,346,708; July 13; v. 276; p. 334.
Headlight-lens. A. R. Gibson. No. 1,346,705; July 13; v. 276; p. 334.
Headlights, Automatic director for. R. H. Shivers. No. 1,348,061; July 27; v. 276; p. 719.
Heat-insulating sheet, Composite. D. W. Pye. No. 1,345,693; July 6; v. 276; p. 72.
Heat, Method and apparatus for indicating. L. Hammond. No. 1,345,767; July 6; v. 276; p. 86.
Heater: *See*—
Automobile-heater. Manifold-heater.
Electric heater. Poultry-house heater.
Fuel-heater. Water-heater.
Gas-heater.
Heater. H. Fickersen. No. 1,346,704; July 13; v. 276; p. 334.
Heater and cooker, Gas. J. S. E. Panasevitch. No. 1,345,807; July 6; v. 276; p. 94.
Heater-beds, Means for holding impression-plates upon. C. F. Burroughs. No. 1,346,876; July 20; v. 276; p. 426.
Heater for cooling systems. R. Ellis. No. 1,345,923; July 6; v. 276; p. 117.
Heaters with supply members, Device for clamping fluid-. A. Papini. No. 1,345,396; July 6; v. 276; p. 14.
Heating and cooking apparatus, Domestic. N. Pemberton-Billing. No. 1,345,400; July 6; v. 276; p. 15.
Heating apparatus. J. Good. No. 1,345,361; July 6; v. 276; p. 7.
Heating apparatus, Catalytic. J. Herck. No. 1,347,631; July 27; v. 276; p. 632.
Heating-drum. E. G. Klingbell. No. 1,345,603; July 6; v. 276; p. 54.
Heel, Combination-. F. J. McEwan. No. 1,346,058; July 6; v. 276; p. 141.
Heel manufacture, Machine for use in. J. H. Pope. No. 1,346,248; July 13; v. 276; p. 243.
Heel-nailing machine. G. M. Pettengill. No. 1,345,876; July 6; v. 276; p. 107.
Heel, Shoe-. E. S. Helwitz. No. 1,346,709; July 13; v. 276; p. 334.
Heel, Shoe-. R. W. Padden. No. 1,346,841; July 20; v. 276; p. 419.
Heel, Shoe-. A. Vanblom. No. 1,347,422; July 20; v. 276; p. 534.
Heel, Shoe-. A. Wedein and J. P. Stevens. No. 1,347,883; July 27; v. 276; p. 683.
Heels, Machine for operating on. J. H. Pope. No. 1,346,247; July 13; v. 276; p. 243.
Heels, Repair part or section for. L. Rosenfeld. No. 1,345,886; July 6; v. 276; p. 110.
Helmet, Life-preserver. D. Del Re. No. 1,348,094; July 27; v. 276; p. 725.
Hides and skins, Machine for treating. D. Mercier. No. 1,347,866; July 27; v. 276; p. 679.
High pressures, Apparatus for producing. R. Berrenberg. No. 1,346,165; July 13; v. 276; p. 226.
Hinge. R. W. Hubbard. No. 1,346,029; July 6; v. 276; p. 139.
Hinge. J. H. Way. No. 1,345,524; July 6; v. 276; p. 39.
Hinge, Detachable spring-. P. Klein and H. Humphrey. No. 1,347,386; July 20; v. 276; p. 527.
Hinge support, Hood-. C. W. McKinley. No. 1,346,325; July 13; v. 276; p. 259.
Hitch, Safety tractor-. D. F. Londt. No. 1,347,346; July 20; v. 276; p. 519.
Hoe, Machine-. R. R. Slipp. No. 1,346,265; July 13; v. 276; p. 247.
Hog-box. W. A. D'Egilbert and B. Garland. No. 1,348,093; July 27; v. 276; p. 725.
Hoist. E. Y. Moore. No. 1,348,034; July 27; v. 276; p. 713.
Hoist, Electric. S. H. Libby. No 1,347,785; July 27; v. 276; p. 663.
Hoist, Electric. F. L. Stone. No. 1,347,308; July 20; v. 276; p. 511.
Holddown appliance. R. B. Stipes and J. De Frain. No. 1,346,387; July 13; v. 276; p. 270.
Hole-closure. B. D. Horton. No. 1,345,489; July 6; v. 276; p. 32.
Hook: *See*—
Brassière-hook. Draft-hook.
Hook or stud. C. Munter. No. 1,345,621; July 6; v. 276; p. 57.
Hopper. T. F. Fehrle. No. 1,346,310; July 13; v. 276; p. 258.
Horseshoe. T. S. Field. No. 1,347,021; July 20; v. 276; p. 455.
Horseshoe. A. Haden. No. 1,347,630; July 27; v. 276; p. 632.
Hose connection to nipples. E. C. Mitchell. No. 1,346,330; July 13; v. 276; p. 260.
Hose-coupling. E. N. Roth. No. 1,346,424; July 13; v. 276; p. 278.
Hose-coupling. E. N. Roth. No. 1,346,425; July 13; v. 276; p. 278.
Hose-coupling. E. A. Russell and S. P. Harriman. No. 1,346,421; July 13; v. 276; p. 277.
Hose-coupling. E. A. Russell and S. P. Harriman. No. 1,346,422; July 13; v. 276; p. 277.
Hose-coupling. E. A. Russell and S. P. Harriman. No. 1,346,423; July 13; v. 276; p. 278.
Hose-supporter. T. F. Hancock. No. 1,346,648; July 13; v. 276; p. 323.
Hose-supporter. A. D. Peralta. No. 1,348,045; July 27; v. 276; p. 715.
Hot-chamber furnace, Double-. O. A. Colby. No. 1,347,696; July 27; v. 276; p. 685.
House: *See*—
Lamp-house.

Looms, Stop-motion for. P. A. Millis. No. 1,347,395; July 20; v. 276; p. 528.
Looms, Weft-replenishing mechanism for. F. A. Kueny. No. 1,347,700; July 27; v. 276; p. 646.
Looms, Weft-spool changer for weaving-. A. G. Koechlin. No. 1,346,095; July 6; v. 276; p. 152.
Low-pressure gage. J. E. Shrader. No. 1,346,427; July 13; v. 276; p. 279.
Lubricating system. Splash. E. B. Cushman. No. 1,347,685; July 27; v. 276; p. 643.
Lubricator: *See*—
Sight-feed lubricator.
Lubricating mechanism. L. B. Edwards. No. 1,347,019; July 20; v. 276; p. 455.
Luminous marking device. C. E. White. No. 1,346,360; July 13; v. 276; p. 266.
Lunch-box. F. Lewis. No. 1,346,220; July 13; v. 276; p. 237.
Machine-tools, Operating device for the turrets of. E. C. Head. No. 1,345,770; July 6; v. 276; p. 87.
Magnesium from compounds and mixtures of magnesium and calcium carbonates. H. W. C. Annable. No. 1,347,610; July 27; v. 276; p. 628.
Mail-bag catcher. J. M. Williams and V. E. Smith. No. 1,348,071; July 27; v. 276; p. 721.
Mail-box signal device. J. H. Runkle, Jr. No. 1,346,789; July 13; v. 276; p. 351.
Mail catching and delivering apparatus. A. Sussilin. No. 1,347,418; July 20; v. 276; p. 533.
Mail-handling apparatus. T. Grubb. No. 1,346,018; July 6; v. 276; p. 136.
Mail-marking machine and postage-meter. A. H. Pitney. (Reissue.) No. 14,916; July 13; v. 276; p. 355.
Mailing device. S. A. Markoff. No. 1,346,502; July 13; v. 276; p. 294.
Mailing-frame. F. C. Greble. No. 1,347,269; July 20; v. 276; p. 504.
Manicuring device. W. Foggle. No. 1,345,918; July 6; v. 276; p. 116.
Manifold-heater. F. D. Goodlake. No. 1,346,745; July 13; v. 276; p. 342.

Mantle-ring-forming machine. H. J. Green. No. 1,345,845; July 6; v. 276; p. 101.
Manure and straw spreader, Combination. H. L. Litchfield. No. 1,347,583; July 27; v. 276; p. 623.
Manure loader and spreader, Combined. H. H. Varland. No. 1,346,433; July 13; v. 276; p. 280.
Margarin, Crystallising. A. C. A. Zeuthen and M. Larsen. No. 1,345,657; July 6; v. 276; p. 64.
Mat: *See*—
Breach-mat. Rotary mat.
Match-boxing machine. C. W. Van Vleet. No. 1,345,420; July 6; v. 276; p. 18.
Match-scratcher. W. P. Hall. No. 1,347,948; July 27; v. 276; p. 695.
Mathematical instrument. J. Puring. No. 1,346,250; July 13; v. 276; p. 243.
Matter, Composition of. C. L. Gebauer. No. 1,346,192; July 13; v. 276; p. 232.
Mattress-guard. M. Winstein. No. 1,346,579; July 13; v. 276; p. 309.
Mattress, Hospital bed-. G. H. Amey. No. 1,347,666; July 27; v. 276; p. 639.
Measure. J. D. Lewis. No. 1,347,465; July 20; v. 276; p. 542.
Measuring apparatus, Tip-. B. D. Bohanon. No. 1,346,167; July 13; v. 276; p. 227.
Measuring instrument. H. F. Gallagher. No. 1,346,646; July 13; v. 276; p. 322.
Measuring instrument, Fluid-pressure-. R. J. Nash and G. H. Alexander. No. 1,345,870; July 6; v. 276; p. 106.
Measuring instrument, Thrust-. C. Macmillan. No. 1,347,348; July 20; v. 276; p. 520.
Measuring machine, Cloth-. J. T. Tullis. No. 1,345,811; July 6; v. 276; p. 95.
Measuring ohmic resistance of liquids and solutions, Apparatus for. T. H. Reardon. No. 1,346,057; July 6; v. 276; p. 144.
Measuring the flow of liquids, Apparatus for. C. Brown. No. 1,347,143; July 20; v. 276; p. 479.
Meat-chopping machine. G. R. Napier. No. 1,346,096; July 6; v. 276; p. 152.
Medicine. U. Matsuura. No. 1,346,132; July 13; v. 276; p. 221.
Memorandum device. R. J. Bell. No. 1,346,479; July 13; v. 276; p. 289.
Mercerization. S. M. Jones. No. 1,346,802; July 13; v. 276; p. 354.
Mercerization. S. M. Jones. No. 1,346,803; July 13; v. 276; p. 354.
Mercuroamino combinations, Producing. A. Eckmann. No. 1,347,083; July 20; v. 276; p. 467.
Mercury-manometer. J. E. Shrader. No. 1,346,428; July 13; v. 276; p. 279.
Metal articles, Apparatus for producing pressed. A. Grob. No. 1,345,594; July 6; v. 276; p. 53.
Metal, Drawing refractory. J. Hisamoto. No. 1,345,441; July 6; v. 276; p. 22.
Metal from ores, Apparatus for extracting. H. H. Godfrey. No. 1,347,026; July 20; v. 276; p. 456.
Metal, Method of and apparatus for rolling. J. W. Shepherdson. No. 1,347,917; July 27; v. 276; p. 689.
Metal, Producing prints on. P. V. Snow. No. 1,346,140; July 13; v. 276; p. 222.
Metal ribbon-leaf, Tool for applying. H. M. Bir. No. 1,348,079; July 27; v. 276; p. 722.
Metal, Shaping and tempering. T. J. Fay. No. 1,346,946; July 20; v. 276; p. 440.
Metal sheets having perforated fibrous layers, apparatus for producing protected. J. Hamill. No. 1,347,852; July 27; v. 276; p. 677.
Metal surfaces, Decorating. K. Warga. No. 1,346,475; July 13; v. 276; p. 288.
Metal wheel. M. Lachman. No. 1,346,829; July 20; v. 276; p. 417.
Metal wheel. R. S. Smith. No. 1,347,183; July 20; v. 276; p. 486.
Metal-working machine. S. M. W. Hanson. No. 1,346,822; July 20; v. 276; p. 416.
Metal-working machines, Toothed change-gear for driving. R. A. Kempin. No. 1,345,497; July 6; v. 276; p. 33.
Metals, Device for shearing and cutting. G. A. Richardson and A. Mercier. No. 1,347,912; July 27; v. 276; p. 688.
Metals from pulverised material, Apparatus for separating or concentrating fine. G. Clement. No. 1,345,835; July 6; v. 276; p. 99.
Metals, Treating. R. H. Bulley. No. 1,347,838; July 27; v. 276; p. 673.
Metals, Treating. W. B. Ruder. No. 1,346,062; July 6; v. 276; p. 145.
Metallurgical and other purposes, Apparatus for. H. B. Hovland. No. 1,345,596; July 6; v. 276; p. 53.
Metallurgical furnace. S. M. Howell. (Reissue.) No. 14,914; July 13; v. 276; p. 355.

Ovens, Valve for coke-. W. E. Roberts. No. 1,347,056; July 20; v. 276; p. 462.
Overalls. A. Hosner. No. 1,345,779; July 6; v. 276; p. 89.
Overhead carriers, Track for. P. M. Hassler. No. 1,346,313; July 13; v. 276; p. 257.
Overhead transit apparatus. O. Bartlett and H. Fryer. No. 1,347,482; July 20; v. 276; p. 546.
Oxyaldehydes and their ethers, Manufacture of. A. Weiss. No. 1,345,649; July 6; v. 276; p. 62.
Package-fastener. W. D. La Batt. No. 1,347,861; July 27; v. 276; p. 679.
Packing apparatus. A. R. Treichel and E. J. Brock. No. 1,346,616; July 13; v. 276; p. 316.
Packing-box. R. L. Lemon. No. 1,346,661; July 13; v. 276; p. 325.
Packing-case. L. W. Hughes. No. 1,345,856; July 6; v. 276; p. 103.
Packing-frame. G. T. Mallette. No. 1,347,643; July 27; v. 276; p. 634.
Packing, Lubricating-. H. A. Lacerda. No. 1,347,388; July 20; v. 276; p. 527.
Packing, Piston-. M. P. Bloom. No. 1,346,806; July 20; v. 276; p. 413.
Packing-ring. E. R. Norman. No. 1,345,804; July 6; v. 276; p. 94.
Pad: *See*—
Writing-pad.
Padlock-seal holder. T. Murphy. No. 1,346,414; July 13; v. 276; p. 276.
Pail, Dinner-. R. B. Kelso. No. 1,346,034; July 6; v. 276; p. 140.
Pails, Guard for metal. J. C. Wright. No. 1,347,357; July 20; v. 276; p. 521.
Paint. G. C. Watson. No. 1,347,311; July 20; v. 276; p. 512.
Paint composition. K. Koivisto. No. 1,347,387; July 20; v. 276; p. 527.
Paint for leather, Composition. J. Richard. No. 1,346,846; July 20; v. 276; p. 420.
Paint-pigment, Mineral. N. A. Thompson. No. 1,347,191; July 20; v. 276; p. 488.
Paintings, maps, wall-papers with relievo-patterns, Manufacturing reproductions of. H. Bogaerts. No. 1,346,807; July 20; v. 276; p. 413.
Pan: *See*—
Bake-pan.
Pan-lifter. R. J. Garison. No. 1,346,820; July 20; v. 276; p. 415.
Panic-bolt mechanism. A. A. Page. No. 1,346,670; July 13; v. 276; p. 327.
Pantograph. G. Gillespie. No. 1,347,695; July 27; v. 276; p. 645.
Paper and producing same, Waterproof. A. L. Clapp. No. 1,345,476; July 6; v. 276; p. 29.
Paper bag. F. R. Skinner. No. 1,346,852; July 20; v. 276; p. 421.
Paper box. H. V. Edington. No. 1,347,899; July 27; v. 276; p. 686.
Paper boxes, Machine for making. A. W. Harris. No. 1,347,853; July 27; v. 276; p. 677.
Paper-cutting machine. J. H. Downie. No. 1,347,536; July 27; v. 276; p. 613.
Paper-hanging implement, Wall-. P. Germaszewski. No. 1,346,647; July 13; v. 276; p. 322.
Paper-making machines, Driving mechanism for. B. D. Coppage. No. 1,345,479; July 6; v. 276; p. 30.
Paper or paper-board and making same. F. B. Davidson. No. 1,347,619; July 27; v. 276; p. 630.
Paper-pulp, Treating straw for making. E. E. Werner. No. 1,347,979; July 27; v. 276; p. 701.
Paper receptacle. J. W. Upp. No. 1,347,309; July 20; v. 276; p. 512.
Paper receptacles, Device for making. D. J. Jennings. No. 1,346,827; July 20; v. 276; p. 417.
Paper-stock, Machine for saturating. E. J. Cady. No. 1,345,747; July 6; v. 276; p. 82.
Paper-weight. J. B. Sumner. No. 1,347,599; July 27; v. 276; p. 626.
Parachute. E. R. Calthrop. No. 1,345,582; July 6; v. 276; p. 50.
Parachute. J. Chytracek. No. 1,345,533; July 6; v. 276; p. 41.
Parachute-flare. H. E. S. Holt. No. 1,346,454; July 13; v. 276; p. 284.
Paraffin-coating machine. F. P. Vavra. No. 1,345,720; July 6; v. 276; p. 77.
Paraffin, Machine for coating blanks with. F. P. Vavra. No. 1,345,719; July 6; v. 276; p. 77.

Paralleling device. L. J. Weinstein. No. 1,345,815; July 6; v. 276; p. 96.
Paring-knife gage. A. B. Lee. No. 1,346,321; July 13; v. 276; p. 258.
Partitions, ceilings, &c., Structure for. M. H. Jester. No. 1,347,009; July 27; v. 276; p. 707.
Pavement. E. Henry. No. 1,347,855; July 27; v. 276; p. 677.
Pavements, Making monolithic. A. J. Parrish. No. 1,347,654; July 27; v. 276; p. 636.
Pawl and ratchet mechanism. A. E. Rhoades. No. 1,347,661; July 27; v. 276; p. 638.
Peat for fuel and apparatus therefor, Treatment of. K. E. Edgeworth. No. 1,347,940; July 27; v. 276; p. 693.
Pedal extension. F. L. Williams. No. 1,346,361; July 13; v. 276; p. 266.
Peeler, Vegetable-. J. H. Hamlin. No. 1,347,091; July 20; v. 276; p. 469.
Peeling attachment, Fruit and vegetable. A. Olevin. No. 1,347,288; July 20; v. 276; p. 508.
Peeling tomatoes, Machine for. C. Kirino. No. 1,347,385; July 20; v. 276; p. 527.
Pen and pencil clip. G. F. Hahn. No. 1,347,090; July 20; v. 276; p. 469.
Pen attachment, Fountain-. C. Schwarts. No. 1,346,982; July 20; v. 276; p. 448.
Pen, Fountain-. P. E. Wirt. No. 1,347,800; July 27; v. 276; p. 666.
Pen or pencil attachment. A. J. Sanders. No. 1,345,962; July 6; v. 276; p. 126.
Pen or pencil clip. G. Woodhouse. No. 1,346,393; July 13; v. 276; p. 271.
Pen, Self-filling fountain-. T. A. Dickinson. No. 1,346,184; July 13; v. 276; p. 231.
Pens, Retarded device for fountain-. W. T. Fitzpatrick. No. 1,347,901; July 27; v. 276; p. 686.
Penwiper. V. G. Jasper. No. 1,347,164; July 20; v. 276; p. 483.
Pencil. W. K. Holmes. No. 1,346,711; July 13; v. 276; p. 335.
Pencil-clip and spectacle-holder, Combined. W. B. White. No. 1,346,777; July 13; v. 276; p. 348.
Pencil, Magazine-. H. P. Fairchild. No. 1,345,436; July 6; v. 276; p. 21.
Pegging-machine. J. Larsen. No. 1,346,715; July 13; v. 276; p. 336.
Perambulator. A. B. Leith. No. 1,347,169; July 20; v. 276; p. 484.
Perch, Antivermin-. M. F. Beebe. No. 1,347,930; July 27; v. 276; p. 692.
Perforating-machine. F. M. Laserson. No. 1,346,217; July 13; v. 276; p. 236.
Perpendicularity-indicator. H. Jantsch and W. E. Guldager. No. 1,345,597; July 6; v. 276; p. 53.
Petroleum, Apparatus for cracking. H. W. Jones. No. 1,347,543; July 27; v. 276; p. 614.
Petroleum, Distilling. P. M. Biddison and H. T. Boyd. No. 1,345,740; July 6; v. 276; p. 80.
Petroleum products, Means for and process of filtering. L. M. Bowman. No. 1,347,932; July 27; v. 276; p. 692.
Phenolic condensation product, Producing a. L. V. Redman, A. J. Weith, and F. P. Brock. No. 1,345,694; July 6; v. 276; p. 72.
Phenolic condensation products from discoloration after preserving, Preserving in fusible. L. V. Redman, A. J. Weith, and F. P. Brock. No. 1,345,695; July 6; v. 276; p. 72.
Phonograph, Automatic. C. M. Heck. No. 1,347,096; July 20; v. 276; p. 470.
Phonograph-brake. A. E. Parnall. No. 1,345,397; July 6; v. 276; p. 14.
Photograph-cleaning device. A. Lomax. No. 1,346,662; July 13; v. 276; p. 325.
Phonograph-driving mechanism. O. E. Kellum and S. A. Murdock. No. 1,346,376; July 13; v. 276; p. 268.
Phonograph sound-box. A. Rogati and L. Aronne. No. 1,346,685; July 13; v. 276; p. 329.
Phonograph sound-box. C. H. Shaw. No. 1,347,059; July 20; v. 276; p. 463.
Phonograph-springs, Fastening device for. G. T. Cherington. No. 1,347,079; July 20; v. 276; p. 467.
Phonographs, Turntable for. J. G. Merriam. No. 1,347,113; July 20; v. 276; p. 473.
Phonographic-record-album signature. M. Willinger. No. 1,345,724; July 6; v. 276; p. 78.
Photographer's developing-rack. B. R. Day. No. 1,347,620; July 27; v. 276; p. 630.
Photographic apparatus. G. N. Pifer. No. 1,347,824; July 27; v. 276; p. 671.
Photographic finders, Masking attachment for. G. R. Caley. No. 1,347,681; July 27; v. 276; p. 642.
Photographic objective. L. C. Bishop. No. 1,347,673; July 27; v. 276; p. 640.
Photographic projection apparatus. A. Konieczny. No. 1,346,319; July 13; v. 276; p. 258.
Piano, Keyboard for practicing and teaching the playing of the. H. S. Wilder. No. 1,347,068; July 20; v. 276; p. 465.
Piano-player, Pneumatic. C. E. Peterson. No. 1,346,246; July 13; v. 276; p. 242.
Piano-players, Pneumatic and connection for pneumatic. W. Lane. No. 1,346,900; July 20; v. 276; p. 431.
Picker: *See*—
Stem-picker.
Picture apparatus, Motion-. B. P. De Vault. No. 1,347,326; July 20; v. 276; p. 515.
Picture apparatus, Panoramic-motion-. T. A. Killiman. No. 1,347,103; July 20; v. 276; p. 471.
Picture film, Motion-. O. A. Owen. No. 1,347,053; July 20; v. 276; p. 462.
Picture-film reel, Motion-. M. F. Walker. No. 1,345,813; July 6; v. 276; p. 95.
Picture machine, Motion-. J. Darby. No. 1,346,880; July 20; v. 276; p. 427.
Picture machine, Motion-. I. Marks. No. 1,345,793; July 6; v. 276; p. 91.
Picture machine, Motion-. A. J. Roderick. No. 1,347,875; July 27; v. 276; p. 681.
Picture machines, Reel-holder for moving-. J. H. Kochobo. No. 1,347,056; July 27; v. 276; p. 697.
Picture-screen. J. M. Shay. No. 1,347,761; July 27; v. 276; p. 650.
Picture theater, Moving-. E. W. Van Fleet. No. 1,348,069; July 27; v. 276; p. 720.
Pictures, Changing. C. W. Saalburg. No. 1,347,793; July 27; v. 276; p. 665.
Pictures, Plate-holder for making changeable. C. W. Saalburg. No. 1,347,794; July 27; v. 276; p. 665.
Pile, Plastic. J. Lindeman. No. 1,346,222; July 13; v. 276; p. 238.
Piles in situ, Construction of ferroconcrete. A. G. Botinoff. No. 1,347,973; July 27; v. 276; p. 700.
Piling, Method and apparatus for sinking. E. F. Estes. No. 1,347,688; July 27; v. 276; p. 644.
Pin-setting mechanism. A. N. Olsen. No. 1,347,821; July 27; v. 276; p. 670.
Pins, Machine for carding safety-. J. F. Haefele. No. 1,347,851; July 27; v. 276; p. 676.

Ships and boats, Propelling and draft-reducing mechanism for. C. Driscoll. No. 1,347,148; July 20; v. 276; p. 480.
Ships, Construction of. G. V. Montarull. No. 1,346,760; July 13; v. 276; p. 345.
Ships, Torpedo-net for. C. F. Dathan. No. 1,347,363; July 20; v. 276; p. 523.
Shirt attachment. E. T. Whiter. No. 1,346,733; July 13; v. 276; p. 339.
Shock-absorber. W. D. Brown. No. 1,346,739; July 13; v. 276; p. 340.
Shock-absorber. C. A. Wiberg. No. 1,347,138; July 20; v. 276; p. 478.
Shock-absorber and dynamometer for power transmissions. A. J. Kloneck. No. 1,346,546; July 13; v. 276; p. 302.
Shock-absorber, Automobile. J. V. Dawson. No. 1,347,939; July 27; v. 276; p. 693.
Shock-absorbing mechanism, Friction. J. F. O'Connor. No. 1,345,393; July 6; v. 276; p. 13.
Shock-former. A. R. Peterson. No. 1,348,046; July 27; v. 276; p. 715.
Shoe. E. W. Dunbar. No. 1,348,136; July 27; v. 276; p. 733.
Shoe. A. J. Schneider. No. 1,345,407; July 6; v. 276; p. 16.
Shoe. G. E. Warren. No. 1,346,146; July 13; v. 276; p. 223.
Shoe attachment. P. Hang. No. 1,346,019; July 6; v. 276; p. 137.

Shoe-form. J. F. Collins and L. B. Weston. No. 1,346,296; July 13; v. 276; p. 253.
Shoe-lace hanger. R. M. Kempf. No. 1,347,277; July 20; v. 276; p. 506.
Shoe-protector. O. W. Peters. No. 1,345,875; July 6; v. 276; p. 107.
Shoe-support. V. Di Maggio. No. 1,346,008; July 6; v. 276; p. 134.
Shoe-tip-measuring mechanism. O. Ashton. No. 1,346,156; July 13; v. 276; p. 225.
Shoes, Making casing-. J. J. Larkin. No. 1,347,013; July 27; v. 276; p. 708.
Shot, Collapsible sling-. J. Smithwick. No. 1,345,561; July 6; v. 276; p. 46.
Shot, Sling-. R. L. Jones. No. 1,346,754; July 13; v. 276; p. 344.
Shovel: *See*—
Mine-shovel.
Shovel attachment. J. Zaokipny. No. 1,346,870; July 20; v. 276; p. 425.
Shovels, Bucket-lathe for. W. J. Newman. No. 1,347,967; July 27; v. 276; p. 699.
Show-case, Adjustable. A. O. Johnson. No. 1,345,367; July 6; v. 276; p. 8.
Shuttle. J. McCann. No. 1,346,037; July 6; v. 276; p. 140.
Shuttle. P. Spencer. No. 1,345,898; July 6; v. 276; p. 112.
Sieve. S. L. Bateman. No. 1,347,489; July 27; v. 276; p. 604.
Sifter, Dustless ash-. C. G. Fette. No. 1,347,151; July 20; v. 276; p. 480.
Sifter, Flour-. J. Tonstad and H. Finsness. No. 1,347,064; July 20; v. 276; p. 464.
Sight-feed lubricator. W. W. Douglas and S. L. Bailey. No. 1,346,942; July 20; v. 276; p. 440.
Sign. J. W. Stonehouse. No. 1,348,065; July 27; v. 276; p. 710.
Sight-gage and valve, Combined. M. H Shoenberg. No. 1,346,725; July 13; v. 276; p. 337.

Tool or work holding device. W. J. Burger and M. E. Lange. No. 1,346,295; July 13; v. 276; p. 253.
Tool, Percussion-. A. Schinkes. No. 1,346,341; July 13; v. 276; p. 262.
Tool, Piston-grooving. C. Muller. No. 1,346,838; July 20; v. 276; p. 419.
Tool, Pneumatic. M. D. Karles. No. 1,345,495; July 6; v. 276; p. 33.
Tool-post. P. M. Bedard. No. 1,347,988; July 27; v. 276; p. 703.
Tool, Riveting-. S. R. Nichols. No. 1,348,040; July 27; v. 276; p. 714.
Tool, Valve-grinding. E. L. Beardsley. No. 1,347,243; July 20; v. 276; p. 498.
Tool, Valve-grinding. C. Gieser and G. Shaffer. No. 1,346,783; July 13; v. 276; p. 350.
Tool, Valve-stem. H. J. Wilgus. No. 1,345,651; July 6; v. 276; p. 63.
Tool, Welder's. R. O. Williams. No. 1,345,817; July 6; v. 276; p. 96.
Tool, Well-boring. S. Toth. No. 1,347,469; July 20; v. 276; p. 543.
Tool, Wire-twisting. J. McDonald. No. 1,347,282; July 20; v. 276; p. 507.
Tools, Holder for drilling and riveting. E. S. Astin. No. 1,348,074; July 27; v. 276; p. 721.
Tooth and making same, Artificial. E. P. Off. No. 1,348,041; July 27; v. 276; p. 714.
Toothbrush. J. J. Fitz-Gibbon. No. 1,346,536; July 13; v. 276; p. 300.
Toothbrush, Folding. C. W. Lloyd. No. 1,345,939; July 6; v. 276; p. 121.
Torpedo-controlling mechanism. W. G. Shelton. No. 1,346,264; July 13; v. 276; p. 247.
Torpedo-defense. E. Nazzareno. No. 1,345,623; July 6; v. 276; p. 58.
Torpedo-director. A. del Solar. No. 1,346,273; July 13; v. 276; p. 249.
Torpedo-trap. V. H. Masters and M. G. Shoop. No. 1,346,551; July 13; v. 276; p. 303.
Torpedoes, Emergency launching system for. J. E. Hammond, Jr. No. 1,347,092; July 20; v. 276; p. 469.
Towboat, Screw-propelled chambered-stern. T. R. Tarn. No. 1,346,279; July 13; v. 276; p. 250.
Towel Paper. A. Ek. No. 1,347,020; July 20; v. 276; p. 455.
Tower-spirals, Machine for forming clay. B. M. Hood. No. 1,346,786; July 13; v. 276; p. 351.
Toy G. G. Beithon. No. 1,345,348; July 6; v. 276; p. 4.
Toy. I. Grgic. No. 1,347,696; July 27; v. 276; p. 645.
Toy. K. M. Kinnard. No. 1,347,384; July 20; v. 276; p. 526.
Toy. A. Peden. No. 1,346,053; July 6; v. 276; p. 144.
Toy. J. Wietecha. No. 1,347,238; July 20; v. 276; p. 497.
Toy aeroplane. P. T. W. Hale. No. 1,346,956; July 20; v. 276; p. 442.
Toy aeroplane. E. J. and H. T. Kingsbury. No. 1,347,814; July 27; v. 276; p. 668.
Toy amusement device, Paper-. A. Hubner. No. 1,347,042; July 20; v. 276; p. 460.
Toy and educational device, Constructional. F. P. Franklin. No. 1,347,808; July 27; v. 276; p. 668.
Toy and savings-bank or collecting-box, Combined. R. E. Starkie. No. 1,345,414; July 6; v. 276; p. 17.
Toy balloons, Machine for forming rolls on. H. R. Gill. No. 1,346,706; July 13; v. 276; p. 334.
Toy book. M. Goodman. No. 1,346,017; July 6; v. 276; p. 136.
Toy firearm. C. L. Allen. No. 1,347,433; July 20; v. 276; p. 536.
Toy fort. H. E. Coates. No. 1,348,086; July 27; v. 276; p. 723.
Toy, Jumping. A. Sandor. No. 1,347,663; July 27; v. 276; p. 638.
Toy pistol. A. F. Carlin. No. 1,346,938; July 20; v. 276; p. 439.
Toy semaphore. E. A. Caziarc. No. 1,347,682; July 27; v. 276; p. 642.
Toy swinging chair. C. L. Wecht. No. 1,346,620; July 13; v. 276; p. 317.
Toy vehicle, Equestrian. I. A. Burnett. No. 1,345,578; July 6; v. 276; p. 49.
Track, Overhead-carrier. P. M. Hassler and A. H. Neller. No. 1,345,851; July 6; v. 276; p. 102.
Tractor. E. Fials. No. 1,346,644; July 13; v. 276; p. 322.
Tractor. F. A. Frogh. No. 1,347,502; July 27; v. 276; p. 606.
Tractor. R. B. Hartsough. No. 1,348,003; July 27; v. 276; p. 706.
Tractor. J. M. Howe. No. 1,347,163; July 20; v. 276; p. 483.
Tractor. H. J. Sauvage. No. 1,346,915; July 20; v. 276; p. 434.
Tractor. J. H. Sissel. No. 1,346,771; July 13; v. 276; p. 347.
Tractor. M. E. Stockwell. No. 1,347,468; July 20; v. 276; p. 543.
Tractor, Convertible cultivator-. E. B. McCartney. No. 1,345,498; July 6; v. 276; p. 34.
Tractor, Farm-. T. E. Stark. No. 1,347,526; July 27; v. 276; p. 611.
Tractor, Heavy motor-. R. Bernat. No. 1,347,244; July 20; v. 276; p. 498.
Tractor-shoe-dirt eliminator. E. Erik. No. 1,346,186; July 13; v. 276; p. 231.
Tractor-wheel. H. Vass. No. 1,346,145; July 13; v. 276; p. 223.
Tractor-wheel. F. W. Whitaker. No. 1,348,070; July 27; v. 276; p. 720.
Tractors, Draft-rigging for. D. W. Evans. No. 1,347,448; July 20; v. 276; p. 539.
Tractors, Transmission mechanism for. H. Ford. No. 1,347,690; July 27; v. 276; p. 644.
Trailer. S. B. Winn. No. 1,346,927; July 20; v. 276; p. 437.
Train-control system. H. Rowntree. No. 1,347,523; July 27; v. 276; p. 610.
Train controlling and stopping mechanism, Automatic. F. C. Williams. No. 1,345,816; July 6; v. 276; p. 96.
Train, Road-. E. Rimailho. No. 1,346,723; July 13; v. 276; p. 337.
Train-stop mechanism, Automatic or safety. F. A. Diodato. No. 1,345,753; July 6; v. 276; p. 83.
Trains, Automatic mechanism for stopping. S. P. Johnson. No. 1,345,599; July 6; v. 276; p. 54.
Trains, Device for automatically announcing orders and dangers to moving. F. R. Ellsondo. No. 1,347,538; July 27; v. 276; p. 618.
Trains or cars, Device for stopping. H. J. Derby. No. 1,347,996; July 27; v. 276; p. 705.
Transferring device. C. F. Phanse. No. 1,345,950; July 6; v. 276; p. 123.
Transformer for use with rotary converters. J. F. Peters. No. 1,347,910; July 27; v. 276; p. 688.

Transmission mechanism. H. T. Herr. No. 1,346,888; July 20; v. 276; p. 429.
Transporting and elevating apparatus. C. Mascart. No. 1,346,454; July 6; v. 276; p. 25.

Valve-actuating mechanism. W. R. Ellis. No. 1,346,401; July 13; v. 276; p. 273.
Valve, Air-. G. F. Muth. No. 1,348,123; July 27; v. 276; p. 730.
Valve and means for cooling same. A. O. Dady. No. 1,345,535; July 6; v. 276; p. 41.
Valve, Automatic. R. Terry. No. 1,346,921; July 20; v. 276; p. 435.
Valve, Automatic safety gas-. D. C. Carver. No. 1,346,000; July 6; v. 276; p. 133.
Valve, Automatic trough-. F. Striegler. No. 1,347,353; July 20; v. 276; p. 521.
Valve, Bottle-. G. Jackson. No. 1,348,116; July 27; v. 276; p. 729.
Valve, Carburetor-needle. V. E. Wasserlein. No. 1,347,922; July 27; v. 276; p. 690.
Valve-casings for wind-musical-instrument valves, Die for making. E. J. Gulick. No. 1,345,921; July 6; v. 276; p. 117.
Valve, Cast-puppet. F. Hilty. No. 1,347,542; July 27; v. 276; p. 614.
Valve, Choke-. D. L. Winters. No. 1,347,199; July 20; v. 276; p. 489.
Valve-control mechanism. E. G. Smith. No. 1,347,300; July 20; v. 276; p. 510.
Valve-controlling means, Automatic. H. H. Lee. No. 1,348,016; July 27; v. 276; p. 709.
Valve device. A. E. L. Scanes. No. 1,347,411; July 20; v. 276; p. 532.
Valve, Flush-. E. Glennon. No. 1,345,920; July 6; v. 276; p. 117.
Valve for high-pressure-fluid containers. R. J. J. Mueller. No. 1,345,885; July 6; v. 276; p. 12.
Valve, Fuel-. F. G. Slonek. No. 1,346,267; July 13; v. 276; p. 247.
Valve, Globe-. W. H. Johnson. No. 1,346,210; July 13; v. 276; p. 235.
Valve-grinder. J. Ralston. No. 1,346,420; July 13; v. 276; p. 277.
Valve, Hydrocarbon-engine. R. M. Hvid. No. 1,346,204; July 13; v. 276; p. 234.
Valve mechanism. I. M. Uppercu. No. 1,346,617; July 13; v. 276; p. 316.
Valve mounting, Bottle-. F. H. Silverthorne. No. 1,346,137; July 13; v. 276; p. 221.
Valve, Multiple-way stop-. J. Dewrance. No. 1,345,751; July 6; v. 276; p. 83.
Valve-operating devices, Lubricating means for. E. A. De Waters. No. 1,346,116; July 13; v. 276; p. 218.
Valve, Rotary. R. Wehr. No. 1,347,978; July 27; v. 276; p. 701.
Valve-spring compressor. C. H. Newton. No. 1,346,416; July 13; v. 276; p. 276.
Valve, Thermo safety-. K. F. Triggs. No. 1,346,791; July 13; v. 276; p. 352.
Valve, Throttle-. C. C. Hansen. No. 1,345,364; July 6; v. 276; p. 7.
Valve, Throttle-. P. D. Hibner. No. 1,345,772; July 6; v. 276; p. 87.
Valves, Machine for trimming. A. E. Schlieder. No. 1,346,259; July 13; v. 276; p. 246.
Vaporiser. J. H. Batchelor. No. 1,347,435; July 20; v. 276; p. 537.
Vaporiser. M. K. Thayer. No. 1,345,563; July 6; v. 276; p. 47.
Vaporiser-guide. A. G. Kaufman. No. 1,345,448; July 6; v. 276; p. 24.
Vapors, Electrical apparatus for the electrochemical treatment of. L. B. Cherry. No. 1,345,431; July 6; v. 276; p. 20.
Vat, Dipping-. T. L. Mullins. No. 1,345,801; July 6; v. 276; p. 93.
Vehicle-brake. G. M. Carter. No. 1,347,990; July 27; v. 276; p. 703.
Vehicle, Combination motor-. R. A. Wornstaff. No. 1,346,778; July 13; v. 276; p. 349.
Vehicle construction, Motor-. C. W. McKinley. No. 1,346,326; July 13; v. 276; p. 259.
Vehicle-guard. R. S. Clary. No. 1,347,937; July 27; v. 276; p. 693.
Vehicle, Manually-propelled. L. M. Tucker. No. 1,346,727; July 13; v. 276; p. 338.
Vehicle, Mechanical. H. Sonoda. No. 1,346,985; July 20; v. 276; p. 449.
Vehicle, Motor-. F. Kiehler. No. 1,345,931; July 6; v. 276; p. 119.
Vehicle, Motor-. D. Kraus. No. 1,347,279; July 20; v. 276; p. 506.
Vehicle, Motor-. H. J. Sauvage. No. 1,346,914; July 20; v. 276; p. 434.
Vehicle, Motor-. F. A. Whitten. No. 1,346,149; July 13; v. 276; p. 224.
Vehicle, Motor-. H. D. Church. No. 1,346,530; July 13; v. 276; p. 299.
Vehicle-shaft support. H. Harden. No. 1,348,109; July 27; v. 276; p. 728.
Vehicle signal, Motor-. E. P. Gerschild. No. 1,347,945; July 27; v. 276; p. 694.
Vehicle-spring suspension. E. J. Cushey. No. 1,347,494; July 27; v. 276; p. 605.
Vehicle spring suspension. E. C. Geissberger. No. 1,347,154; July 20; v. 276; p. 481.
Vehicle-wheel. N. Renner. No. 1,345,506; July 6; v. 276; p. 35.
Vehicles, Body structure for road-. A. V. Roe. No. 1,347,592; July 27; v. 276; p. 625.
Vehicles, Folding top for. W. S. Rawson. No. 1,347,553; July 27; v. 276; p. 617.
Vehicles, Folding top for. W. S. Rawson. No. 1,347,554; July 27; v. 276; p. 617.
Vehicles, Holder for motor-. H. O. Gibson and E. F. Ames. No. 1,346,949; July 20; v. 276; p. 441.
Vehicles, Means for supplying lighting and ignition current for automotive. J. A. Heany. No. 1,347,460; July 20; v. 276; p. 541.
Vehicles, Pump for motor-. J. G. Vincent. No. 1,345,902; July 6; v. 276; p. 113.
Vehicles, Rain-guard for motor-. M. J. Fassel. No. 1,347,218; July 20; v. 276; p. 493.
Vehicles, Repair of the axles of motor-. E. Hodges. No. 1,346,202; July 13; v. 276; p. 233.
Vehicles, Roof-deck for. M. R. Hull. No. 1,346,203; July 13; v. 276; p. 234.
Vehicles, Runner-carrier for motor-. J. E. Ollivier. No. 1,346,052; July 6; v. 276; p. 143.
Vehicles, Speed-change indicator for. H. Rekersdres. No. 1,345,835; July 6; v. 276; p. 60.
Vehicles, Spring suspension for. C. Drabek. (Reissue.) No. 14,718; July 20; v. 267; p. 546.
Vehicles, Storing. C. L. Michod. No. 1,347,960; July 27; v. 276; p. 697.
Vehicles, Tank suspension for motor-. B. B. Neuteboom. No. 1,347,051; July 20; v. 276; p. 461.
Vehicles, Towing-dolly for. L. T. and D. S. Kimmerle. No. 1,346,712; July 13; v. 276; p. 335.
Velocipede and wagon, Combined. E. J. Doyle. No. 1,346,596; July 13; v. 276; p. 312.
Velocipede, Child's. H. H. Histand. No. 1,348,113; July 27; v. 276; p. 728.
Vending device. A. B. Simon. No. 1,347,558; July 27; v. 276; p. 618.
Vending-machine. A. D. Grover and E. E. Barber. (Reissue.) No. 14,925; July 27; v. 276; p. 735.
Vending-machine, Coin-controlled. J. L. Meyfarth. No. 1,345,499; July 6; v. 276; p. 34.
Vending machine, Newspaper-. O. J. Hotaling. No. 1,345,855; July 6; v. 276; p. 103.
Vending-machine, Slot. S. Clapers. No. 1,347,683; July 27; v. 276; p. 642.
Ventilating apparatus. H. F. Schmidt. No. 1,345,638; July 6; v. 276; p. 60.
Ventilation, Workshop. C. Weller. No. 1,347,195; July 20; v. 276; p. 488.

Shoes, Leather, rubber, and canvas. Mrs. A. R. King. No. 133,268; July 20; v. 276; p. 591.
Shoes made of leather and cloth, Women's high and low. The Duttenhofer-Stevens Co. No. 132,932; July 6; v. 276; p. 200.
Signals for vehicles, Traffic-. Auto Indicator Company. No. 133,209; July 20; v. 276; p. 589.
Silk and cotton piece goods and combinations of same. W. Skinner & Sons. No. 133,512; July 27; v. 276; p. 771.
Silk and cotton piece goods and combinations of the same. Turner & Walls. No. 133,067; July 6; v. 276; p. 204.
Silk-filled crêpe de chine piece goods. Nathan and Cohen Co. No. 133,289; July 20; v. 276; p. 591
Silk goods in the piece. Henri Gutmann Silks Corporation. No. 133,427; July 27; v. 276; p. 769.
Silk goods in the piece. T. J. Mitchell & Co. No. 133,469; July 27; v. 276; p. 770.
Silk in the piece. Stavisky & Greenstone. No. 133,516; July 27; v. 276; p. 772.
Silk piece goods. S. Eiseman & Co. No. 133,240; July 20; v. 276; p. 590.
Silk piece goods. Empire Silk Company. No. 133,407; July 27; v. 276; p. 768.
Silk piece goods. H. R. Mallinson & Co. No. 133,461; July 27; v. 276; p. 770.
Silk, wool, linen, &c., piece goods. Bianchini, Férier. No. 133,354; July 27; v. 276; p. 767.
Silks, velvets, &c. United Silk Mills. No. 133,535; July 27; v. 276; p. 772.
Skates, Ice-. The Samuel Winslow Skate Mfg. Co. No. 133,506; July 27; v. 276; p. 771.
Skirts. Mazzei Skirt Co. No. 133,282; July 20; v. 276; p. 591.
Skylight-bars. Steelead Skylight Co. No. 133,326; July 20; v. 276; p. 593.
Soap. Procter & Gamble Company. No. 133,492; July 27; v. 276; p. 771.
Solvent or softener to facilitate the cleaning of certain named articles. Three In One Oil Company. No. 133,061; July 6; v. 276; p. 204.
Spark-plugs. Aircraft & Motor Products Co. No. 133,097; July 13; v. 276; p. 401.
Spark-plugs. Brewster-Goldsmith Corp. Inc. No. 133,219; July 20; v. 276; p. 589.
Spark-plugs. Rummell Manufacturing Works. No. 133,031; July 6; v. 276; p. 203.
Spark-plugs. Stitt Ignition Co. No. 133,048; July 6; v. 276; p. 204.
Sparking plugs for internal-combustion engines. Forward Sparking Plug Co. No. 132,943; July 6; v. 276; p. 201.
Spectacles, eyeglasses, eyeglass-mountings, opthalmic lenses, &c. Wall & Ochs. No. 133,338; July 20; v. 276; p. 593.
Spoons, Wooden. J. H. Mulholland. No. 133,167; July 13; v. 276; p. 403.
Springs and mattresses, Bed and couch. Shott Manufacturing Company. No. 133,509; July 27; v. 276; p. 771.
Sprinklers, Automatic. R. W. Newton. No. 133,172; July 13; v. 276; p. 403.
Stationery. White & Wyckoff Manufacturing Company. No. 133,543; July 27; v. 276; p. 772.
Staybolt-taps. W. L. Brubaker & Bros. No. 133,220; July 20; v. 276; p. 589.
Steel bars, rods, billets, &c. Sanderson Bros. & Co. No. 133,507; July 27; v. 276; p. 771.
Steel, Iron, &c., Wrought. Connecticut Electric Steel Co. No. 132,916; July 6; v. 276; p. 200.
Stovepipe and elbows. Hemp and Co. (Corp.) No. 133,426; July 27; v. 276; p. 769.
Stovepipes and elbows. Hemp & Co. (Corp.). Nos. 132,962–4; July 6; v. 276; p. 201.
Stoves, Alcohol-. F. Chapman. No. 132,910; July 6; v. 276; p. 200.
Sugar, Granulated cane-. Federal Sugar Refining Company. No. 133,412; July 27; v. 276; p. 768.
Suits, Boys'. Hessberg, Morris & Gunst. No. 133,260; July 20; v. 276; p. 591.
Surgical appliances. Dental Products Company. No. 133,115; July 13; v. 276; p. 401.
Sweaters, bathing-suits. Amer Knitting Mills. No. 133,203; July 20; v. 276; p. 589.
Sweaters, shawls, scarfs, hoods, and caps. Imperial Knitting Co. No. 133,436; July 27; v. 276; p. 769.
Syrup, Table-. J. R. Cargill. No. 133,371; July 27; v. 276; p. 767.
Syrup, Table-. The L. and T. Company. No. 132,985; July 6; v. 276; p. 202.
Syrups, Corn and maltose. Young & Wile. No. 133,200; July 13; v. 276; p. 404.
Tables and cabinets, Kitchen. Blue Bird Manufacturing Company. No. 133,215; July 20; v. 276; p. 589.
Tablet, Medicinal. G. W. Carnick Co. No. 133,372; July 27; v. 276; p. 767.
Tablets. Preston Chemical Company. No. 133,491; July 27; v. 276; p. 771.
Tea, Herb. J. G. Sultanaki. No. 133,523; July 27; v. 276; p. 772.
Teeth, Artificial. G. Flint. No. 132,940; July 6; v. 276; p. 201.
Textile fabrics in the piece, Worsted and woolen. Holden-Leonard Company. Nos. 132,967–8; July 6; v. 276; p. 202.
Textiles in the piece. C. A. Coleman Company. No. 133,388; July 27; v. 276; p. 768.
Theaters, Miniature. E. Moore. No. 113,165; July 13; v. 276; p. 403.
Thread and yarn. H. E. Locke & Company. No. 132,991; July 6; v. 276; p. 202.
Thread or yarn, Mercerised cotton. Summit Thread Company. No. 133,052; July 6; v. 276; p. 204.
Thread, Shoe-. Commonwealth Thread Co. Nos. 132,913–4; v. 276; July 6; p. 200.
Thermometers, sphygmomanometers, &c., Clinical. C. J. Tagliabue Mfg. Co. Nos. 133,054–5; July 6; v. 276; p. 204.
Tile, brick, and artificial stone. Formby Petrinite Corporation. No. 133,245; July 20; v. 276; p. 590.
Timepieces. F. W. Alter. No. 132,875; July 6; v. 276; p. 199.
Timepieces. F. W. Alter. No. 133,098; July 13; v. 276; p. 401
Tin, Pig-. Richards and Co. No. 133,177; July 13; v. 276; p. 403.
Tire-pumps, Hand-operated. Mayo-Skinner Manufacturing Company. No. 133,281; July 20; v. 276; p. 591.
Tires and inner tubes. Outer casings for automobile-. Victor Rubber Company. No. 133,538; July 27; v. 276; p. 772.
Tires and tubes, Automobile and truck. Mason Tire & Rubber Co. No. 133,162; July 13; v. 276; p. 403.
Tires and tubes, Rubber. C. Kenyon Company. No. 133,153; July 13; v. 276; p. 402.
Tires, Inner tubes for vehicle-. Dural Rubber Corporation. No. 133,123; July 13; v. 276; p. 401.
Tires, Universal Tire & Rubber Association. No. 133,335; July 20; v. 276; p. 593.

Tires, tire-casings, and inner tubes, Rubber. Canton Blackstone Company. No. 133,224; July 20; v. 276; p. 589.
Tires, tubes, boots, and tire-patches, Rubber and fabric vehicle-. Washington Tire & Rubber Company. Nos. 133,339–40; July 20; v. 276 p. 593.
Tobacco and cigarettes. Liggett & Myers Tobacco Company. No. 133,454; July 27; v. 276; p. 770.
Tobacco, Smoking-. Zorro Tobacco Co. No. 133,550; July 27; v. 276; p. 773.
Tobacco and cigarettes, Smoking and chewing. American Tobacco Company. No. 133,349; July 27; v. 276; p. 767.
Toilet and manicure sets. Herculean Products Company. Nos. 133,141–2; July 13; v. 276; p. 402.
Toilet preparations. Talcum Puff Company. No. 133,524; July 27; v. 276; p. 772.
Toilet preparations. I. J. Tetlow. No. 133,526; July 27; v. 276; p. 772.
Toilet preparations for treating the skin. Geo. Zubrod & Co. No. 133,552; July 27; v. 276; p. 773.
Toothbrushes. M. Levy. No. 133,990; July 6; v. 276; p. 202.
Toothbrushes. Williams, Davis, Brooks & Hinchman Sons. No. 133,547; July 27; v. 276; p. 773.
Toweling. J. F. White & Co. No. 133,542; July 27; v. 276; p. 772.
Toy aeroplanes. P. Pierce. No. 133,019; July 6; v. 276; p. 203.
Toy furniture. R. W. Porter. No. 133,020; July 6; v. 276; p. 203.
Toy molds and molding-wax for same. L. E. Butler. No. 133,367; July 27; v. 276; p. 767.
Toy savings-banks. M. Stoltz. No. 133,049; July 6; v. 276; p. 204.
Toy soldiers, dishes, and furniture. Ferdinand Gutmann & Co. No. 132,954; July 6; v. 276; p. 201.
Toy vehicle. E. G. Kirtz. No. 132,981; July 6; v. 276; p. 202.
Toy vehicle—viz., coaster. R. H. Blackburn. No. 132,898; July 6; v. 276; p. 199.
Toys. O. M. Burton. No. 133,105; July 13; v. 276; p. 401.
Trucks, Motor-. Ward La France Truck Co. No. 133,086; July 6; v. 276; p. 205.
Tungsten. Metal & Thermit Corporation. No. 133,163; July 13; v. 276; p. 403.
Twines, string, and cordage. C. C. Davis. No. 133,113; July 13; v. 276; p. 401.
Typewriters. Blickensderfer Manufacturing Company. No. 133,101; July 13; v. 276; p. 401.
Underwear, Knitted. De Milo Distributing Co. No. 133,234; July 20; v. 276; p. 590.
Underwear, Men's and boys'. W. D. Porter. No. 133,302; July 20; v. 276; p. 592.
Underwear, night-robes, dresses, and blouses, Women's and children's. M. E. Smith & Co. No. 133,322; July 20; v. 276; p. 592.
Union-suits, Woven and knitted. Neustadter Brothers. No. 133,008; July 6; v. 276; p. 203.
Vacuum tube devices, parts and accessories therefor. Wireless Specialty Apparatus Company. No. 133,095; July 6; v. 276; p. 205.
Valves, Automatic relief-. Dew Valve Co. No. 132,927; July 6; v. 276; p. 200.
Valves, Compressor-. Bury Compressor Company. No. 133,106; July 13; v. 276; p. 401.
Valves for general use, pump-governors, and pressure-reducing valves, Metal. Framingham Manufacturing Company. No. 132,944; July 6; v. 276; p. 201.
Varnish-paint. Ault & Wiborg Co. Nos. 132,884–8; July 6; v. 276; p. 199.
Varnish, Prepared liquid. The Don-O-Lac Co. No. 133,236; July 20; v. 276; p. 590.
Varnishes for electric insulation. The Sterling Varnish Company. No. 133,047; July 6; v. 276; p. 204.
Vegetables, Dehydrated. Twin Falls Dehydrating Co. No. 133,066; July 6; v. 276; p. 204.
Vegetables, Fresh. Crowd Packing Company. No. 132,923; July 6; v. 276; p. 200.
Voiles in the piece. M. Schwarz. No. 133,037; July 6; v. 276; p. 204.
Wall or partition sections or units. A. H. Revell & Co. No. 133,306; July 20; v. 276; p. 592.
Washing compound. A. E. Cleveland. No. 133,387; July 27; v. 276; p. 768.
Washing compound. Mab Cleaner Manufacturing Company. No. 133,460; July 27; v. 276; p. 770.
Waste cotton, silk, and waste paper, &c., Bales or bags of. M. Frank. No. 132,945; July 6; v. 276; p. 201.
Watch and clock dials. J. R. Bartlett. No. 132,893; July 6; v. 276; p. 199.
Watch and clock dials, Protective facings or coverings for. I. Florman. No. 132,941; July 6; v. 276; p. 201.
Watchcases. Roy Watch Case Company. No. 133,029; July 6; v. 276; p. 203.
Watches. W. J. Bernard. No. 132,897; July 6; v. 276; p. 199.
Watches. J. Bulova Company. Nos. 132,903–6; July 6; v. 276; p. 200.
Watches. Dubois Watch Case Company. No. 132,930; July 6; v. 276; p. 200.
Watches. The D. Gruen Sons & Company. No. 132,953; July 6; v. 276; p. 201.
Watches. Knickerbocker Watch Co. No. 132,982; July 6; v. 276; p. 202.
Watches. Knickerbocker Watch Co. No. 133,154; July 13; v. 276; p. 402.
Watches and parts thereof. Société Anonyme Les fils de L. Braunschweig, Fabrique Election. No. 133,042; July 6; v. 276; p. 204.
Water-bottles, syringe-bags, &c. The Miller Rubber Co. No. 133,005; July 6; v. 276; p. 203.
Water-towers, Steel. J. Armstrong. No. 133,351; July 27; v. 276; p. 767.
Weatherproof coats. W. O. Peake Ltd. No. 133,298; July 20; v. 276; p. 592.
Webbing in the piece. Hope Webbing Company. No. 133,432; July 27; v. 276; p. 769.
Webs, Elastic. Faire Bros. & Co. Nos. 132,936–7; July 6; v. 276; p. 201.
Webs, Elastic. Faire Bros. & Co. No. 133,408; July 27; v. 276; p. 768.
Webs, Elastic. Faire Bros. & Co. No. 133,411; July 27; v. 276; p. 768.
Windshield-cleaners. Outlook Company. No. 133,015; July 6; v. 276; p. 203.
Wines and champagnes, Non-alcoholic. Wm. H. Hommel. No. 133,431; July 27; v. 276; p. 769.
Wiping and cleaning apparatus for automobile windshields, &c. Presto-Felt Mfg. Co. No. 133,021; July 6; v. 276; p. 203.
Wire and manila ropes and wire cables. Western Rope & Manufacturing Company. No. 133,089; July 6; v. 276; p. 205.
Wire and metallic strips of an allow containing manganese. Driver-Harris Company. No. 133,237; July 20; v. 276; p. 590.
Woodworking-machines. S. A. Woods Machine Co. No. 133,198; July 13; v. 276; p. 404.
Woolen goods in the piece. Worumbo Manufacturing Company. No. 133,549; July 27; v. 276; p. 773.
Woolen piece goods. Pawcatuck Woolen Mills. No. 133,486; July 27; v. 276; p. 771.
Woolens, worsted, silk, &c., piece goods. Pearsall & Company. No. 133,486; July 27; v. 276; p. 771.
Worsted and woolen textile fabrics in the piece. Holden-Leonard Company. No. 133,428; July 27; v. 276; p. 769.
Yarn, Knitting-. Carver-Beaver Yarn Co. No. 132,909; July 6; v. 276; p. 200.

ALPHABETICAL LIST OF LABELS.

"Beaux Arts Candy." (For Candies.) C. W. Cannar. No. 21,910; July 27; v. 276; p. 774.
"Bitrose Scotties." (For Candies.) Bitrose Company. No. 21,908; July 27; v. 276; p. 774.
"Chump." (For Soaps.) California Soap Company, Inc. No. 21,909; July 27; v. 276; p. 774.
"Cotec." (For Pile-Ointment.) T. E. Connor. No. 21,911; July 27; v. 276; p. 774.
"Cup & Saucer." (For Coffee.) Dwinell-Wright Company. No. 21,912; July 27; v. 276; p. 774.
"Delaine." (For Toilet Paper.) Wm. H. Williams Co. No. 21,924; July 27; v. 276; p. 774.
"Denison's Original Famous Cancer Ointment." (For an Ointment for Cancer.) Alfred Denison & Son. No. 21,904; July 20; v. 276; p. 594.
"Flossies." (For Candy Lozenges.) The Flossmint Company. No. 21,913; July 27; v. 276; p. 774.
"Franks." (For Frankforts—Namely, Sausages. Frank & Company. No. 21,905; July 20; v. 276; p. 594.
"Idaho Apples." (For Fresh Apples.) Judah P. Gray. No. 21,914; July 27; v. 276; p. 774.
"Lemon Cleansing Cream." (For a Massage and Cleansing Cream.) A. J. Krank. No. 21,917; July 27; v. 276; p. 774.
"Lemon Vanishing Cream." (For a Skin Cream.) A. J. Krank. No. 21,918; July 27; v. 276; p. 774.
"Log Cabin." (For Candy—Namely, Pecan Rolls.) Pulos Bros. No. 21,921; July 27; v. 276; p. 774.
"Mi Candita." (For Cigars.) V. Jordan. No. 21,916; July 27; v. 276; p. 774.
"Nacarine." (For a Lotion for the Complexion.) The Nacarine Co. No. 21,920; July 27; v. 276; p. 774.
"Nut-All." (For Oleomargarin.) The Baltimore Butterine Co. No. 21,906; July 27; v. 276; p. 774.
"Our-Home-Made." (For Malt-Syrup.) C. T. Zirkle. No. 21,925; July 27; v. 276; p. 774.
"Over the Top." (For a Game.) E. B. Sode Paper-Box Company. No. 21,923; July 27; v. 276; p. 774.
"Packard Brand, Egyptian Style." (For Butter-Cream Chocolates.) R. A. Sanburg. No. 21,922; July 27; v. 276; p. 774.
"Rosa-Belle." (For Silks.) Lindeke, Warner & Sons, Incorporated. No. 21,919; July 27; v. 276; p. 774.
"Sciroppo Tamarindo." (For Non-Intoxicating Beverages.) The Italian Distilling Co. No. 21,915; July 27; v. 276; p. 774.
"Silver Star." (For Oleomargarin.) The Baltimore Butterine Co. No. 21,907; July 27; v. 276; p. 774.
"Toyland Special." (For Crackers Known as Toyland Special and Cut in the Shape of a Car.) P. I. Jacoby. No. 21,903; July 6; v. 276; p. 206.

ALPHABETICAL LIST OF PRINTS.

"Don't Buy New Corsets." (For Dye-Soap.) Sunbeam Chemical Co. No. 5,274; July 27; v. 276; p. 774.
"Graham Beauty Secret." (For a Preparation for Cleansing the Skin.) P. Graham. No. 5,268; July 27; v. 276; p. 774.
"King 8 Sedanette." (For Automobiles.) King Car Corporation of New York. No. 5,269; July 27; v. 276; p. 774.
"One of the few things 5 cents will buy—Gold Dust." (For Washing Powder.) The N. K. Fairbank Company. No. 5,267; July 27; v. 276; p. 774.
"Salz $1 Fountain Pen." (For Fountain-Pens.) Salz Brothers. No. 5,272; July 27; v. 276; p. 774.
"Solrex." (For Watches.) Marshall Field and Company. No. 5,270; July 27; v. 276; p. 774.
"Sweeney Tank and Supply Co." (For Tanks and Tank Supplies.) T. E. Sweeney. No. 5,273; July 27; v. 276; p. 774.
"Taxpayers Value Brick Roads." (For Paving-Brick.) National Paving Brick Manufacturers Association. No. 5,271; July 27; v. 276; p. 774.
"Watches That Run." (For Watches.) Adels-Ribakoff Co. Inc. No. 5,266; July 20; v. 276; p. 594.

DISCLAIMERS.

Condenser and method of making the same. A. Pruessman. No. 1,275,468; date of patent Aug. 13, 1918; disclaimer filed June 15, 1920; v. 276; p. 409.
Non-interfering extension or party-line telephone system. T. G. Martin. No. 1,151,554; date of patent Aug. 24, 1915; disclaimer filed June 28, 1920; v. 276; p. 409.
Automatic telephone switching apparatus. T. G. Martin. No. 14,655 (reissue); date of patent June 10, 1918; disclaimer filed June 30, 1920; v. 276; p. 409.
Process of making derivatives of petroleum-hydrocarbons. C. Ellis. No. 1,317,868; date of patent Oct. 7, 1919; disclaimer filed July 3, 1920; v. 276; p. 601.

CLASSIFICATION OF PATENTS

JULY, 1920.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 6: 1,346,157
7: 1,346,415
23: 1,346,715
35: 1,345,876
36: 1,346,247
2— 11: 1,347,782
32: 1,347,528
60: 1,346,320
78: 1,345,620
1,347,180
74: 1,348,021
79: 1,346,683
83: 1,347,359
84: 1,347,957
90: 1,346,733
91: 1,345,823

Cutler-Hammer Mfg. Co., The. (See Tregoning William C., assignor.)

Dalrymple, Philip W., Baltimore, Md. Tread. No. 1,347,253; July 20; v. 276; p. 501.

Dankmeyer, Charles H., Baltimore, Md. Belting fabric. No. 1,347,254; July 20; v. 276; p. 501.

Darby, John, Summit, N. J., assignor to F. B. Griffin, New York, N. Y. Motion-picture machine. No. 1,346,880; July 20; v. 276; p. 427.

Dathan, Charles F., Chicago, Ill. Torpedo-net for ships. No. 1,347,363; July 20; v. 276; p. 523.

Davenport, Floy E., Callaway, Nebr. Animal gun-trap. No. 1,347,255; July 20; v. 276; p. 501.

Davies, Nelson E., Redwood City, Calif. Fluid-checking device. No. 1,347,017; July 20; v. 276; p. 454.

Davis, James G., Buffalo, N. Y. Floor and ceiling construction. No. 1,347,146; July 20; v. 276; p. 479.

Davis, John B., Springfield, assignor to Gilbert & Barker Manufacturing Company, West Springfield, Mass. Piston. No. 1,347,082; July 20; v. 276; p. 467.

Davis, Laurence R., Providence, R. I., assignor to Revere Rubber Company. Coating apparatus. No. 1,347,256; July 20; v. 276; p. 501.

Davis, Robert S., Powhatan, La. Adjustable standard and heel-knife. No. 1,347,257; July 20; v. 276; p. 502.

Dawley, James C. (See Rinsch, C. W., and Dawley.)

Dawson, Arthur T., and G. T. Buckham, assignors to Vickers Limited, Westminster, London, England. Electrical signaling system. No. 1,347,258; July 20; v. 276; p. 502.

Dayton Steel Foundry Company, The. (See Walther, George, assignor.)

Decker, Walter W., Minneapolis, Minn. Name-piece for umbrellas. No. 1,346,810; July 20; v. 276; p. 414.

De Long, Oscar T., Atlanta, Ga. Clamp for vulcanizing-machines. No. 1,347,213; July 20; v. 276; p. 492.

Dennis, Fred C., Blair, Okla. Automatic gasolene-dispensing machine. No. 1,347,147; July 20; v. 276; p. 479.

Denver Fire Clay Company. (See Lindsay, George W., assignor.)

De Vault, Ralph P., Battle Creek, Mich. Motion-picture apparatus. No. 1,347,326; July 20; v. 276; p. 515.

Derscha, Joseph, Flint, Mich. Amount-certification rubber check-stamp for banks. No. 1,347,259; July 20; v. 276; p. 502.

Desmarais, Samuel, Cleveland, Ohio. Comb. No. 1,347,260; July 20; v. 276; p. 502.

Dexter Folder Company. (See Christophel, Carl E., assignor.)

Diamond Electric Specialties Corp. (See Rosenfeld, Francis M., assignor.)

Diamond, James E., assignor to The Aluminum Castings Company, Cleveland, Ohio. Internal-combustion-motor cylinder. No. 1,347,478; July 20; v. 276; p. 545.

Dick, Joseph C. F., Stockton, Calif. Tread attachment for tractor-wheels. No. 1,347,018; July 20; v. 276; p. 455.

Dickinson, Edgar D., Schenectady, N. Y., assignor to General Electric Company. Elastic-fluid turbine. No. 1,347,327; July 20; v. 276; p. 515.

Diebold, Fritz, Zurich, Switzerland. Process and apparatus for atomizing liquid substances into very small particles. No. 1,346,811; July 20; v. 276; p. 414.

Dieter Nut Company. (See Schrader, John R., assignor.)

Dixon, Galen J., Bishop, Calif. Fish screen or guard. No. 1,346,881; July 20; v. 276; p. 427.

Dom, Alexander, assignor to The Samuel C. Tatum Company, Cincinnati, Ohio. Drilling-machine. No. 1,347,214; July 20; v. 276; p. 492.

Douglas, William W., and S. L. Bailey, Bristol, England. Sight-feed lubricator. No. 1,346,942; July 20; v. 276; p. 440.

Dow, Fred T., Bangor, Me. Drying apparatus. No. 1,347,473; July 20; v. 276; p. 544.

Doyle, Clarence E., Washington, D. C., assignor to Hutchinson Egg-Case Filler Co., Hutchinson, Kans. Receptacle-closure. No. 1,347,446; July 20; v. 276; p. 539.

Doyle, Joseph P., Lakewood, Ohio. Smoke-preventing furnace-door check. No. 1,347,261; July 20; v. 276; p. 502.

Drabek, Charles, assignor to The Drabek Equalizer Company, Cleveland, Ohio. Spring-suspension for vehicles. (Reissue.) No. 14,018; July 20; v. 276; p. 546.

Drabek Equalizer Company, The. (See Drabek, Charles, assignor.) (Reissue.)

Draper, Charles T., assignor to The Draper Manufacturing Company, Cleveland, Ohio. Protectively coating sheet-metal containers. No. 1,346,943; July 20; v. 276; p. 440.

Draper Manufacturing Company, The. (See Draper, Charles T., assignor.)

Dreis, Herman C., Chicago, Ill. Bending-brake. No. 1,347,474; July 20; v. 276; p. 544.

Driggs, George W., and F. R. Henke, Elyria, Ohio. Object-holder. No. 1,346,944; July 20; v. 276; p. 440.

Driscoll, Con, Coalinga, Calif. Propelling and draft-reducing mechanism for ships and boats. No. 1,347,148; July 20; v. 276; p. 480.

Dronet, Charles, Houston, Tex. Pneumatic tire. No. 1,346,945; July 20; v. 276; p. 440.

Du Pont, E. I., de Nemours and Company. (See Andreau, Roland L., assignor.)

Du Prey, Hartwell A. (See Wade, J., Markin, and Du Prey.)

Duston, Ernest W., assignor to The Blake & Johnson Company, Waterbury, Conn. Collapsible spool. No. 1,346,812; July 20; v. 276; p. 414.

Eastern Tool & Manufacturing Company. (See Peterson, Carl E., assignor.)

Eberl, Frank, New York, N. Y. Folding attachment for beds. No. 1,347,447; July 20; v. 276; p. 539.

Eby, Philip, assignor to Art In Buttons, Inc., Rochester, N. Y. Separating-machine. No. 1,347,215; July 20; v. 276; p. 492.

Eckmann, Aron, assignor to Schweiz. Serum- und -Impfinstitut, Berne, Switzerland. Producing mercuroamino combinations. No. 1,347,083; July 20; v. 276; p. 467.

Edwards, Henry, Birmingham, England. Fastener for bags, purses, and the like. No. 1,347,364; July 20; v. 276; p. 523.

Edmunds and Jones Corporation. (See Godley, Charles E., assignor.)

Edwards, Lake B., Anniston, Ala. Lubricating mechanism. No. 1,347,019; July 20; v. 276; p. 455.

Eggleston Air-Cell Aeroplane Company. (See Eggleston, Thomas L., assignor.)

Eggleston, Thomas L., Washington, D. C., assignor to Eggleston Air-Cell Aeroplane Company. Airplane. No. 1,347,084; July 20; v. 276; p. 468.

Eichorn, Albert H., *et al.* (See Eichorn, Frederick C. H., assignor.)

Eichorn, Frederick C. H., assignor of two-thirds to J. W. Burke and A. H. Eichorn, Boston, Mass. Automobile-lock. No. 1,347,262; July 20; v. 276; p. 503.

Ek, Arvid, Portland, Me. Paper towel. No. 1,347,020; July 20; v. 276; p. 455.

Electric Vacuum Cleaner Company. (See Kirby, James B., assignor.)

Electrolytic Zinc Company. (See Avery, D., and Williams.)

Electrolytic Zinc Company. (See Stevens, Royale H., assignor.)

Ellis, Amos, Philadelphia, Pa. Shaving-brush case. No. 1,347,263; July 20; v. 276; p. 503.

Emmert, John R., Chicago, Ill. Barber's chair. No. 1,347,264; July 20; v. 276; p. 503.

Engelhard, Frank. (See Engelhard, William A., F., and F. H.)

Engelhard, Frederick H. (See Engelhard, William A., F., and F. H.)

Engelhard, William A., F., and F. H., Springfield, Mass. Float. No. 1,347,217; July 20; v. 276; p. 493.

Espy, Carl. (See Batchelor, Jamie H., assignor.)
Essex Motors. (See Fekete, S. I., and Baits, assignors.)
Estera, Manuel A. (See Bone, Roberto C., assignor.)
Etzel, Frank E., Montclair, N. J. Air-valve for radiators. No. 1,347,216; July 20; v. 276; p. 493.
Evans, Daniel W., Scranton, Pa. Draft-rigging for tractors. No. 1,347,448; July 20; v. 276; p. 539.
Evans, Percy. (See Tonkin, George A., assignor.)
Fassel, Martin J., St. Louis, Mo. Rain-guard for motor-vehicles. No. 1,347,218; July 20; v. 276; p. 493.
Fay, Thomas J., Brooklyn, N. Y., assignor to The Standard Parts Company, Cleveland, Ohio. Shaping and tempering metal. No. 1,346,946; July 20; v. 276; p. 440.
Fekete, Stephen I., and S. G. Baits, assignors to Essex Motors, Detroit, Mich. Gear-engaging mechanism for self-starters. No. 1,347,265; July 20; v. 276; p. 503.
Felsenthal, Gabriel, Chicago, Ill. Powder-receptacle. No. 1,347,149; July 20; v. 276; p. 480.
Ferch, Walter H., Milwaukee, Wis. Traction device for automobiles and the like. No. 1,346,813; July 20; v. 276; p. 414.
Feroldi, Enrico, Turin, Italy. Carbureter. No. 1,347,150; July 20; v. 276; p. 480.
Fette, Charlotte G., Shelton, Conn. Dustless ash-sifter. No. 1,347,151; July 20; v. 276; p. 480.
Field, Thaddeus S., Atlanta, Ga. Horseshoe. No. 1,347,021; July 20; v. 276; p. 455.
Fifield, Albert F., Newark, N. J., assignor to The Singer Manufacturing Company. Thread-severing mechanism for sewing-machines. No. 1,346,814; July 20; v. 276; p. 414.
Fink, Eugene L., Deloit, Iowa. Hen's nest. No. 1,347,266; July 20; v. 276; p. 503.
Finnigan, George P., Richmond, Va. Electropneumatic control. No. 1,346,882; July 20; v. 276; p. 428.
Finsness, Helen. (See Tonstad, J., and Finsness.)
Fischer, Albert T. (See Horr, John V., assignor.)
Fitzgerald, John J., Los Angeles, Calif. Gage device. No. 1,347,022; July 20; v. 276; p. 455.
Flammang, John, assignor to O. G. Stark, St. Louis, Mo. Making pistons. No. 1,347,449; July 20; v. 276; p. 539.
Flammang, John, assignor to O. G. Stark, St. Louis, Mo. Making pistons. No. 1,347,450; July 20; v. 276; p. 539.
Fletcher, Henry J., Brainerd, Minn. Hammer-saw or line-hammer. No. 1,347,365; July 20; v. 276; p. 523.
Flie, Michael F., Mohawk, Ontario, Canada. Combined cradle and bed. No. 1,347,451; July 20; v. 276; p. 540.
Fluke, Floyd L., *et al.* (See Johnson, Albert S., assignor.)
Folger, Harry S., Chicago, Ill. Stamp-mount. No. 1,347,152; July 20; v. 276; p. 480.
Fontaine, Walter R., assignor to Western Vulcanizer Manufactnring Company, Chicago, Ill. Clamp. No. 1,346,947; July 20; v. 276; p. 441.
Foster, Edward E., Beverly, Mass. Cam-path-generating machine. No. 1,347,08b; July 20; v. 276; p. 468.
Foster, Ernest H., Dongan Hills, assignor to Power Specialty Company, New York, N. Y. Superheater. No. 1,347,086; July 20; v. 276; p. 468.
Foundation Oven Corporation. (See Roberts, William E., assignor.)
Franzen, Frank C., Buxton, Iowa. Check-pocket. No. 1,347,452; July 20; v. 276; p. 540.
Fraser, Norman P., Detroit, Mich. Lock. No. 1,346,815; July 20; v. 276; p. 415.
Frederick, Salvador H., St. Paul, Minn. Stove attachment. No. 1,346,883; July 20; v. 276; p. 428.
Freed, George F., Ben Avon, and J. R. Spencer, assignors to Pittsburgh Gage & Supply Company, Pittsburgh, Pa. Safety-lock for swing-wringers. No. 1,346,816; July 20; v. 276; p. 415.
Freedman, Louis A., New York, N. Y. Battery-filling machine. No. 1,346,948; July 20; v. 276; p. 441.
Fronek, Bohumil, Chicago, Ill. Hat-fastener. No. 1,347,267; July 20; v. 276; p. 504.
Frost, Clinton E., East Cleveland, assignor to The Cleveland Osborn Manufacturing Company, Cleveland, Ohio. Rotary brush. No. 1,347,153; July 20; v. 276; p. 481.
Fryer, Harry. (See Bartlett, O., and Fryer.)
Gahl, Rudolf, Miami, Ariz., assignor, by mesne assignments, to Pneumatic Process Flotation Company, New York, N. Y. Flotation ore-separator and process. No. 1,346,817; July 20; v. 276; p. 415.
Gahl, Rudolf, Miami, Ariz., assignor, by mesne assignments, to Pneumatic Process Flotation Company, New York, N. Y. Flotation ore-separator. No. 1,346,818; July 20; v. 276; p. 415.
Gahl, Rudolf, Denver, Colo., assignor, by mesne assignments, to Pneumatic Process Flotation Company, New York, N. Y. Flotation process. No. 1,346,819; July 20; v. 276; p. 415.
Galbreath, John T., Cynthiana, Ky. Spark-plug-cleaning device. No. 1,347,366; July 20; v. 276; p. 523.
Gamewell Fire-Alarm Telegraph Company, The. (See Suren, Nathan R., assignor.)

Alphy, Harry, *et al.* (See Tullis, John T., assignor.)
Ambrose, Robert L., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Mounting for drills. No. 1,345,731; July 6; v. 276; p. 79.
American Metal Cap Company. (See Hammer, Charles, assignor.)
American Optical Company. (See Haynes, Charles M., assignor.)
American Potash Corporation. (See Charlton, Harry W., assignor.)
American Vulcanized Fibre Co. (See Pierce, James F., assignor.)
Anchor Cap & Closure Corporation. (See White, William P., assignor.
Anders, Hanns R., Perth Amboy, N. J., assignor to The Roessler & Hasslacher Chemical Co., New York, N. Y. Method of and apparatus for treating goods with fluids. No. 1,345,341; July 6; v. 276; p. 3.
Anderson, Carl E., Maywood, Ill. Window-frame. No. 1,345,471; July 6; v. 276; p. 28.
Anheuser, Ernst, Racine, Wis. File or brush holder. No. 1,345,472; July 6; v. 276; p. 29.
Antoine, Alfred D., Chicago, and C. C. Travis, Evanston, Ill., assignors to Advance Machine Co., Chicago, Ill. Check-detector for check-actuated machines. (Reissue.) No. 14,905; July 6; v. 276; p. 153.
Appleman, John P. (See Cissel, G. W., and Appleman.)
Arnold, John O., Sheffield, England. High-speed steel. No. 1,345,732; July 6; v. 276; p. 79.
Atkinson, Lloyd S., Los Angeles, Calif. Tire for vehicle-wheels. No. 1,346,074; July 6; v. 276; p. 148.
Augustine, William F., Chicago, Ill. Hot-water and ice bandage. No. 1,345,906; July 6; v. 276; p. 114.
Automatic Electric Company. (See Jacobsen, Emil, assignor.)
Ayres, Charles S., Riverton, N. J. Sight-indicator for dispensing-pumps. No. 1,345,733; July 6; v. 275; p. 79.
Babcock & Wilcox Company, The. (See Kerr, Howard J., assignor.)
Baer, Sylvan T., New York, N. Y. Sanitary appliance for telephone-transmitters, &c. No. 1,345,734; July 6; v. 276; p. 80.
Bailey, Charles A., Chicago, Ill. Coupling. No. 1,345,735; July 6; v. 276; p. 80.
Bailey, Robert R., Chicago, Ill. Cigar-drill. No. 1,345,736; July 6; v. 276; p. 80.
Bailey, Robert R., Chicago, Ill. Razor-blade holder. No. 1,345,737; July 6; v. 276; p. 80.
Baker, Cloice B., assignor of one-half to W. Bawden, St. Louis, Mo. Handrail-column. No. 1,345,338; July 6; v. 276; p. 3.
Balsa Refrigerator Corporation. (See Kramer, Gustav A., assignor.)
Baltensperger, Elizabeth A. (See Thomas, August, assignor.)
Bancroft, Samuel M. (See Evans, W. C., and Bancroft.)
Bank, Isaac, Hammonton, N. J. Sleeve-former. No. 1,345,739; July 6; v. 276; p. 80.
Barker, Alpheus E., assignor to Alexander Brothers, Philadelphia, Pa. Machine for making round belting. No. 1,345,907; July 6; v. 276; p. 114.
Barker, Eugene G., Glenwood, Iowa. Corn-harvester. No. 1,345,527; July 6; v. 276; p. 39.
Barnard, Charles S., assignor to The Bassick Co., Bridgeport, Conn. Caster-socket. No. 1,345,908; July 6; v. 276; p. 114.
Barniak, Felika, Rosemont, W. Va. Railway-tie. No. 1,345,572; July 6; v. 276; p. 48.
Barr Company, The. (See Barr, Samuel C., assignor.)
Barr, Samuel C., Chillicothe, Ohio, assignor to The Barr Company. Eye-testing mechanism. No. 1,345,573; July 6; v. 276; p. 48.
Bass, Ernest C., New York, N. Y. Gun-camera. No. 1,345,981; July 6; v. 276; p. 129.
Bassick Co., The. (See Barnard, Charles S., assignor.)
Batchelder, Frank R. (See Lethern, Albert A., assignor.)
Bawden, William. (See Baker, Cloice B., assignor.)
Bayles, Robert A., Stockton, Calif. Ditch-digger. No. 1,346,075; July 6; v. 276; p. 148.
Bayless, Isabel L., Washington, D. C. Cooking device. No. 1,345,824; July 6; v. 276; p. 97.
Beall, Walter W., Philadelphia, Pa. Strainer. No. 1,345,342; July 6; v. 276; p. 4.
Beau, Mathew, Port Colborne, Ontario, Canada. Sleigh. No. 1,345,825; July 6; v. 276; p. 97.
Becker, Robert A., assignor to C. Tremain, Poughkeepsie, N. Y. T. Y. and L connector. No. 1,345,982; July 6; v. 276; p. 130.
Bedard, Joseph, Columbus, Ohio. Protector for windshields. No. 1,345,826; July 6; v. 276; p. 98.
Beddingfield, John A., assignor of one-half to R. D. Feagin, Macon, Ga. Automobile-tire rim. No. 1,345,659; July 6; v. 276; p. 65.
Beecher, Milton F. (See Purdy, R. C., and Beecher.)
Beithon, Gilbert G., Bismarck, N. D. Toy. No. 1,345,343; July 6; v. 276; p. 4.
Belknap, Charles B. (See McOmber, Loren W., assignor.)
Bell, William E., assignor to The Bell Wrench Company, Tulsa, Okla. Ratchet pipe-wrench. No. 1,345,983; July 6; v. 276; p. 130.
Bell Wrench Company, The. (See Bell, William E., assignor.)
Bendix, Vincent, Chicago, Ill. Engine-starter. No. 1,345,576; July 6; v. 276; p. 49.
Benham, Edgar M. (See Benham, William T. and E. M.)
Benham, Edgar M., Norwood, Ohio, assignor, by mesne assignments, to The Mosler Lock Company, Cincinnati, Ohio. Combination-lock. No. 1,345,574; July 6; v. 276; p. 49.
Benham, William T. and E. M., Norwood, assignors, by mesne assignments, to The Mosler Lock Company, Cincinnati, Ohio. Combination-lock. No. 1,345,575; July 6; v. 276; p. 49.
Benjamin Electric Manufacturing Company. (See Benjamin, Reuben B., assignor.)
Benjamin, Maxwell W., *et al.* (See Hadrich, George, assignor.)
Benjamin, Reuben B., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill. Water-tight connection for electrical conductors. No. 1,345,473; July 6; v. 276; p. 29.
Bennett, Charles H., Mount Morris, N. Y. Toothpick-dispensing device. No. 1,345,984; July 6; v. 276; p. 130.
Berkshire, William A., Ocheyedan, Iowa. Silo-brace. No. 1,345,985; July 6; v. 276; p. 130.
Betts, Albert, *et al.* (See Tullis, John T., assignor.)

Betzoldt, Theodore C., *et al.* (See Hadrich, George, assignor.)

Biddison, Pascal M., Columbus, and H. T. Boyd, Homer Ohio. Distilling petroleum. No. 1,345,740; July 6 v. 276; p. 80.

Bischoff, Herman, assignor to Defiance Button Machin Co., New York, N. Y. Plaiting-machine. No. 1,345,474 July 6; v. 276; p. 29.

Bissell, Carl H., assignor to Crouse-Hinds Company, Syracuse, N. Y. Lamp-shade holder. No. 1,345,741; July 6 v. 276; p. 81.

Blackstone, George M. (See Carter, Frank and E., as signors.)

Blaine, Joseph R., Oak Park, assignor to Miehle Printing Press & Manufacturing Company, Chicago, Ill. Sheet guide adjustment. No. 1,345,742; July 6; v. 276; p. 81

Blandford, George G., Herring Neck, Newfoundland. Adjustable bracket. No. 1,345,344; July 6; v. 276 p. 4.

Blount, Harry, Oak Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Means for grinding and slotting carbon disks and the like. No. 1,345,743; July 6; v. 276; p. 81.

Blume, Milton E., New York, N. Y. Copy-holder for typewriters. No. 1,345,986; July 6; v. 276; p. 130.

Bocking, Frederick W., Rifle, Colo. Cushion-support. No. 1,345,987; July 6; v. 276; p. 131.

Boehm, Rudolph A., assignor to Rickert-Shafter Company, Erie, Pa. Collapsible tap. No. 1,345,744; July 6; v. 276; p. 81.

Bogart, John A., Port Chester, assignor to Alberger Gas Engine Company, Buffalo, N. Y. Expansion-joint. (Reissue.) No. 14,906; July 6; v. 276; p. 153.

Bohannon, David D., Berkeley, Calif. Resilient wheel. No. 1,345,827; July 6; v. 276; p. 98.

Dawson, Arthur T., and G. T. Buckham, assignors to Vickers Limited, Westminster, London, England. Ordnance breech mechanism. No. 1,345,536; July 6; v. 276; p. 41.

Dawson Manufacturing Company. (See Dawson, Sidney, assignor.)

Dawson, Sidney, assignor to Dawson Manufacturing Company, Chicago, Ill. Grease-cup. No. 1,345,434; July 6; v. 276; p. 21.

De Aguiar, Pedro P., Habana, Cuba. Condiment-holder. No. 1,346,007; July 6; v. 276; p. 134.

De Beaumont, Norman, New York, N. Y. Belt. No. 1,345,750; July 6; v. 276; p. 83.

Defiance Button Machine Co. (See Bischoff, Herman, assignor.)

De Leeuw, Joseph, The Hague, Netherlands. Keyless lock. No. 1,346,080; July 6; v. 276; p. 149.

Demling, John W. (See Franck, Val F., assignor.)

Devarco, Paul, West Hoboken, N. J. Reversible broom and the like. No. 1,345,353; July 6; v. 276; p. 6.

Devey, Walter A., American Fork, Utah. Automatic weighing apparatus. No. 1,345,838; July 6; v. 276; p. 100.

Dewrance, John, London, England. Multiple-way stop-valve. No. 1,345,751; July 6; v. 276; p. 83.

Diebold, Alfred J., Pittsburgh, Pa. Telephone-receiver holder. No. 1,345,839; July 6; v. 276; p. 100.

Diederich, Hunt, New York, N. Y. Electric lamp and fan. No. 1,345,752; July 6; v. 276; p. 83.

Di Maggio, Vincenzo, New York, N. Y. Shoe-support. No. 1,346,008; July 6; v. 276; p. 134.

Dio-Kads Corporation. (See Diodato, Frank A., assignor.)

Diodato, Frank A., North Collins, assignor to Dio-Kads Corporation, Buffalo, N. Y. Automatic or safety train-stop mechanism. No. 1,345,753; July 6; v. 276; p. 83.

Dion, Amédée. (See Dion, Bruno and A.)

Dion, Bruno and A., Ste. Therese de Blainville, Quebec, Canada. Band-cutter and feeder. No. 1,345,588; July 6; v. 276; p. 51.

Doerflinger, William F., Arrochar, N. Y. Lacquer enamel. No. 1,345,354; July 6; v. 276; p. 6.

Donavon, Joseph P., Lompoc, Calif. Insulating material. No. 1,345,666; July 6; v. 276; p. 66.

Dossert, John J. (See Hastings, H. P., and Dossert.)

Dougan, Kennedy, Minneapolis, Minn. Wheat-steamer. No. 1,345,840; July 6; v. 276; p. 100.

Doughty, Herman W., Binghamton, N. Y., assignor, by mesne assignments, to The Gamewell Fire Alarm Telegraph Company, Newton Upper Falls, Mass. Signal-recorder. No. 1,345,355; July 6; v. 276; p. 6.

Draper Corporation. (See Stone, Melvin L., assignor.)

Drone, Clarence J., Minneapolis, Minn. Tire. No. 1,346,081; July 6; v. 276; p. 149.

Dubilier, William, New York, N. Y. Condenser and making same. No. 1,345,754; July 6; v. 276; p. 84.

Duncan, Raymond, New York, N. Y. Stop mechanism for talking-machines. No. 1,346,082; July 6; v. 276; p. 149.

Dunhill, Alfred, London, England. Receptacle for cigar or cigarette holders. No. 1,345,356; July 6; v. 276; p. 6.

Dunn, Edwin S. (See Leisen, F. J., and Dunn.)

Durkee, Charles S., Grasmere, N. Y. Automatic self-contained fire-extinguisher. No. 1,345,435; July 6; v. 276; p. 21.

Eastman, James H., Detroit, Mich. Electrotherapeutic apparatus. No. 1,345,537; July 6; v. 276; p. 41.

Edgar, Robert A., assignor of one-fourth to H. T. Rentfroe and one-eighth to J. A. Sellers, Carlyle, Kans. Car-door. No. 1,345,755; July 6; v. 276; p. 84.

Edison Electric Appliance Company. (See Richardson, Earl H., assignor.)

Edling, Matthias, and W. Falk, Iron River, Mich. Resilient wheel. No. 1,345,912; July 6; v. 276; p. 115.

Ekstrom, Ernest S., Rosholt, S. D. Latch. No. 1,345,913; July 6; v. 276; p. 116.

Elgin Gas Motor Company. (See Thompson, Herbert L., assignor.)

Ellis, Carleton, Montclair, N. J. Hydrogenation. No. 1,345,589; July 6; v. 276; p. 52.

Ellis, James M., Canton, Ill. Equalizer. No. 1,346,097; July 6; v. 276; p. 152.

Ellis, Ridsdale, Oak Park, Ill., assignor to P. Carpenter, Glenview, Ill. Heater for cooling systems. No. 1,345,923; July 6; v. 276; p. 117.

Emco Manufacturing Company. (See Taber, George H., assignor.)

Emerson Phonograph Company. (See Emerson, Victor H., assignor.)

Emerson, Victor H., New York, N. Y., assignor to Emerson Phonograph Company, Inc., Talking-machine. No. 1,345,756; July 6; v. 276; p. 84.

Emmert, William H., Chicago, Ill. Game device. No. 1,345,914; July 6; v. 276; p. 116.

Emmet, William L. R., Schenectady, N. Y., assignor to General Electric Company. Propulsion of submarine vessels. No. 1,345,757; July 6; v. 276; p. 84.

Engel, August F., Defiance, Ohio. Tire-holder. No. 1,346,083; July 6; v. 276; p. 150.

Engelbrecht, Julius, Boone, Colo. Carrying-truck. No. 1,345,667; July 6; v. 276; p. 66.

Estes, Jerry M., Breckinridge, Okla. Deraller. No. 1,346,009; July 6; v. 276; p. 135.

Evans, William, Uvalde, Tex. Key-Ring Clip. No. 1,345,357; July 6; v. 276; p. 6.

Evans, William C., Sedalia, Mo., and S. M. Bancroft, Wichita, Kans., assignors, by mesne assignments, to The Carburetor Lock Corporation. Carbureter-lock. No. 1,345,841; July 6; v. 276; p. 101.
Ewry, Charles S., Portland, Ind. Egg-tray. No. 1,345,483; July 6; v. 276; p. 31.
Fair, George A., Detroit, Mich. Window. No. 1,345,915; July 6; v. 276; p. 116.
Fairbanks, Ephraim W., San Diego, Calif. Automobile-wheel. No. 1,346,064; July 6; v. 276; p. 150.
Fairchild, Harry P., New York, N. Y. Magazine-pencil. No. 1,345,436; July 6; v. 276; p. 21.
Fairchild, Samuel P. Mountain Home, Idaho. Auxiliary car-step. No. 1,345,668; July 6; v. 276; p. 66.
Falk, William. (See Edling, M., and Falk.)
Farnham, Dana C. (See Hiner, O. W., and Farnham.)
Farnham, Eli A., Jr. (See Hiner, O. W., and Farnham.)
Fayant, J. B. (See Manker, Charles C., assignor.)
Feagin, R. Douglas. (See Beddingfield, John A., assignor.)
Fehr, Frank, Louisville, Ky. Process and apparatus for extracting alcohol from liquids. No. 1,345,437; July 6; v. 276; p. 21.
Feiden, Peter, Jr., St. Joseph, Mo. Wheel-guard. No. 1,345,916; July 6; v. 276; p. 116.
Fishbaugh, William, Newark, Ohio. Vulcanizer. No. 1,346,085; July 6; v. 276; p. 150.
Fisher, Arthur W., Wilkinsburg, and C. S. Snavely, Pittsburgh, assignors to The Union Switch & Signal Company, Swissvale, Pa. Electrical coil. No. 1,345,484; July 6; v. 276; p. 31.
Fisher, Louis M., Clarksdale, Mo. Automatic automobile-jack. No. 1,345,842; July 6; v. 276; p. 101.
Fitzgerald, Frank E., Watertown, N. Y. Trousers-support. No. 1,345,917; July 6; v. 276; p. 116.
Fjellman, Bengt W. (See Wingquist, S. G., and Fjellman.)
Fluitkote Company, The. (See Overbury, Frederick C., assignor.)
Foggie, William, Brooklyn, N. Y. Manicuring device. No. 1,345,918; July 6; v. 276; p. 116.
Folsom, Arthur V., Jacksonville, Fla. Solar steam-generator. No. 1,345,758; July 6; v. 276; p. 84.
Foltz, Ira W., Chicago, Ill. Arch for furnaces. No. 1,346,010; July 6; v. 276; p. 135.
Ford, Matthew A., Rockford, Ill. Gridiron. No. 1,345,590; July 6; v. 276; p. 52.
Ford, Robert H., *et al.* (See Priest, H. M., Ford, Greenabaum, and Richardson.)
Fortier, John J., and J. K. Sherwood, Grand Rapids, Mich.; said Sherwood, assignor to said Fortier. Oiler for loose pulleys. No. 1,345,843; July 6; v. 276; p. 101.
Fortuna-Werke, Spezialmaschinenfabrik, G. m. b. H. (See Loose, Johannes, assignor.)
Foster Brothers Manufacturing Company. (See Foster, William B., assignor.)
Foster-Johnson Reamer Company. (See Johnson, William B., assignor.)
Foster, William B., assignor to Foster Brothers Manufacturing Company, Utica, N. Y. Cushion for sliding-side cribs. No. 1,345,485; July 6; v. 276; p. 31.
Franc, Joseph M. E., St. Vallier, France. Disk wheel for motor-cars. No. 1,345,759; July 6; v. 276; p. 85.
Franck, Val F., assignor of one-half to J. W. Deming, Louisville, Ky. Rail-clamp. No. 1,345,844; July 6; v. 276; p. 101.
Fricker, Anthony, Cleveland, Ohio. Snowplow. No. 1,345,438; July 6; v. 276; p. 22.
Frye, Edwin P., Milburn, W. Va. Invalid's bed. No. 1,345,760; July 6; v. 276; p. 85.
Fuel Economy Company. (See Livingstone, Frank M., assignor.)
Fuller, Silas S., Lewiston, Me. Clamping device. No. 1,345,358; July 6; v. 276; p. 6.
Fulton Company, The. (See Fulton, Weston M., assignor.)
Fulton, James J., Guerneville, Calif. Centrifugal clothes-washing machine. No. 1,345,761; July 6; v. 276; p. 85.
Fulton, Weston M., assignor to The Fulton Company, Knoxville, Tenn. Encased radiator. No. 1,345,591; July 6; v. 276; p. 52.
Funk, Carlyle B., Chicago, Ill. Hydraulic transmission. No. 1,346,086; July 6; v. 276; p. 150.
Furry, Samuel H., Lancaster, Ohio. Road-crossing. No. 1,346,011; July 6; v. 276; p. 135.
Fynn, Valère A., assignor to Wagner Electric Manufacturing Company, St. Louis, Mo. Alternating-current motor. No. 1,345,538; July 6; v. 276; p. 42.
Fynn, Valère A., assignor to Wagner Electric Manufacturing Company, St. Louis, Mo. Speed-regulating apparatus. No. 1,345,539; July 6; v. 276; p. 42.
Fynn, Valère A., assignor to Wagner Electric Manufacturing Company, St. Louis, Mo. Speed-regulating apparatus. No. 1,345,540; July 6; v. 276; p. 42.
Gabbett-Fairfax, Hugh W., London, England. Automatic firearm. No. 1,346,012. July 6; v. 276; p. 135.
Gabelman, Charles, assignor to Packard Motor Car Company, Detroit, Mich. Grinding-machine. No. 1,345,919; July 6; v. 276; p. 117.
Galbraith, Hugh, Wahiawa, Oahu, Hawaii. Violin attachment. No. 1,346,013; July 6; v. 276; p. 135.
Garrett, Walter B., and H. M. Hoffman, Carrollbersville, Mo. Lock-operated circuit-closer. No. 1,346,087; July 6; v. 276; p. 150.
Garwitt, Louis, New York, N. Y. Shawl-muffler. No. 1,346,014; July 6; v. 276; p. 135.
Gates, Louis W., assignor to Ternstedt Manufacturing Company, Detroit, Mich. Windshield-wiper. No. 1,345,541; July 6; v. 276; p. 42.
Gamewell Fire Alarm Telegraph Company, The. (See Doughty, Herman W., assignor.)
Gardner, Charles F. (See Cartwright, Ernest O., assignor.)
Génault, Albert, Courbevoie, France. Fuel-heater. No. 1,345,762; July 6; v. 276; p. 85.
General Chemical Company. (See Kyrides, Lucas P., assignor.)
General Electric Company. (See Abbott, Charles C., assignor.)
General Electric Company. (See Emmet, William L. R., assignor.)
General Electric Company. (See Kubo, Masakichi, assignor.)
General Electric Company. (See Minor, W. F., Keller, and Ralph, assignors.)
General Electric Company. (See Porter, Willard E., assignor.)
General Electric Company. (See Ruder, William E., assignor.)
General Electric Company. (See Stephens, Howard O., assignor.)
Gentile, Frank T., assignor of one-half to K. M. Kleeman, Canton, Ohio. Automatic sprinkler. No. 1,345,592; July 6; v. 276; p. 52.
Gibbons, Francis J., Wolverhampton, England. Metal window frame and sash of the sliding-sash type. No. 1,345,669; July 6; v. 276; p. 67.
Gibson, William A., and C. E. Needham, Allentown, Pa., assignors to Bradley Pulverizer Company, Boston, Mass. Air-separator. No. 1,346,015; July 6; v. 276; p. 136.
Giddens, Francis, Ottawa, Ontario, Canada. Incubator. No. 1,345,593; July 6; v. 276; p. 52.
Gilbert & Barker Manufacturing Company. (See Davis, John B., assignor.)
Gilbert, Joseph M. (See Carlisle, Fred B., assignor.)
Glenn, George M. (See Hormel, George W., assignor.)
Glennon, Edward, Brooklyn, N. Y. Flush-valve. No. 1,345,920; July 6; v. 276; p. 117.
Godefroy, Marie L., Paris, France. Exposure-meter. No. 1,346,088; July 6; v. 276; p. 151.
Goertz, August, and Company. (See Goertz, F., and Whitcomb, assignors.)
Goertz, Frederick, Newark, and R. Whitcomb, Elizabeth, N. J., assignors to August Goertz and Company. Container. No. 1,345,359; July 6; v. 276; p. 5.
Goertz, Frederick, Newark, and R. Whitcomb, Elizabeth, N. J. Container. No. 1,345,360; July 6; v. 276; p. 7.
Gold, Anna, Fredericksburg, Tex. Combination-garment. No. 1,345,763; July 6; v. 276; p. 85.
Goldberg, Solomon H., assignor to The West Coast Roofing and Manufacturing Company, Chicago, Ill. Producing roofing material. No. 1,345,922; July 6; v. 276; p. 117.
Goldstein, Alexander. (See Moran, Walter R., assignor.)
Gomsrud, Axel, Portland, Oreg. Concrete construction. No. 1,346,016; July 6; v. 276; p. 136.
Good Inventions Co. (See Good, John, assignor.)
Good Inventions Co. (See Lucke, C. E., and Good, assignors.)
Good, John. (See Lucke, C. E., and Good.)
Good, John, assignor to Good Inventions Co., Brooklyn, N. Y. Heating apparatus. No. 1,345,361; July 6; v. 276; p.
Goodman, Milton, New York, N. Y. Toy book. No. 1,346,017; July 6; v. 276; p. 136.
Graham, John G., Granite City, Ill. Sheet-metal-doubling machine. (Reissue.) No. 14,907; July 6; v. 276; p. 154.
Green, Harry J., Sebring, Ohio. Mantle-ring-forming machine. No. 1,345,845; July 6; v. 276; p. 101.

McEwan, Frank J., Chicago, Ill. Combination-heel. No. 1,346,038; July 6; v. 276; p. 141.

McGill Manufacturing Company. (See Hasselstrom, Ivar S., assignor.)

McKibbin, Alexander, Chicago, Ill. Valve. No. 1,345,382; July 6; v. 276; p. 11.

McKibbin, Alexander, Chicago, Ill. Automatic controller. No. 1,345,383; July 6; v. 276; p. 11.

McNerny, Clyde J., assignor to H. Loeb and H. Hurst, Memphis, Tenn. Oil-burner. No. 1,345,612; July 6; v. 276; p. 56.

McOmber, Loren W., Milwaukee, Wis., assignor of one-half to C. B. Belknap, Detroit, Mich. Treating hydrocarbons. No. 1,345,452; July 6; v. 276; p. 24.

McRae, Arthur A., Attleboro, Mass. Cuff-link. No. 1,346,039; July 6; v. 276; p. 141.

McRae, Daniel, Central Islip, N. Y. Rowing-gear. No. 1,346,040; July 6; v. 276; p. 141.

McRae, John, Vancouver, British Columbia, Canada. Marine-engine-operation indicator. No. 1,345,384; July 6; v. 276; p. 11.

Maag, Max, Zurich, Switzerland. Gear-cutting machine. (Reissue.) No. 14,908; July 6; v. 276; p. 154.

Maag, Max, Zurich, Switzerland. Gear-cutting machine. (Reissue.) No. 14,909; July 6; v. 276; p. 154.

Mabie, Ralph R. New York, N. Y. Support for shingles. No. 1,345,683; July 6; v. 276; p. 70.

Macdonald, David B., Leicester, England. Toe-puff and like stiffener for boots and shoes. No. 1,345,944; July 6; v. 276; p. 122.

Macfarlane, George T., Pinner, England. Winch. No. 1,345,613; July 6; v. 276; p. 56.

MacFarlane, William M., Scranton, Pa. Coal-separator. No. 1,345,453; July 6; v. 276; p. 24.

Macheroux, Louis, assignor of one-half to K. Matheus, Chicago, Ill. Elastic extension device. No. 1,345,945; July 6; v. 276; p. 122.

Maclagen, John C. M., Glasgow, Scotland. Piston and piston-rod for internal-combustion engines. No. 1,346,041; July 6; v. 276; p. 141.

Maclaren, James G., Harrison, N. Y. Pneumatic-despatch-tube apparatus. No. 1,346,042; July 6; v. 276; p. 141.

Maire, Auguste, Argenteuil, assignor to Societe Lorraine Des Anciens Etablissements De Dietrich & Cie., De Luneville, Paris, France. Means for attaching sheet-steel jackets to cast-iron motor-cylinders for water-cooling and other purposes. No. 1,345,684; July 6; v. 276; p. 70.

Maize, Frank P., Portland, Oreg. Auto-pedals lock. No. 1,346,098; July 6; v. 276; p. 152.

Malleable Iron Fittings Co., The. (See Pickop, George B., assignor.)

Manker, Charles C., Des Moines, Iowa, assignor of one-half to J. B. Fayant, Golconda, Nev. Internal-combustion engine. No. 1,345,614; July 6; v. 276; p. 56.

Marathon Electric & Manufacturing Co. (See Kimble, Austin, assignor.)

Marks, Isidore, assignor to Keystone Manufacturing Company, Boston, Mass. Motion-picture machine. No. 1,345,793; July 6; v. 276; p. 91.

Marshick, Oliver J. (See Crosby, E. L., and Marshick.)

Mascart, Charles, Croissy-sur-Seine, France. Transporting and elevating apparatus. No. 1,345,454; July 6; v. 276; p. 25.

Maske, Robert W., Chicago, Ill. Faucet. No. 1,345,615; July 6; v. 276; p. 56.

Mason, Charles E., Detroit, Mich., assignor to G. Waldref, St. Paul, Minn. Manifold-bracket for hydraulic hoists. No. 1,345,616; July 6; v. 276; p. 56.

Massi, Anthony, Rochester, N. Y. Check-printer. No. 1,345,794; July 6; v. 276; p. 91.

Masury, Alfred F., and R. S. Bolger, assignors to International Motor Company, New York, N. Y. Clutch-control device. No. 1,345,685; July 6; v. 276; p. 70.

Mathews, Karl. (See Macheroux, Louis, assignor.)

Maxwell, James T. (See Van Vleet, C. W., and Haley.)

Maxwell, James T., *et al.* (See Van Vleet, Charles W., assignor.)

Mead, Ezra B., Ottumwa, Iowa. Boring-machine attachment. No. 1,345,455; July 6; v. 276; p. 25.

Mecky, A., Company. (See Papini, Antonio, assignor.)

Medart, Fred, Manufacturing Company. (See Medart, Philip S., assignor.

Medart, Philip S., assignor to Fred Medart Manufacturing Company, St. Louis, Mo. Playground-swing. No. 1,345,385; July 6; v. 276; p. 11.

Merrill Company, The. (See Kuryla, Michael H., assignor.)

Metesser, Lewis, New Orleans, La. Valve. No. 1,345,686; July 6; v. 276; p. 70.

Meyer, Bernhard H., New Haven, Conn. Drapery-clip. No. 1,345,868; July 6; v. 276; p. 105.

Meyer, Geo. J., Manufacturing Company. (See Meyer, George J., assignor.)

Meyer, George J., assignor to Geo. J. Meyer Manufacturing Company, Milwaukee, Wis. Loader for bottle-washers. No. 1,345,617; July 6; v. 276; p. 57.

Meyer, Nicolaas E. G. (See Schoute C., van Heyst, and Meyer.)

Meyers, Alfred M., Merriam, Kans. Plate-bending machine. No. 1,345,386; July 6; v. 276; p. 12.

Meyfarth, John L., Chicago, Ill. Coin-controlled vending-machine. No. 1,345,499; July 6; v. 276; p. 34.

Miehle Printing Press & Manufacturing Company. (See Blaine, Joseph R., assignor.)

Milker, Herbert P., assignor to C. J. Tagliabue Manufacturing Co., Brooklyn, N. Y. Thermometer. No. 1,345,687; July 6; v. 276; p. 70.

Milker, Herbert P., assignor to Charles J. Tagliabue Manufacturing Co., Brooklyn, N. Y. Thermometer. No. 1,345,795; July 6; v. 276; p. 92.

Miller, James A., Beeville, Tex. Plow attachment. No. 1,345,869; July 6; v. 276; p. 106.

Milne, Robert. (See Johnson, O. W., and Milne.)
Miner, William H. (See O'Connor, John F., assignor.)
Minor, William F., P. C. Keller, Cleveland, and T. W. Rolph, Sebring, Ohio, assignors to General Electric Company. Reflector. No. 1,345,796; July 6; v. 276; p. 92.
Mitchell, Leon, Dorchester, Mass. Dough-dropper for frying doughnuts. No. 1,345,500; July 6; v. 276; p. 84.
Miyasaki, Yuske, McKees Rocks, Pa. Locking device for levers. No. 1,345,618; July 6; v. 276; p. 57.
Mizer, Joseph J., and V. Jakob, assignors to Walker Manufacturing Company, Racine, Wis. Lifting-jack. No. 1,345,797; July 6; v. 276; p. 92.
Montague, Edward, Chicago, Ill. Valve. No. 1,345,548; July 6; v. 276; p. 44.
Moody, John P. (See Moody, William F., assignor.)
Moody, William F., assignor of one-tenth to J. P. Moody, Denver, Colo. Folding camp-berth. No. 1,346,043; July 6; v. 276; p. 142.
Moomy, Joseph G., Erie, Pa. Wrench mechanism. No. 1,345,619; July 6; v. 276; p. 57.
Moore, Frank P., St. Joseph, Mo. Blower and suction carpet and rug cleaner. No. 1,346,044; July 6; v. 276; p. 142.
Moore, James E. A. (See Peck, F. A., and Moore.)
Moore, Swinfen B., Huddersfield, England. Change-speed gear. No. 1,345,688; July 6; v. 276; p. 71.
Moore, William F., assignor to G. S. Parker and W. F. Palmer, Janesville, Wis. Pressure-bar mechanism. No. 1,346,045; July 6; v. 276; p. 142.
Moran, Walter R., assignor of one-half to A. Goldstein, Worcester, Mass. Automobile-alarm. No. 1,345,387; July 6; v. 276; p. 12.
Morehouse, Clarence A., Lawrence, Kans. Chain-fastener. No. 1,346,046; July 6; v. 276; p. 142.
Morgan & Wright. (See Wetlon, Harry A., assignor.)
Morris, Herbert, Limited. (See Purnell, W. H., and Butterworth, assignors.)
Morris, Joseph, Elton, near Chester, England. Shell or projectile. No. 1,345,689; July 6; v. 276; p. 71.
Morrison, Dennis W., Indiana Harbor, Ind. Lattice-truss. No. 1,345,501; July 6; v. 276; p. 84.
Mortimer, Louis A., assignor to Western Electric Company, Incorporated, New York, N. Y. Electrical relay. No. 1,345,798; July 6; v. 276; p. 92.
Mosler Lock Company, The. (See Benham, Edgar M., assignor.)
Mosler Lock Company, The. (See Benham, William T. and E. M., assignors.)
Mowbray, Archibald J. H. (See Jones, A. W. Bryden, and Mowbray.)
Moyer, John A., Harriman, Pa. Water glass and column reflector and protector. No. 1,345,799; July 6; v. 276; p. 92.
Mueller, Adolph, trustee. (See Mueller, Philip, assignor.)
Mueller, Philip, assignor to A. Mueller, trustee, Decatur, Ill. Eel-guard for cocks. No. 1,345,946; July 6; v. 276; p. 122.
Mueller, Rudolph J. J., assignor to Universal Oxygen Company, Sheboygan, Wis. Valve for high-pressure-fluid containers. No. 1,345,388; July 6; v. 276; p. 12.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 6TH DAY OF JULY, 1920.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Acoustic device. G. B. Thomas. No. 1,345,717; July 6; v. 276; p. 77.
Adding-machine. J. T. Hurley. No. 1,345,781; July 6; v. 276; p. 89.
Adjustable bracket. G. G. Blandford. No. 1,345,344; July 6; v. 276; p. 4.
Aeroplane. H. A. Robinson. No. 1,345,885; July 6; v. 276; p. 110.
Aeroplane. C. R. Wilson. No. 1,345,726; July 6; v. 276; p. 78.
Agricultural implement. J. W. Scott. No. 1,345,964; July 6; v. 276; p. 126.
Agricultural-implement seat. J. C. Brian. No. 1,345,830; July 6; v. 276; p. 98.
Air-compressor. B. D. Thompson. No. 1,345,973; July 6; v. 276; p. 128.
Air-compressors, Dust-arrester for. J. R. Ricketts. No. 1,345,405; July 6; v. 276; p. 16.
Air or water. Apparatus for the determination of vertical velocities in or of. C. Schoute, F. A. van Heyst, and N. E. G. Meyer. No. 1,345,556; July 6; v. 276; p. 45.
Air-separator. W. A. Gibson and C. E. Needham. No. 1,346,015; July 6; v. 276; p. 136.
Air-washer. E. J. Kratochvil. No. 1,345,681; July 6; v. 276; p. 69.
Airplane. C. F. Stanley. No. 1,345,970; July 6; v. 276; p. 127.
Alarm: *See*—
Automobile-alarm.
Alcohol from liquids, Process and apparatus for extracting. F. Fehr. No. 1,345,437; July 6; v. 276; p. 21.
Alkali-metal hydrates, Producing. H. W. Charlton. No. 1,346,002; July 6; v. 276; p. 133.
Alternating-current motor. V. A. Fynn. No. 1,345,538; July 6; v. 276; p. 42.
Ammunition-carrier. A. A. Lethern. No. 1,345,864; July 6; v. 276; p. 105.
Amusement device. A. McK. Waters. No. 1,345,647; July 6; v. 276; p. 62.
Anti-aircraft, Apparatus for regulating the firing of. J. L. Routin. No. 1,345,707; July 6; v. 276; p. 74.
Anti-aircraft-control system. J. L. Routin. No. 1,345,697; July 6; v. 276; p. 72.
Anti-aircraft fire control. J. L. Routin. No. 1,345,701; July 6; v. 276; p. 73.
Anti-aircraft fire-control apparatus. J. L. Routin. No. 1,345,705; July 6; v. 276; p. 74.
Anti-aircraft gunfire control. J. L. Routin. No. 345,698; July 6; v. 276; p. 72.
Anti-aircraft gunfire control apparatus. J. L. Routin. No. 1,345,703; July 6; v. 276; p. 74.
Anti-aircraft gunfire-control system. J. L. Routin. No. 1,345,700; July 6; v. 276; p. 73.
Anti-aircraft tracker. J. L. Routin. No. 1,345,704; July 6; v. 276; p. 74.
Auto-pedals lock. F. P. Maize. No. 1,346,098; July 6; v. 276; p. 152.
Automatic sprinkler. F. T. Gentile. No. 1,345,592; July 6; v. 276; p. 52.
Automobile-alarm. W. R. Moran. No. 1,345,387; July 6; v. 276; p. 12.
Automobile-bumper. J. H. Sager. No. 1,345,553; July 6; v. 276; p. 45.
Automobile-bumper. J. H. Sager. No. 1,345,554; July 6; v. 276; p. 45.
Automobile direction-indicator. J. Sobocinski. No. 1,345,562; July 6; v. 276; p. 47.
Automobile-jack, Automatic. L. M. Fisher. No. 1,345,842; July 6; v. 276; p. 101.
Automobile-lock. W. Henckler. No. 1,345,672; July 6; v. 276; p. 67.
Automobile-signal. W. A. Lee. No. 1,345,863; July 6; v. 276; p. 105.
Automobile-signal. E. G. Shane. No. 1,345,557; July 6; v. 276; p. 46.
Automobile-wheel. E. W. Fairbanks. No. 1,346,084; July 6; v. 276; p. 150.
Automonocycle. L. G. Wilson. No. 1,345,727; July 6; v. 276; p. 78.
Axles, crank-shafts, &c., Device for refinishing. G. H. Taber. No. 1,345,809; July 6; v. 276; p. 95.
Backrest, Adjustable. W. J. Koch. No. 1,345,785; July 6; v. 276; p. 90.
Bagging-machine. L. C. Lorenson. No. 1,345,866; July 6; v. 276; p. 105.
Bait, Artificial. F. C. Keeling. No. 1,345,600; July 6; v. 276; p. 54.
Bake-pan. J. J. O'Donnell. No. 1,345,625; July 6; v. 276; p. 58.
Baking apparatus. G. W. Bollinger. No. 1,346,076; July 6; v. 276; p. 148.
Ballonnet-gage. S. Truscott. No. 1,345,417; July 6; v. 276; p. 18.
Ball-rack. T. R. Hayes and L. E. Kitson. No. 1,345,769; July 6; v. 276; p. 87.
Band-cutter and feeder. B. and A. Dion. No. 1,345,588; July 6; v. 276; p. 51.
Bandage, Hot-water and ice. W. F. Augustine. No. 1,345,906; July 6; v. 276; p. 114.
Bar: *See*—
Draw-bar.
Barotype-machine. H. E. Brown. No. 1,345,060; July 6; v. 276; p. 65.
Battery-carbons, Terminal post for. E. W. Henger. No. 1,345,853; July 6; v. 276; p. 103.
Bearing, Gravity self-centering roller-. J. F. O'Connor. No. 1,345,805; July 6; v. 276; p. 94.
Bearing, Line-shaft. J. T. Crane. No. 1,345,534; July 6; v. 276; p. 41.
Bearing-puller. F. J. Heinrich. No. 1,346,023; July 6; v. 276; p. 137.
Bed, Automobile-. G. W. Young. No. 1,345,820; July 6; v. 276; p. 96.
Bed, Invalid's. E. P. Frye. No. 1,345,760; July 6; v. 276; p. 85.
Belt. N. de Beaumont. No. 1,345,750; July 6; v. 276; p. 83.
Belt-tightener. C. L. Rayfield. No. 1,345,461; July 6; v. 276; p. 26.
Belting, Machine for making round. A. E. Barker. No. 1,345,907; July 6; v. 276; p. 114.
Benzene, Producing halogenated homologues of. L. P. Kyrides. No. 1,345,373; July 6; v. 276; p. 9.
Berth, Folding camp-. W. F. Meody. No. 1,346,043; July 6; v. 276; p. 142.
Bevel and miter gage. J. S. M. Nicholson. No. 1,346,050; July 6; v. 276; p. 143.
Beverages, Apparatus for cooling and dispensing. E. R. Brown. No. 1,345,746; July 6; v. 276; p. 82.
Binders, Shocker attachment for grain-. J. A. McElroy. No. 1,345,381; July 6; v. 276; p. 11.
Bird-trap. J. Sudul. No. 1,345,716; July 6; v. 276; p. 76.
Bit: *See*—
Drill-bit.
Blade-mounting. H. F. Schmidt. No. 1,345,642; July 6; v. 276; p. 61.
Blotter, Wrist or hand. P. Orzel. No. 1,345,872; July 6; v. 276; p. 107.
Board: *See*—
Bread-slicing board.
Boat and trunk combined. E. R. Thomas. No. 1,345,416; July 6; v. 276; p. 18.
Boiler arch and wall and means for supporting same. L. S. Shaw. No. 1,345,410; July 6; v. 276; p. 17.
Boilers, Economizer for transverse-drum. H. J. Kerr. No. 1,345,369; July 6; v. 276; p. 9.
Bolts, Manufacture of. G. Robergel. No. 1,346,058; July 6; v. 276; p. 144.
Boots and shoes, Toe-puff and like stiffener for. D. B. Macdonald. No. 1,345,944; July 6; v. 276; p. 122.
Boring-machine attachment. E. B. Mead. No. 1,345,455; July 6; v. 276; p. 25.
Bottle-cap remover. L. Myers. No. 1,345,948; July 6; v. 276; p. 123.
Bottle-closure. C. Hammer. No. 1,345,363; July 6; v. 276; p. 7.
Bottle-washers, Loader for. G. J. Meyer. No. 1,345,617; July 6; v. 276; p. 57.
Bottles, Wire-protector for nursing-. E. K. Wolfe. No. 1,345,654; July 6; v. 276; p. 63.
Box: *See*—
Cigar and cigarette box. Display-box.
Switch or receptacle box.
Box. W. C. Kitt. No. 1,345,784; July 6; v. 276; p. 90.
Brace: *See*—
Silo-brace.

Bracket: *See*—
Adjustable bracket. Wall-bracket.
Bracket. R. T. Newton. No. 1,346,048; July 6; v. 276; p. 143.
Brake: *See*—
Phonograph-brake. Skee-brake.
Breach-mat. J. R. Hewett. No. 1,345,771; July 6; v. 276; p. 87.
Bread, Manufacture of leavened. H. A. Kohman and R. Irvin. No. 1,345,680; July 6; v. 276; p. 69.
Bread-slicing board. C. L. Leonard. No. 1,345,376; July 6; v. 276; p. 10.
Brick, Light-weight refractory. R. C. Purdy and M. F. Beecher. No. 1,345,632; July 6; v. 276; p. 59.
Broom, Reversible. P. Devarco. No. 1,345,353; July 6; v. 276; p. 6.
Brush, Vacuum cleaning-. H. W. Wasenska. No. 1,345,424; July 6; v. 276; p. 19.
Buckle, Harness-. W. C. Reed. No. 1,345,956; July 6; v. 276; p. 124.
Building construction. E. Nottebohm. No. 1,345,871; July 6; v. 276; p. 106.
Burglar-protector. A. Horvitz. No. 1,345,444; July 6; v. 276; p. 23.
Burner: *See*—
Oil-burner.
Cabinet, Clothes-hanger. J. H. Nelson. No. 1,345,624; July 6; v. 276; p. 58.
Cabinet, Talking-machine. J. G. Providenti. No. 1,345,692; July 6; v. 276; p. 71.
Cable-clamp. Journaled. E. L. Crosby and O. J. Marshick. No. 1,345,351; July 6; v. 276; p. 5.
Cable, Towing-. C. B. Osmundsen. No. 1,345,873; July 6; v. 276; p. 107.
Camera, Gun-. E. C. Bass. No. 1,345,981; July 6; v. 276; p. 129.
Cans, Lever operating mechanism for oil-. G. Lidseen. No. 1,345,788; July 6; v. 276; p. 90.
Canning apparatus. F. P. McColl and W. W. Willison. No. 1,345,380; July 6; v. 276; p. 11.
Caps, Head-guard attachment for. G. B. Knight. No. 1,345,933; July 6; v. 276; p. 120.
Car-door. R. A. Edgar. No. 1,345,755; July 6; v. 276; p. 84.
Car door, Refrigerator-. J. F. O'Connor. No. 1,345,392; July 6; v. 276; p. 13.
Car, Drag-. R. Hamilton and E. J. Reimel. No. 1,345,439; July 6; v. 276; p. 22.
Car-step, Auxiliary. S. P. Fairchild. No. 1,345,668; July 6; v. 276; p. 66.
Car truck, Street-. T. A. Brewster. No. 1,345,528; July 6; v. 276; p. 40.
Cars, Disk wheel for motor-. J. M. E. Franc. No. 1,345,759; July 6; v. 276; p. 85.
Cars, Insulation for refrigerator-. J. F. O'Connor. No. 1,345,391; July 6; v. 276; p. 13.
Carbon disks, Means for grinding and slotting. H. Blount. No. 1,345,743; July 6; v. 276; p. 81.
Carbureter. T. Linga. No. 1,345,546; July 6; v. 276; p. 43.
Carbureter. H. L. Thompson. No. 1,345,516; July 6; v. 276; p. 37.
Carbureter-lock. W. C. Evans and S. M. Bancroft. No. 1,345,841; July 6; v. 276; p. 101.
Card, License-. C. H. Cornell. No. 1,346,005; July 6; v. 276; p. 134.
Carpet and rug cleaner, Blower and suction. F. P. Moore. No. 1,346,044; July 6; v. 276; p. 142.
Carrier: *See*—
Ammunition-carrier.
Carton-packing mechanism. A. W. Harris. No. 1,345,926; July 6; v. 276; p. 118.
Case: *See*—
Packing-case. Show-case.
Casket lock, Burial-. F. Lundberg. No. 1,345,451; July 6; v. 276; p. 24.
Caster. P. R. Nack. No. 1,345,622; July 6; v. 276; p. 57.
Caster-socket. C. S. Barnard. No. 1,345,908; July 6; v. 276; p. 114.
Cement-applying machine. A. Smolker. No. 1,345,512; July 6; v. 276; p. 36.
Chain-fastener. C. A. Morehouse. No. 1,346,046; July 6; v. 276; p. 142.
Chain, Link. F. C. Witt. No. 1,345,818; July 6; v. 276; p. 96.
Chair: *See*—
Convertible chair.
Chairs, Attachment for rocking-. J. B. Boyle. No. 1,345,745; July 6; v. 276; p. 82.
Changeable indicator. J. Hutchinson. No. 1,345,675; July 6; v. 276; p. 68.
Chassis. C. W. Van Vleet and R. E. Haley. No. 1,345,421; July 6; v. 276; p. 19.
Check-detector for check-actuated machines. A. D. Antoine and C. C. Travis. (Reissue.) No. 14,905; July 6; v. 276; p. 153.
Christmas tree, Knockdown. C. J. Carlstrand. No. 1,345,477; July 6; v. 276; p. 29.
Chuck, Drill-press. A. E. Church. No. 1,345,583; July 6; v. 276; p. 50.
Cigar and cigarette box. J. Kostka. No. 1,345,935; July 6; v. 276; p. 120.
Cigar-drill. R. R. Bailey. No. 1,345,736; July 6; v. 276; p. 80.
Cigar or cigarette holders, Receptacle for. A. Dunhill. No. 1,345,356; July 6; v. 276; p. 6.
Cigar-slitting attachment. W. N. Jackson. No. 1,345,677; July 6; v. 276; p. 68.
Circuit-closer, Lock-operated. W. B. Garrett and H. M. Hoffman. No. 1,346,087; July 6; v. 276; p. 150.
Circuit-closer, Speed-operated. F. E. Touchy. No. 1,346,067; July 6; v. 276; p. 146.
Clamp: *See*—
Cable-clamp. Rail-clamp.
Tire-clamp.
Clamping device. S. S. Fuller. No. 1,345,358; July 6; v. 276; p. 6.
Clasp. W. H. Stevens. No. 1,345,713; July 6; v. 276; p. 76.
Cleaner: *See*—

Tires and wheels, Tool for handling and manipulating vehicle. L. R. Schmertz. No. 1,345,889; July 6; v. 276; p. 110.
Tires, Valve-cap for pneumatic. R. P. Adams. No. 1,345,073; July 6; v. 276; p. 147.
Tire, Vehicle-. H. H. Holdaway. No. 1,345,777; July 6; v. 276; p. 88.
Tool, Diamond-point cutting-. P. Poulain. No. 1,346,056; July 6; v. 276; p. 144.
Tool, Grinding-. P. U. Loveiace. No. 1,346,036; July 6; v. 276; p. 140.
Tool, Hand scraping-. C. L. Aagaard. No. 1,345,658; July 6; v. 276; p. 65.
Tool, Pneumatic. M. D. Karles. No. 1,345,495; July 6; v. 276; p. 33.
Tool, Valve-stem. H. J. Wilgus. No. 1,345,651; July 6; v. 276; p. 63.
Tool, Welder's. R. O. Williams. No. 1,345,817; July 6; v. 276; p. 96.
Toothbrush, Folding. C. W. Lloyd. No. 1,345,939; July 6; v. 276; p. 121.
Torpedo-defense. E. Nazzareno. No. 1,345,623; July 6; v. 276; p. 58.
Toy. A. Peden. No. 1,346,053; July 6; v. 276; p. 144.
Toy. G. G. Beithon. No. 1,345,343; July 6; v. 276; p. 4.
Toy and savings-bank or collecting-box, Combined. R. E. Starkie. No. 1,345,414; July 6; v. 276; p. 17.
Toy book. M. Goodman. No. 1,346,017; July 6; v. 276; p. 136.
Toy vehicle, Equestrian. I. A. Burnett. No. 1,345,578; July 6; v. 276; p. 49.
Track, Overhead-carrier. P. M. Hassler and A. H. Neller. No. 1,345,851; July 6; v. 276; p. 102.
Tractor, Convertible cultivator-. E. B. McCartney. No. 1,345,498; July 6; v. 276; p. 34.
Train controlling and stopping mechanism, Automatic. F. C. Williams. No. 1,345,816; July 6; v. 276; p. 96.
Train-stop mechanism, Automatic or safety. F. A. Diodato. No. 1,345,753; July 6; v. 276; p. 83.
Trains, Automatic mechanism for stopping. S. P. Johnson. No. 1,345,599; July 6; v. 276; p. 54.
Transferring device. C. F. Pfanze. No. 1,345,950; July 6; v. 276; p. 123.
Transporting and elevating apparatus. C. Mascart. No. 1,345,454; July 6; v. 276; p. 25.
Trap: *See*—
Bird-trap.
Tray. L. Myers. No. 1,345,949; July 6; v. 276; p. 123.
Tree: *See*—
Christmas tree.
Tree-protector band. E. G. Perl. No. 1,345,690; July 6; v. 276; p. 71.
Trousers-support. F. E. Fitzgerald. No. 1,345,917; July 6; v. 276; p. 116.
Truck. G. S. Wood. No. 1,345,469; July 6; v. 276; p. 28.
Truck. T. G. Thomas. No. 1,345,564; July 6; v. 276; p. 47.
Truck, Carrying-. J. Engelbrecht. No. 1,345,667; July 6; v. 276; p. 66.
Truck-nose, Removable. G. S. Wood. No. 1,345,470; July 6; v. 276; p. 28.
Trucks, Driving apparatus for monorail-. R. A. McClure and W. W. Boulton. No. 1,345,867; July 6; v. 276; p. 106.
Tube-cleaner. P. J. Darlington. No. 1,345,480; July 6; v. 276; p. 30.
Tubes, Apparatus for forming. J. F. Pierce. No. 1,345,459; July 6; v. 276; p. 26.
Tubes, Device for cutting. J. F. Pierce. No. 1,345,458; July 6; v. 276; p. 25.
Tunnel-kiln. F. J. Leisen and E. S. Dunn. No. 1,345,605; July 6; v. 276; p. 54.
Turbine-buckets, Mounting for. A. T. Kasley. No. 1,345,678; July 6; v. 276; p. 69.
Turbine, Elastic-fluid. F. Hodgkinson. No. 1,345,674; July 6; v. 276; p. 68.
Turbine, Marine. H. F. Schmidt. No. 1,345,641; July 6; v. 276; p. 61.
Two-stroke motor, Multicylinder. M. A. Violet. No. 1,346,069; July 6; v. 276; p. 147.
Type-casting machines, Melting-pot and metal-injecting mechanism for. J. T. Carter. No. 1,346,077; July 6; v. 276; p. 148.
Typewriter tabulator device. W. L. White. No. 1,345,467; July 6; v. 276; p. 28.
Typewriters, Copyholder for. M. E. Blume. No. 1,345,986; July 6; v. 276; p. 130.
Typewriting and computing machine, Combined. H. L. Pitman. No. 1,345,460; July 6; v. 276; p. 26.
Typewriting and computing machine, Combined. H. L. Pitman. No. 1,345,877; July 6; v. 276; p. 107.
Typewriting-machine. C. Schlüns. No. 1,345,510; July 6; v. 276; p. 36.
Typewriting-machine. G. A. Seib. No. 1,345,894; July 6; v. 276; p. 112.
Undergarment. S. Wright, Jr. No. 1,345,728; July 6; v. 276; p. 79.
Urethroscope and like surgical instrument. M. C. Rimmer. No. 1,345,406; July 6; v. 276; p. 16.
Vacuum cleaning apparatus. E. T. S. Cliffe. No. 1,345,478; July 6; v. 276; p. 30.
Valve. A. McKibbin. No. 1,345,382; July 6; v. 276; p. 11.
Valve. E. Montague. No. 1,345,548; July 6; v. 276; p. 44.
Valve. J. Van Brunt. No. 1,345,518; July 6; v. 276; p. 37.
Valve. L. Metesser. No. 1,345,686; July 6; v. 276; p. 70.
Valve. W. Le Francois. No. 1,345,682; July 6; v. 276; p. 69.
Valve and means for cooling same. A. O. Dady. No. 1,345,535; July 6; v. 276; p. 41.
Valve, Automatic safety gas-. D. C. Carver. No. 1,346,000; July 6; v. 276; p. 133.
Valve-casings for wind-musical-instrument valves, Die for making. E. J. Gulick. No. 1,345,921; July 6; v. 276; p. 117.
Valve, Flush-. E. Glennon. No. 1,345,920; July 6; v. 276; p. 117.
Valve for high-pressure-fluid containers. R. J. J. Mueller. No. 1,345,388; July 6; v. 276; p. 12.
Valve, Multiple-way stop-. J. Dewrance. No. 1,345,751; July 6; v. 276; p. 83.
Valve, Throttle-. C. C. Hansen. No. 1,345,864; July 6; v. 276; p. 7.
Valve, Throttle-. P. D. Hibner. No. 1,345,772; July 6; v. 276; p. 87.
Vaporizer. M. K. Thayer. No. 1,345,563; July 6; v. 276; p. 47.
Vaporizer-guide. A. G. Kaufman. No. 1,345,448; July 6; v. 276; p. 24.
Vapors, Electrical apparatus for the electrochemical treatment of. L. B. Cherry. No. 1,345,431; July 6; v. 276; p. 20.
Vat, Dipping-. T. L. Mullins. No. 1,345,801; July 6; v. 276; p. 93.
Vehicle, Motor-. F. Kiehler. No. 1,345,931; July 6; v. 276; p. 119.
Vehicle-wheel. N. Renner. No. 1,345,506; July 6; v. 276; p. 35
Vehicles, Pump for motor-. J. G. Vincent. No. 1,345,902; July 6; v. 276; p. 113.
Vehicles, Runner-carrier for motor-. J. E. Ollivier. No. 1,346,052; July 6; v. 276; p. 143.
Vehicles, Speed-change indicator for. H. Rekersdres. No. 1,365,635; July 6; v. 276; p. 60.
Vending-machine, Coin-controlled. J. L. Meyfarth. No. 1,345,499; July 6; v. 276; p. 34.
Vending machine, Newspaper-. O. J. Hotaling. No. 1,345,855; July 6; v. 276; p. 103.
Ventilator. J. Stepin. No. 1,345,514; July 6; v. 276; p. 37.
Ventilating apparatus. H. F. Schmidt. No. 1,345,638; July 6; v. 276; p. 60.
Vessel. A. McDougall. No. 1,345,610; July 6; v. 276; p. 55.
Vessel. A. McDougall. No. 1,345,611; July 6; v. 276; p. 55.
Vessels, Propulsion of submarine. W. L. R. Emmet. No. 1,345,757; July 6; v. 276; p. 84.
Violin attachment. H. Galbraith. No. 1,346,013; July 6; v. 276; p. 135.
Vise. M. Cuendet. No. 1,345,665; July 6; v. 276; p. 66.
Vulcanizer. W. Fishbaugh. No. 1,346,085; July 6; v. 276; p. 150.
Wall-bracket. W. A. Cozart. No. 1,345,910; July 6; v. 276; p. 115.
Walls, Mold for hollow. O. Kofstad. No. 1,345,371; July 6; v. 276; p. 9.
Washer: *See*—
Air-washer.
Washing machine, Centrifugal clothes-. J. J. Fulton. No. 1,345,761; July 6; v. 276; p. 85.
Washing machine, Dish-. S. G. Smith. No. 1,345,412; July 6; v. 276; p. 17.
Washing-machines, Dish-rack for. A. Ratner. No. 1,345,401; July 6; v. 276; p. 15.
Washing machines, Casing for dish-. J. Vaudreuil. No. 1,345,519; July 6; v. 276; p. 38.
Water glass and column reflector and protector. J. A. Moyer. No. 1,345,799; July 6; v. 276; p. 92.

Water-station. F. W. Davis. No. 1,345,482; July 6; v. 276; p. 30.
Water-wheel, Turbine. E. A. Jacobson. No. 1,345,493; July 6; v. 276; p. 33.
Weather-strip. C. D. Shafer. No. 1,345,409; July 6; v. 276; p. 16.
Weather-strip. T. M. Campbell. No. 1,345,832; July 6; v. 276; p. 99.
Weft-detecting mechanism. E. H. Ryon. No. 1,345,508; July 6; v. 276; p. 36.
Weighing apparatus, Automatic. W. A. Devey. No. 1,345,838; July 6; v. 276; p. 100.
Well-cleaner. L. H. Sargent. No. 1,345,555; July 6; v. 276; p. 45.

Emblem, medal, badge, insignia, &c. M. D. Salisbury. No. 55,649; July 6; v. 276; p. 167.
Fabric, Textile. E. Krupicka. No. 55,622; July 6; v. 276; p. 162.
Fabric, Textile. C. Loegler. No. 55,623; July 6; v. 276; p. 163.
Foot rest and warmer. J. G. Johnson. No. 55,616; July 6; v. 276; p. 161.
Fork. F. E. Burchfield. No. 55,589; July 6; v. 276; p. 156.
Gems in jewelry, Plate for mounting. F. H. Felger. No. 55,597; July 6; v. 276; p. 158.
Golf-club. W. F. Reach. No. 55,644; July 6; v. 276; p. 167.
Guide device. W. E. McMullan and H. J. Hickey. No. 55,631; July 6; v. 276; p. 164.
Hammer, can-punch, and ice-pick combination. A. H. Crampton. No. 55,592; July 6; v. 276; p. 157.
Hosiery-drying form. J. O. von Stetten. No. 55,733; July 6; v. 276; p. 180.
Inkstand. J. T. Riley. Nos. 55,646–7; July 6; v. 276; p. 167.
Inkstand-cover. H. Haupt. No. 55,610; July 6; v. 276; p. 160.
Jewelry—namely, ring-top, pendant, pair of cuff buttons, pin, or similar article. C. J. and S. M. Grossman. No. 55,609; July 6; v. 276; p. 160.
Lace. M. Seidel. Nos. 55,712–19; July 6; v. 276; pp. 176–8.
Lace and embroidery. W. Schmid. Nos. 55,651–711; July 6; v. 276; pp. 168–76.
Motors, Mounting-frame for spring-. H. G. Saal. No. 55,648; July 6; v. 276; p. 167.
Pan, Metal baking-. B. P. Wagner. No. 55,734; July 6; v. 276; p. 180.
Paper-weight and magnifying-glass, Combined. P. H. Meyer. No. 55,632; July 6; v. 276; p. 164.
Picture-frame. P. Morea. No. 55,635; July 6; v. 276; p. 165.
Rattle. F. C. Monkhouse. Nos. 55,633–4; July 6; v. 276; p. 164.
Ring. N. Gorod. No. 55,604; July 6; v. 276; p. 159.
Ring. L. W. Sanborn. No. 55,650; July 6; v. 276; p. 168.
Screen. A. Viscardi. No. 55,731; July 6; v. 276; p. 180.
Shrine, Sacramental. S. Buscarage. No. 55,590; July 6; v. 276; p. 156.
Slipper. P. E. Giroux. No. 55,602; July 6; v. 276; p. 159.
Sound-producing-instrument casing. M. Richtsteig. No. 55,645; July 6; v. 276; p. 167.
Spool-holder. P. O. Mueller. No. 55,637; July 6; v. 276; p. 165.
Step-plate. E. E. Green. No. 55,605; July 6; v. 276; p. 159.
Switch-casing. A. C. Hulbert. No. 55,614; July 6; v. 276; p. 161.
Talking-machine-cabinet grill. W. F. Stolzenburg and H. R. Leubner. No. 55,726; July 6; v. 276; p. 179.
Tire. T. Follen. No. 55,600; July 6; v. 276; p. 158.
Tire. C. W. Greene. No. 55,606; July 6; v. 276; p. 159.
Tire. E. A. Tinsman. Nos. 55,728–9; July 6; v. 276; pp. 179–80.
Tire, Automobile-. G. E. Batcheller. No. 55,585; July 6; v. 276; p. 156.
Tire-casing. R. D. Belden. No. 55,586; July 6; v. 276; p. 156.
Tire, Pneumatic. R. P. McElrath. No. 55,630; July 6; v. 276; p. 164.
Tire-tread. W. O. Bruess. No. 55,588; July 6; v. 276; p. 156.

Tire-tread. C. O. Henderson. Nos. 55,611–12; July 6; v. 276; p. 160.
Toy. N. Segawa. No. 55,720; July 6; v. 276; p. 178.
Toy automobile. B. W. Spitler. 55,722; July 6; v. 276; p. 178.
Toy block. E. Bratton. No. 55,587; July 6; v. 276; p. 156.
Toy chair. M. L. Greenstreet. No. 55,607; July 6; v. 276; p. 159.
Toy, Flying. W. H. Van Shrum. No. 55,732; July 6; v. 276; p. 180.
Toy vehicle. F. Starr. No. 55,725; July 6; v. 276; p. 179.
Weeder. J. Gilson, Sr. No. 55,601; July 6; v. 276; p. 158.
Windshield. C. D. Keller. No. 55,618; July 6; v. 276; p. 162.
Wreath. L. Koropp and V. F. Bergman. No. 55,621; July 6; v. 276; p. 162.
Wrench. A. B. Carli. No. 55,591; July 6; v. 276; p. 157.

ALPHABETICAL LIST OF TRADE-MARKS.

Acetylene cutting and welding machines and lighting plants, steam-boilers. Allied Machinery Company of America. No. 132,872; July 6; v. 276; p. 199.
Aeroplane covers and tents. Handley Page Limited. No. 132,956; July 6; v. 276; p. 101.
Alcohol, Ethyl, U. S. Industrial Alcohol Co. No. 133,069; July 6; v. 276; p. 205.
Automobile-curtain window. Wm. R. Johnston Mfg. Co. No. 132,976; July 6; v. 276; p. 202.
Balls, Bowling-. Brunswick-Balke-Collender Company. No. 132,902; July 6; v. 276; p. 200.
Bandage, Catamenial. S. D. Trumbo. No. 133,044; July 6; v. 276; p. 204.
Batteries and parts thereof. Storage. A. H. Lyons. No. 132,994; July 6; v. 276; p. 202.
Batteries, Dry-cell. French Battery & Carbon Co. No. 132,947; July 6; v. 276; p. 201.
Batteries, Electric. Stuart Products Corporation. No. 133,051; July 6; v. 276; p. 204.
Batteries, electrical mine-lamps, and magnetos. Witherbee Igniter Company. No. 133,096; July 6; v. 276; p. 205.
Batteries and parts thereof, Storage. A. H. Lyons. No. 132,995; July 6; v. 276; p. 202.
Beverages, Non-intoxicating cereal. E. L. Ropkins. No. 133,028; July 6; v. 276; p. 203.
Billiard-cue tips. N. E. Bensinger. No. 132,896; July 6; v. 276; p. 199.
Brassières. C. V. Havens. No. 132,961; July 6; v. 276; p. 201.
Brassière combination-undergarments and undergarments for women. The Warner Brothers Company. No. 133,087; July 6; v. 276; p. 205.
Bread. Ward Baking Company. Nos. 133,083–5; July 6; v. 276; p. 205
Brooms. Crocker Broom and Brush Co. No. 132,922; July 6; v. 276; p. 200.
Brooms. Newton Broom Co. No. 133,009; July 6; v. 276; p. 203.
Brooms and brushes. M. Marcus. No. 132,997; July 6; v. 276; p. 202.
Brooms, brushes, and mops. Geo. A. Fink Co. No. 132,939; July 6; v. 276; p. 201.
Brushes. A. Bourjois & Co. No. 132,899; July 6; v. 276; p. 199.
Brushes, floor-brooms, dusters. J. C. Pushee & Sons. No. 133,023; July 6; v. 276; p. 203.
Brushes, Hat-. R. Swisky. No. 133,053; July 6; v. 276; p. 204.
Brushes, Shaving-. Kampfe Bros. Nos. 132,977–8; July 6; v. 276; p. 202.
Brushes, Shine-removing. A. J. Rheinberger. No. 133,025; July 6; v. 276; p. 203.
Bunting. C. H. Reed. No. 133,024; July 6; v. 276; p. 203.
Burs and breaches. Usona Dental Company. Nos. 133,073–4; July 6; v. 276; p. 205.
Chocolates. Shaffa Inc. No. 133,033; July 6; v. 276; p. 203.
Clock-dial. Mayclese. No. 133,000; July 6; v. 276; p. 202.
Clothes-lines. C. C. Davis. No. 132,925; July 6; v. 275; p. 200.
Coat, Shawl-. Louis Katzman, Inc. No. 132,979; July 6; v. 276; p. 202.
Coffee. L. H. Davis. No. 132,926; July 6; v. 276; p. 200.
Coffee. The E. C. Harley Company. Nos. 132,957–8; July 6; v. 276; p. 201.
Coffee, tea, spices, mustard, &c. David G. Evans' Coffee Co. No. 132,935; July 6; v. 276; p. 201.

Cookers, Fireless. The Diller Mfg. Co. No. 132,928; July 6; v. 276; p. 200.
Cord, Maitre-. Brownell & Company. No. 132,901; July 6; v. 276; p. 199.
Corn products, oatmeal, &c. H. Howson. No. 132,971; July 6; v. 276; p. 202.
Corsets. The Van Orden Company. Nos. 133,076–8; July 6; v. 276; p. 205.
Cream and nutmegs, Food-flavoring. The Brown Chemical Co. No. 132,900; July 6; v. 276; p. 199.
Cabinet and exercising apparatus, Sweat-. J. Cooper. No. 132,919; July 6; v. 276; p. 200.
Candies. Hawley & Hoops. No. 132,970; July 6; v. 276; p. 202.
Candy. American Candy Company. No. 132,877; July 6; v. 276; p. 199.
Candy. C. A. Crane. No. 132,921; July 6; v. 276; p. 200.
Candy. Schuler Chocolate Factory. Nos. 133,035–6; July 6; v. 276; pp. 203–4.
Canned fruits and vegetables. Herbert Packing Co. Nos. 132,965–6; July 6; v. 276; p. 201.
Canned vegetables. J. E. Barr Pickling & Preserving Company. Nos. 132,891–2; July 6; v. 276; p. 199.
Cards, Playing-. Root Playing Card Co. No. 133,027; July 6; v. 276; p. 203.
Cards, Playing-. The United States Playing Card Company. Nos. 133,070–1; July 6; v. 276; p. 205.
Cards, Playing-. W. D. Roy. No. 133,030; July 6; v. 276; p. 203.
Carpets. Harrod's Stores, Limited. No. 132,959; July 6; v. 276; p. 201.
Cars, Tank-. General American Tank Car Corporation. No. 132,948; July 6; v. 276; p. 201.
Castings, Malleable-iron. Fort Pitt Malleable Iron Co. No. 132,942; July 6; v. 276; p. 201.
Dental, medical, and surgical appliances. United Drug Company. No. 133,068; July 6; v. 276; p. 205.
Dental dam, surgeons' gloves, &c. United States Rubber Company. No. 133,072; July 6; v. 276; p. 205.
Dental pliers and forceps. Utica Drop Forging & Tool Company. No. 133,075; July 6; v. 276; p. 205.
Digester-tankage, Stock food. Standard By-Products Co. No. 133,045; July 6; v. 276; p. 204.
Doll-buggies. C. M. Farrer. No. 132,938; July 6; v. 276; p. 201.
Dolls. E. Shaver. No. 133,039; July 6; v. 276; p. 204.
Dolls. G. Pfeffer. No. 133,018; July 6; v. 276; p. 203.
Doughnuts. S. G. Leoffler, Jr. No. 132,988; July 6; v. 276; p. 202.
Dresses, House or apron. Sterling Manufacturing Company. No. 133,046; July 6; v. 276; p. 204.
Dresses, Ladies' and misses'. Mannie Solomon Company. No. 133,043; July 6; v. 276; p. 204.
Drills and shirtings. William Schall & Co. No. 133,034; July 6; v. 276; p. 203.
Electric accumulators or secondary batteries. H. Leitner and W. H. Exley. No. 132,987; July 6; v. 276; p. 202.
Electric-lighting plants, electric-storage-battery locomotives, &c., Isolated. Allied Machinery Company of America. No. 132,873; July 6; v. 276; p. 199.
Electric plants, Unitary. The Matthews Engineering Co. No. 132,998; July 6; v. 276; p. 202.
Electrodes, High-potential-electricity-arrester. F. R. Parker. No. 133,016; July 6; v. 276; p. 203.
Electromedical switchboard for electric-bath use. McIntosh Battery & Optical Co. No. 132,996; July 6; v. 276; p. 202.
Fabric made with a cotton warp and a filling of wool or mohair, &c. Lesher, Whitman & Co. No. 133,085; July 6; v. 276; p. 202.
Fabrics, Narrow woven. C. Prosnitz. No. 133,022; July 6; v. 276; p. 203.
Fabrics of silk and silk mixtures. Cheney Brothers. No. 132,911; July 6; v. 276; p. 200.
Fabrics, Woven, printed, and dyed drapery. A. M. Barbe. No. 132,890; July 6; v. 276; p. 199.
Fertilizer. The American Agricultural Chemical Company. No. 132,876; July 6; v. 276; p. 199.
Fishing-lines. Cortland Line Co. No. 132,920; July 6; v. 276; p. 200.
Fishing rods, hooks, nets, lines, &c. Cumberland (Aylestone), Limited. No. 132,924; July 6; v. 276; p. 200.
Flat-ware, Plated. Oneida Community. Nos. 133,012–14; July 6; v. 276; p. 203.
Flour, Wheat-. The Scott County Milling Company. No. 133,038; July 6; v. 276; p. 204.
Flour, Wheat-. Lawrenceburg Roller Mills Co. No. 132,986; July 6; v. 276; p. 202.
Flour, Wheat-. T. L. Carroll Company. No. 132,908; July 6; v. 276; p. 200.
Flour, Wheat-. W. P. Tanner-Gross & Company. No. 133,056; July 6; v. 276; p. 204.
Fruit and fresh vegetables. Atlantic Coast Distributors. No. 132,882; July 6; v. 276; p. 199.
Furnishing goods, hosiery, and notions, Men's and ladies'. Shushan Bros. & Co. No. 133,040; July 6; v. 276; p. 204.

Solvent or softener to facilitate the cleaning of certain named articles. Three In One Oil Company. No. 133,061; July 6; v. 276; p. 204.
Spark-plugs. Rummell Manufacturing Works. No. 133,031; July 6; v. 276; p. 203.
Spark-plugs. Stitt Ignition Co. No. 133,048; July 6; v. 276; p. 204.
Sparking plugs for internal-combustion engines. Forward Sparking Plug Co. No. 132,943; July 6; v. 276; p. 201.
Steel, iron, &c., Wrought. Connecticut Electric Steel Co. No. 132,916; July 6; v. 276; p. 200.
Stoves, Alcohol-. F. Chapman. No. 132,910; July 6; v. 276; p. 200.
Stovepipes and elbows. Hemp & Co. (Corp.). Nos. 132,962–4; July 6; v. 276; p. 201.
Syrup, Table-. The L. and T. Company. No. 132,985; July 6; v. 276; p. 202.
Teeth, Artificial. G. Flint. No. 132,940; July 6; v. 276; p. 201.
Textile fabrics in the piece, Worsted and woolen. Holden-Leonard Company. Nos. 132,967–8; July 6; v. 276; p. 202.
Thread and yarn. H. E. Locke & Company. No. 132,991; July 6; v. 276; p. 202.
Thread or yarn, Mercerized cotton. Summit Thread Company. No. 133,052; July 6; v. 276; p. 204.
Thread, Shoe-. Commonwealth Thread Co. Nos. 132,913–4; v. 276; July 6; p. 200.
Thermometers, sphygmomanometers, &c., Clinical. C. J. Taglibue Mfg. Co. Nos. 133,054–5; July 6; v. 276; p. 204.
Timepieces. F. W. Alter. No. 132,875; July 6; v. 276; p. 199.
Toy aeroplanes. P. Pierce. No. 133,019; July 6; v. 276; p. 203.
Toothbrushes. M. Levy. No. 133,990; July 6; v. 276; p. 202.
Toy furniture. R. W. Porter. No. 133,020; July 6; v. 276; p. 203.
Toy savings-banks. M. Stoltz. No. 133,049; July 6; v. 276; p. 204.
Toy soldiers, dishes, and furniture. Ferdinand Gutmann & Co. No. 132,954; July 6; v. 276; p. 201.
Toy vehicle E. G. Kirtz. No. 132,981; July 6; v. 276; p. 202.
Toy vehicle—viz., coaster. R. H. Blackburn. No. 132,898; July 6; v. 276; p. 199.
Trucks, Motor-. Ward La France Truck Co. No. 133,086; July 6; v. 276; p. 205.
Union-suits, Woven and knitted. Neustadter Brothers. No. 133,008; July 6; v. 276; p. 203.
Vacuum tube devices, parts and accessories therefor. Wireless Specialty Apparatus Company. No. 133,095; July 6; v. 276; p. 205.
Valves, Automatic relief-. Dew Valve Co. No. 132,927; July 6; v. 276; p. 200.
Valves for general use, pump-governors, and pressure-reducing valves, Metal. Framingham Manufacturing Company. No. 132,944; July 6; v. 276; p. 201.
Varnish-paint. Ault & Wiborg Co. Nos. 132,884–8; July 6; v. 276; p. 199.
Varnishes for electric insulation. The Sterling Varnish Company. No. 133,047; July 6; v. 276; p. 204.
Vegetables, Dehydrated. Twin Falls Dehydrating Co. No. 133,066; July 6; v. 276; p. 204.
Vegetables, Fresh. Crown Packing Company. No. 132,923; July 6; v. 276; p. 200.
Voiles in the piece. M. Schwarz. No. 133,037; July 6; v. 276; p. 204.
Watch and clock dials. J. R. Bartlett. No. 132,893; July 6; v. 276; p. 199.
Watch and clock dials, Protective facings or coverings for. I. Florman. No. 132,941; July 6; v. 276; p. 201.
Watchcases. Roy Watch Case Company. No. 133,029; July 6; v. 276; p. 203.
Watches. Dubois Watch Case Company. No. 132,930; July 6; v. 276; p. 200.
Watches. J. Bulova Company. Nos. 132,903–6; July 6; v. 276; p. 200.
Watches. Knickerbocker Watch Co. No. 132,982; July 6; v. 276; p. 202.
Watches. The D. Gruen Sons & Company. No. 132,953; July 6; v. 276; p. 201.

Watches. W. J. Bernard. No. 132,897; July 6; v. 276; p. 199.
Watches and parts thereof. Société Anonyme Les fils de L. Braunschweig, Fabrique Election. No. 133,042; July 6; v. 276; p. 204.
Waste cotton, silk, and waste paper, &c., Bales or bags of. M. Frank. No. 132,945; July 6; v. 276; p. 201.
Water-bottles, syringe-bags, &c. The Miller Rubber Co. No. 133,005; July 6; v. 276; p. 203.
Webs, Elastic. Faire Bros. & Co. Nos. 132,936–7; July 6; v. 276; p. 201.
Windshield-cleaners. Outlook Company. No. 133,015; July 6; v. 276; p. 203.
Wiping and cleaning apparatus for automobile windshields, &c. Presto-Felt Mfg. Co. No. 133,021; July 6; v. 276; p. 203.
Wire and manila ropes and wire cables. Western Rope & Manufacturing Company. No. 133,089; July 6; v. 276; p. 205.
Yarn, Knitting-. Carver-Beaver Yarn Co. No. 132,909; July 6; v. 276; p. 200.

ALPHABETICAL LIST OF LABELS.

"Toyland Special." (For Crackers Known as Toyland Special and Cut in the Shape of a Car.) P. I. Jacoby. No. 21,903; July 6; v. 276; p. 206.

ALPHABETICAL LIST OF TRADE-MARK TITLES.

(REGISTRATION APPLIED FOR.)

Air-heating apparatus and parts thereof, Electrical. P. J. H. Bernard. No. 125,650; July 6; v. 276; p. 184.
Alloys, Base-metal. W. W. Holland. No. 132,861; July 6; v. 276; p. 196.
Apples and pears, Fresh. Naches Cold Storage Co. No. 131,446; July 6; v. 276; p. 191.
Art-feature title. Public Ledger Company. No. 124,049; July 6; v. 276; p. 184.
Axes, shovels, scoops, &c. Nixon Hardware Co. No. 127,443; July 6; v. 276; p. 186.
Balsam for the treatment of constipation, flatulency, &c. F. Ad. Richter & Co. No. 121,262; July 6; v. 276; p. 183.
Beverage, Malt. Keeley Brewing Co. No. 129,847; July 6; v. 276; p. 189.
Beverage, Non-intoxicating cereal. The Stark Tuscarawas Co. No. 128,471; July 6; v. 276; p. 188.
Beverages, Bottled malt. Jackson Brewing Company. No. 127,512; July 6; v. 276; p. 186.
Beverages containing malt. Independent Brewing Company of Pittsburgh. No. 120,389; July 6; v. 276; p. 182.
Beverages in the form of a syrup or carbonated in bottles, Non-alcoholic. Southern Beverage Company. No. 131,509; July 6; v. 276; p. 191.
Beverages, Non-alcoholic. Ohio Valley Bottling Works. No. 126,056; July 6; v. 276; p. 105.
Blankets, Manufactured. Edson Moore & Company. No. 132,104; July 6; v. 276; p. 194.
Blanks, Legal. W. S. Tuttle. No. 132,126; July 6; v. 276; p. 194.
Blouses, kimonos, &c. F. A. Patrick & Co. No. 130,923; July 6; v. 276; p. 190.
Booklet published annually, Printed. E. J. Elbury. No. 132,348; July 6; v. 276; p. 195.
Brisling and sild. The Oversea Export Co. No. 129,652; July 6; v. 276; p. 189.
Bugles, trombones, reverse-horns, &c. The Rex Metal Products Company. No. 131,089; July 6; v. 276; p. 191.
Buttons and attaching-thread, Outfit consisting of garment-. Wenck & Co. No. 130,112; July 6; v. 276; p. 189.
Candies. Eye Brand Confectionery, Inc. No. 115,342; July 6; v. 276; p. 181.
Candies. Wallace & Co. No. 131,716; July 6; v. 276; p. 192.
Candy. Busath's Candy Shop. No. 131,774; July 6; v. 276; p. 192.
Canned fruits and vegetables. Herbert Packing Co. No. 127,646; July 6; v. 276; p. 186.
Carbureters. Carter Carburetor Company. Nos. 133,517–8; July 6; v. 276; p. 197.
Cartoons. W. F. Bartsch. No. 132,424; July 6; v. 276; p. 195.
Catalogue, Annual. Julius Roehrs Co. No. 132,049; July 6; v. 276; p. 194.
Catalogues, Style-. The Little Duchess Dress Co. No. 123,127; July 6; v. 276; p. 183.
Ceilings, Metal. The Berger Manufacturing Company. No. 132,502; July 6; v. 276; p. 196.
Cement, Boiler-wall. M. M. Casamer. No. 131,816; July 6; v. 276; p. 193.
Cement, Portland. The Edison Portland Cement Company. No. 119,232; July 6; v. 276; p. 182.
Cement, Portland. V. V. Lebedjeff Engineering & Supply Corporation. No. 118,055; July 6; v. 276; p. 181.
Cement stucco. Nebraska Material Company. No. 129,019; July 6; v. 276; p. 188.
Charms, pendants, &c. Miller and Hunold. No. 130,484; July 6; v. 276; p. 190.
Cigars. Bramore Cigar Co. No. 122,878; July 6; v. 276; p. 183.
Cigars. Henry Clay and Bock & Co. No. 129,445; July 6; v. 276; p. 188.
Clothing. H. M. Baron. No. 132,079; July 6; v. 276; p. 194.
Clothing, Women's and misses'. L. Levine and Sons. No. 129,936; July 6; v. 276; p. 189.
Cloths and stuffs of wool in the piece. The Scottish Woolen Trade Mark Association. No. 126,750; July 6; v. 276; p. 185.
Coats, cloaks, wraps, &c., Women's, children's, and infants'. The Salt's Textile Manufacturing Company. No. 132,122; July 6; v. 276; p. 194.
Coats, trousers, vests, overcoats, outer skirts, and suits for men, women, and children. The M. & M. Company. No. 131,645; July 6; v. 276; p. 192.
Coffee, Decaffeinated. Kaffee Hag Corporation. No. 131,335; July 6; v. 275; p. 191.
Concrete-hardener. R. Greenstein. No. 131,599; July 6; v. 276; p. 192.
Cotton piece goods. Samuel Hymes & Sons. No. 131,269; July 6; v. 276; p. 191.
Cutlery, razors, shears, and butcher-knives, Pocket- Union Cutlery Co. No. 131,290; July 6; v. 276; p. 191.
Dresses. O'Gorman, Wade & Powers Co. No. 132,110; July 6; v. 276; p. 194.
Dresses, Women's and children's. Elseman Bros. Mfg. Co. No. 130,812; July 6; v. 276; p. 190.
Engines and parts thereof, Internal-combustion. Aktiebolaget Spritmotorer. No. 132,768; July 6; v. 276; p. 196.
Engines and their parts, Internal-combustion. Supreme Motors Corporation. No. 132,757; July 6; v. 276; p. 196.
Feed, Stock, dairy, and poultry. The Superior Feed Co. No. 127,787; July 6; v. 276; p. 187.
Fire brick and tile. Laclede-Christy Clay Products Company. No. 120,214; July 6; v. 276; p. 182.
Fish products. Smith Bros. No. 132,031; July 6; v. 276; p. 194.
Flatirons, Electric. Chicago Flexible Shaft Company. No. 122,112; July 6; v. 276; p. 188.
Flooring, Composition. Linotol Flooring Co. No. 128,214; July 6; v. 276; p. 187.
Flour and cornmeal. St. Albans Grain Company. No. 130,694; July 6; v. 276; p. 190.
Flour, prepared flour, buckwheat-flour, &c. Ballard and Ballard Company. No. 132,001; July 6; v. 276; p. 193.
Flour, Wheat-. Borden Brothers and Co. No. 132,000; July 6; v. 276; p. 193.
Flour, Wheat-. The Larabee Flour Mills Corporation. No. 133,359; July 6; v. 276; p. 197.
Flour, Wheat-. The Larabee Flour Mills Corporation. No. 133,364; July 6; v. 276; p. 197.
Flour, Wheat-. The Larabee Flour Mills Corporation. No. 133,366; July 6; v. 276; p. 197.
Flour, Wheat-. The Larabee Flour Mills Corporation. No. 133,368; July 6; v. 276; p. 197.
Food composition. The Virocacao Company. No. 115,080; July 6; v. 276; p. 184.
Games. Dodo Board Company. No. 127,581; July 6; v. 276; p. 186.
Gasolene, kerosene, lubricating-oil. Producers & Refiners Corporation. No. 127,697; July 6; v. 276; p. 186.
Ginger-ale. J. E. Marceau. No. 128,449; July 6; v. 276; p. 188.
Ginger-tea tablets. The E. L. Patch Co. No. 129,799; July 6; v. 276; p. 189.
Glue. G. Mayer. No. 121,840; July 6; v. 276; p. 183.
Grape-soda. The Coca-Cola Bottling Co. No. 128,079; July 6; v. 276; p. 187.
Grease-cups. Merchant & Evans Company. No. 132,105; July 6; v. 276; p. 194.
Hats and caps, Men's. Rogers Peet Company. No. 131,921; July 6; v. 276; p. 193.
Horns, Electric. American Electric Co. No. 129,962; July 6; v. 276; p. 189.
Hosiery. L. D. Boyd. No. 130,204; July 6; v. 276; p. 190.
Hosiery. New Haven Knitting Mills. No. 131,822; July 6; v. 276; p. 193.
Hosiery. J. P. Voorhees. No. 132,456; July 6; v. 276; p. 195.
Jacks. Sunderman Corporation. No. 132,205; July 6; v. 276; p. 195.
Knit goods. Bender-Zimmer Company. No. 132,460; July 6; v. 276; p. 196.
Knives, Pocket-. The Liberty Knife Company. No. 132,540; July 6; v. 276; p. 196.
Lard compound and peanut-butter. International Vegetable Oil Company. No. 117,187; July 6; v. 276; p. 181.
Lighting fixtures, shades, and reflectors, Electric-. Overbagh & Ayres Mfg. Co. No. 124,866; July 6; v. 276; p. 184.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 13TH DAY OF JULY, 1920.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

A-Z Company, The. (See Hanmer, Laurence G., assignor.)
Acre, Ray E. (See Andrews, E. F., and Acre.)
Adams, Lewis M., Ridgefield Park, N. J. Typographic plate. No. 1,346,583; July 13; v. 276; p. 309.
Aigner, George J., Chicago, Ill. Index-tab. No. 1,346,101; July 13; v. 276; p. 215.
Alberico, Antonio, Joliet, Ill. Aeroplane. No. 1,346,107; July 13; v. 276; p. 216.
Albinson, Alvin, Minneapolis, Minn. Plaster gage and reinforcement. No. 1,346,437; July 13; v. 276; p. 281.
Albright, Andrew, Jr. (See Golly, Louis.)
Allee, William L., Topeka, Kans. Brace. No. 1,346,736; July 13; v. 276; p. 340.
Allen, Edward B., Bridgeport, Conn., assignor to The Singer Manufacturing Company. Buttonhole-sewing machine. No. 1,346,102; July 13; v. 276; p. 215.
Allen, Edward B., Newtown, Conn., assignor to The Singer Manufacturing Company. Tension-controlling mechanism for sewing-machines. No. 1,346,103; July 13; v. 276; p. 215.
Allen, Victor M., Shinglehouse, Pa. Combined ventilator and shade. No. 1,346,800; July 13; v. 276; p. 354.
Altick, Harold K., Dayton, Ohio. Automatic gear-shift for automobiles. No. 1,346,151; July 13; v. 276; p. 224.
Altman, Harvey P., Findlay, Ohio. Auxiliary spark-gap. No. 1,346,522; July 13; v. 276; p. 297.
American Hardware Corporation, The. (See Teich, Ernest L., assignor.)
American Optical Company. (See Bugbee, L. W., and Tillyer, assignors.)
American Warp Drawing Machine Company. (See Lea, Charles, assignor.)
Amos, Ora and R., and E. A. McKee, Edinburg, Ind. Loading and hauling automobile-truck. No. 1,346,152; July 13; v. 276; p. 224.
Amos, Roy. (See Amos, Ora and R., and McKee.)
Anderson, Albert R. (See Anderson, John W., Jr., and A. R.)
Anderson Company, The. (See Anderson, John W., Jr., and A. R., assignors.)
Anderson, John W., Jr., Mishawaka, Ind., and A. R. Anderson, Chicago, Ill., assignors to The Anderson Company, South Bend, Ind. Combined motor and fuel control. No. 1,346,477; July 13; v. 276; p. 288.
Anderson, Sigurd E., Des Moines, Iowa. Cement-stave machine. No. 1,346,779; July 13; v. 276; p. 349.
Andrews, Edward F., Chicago, and R. E. Acre, Wheaton, assignors to Universal Engineering Company, Maywood, Ill. Brush-rigging for dynamo-electric machines. No. 1,346,108; July 13; v. 276; p. 216.
Angle, Edward H., Pasadena, Calif. Orthodontic implement. No. 1,346,584; July 13; v. 276; p. 310.
Appelbaum, Alan I., assignor to The Import and By Products Company, Incorporated, Trenton, N. J. Sulfur color and manufacturing same from aloe resin. No. 1,346,153; July 13; v. 276; p. 224.
Appelbaum, Alan I., assignor to The Import and By Products Company, Incorporated, Trenton, N. J. Sulfur color and manufacturing same from aloes. No. 1,346,154; July 13; v. 276; p. 224.
Arnold, George A., Irwin, and E. J. Gross, Trafford, Pa. Resilient tire. No. 1,346,155; July 13; v. 276; p. 225.
Arnold Print Works. (See Jones, Samuel M., assignor.)
Aronne, Louis. (See Rogati, A., and Aronne.)
Arter, Leroy H., Warren, Ohio. Shoe-shining cabinet. No. 1,346,585; July 13; v. 276; p. 310.
Aseptic Service Company. (See Rees, Warren C., assignor.)
Ashby, Sydney G. (See Barningham, V., and Ashby.)
Ashton, Hannah, executrix. (See Ashton, Orrell.)
Athens Bindery Company, The. (See Crippen, Henry M., assignor.)
Atkinson, Arthur F. (See Ullman, E. B., Simmonds, and Atkinson.)
Aston, Albert A., Leicester, England, assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Machine for inserting fasteners. No. 1,346,157; July 13; v. 276; p. 225.
Astley, Robert, Boston, Mass. Folding device. No. 1,346,109; July 13; v. 276; p. 216.
Ashton, Orrell, deceased; H. Ashton, executrix, Swampscott, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Shoe-tip-measuring mechanism. No. 1,346,156; July 13; v. 276; p. 225.
Atteberry, William A., assignor of one-fourth to O. A. Sewell and one-fourth to P. A. Fox, Coweta, Okla. Valve. No. 1,346,737; July 13; v. 276; p. 340.
Atwood, Harry A., Milwaukee, Wis. Chair. No. 1,346,110; July 13; v. 276; p. 216.
Babcock, Courtlandt W., Stonington, Conn. Chart-holder. No. 1,346,691; July 13; v. 276; p. 331.
Baer, Samuel H. (See George, Alexander W., assignor.)
Bailey, Charles W., and J. H. Stewart, Lynn, Mass.; said Bailey assignor to said Stewart. Cutting-machine. No. 1,346,626; July 13; v. 276; p. 318.
Baily, Thaddeus F., and F. T. Cope, Alliance, Ohio. Continuous tire-vulcanizing machine. No. 1,346,158; July 13; v. 276; p. 225.
Baker, Elbridge, assignor of one-fourth to E. P. Tucker, one-fourth to G. W. Tackabury, and one-fourth to G. D. Robertson, Los Angeles, Calif. Harvesting-machine. No. 1,346,159; July 13; v. 276; p. 225.
Baker-Vawter Company. (See Manny, Fred L., assignor.)
Balaguer, Andres Marianao, Habana, Cuba. Resilient tire for vehicle-wheels. No. 1,346,692; July 13; v. 276; p. 331.
Ballard, Charles S., assignee. (See Washburn, Howard L., assignor.)
Ballou, B. A., & Co. (See Lahey, Edgar C., assignor.)
Ballou, Frank H., Newark, Ohio. Product assorting and distributing machine. No. 1,346,438; July 13; v. 276; p. 281.
Barber, Ada S. (See Barber, William, assignor.)
Barber, George A., Chicago, Ill., assignor to J. V. McManis, Kirksville, Mo. Table-supporting mechanism. No. 1,346,586; July 13; v. 276; p. 310.
Barber, William, New York, assignor to A. S. Barber, Brooklyn, N. Y. Tire-tread. No. 1,346,627; July 13; v. 276; p. 318.
Bard, Francis N., Highland Park, Ill. Composite non-metallic gasket. No. 1,346,523; July 13; v. 276; p. 298.
Bard, Francis N., Highland Park, Ill. Composite non-metallic gasket. No. 1,346,524; July 13; v. 276; p. 298.
Barlow, Samuel E., Denver, Colo. Power-operated tongs. No. 1,346,160; July 13; v. 276; p. 226.
Barnes & Kobert Manufacturing Company, The. (See Benedict, Paul M., assignor.)
Barningham, Vincent, Reading, and S. G. Ashby, Edenbridge, England. Automatic brake. No. 1,346,628; July 13; v. 276; p. 318.
Bartholomew, Fred R. (See Vierling, Bartholomew, and Smith.)
Bartholomew, William, assignor to Troy Laundry Machinery Company, Limited, Chicago, Ill. Washing-machine cylinder. No. 1,346,291; July 13; v. 276; p. 252.
Bartram, George C., Massapequa, assignor to United Concrete Pipe Co., New York, N. Y. Reinforced-concrete pipe. No. 1,346,629; July 13; v. 276; p. 319.
Basquin, Olin H., Evanston, Ill., assignor to Haskelite Manufacturing Corporation. Bent ply-wood and bending same. No. 1,346,161; July 13; v. 276; p. 226.
Bassett, William H., East Orange, N. J., assignor to Powers Accounting Machine Company, New York, N. Y. Statistical-record card. No. 1,346,162; July 13; v. 276; p. 226.
Bastian, Charles O., London, England. Means for positively indicating the condition of steel during heat treatment. No. 1,346,693; July 13; v. 276; p. 331.
Baumgarti, Leroy, Chicago, Ill. Automobile-bumper. No. 1,346,478; July 13; v. 276; p. 289.
Baush Machine Tool Company. (See Cannell, William, assignor.)
Bayles, Ernest A., and H. Higham, Helsby, England. Electrical condenser. No. 1,346,694; July 13; v. 276; p. 332.
Bayles, Lewis C., and F. M. Slater, Easton, Pa., assignors to Ingersoll-Rand Company, Jersey City, N. J. Roller-bearing construction. No. 1,346,163; July 13; v. 276; p. 226.

Beaupré, Enid, Albany, N. Y. Game apparatus. No. 1,346,738; July 13; v. 276; p. 340.
Becklund, John A., Centralia, Wash. Steam turbine-engine. No. 1,346,292; July 13; v. 276; p. 253.
Beetem, Frank G., Washington, D. C. Binding-post. No. 1,346,525; July 13; v. 276; p. 298.
Behrens, Hugo E., Fargo, N. D. Grain-separator. No. 1,346,630; July 13; v. 276; p. 319.
Beidler, George C., Rochester, N. Y. Method of and device for developing films. No. 1,346,780; July 13; v. 276; p. 349.
Bell, Robert J., assignor to Bell's Auto Memo Co., Incorporated, Richmond, Va. Memorandum device. No. 1,346,479; July 13; v. 276; p. 289.
Bell's Auto Memo Co. (See Bell, Robert J., assignor.)
Belz, Edward P., Athens, Wis. Harness trace-chain. No. 1,346,439; July 13; v. 276; p. 281.
Benedict, Emory J., and M. C. Frost, Memphis, Tenn. Resilient tire. No. 1,346,695; July 13; v. 276; p. 332.
Benedict, Paul M., New Haven, assignor to The Barnes & Kobert Manufacturing Company, Millidale, Conn. Electric riveting-machine. No. 1,346,631; July 13; v. 276; p. 319.
Bennett, Alan M., assignor of one-half to C. H. Florandin, Westfield, N. J. Arc-welding generator. No. 1,346,164; July 13; v. 276; p. 226.
Bennett, Frank S., Philadelphia, Pa. Inner-tube covering for tires. No. 1,346,632; July 13; v. 276; p. 319.
Bennett, Lu Ella, Sutherland, Mont. Stove-leg. No. 1,346,526; July 13; v. 276; p. 298.
Bergeron, Arthur J., New York, N. Y. Rope-lock for pulleys. No. 1,346,696; July 13; v. 276; p. 332.
Bergman, Simon, New York, N. Y. Carton for cups and similar articles. No. 1,346,792; July 13; v. 276; p. 352.
Bernstein, Peter, Boston, Mass. Portable gas-heater. No. 1,346,587; July 13; v. 276; p. 310.
Bergve, Einar, Notodden, assignor to Norsk Hydro-Elektrisk Kvaelstofaktieselskab, Christiania, Norway. Decomposition of alkali-metal minerals. No. 1,346,365; July 13; v. 276; p. 266.
Bernert, George and J., assignors to Bernert Manufacturing Company, Milwaukee, Wis. Feed-drum for pneumatic elevators. No. 1,346,293; July 13; v. 276; p. 253.
Bernert, Jacob. (See Bernert, George and J.)
Bernert Manufacturing Company. (See Bernert, George and J., assignors.)
Bernhard, Jakob, Hasle, near Ruegsau, and A. Meister, Ruegsau, Switzerland. Pneumatic hammer. No. 1,346,166; July 13; v. 276; p. 227.
Berrenberg, Reinold, Boston, Mass. Apparatus for producing high pressures. No. 1,346,165; July 13; v. 276; p. 226.
Bird, Richard E., Wichita, Kans. Fuel-line lock. No. 1,346,480; July 13; v. 276; p. 289.
Blevins, David T. (See Lewis, W. K., and Blevins.)
Boden, Oscar J. (See Petersen, C. M., and Boden.)
Boedtcher, Franz A. Bergenfield, N. J. Combined locking and circuit-controlling device for double doors. No. 1,346,111; July 13; v. 276; p. 216.
Bohanon, Budd D., Boston, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Tip-measuring apparatus. No. 1,346,167; July 13; v. 276; p. 227.
Boltshauser, Conrad, assignor to Comp., Phoebus E. G., Zurich, Switzerland. Electric pocket-lamp. No. 1,346,104; July 13; v. 276; p. 215.
Bosse, Charles O., Tacoma, Wash. Adjustable countersink. No. 1,346,105; July 13; v. 276; p. 216.
Boswell, Fletcher O., Philadelphia, Pa. Compound rail and electrical conductor. No. 1,346,168; July 13; v. 276; p. 227.
Bousfield, John H. A., assignor to E. and T. Fairbanks and Company, St. Johnsbury, Vt. Scale. No. 1,346,481; July 13; v. 276; p. 289.
Bower, Harry A., Boston, Mass. Practice-drum. No. 1,346,588; July 13; v. 276; p. 310.
Boyd, James K., Wilkinsburg, Pa. Compound rail. No. 1,346,394; July 13; v. 276; p. 272.
Bradbury, Clifford C., Oak Park, Ill. Vacuum feed mechanism. No. 1,346,482; July 13; v. 276; p. 289.
Bradfield, Clyde C., Harbor Springs, Mich. Meter-support. No. 1,346,440; July 13; v. 276; p. 281.
Bragdon, George W., Smyrna Mills, assignor of one-fourth to P. H. Tarbell and one-fourth to H. J. Tarbell, Merrill, Me. Sewing-machine. No. 1,346,169; July 13; v. 276; p. 227.
Brandt, Fokko H. G., and G. K. Krell, Kansas City, Mo. Adjustable stringer-support for scaffolds. No. 1,346,170; July 13; v. 276; p. 228.
Bredlik, Vladimir, New York, N. Y. Purification of ammonium salts. No. 1,346,106; July 13; v. 276; p. 216.
Brenner, Richard M., Palisade, N. J. Race-game apparatus. No. 1,346,697; July 13; v. 276; p. 332.
Briggs, Charles A. (See Cooper, Hamilton A., assignor.)
Brinker, Samuel N., Minneapolis, Minn. Car-brake. No. 1,346,171; July 13; v. 276; p. 228.
Brock, Edward J. (See Treichel, A. R., and Brock.)
Brokaw-Eden Company. (See Settlage, Rudolph F., assignor.)
Brookfield, Douglas Holloway, London, England. Smelting-furnace. No. 1,346,527; July 13; v. 276; p. 298.
Brooks, J. B., and Company. (See Jenkins, Alexander H., assignor.)
Brown, Harry M., assignor to Spring Stopper Company, Brooklyn, N. Y. Glass-severing implement. No. 1,346,528; July 13; v. 276; p. 298.
Brown, Horace P. (See Johnston, Clarance L., assignor.)
Brown, William D., Somerset, Ky. Shock-absorber. No. 1,346,739; July 13; v. 276; p. 340.
Browning, George, Chicago, Ill. Safety-razor. No. 1,346,294; July 13; v. 276; p. 253.
Brunelli, Tito L., Clearfield, Pa. Electrical fire-lighting attachment for stoves. No. 1,346,698; July 13; v. 276; p. 332.
Bruns, Richard E., Chicago, Ill. Sealing-cap. No. 1,346,112; July 13; v. 276; p. 217.
Buckham, George T. (See Dawson, A. T., and Buckham.)
Bugbee, Lucian W., and E. D. Tillyer, assignors to American Optical Company, Southbridge, Mass. Illumination. No. 1,346,172; July 13; v. 276; p. 228.
Bunnell, Rose P., administratrix. (See Bunnell, W. O., and Gates.)
Bunnell, William O., deceased, and Q. A. Gates, Wilkes-Barre, Pa.; R. P. Bunnell, executrix. Electric heater. No. 1,346,793; July 13; v. 276; p. 352.
Bunting Brass & Bronze Company, The. (See Donaldson, Augustus F., assignor.)
Burd, Charles. (See Burd, George and C.)
Burd, George and C., Detroit, Mich. Air-compresser pump. No. 1,346,699; July 13; v. 276; p. 333.
Burger, William J., East Cleveland, and M. E. Lauge, assignors to The Warner & Swasey Company, Cleveland, Ohio. Tool or work holding device. No. 1,346,295; July 13; v. 276; p. 253.
Burgess, C. F., Laboratories. (See Weiss, Howard F., assignor.)
Burgi, Herman, assignor of one-half to C. H. Tenney, Springfield, Mass. Automatic gas-pressure regulator. No. 1,346,529; July 13; v. 276; p. 299.
Butcher, William L., Flora, Ind. Fence-gate. No. 1,346,395; July 13; v. 276; p. 272.
Butler, Leonard F. G. (See Fedden, A. H. R., and Butler.)
Butters-Camp Mfg. Co., The. (See Butters, Robert H., assignor.)
Butters, Robert H., Atlanta, Ga., assignor to The Butters-Camp Mfg. Co. Gin or linter saw. No. 1,346,396; July 13; v. 276; p. 272.
Cameron, William, assignor to Torris Weld & Company, Chicago, Ill. Blank-positioning mechanism. No. 1,346,589; July 13; v. 276; p. 310.
Campbell, Charles G. (See Dawson, James, assignor.)
Cannles, John L. (See Mediaville, L., Cannles.)
Cannell, William, Springfield, Mass., assignor to Bausch Machine Tool Company. Machine for grinding worms and the like. No. 1,346,173; July 13; v. 276; p. 228.
Canner, Max O., assignor of one-half to A. Duff and S. Duff, New York, N. Y. Safety-receptacle. No. 1,346,174; July 13; v. 276; p. 229.
Cannon, Andrew H. (See Smith, Leonard A., assignor.)
Cannon, Mervin B., Cincinnati, Ohio. Toilet-package. No. 1,346,441; July 13; v. 276; p. 282.
Carbart, Linden P., Brooklyn, N. Y., and S. Shaughnessy, Jersey City, N. J. Line-indicating device for typewriters. No. 1,346,115; July 13; v. 276; p. 217.
Carlsen, Axel, Lyngby, near Copenhagen, Denmark. Apparatus for producing driving-belts. No. 1,346,700; July 13; v. 276; p. 333.
Caron, Martinus H., Weltevreden, Java, Dutch East Indies, assignor to Clevenger & Caron, Washington, D. C. Treating nickel ores. No. 1,346,175; July 13; v. 276; p. 229.
Castor, Harry B. (See Hinshaw, C. J., and Castor.)
Cathcart, Royal W., Toledo, Ohio. Music-rack. No. 1,346,740; July 13; v. 276; p. 340.
Cavanagh, John F., assignor to Connecticut Telephone & Electric Company, Incorporated, Meriden, Conn. Composition and manufacture. No. 1,346,397; July 13; v. 276; p. 272.
Chambers, Alden R., Winthrop, Mass. Hot-water bottle. No. 1,346,176; July 13; v. 276; p. 229.
Chanard, Auguste, Ruell, France. Fuse for projectiles. No. 1,346,177; July 13; v. 276; p. 229.
Chapman, Richard D. (See Crook, A., and Chapman.)
Chavannes, Adrian J., Des Moines, Iowa. Printer's drying-cabinet. No. 1,346,781; July 13; v. 276; p. 349.
Chicker, Stanley L. (See Ritchie, Samuel, assignor.)
Chiodo, Joseph. (See Tweeddale, Daniel E., assignor.)
Christopher, Calvin F., Asheville, N. C. Wheel-rim. No. 1,346,178; July 13; v. 276; p. 229.
Church, Harold D., assignor to Packard Motor Car Company, Detroit, Mich. Motor-vehicle. No. 1,346,530; July 13; v. 276; p. 299.
Church, Shelby L., Houston, Tex. Pneumatic tire. No. 1,346,113; July 13; v. 276; p. 217.
Claesson, Helge L., Gottenborg, Sweden. Automatic door-closer. No. 1,346,366; July 13; v. 276; p. 266.
Clausing, Louis F., Los Angeles, Calif. Radiator. No. 1,346,442; July 13; v. 276; p. 282.
Claxo Company, The. (See Slater, Vern, assignor.)
Cleveland, William H., Wellington, Kans. Rail-anti-creeper tie-plate. No. 1,346,398; July 13; v. 276; p. 272.
Clevenger & Caron. (See Caron, Martinus H., assignor.)
Cloud, Oscar E., Wichita, Kans. Ventilator. No. 1,346,633; July 13; v. 276; p. 319.
Coburn, Pressly J., Wellsville, Ohio. Amusement device. No. 1,346,634; July 13; v. 276; p. 320.

Cochran, Willard F., Blue Ridge, Ga. Plow. No. 1,346,701; July 13; v. 276; p. 333.
Cockburn, David, and D. MacNicoll, Cardonald, near Glasgow, Scotland. Engine stop-gear. No. 1,346,590; July 13; v. 276; p. 311.
Collins, Jeremiah F., and L. B. Weston, Brockton, Mass. Shoe-form. No. 1,346,296; July 13; v. 276; p. 253.
Collins, Jeremiah F., and L. B. Weston, Brockton, Mass. Last. No. 1,346,297; July 13; v. 276; p. 253.
Colter, George T., New York, N. Y. Brassière-hook. No. 1,346,702; July 13; v. 276; p. 333.
Colvin, Shady D., assignor of one-half to W. H. Welch, Myrtis, La. Electrical superheater. No. 1,346,741; July 13; v. 276; p. 341.
Comstock, Jesse F., Wilkes-Barre, Pa. Winding-machine. No. 1,346,635; July 13; v. 276; p. 320.
Comp., Phoebus E. G. (See Boltshauser, Conrad, assignor.)
Compagnie Des Forges Et Acieries De La Marine Et D'Homecourt. (See Rimailho, Emile, assignor.)
Congdon, Charles H., East Stroudsburg, Pa. Container. No. 1,346,298; July 13; v. 276; p. 254.
Connecticut Telephone & Electric Company. (See Cavanagh, John F., assignor.)
Continental Can Company. (See Taliaferro, J. C., and Warme, assignors.)
Cook, Wilbur C., Waltham, Mass., assignor to The Keystone Watch Case Company, Philadelphia, Pa. Display-box for watches. No. 1,346,591; July 13; v. 276; p. 311.
Cooper, George B., Cleveland, Ohio. Tire-vulcanizer. No. 1,346,483; July 13; v. 276; p. 290.
Cooper, Hamilton A., assignor of one-half to C. A. Briggs, Toledo, Ohio. Ladder. No. 1,346,299; July 13; v. 276; p. 254.
Cope, Frank T. (See Baily, T. F., and Cope.)
Corell, Clifton B., assignor to Underwood Computing Machine Company, New York, N. Y. Combined typewriting and computing machine. No. 1,346,367; July 13; v. 276; p. 267.
Cosmos Engineering Company, The. (See Fedden, A. H. R., and Butler, assignors.)
Cottle, Charles A., Edwardsville, Pa. Carrier for explosives. No. 1,346,636; July 13; v. 276; p. 320.
Coulston, Herbert V., assignor to Smith and Furbush Machine Company, Philadelphia, Pa. Garnet-cylinder. No. 1,346,637; July 13; v. 276; p. 320.
Cowan, Albert W. (See Shiett, H. C., and Cowan.)
Crawford-Frost, William A., Baltimore, Md. Wave-energy motor. No. 1,346,300; July 13; v. 276; p. 272.
Crippen, Henry M., Athens, Ohio, assignor to The Athens Bindery Company. Loose-leaf-binding machine. No. 1,346,179; July 13; v. 276; p. 229.
Crook, Alfred, and R. D. Chapman, Philadelphia, Pa., assignors to Taylor-Wharton Iron and Steel Company, High Bridge, N. J. Method and means for making artificial-stone products. No. 1,346,638; July 13; v. 276; p. 320.
Cru Patents Corporation. (See Wenderhold, William, assignor.)
Cullin, Jasper F., assignor to W. J. Hartwig, Detroit, Mich. Field-coil-testing device. No. 1,346,592; July 13; v. 276; p. 311.
Cuno, Charles F., Meriden, Conn. Electric cigar-lighter. No. 1,346,368; July 13; v. 276; p. 267.
Curtis, Jesse T., assignor of one-third to F. L. McClure and one-third to F. F. Le Fevre, Sebring, Ohio. Signal-operating means. No. 1,346,703; July 13; v. 276; p. 333.
Cutler, Cecil, and D. F. Morand; said Cutler assignor to E. Verey, Sydney, New South Wales, Australia. Loose-leaf binder. No. 1,346,180; July 13; v. 276; p. 230.
Dabbs, Albert E., Manchester, S. W. Savage, Chorlton-cum-Hardy, and A. H. Hindle, Birmingham, assignors of one-eighth to A. Liddle, Manchester, and one-half to J. G. W. Gruban, Kingsway, London, England. Roller or ball bearing. No. 1,346,443; July 13; v. 276; p. 282.
Daniels, Harry H. Winthrop, assignor to The Service Machines Company, Boston, Mass. Stamp-affixing machine. No. 1,346,484; July 13; v. 276; p. 290.
Dargin, Ernest P., Denver, Colo. Spring mechanism for automobiles and other vehicles. No. 1,346,300; July 13; v. 276; p. 254.
Darling, Samuel, Waupun, Wis. Arch-support. No. 1,346,444; July 13; v. 276; p. 282.
Darrin, David H., Maywood, N. J. Time-switch. No. 1,346,114; July 13; v. 276; p. 217.
Daugherty, John Q., assignor of one-fourth to K. M. Rowe, Broken Arrow, Okla. Nut-lock. No. 1,346,301; July 13; v. 276; p. 254.
Davies, Henry R., assignor to Industrial Research Corporation, Toledo, Ohio. Automatic regulator. No. 1,346,181; July 13; v. 276; p. 230.
Davis, Benjamin W., Chicago, Ill. Portable signal system. No. 1,346,531; July 13; v. 276; p. 299.
Davis, Irving L., Dayton, Ohio. Arrow. No. 1,346,639; July 13; v. 276; p. 321.
Davy Brothers Limited. (See Hand, Thomas W., assignor.)
Dawson, Arthur T., Westminster, London, and J. Horne, Barrow-in-Furness, assignors to Vickers Limited, Westminster, London, England. Ammunition-hoisting apparatus. No. 1,346,302; July 13; v. 276; p. 254.
Dawson, Arthur T., and G. T. Buckham, assignors to Vickers Limited, Westminster, London, England. Sighting device for guns. No. 1,346,303; July 13; v. 276; p. 255.
Dawson, James, Oakland, assignor to C. G. Campbell, Alameda county, Calif. Fuel-economizer for cooking-stoves. No. 1,346,445; July 13; v. 276; p. 282.
De Arrigunaga, Manuel, New York, N. Y. Device for the preparation of coffee or like beverages. No. 1,346,485; July 13; v. 276; p. 290.
De Brandt, William F., Melbourne, Victoria, assignor to The Fogarty Patent Interchangeable Harvester Corporation Limited, Perth, Western Australia, Australia. Harvesting-machine. No. 1,346,182; July 13; v. 276; p. 230.
De Clercq, Hendrik, Amsterdam, Netherlands. Drawing-board. No. 1,346,593; July 13; v. 276; p. 311.
Deere and Company. (See Holstein, John V., assignor.)
Deere & Company. (See Howard, Otis W., assignor.)
Deerr, Noël, Brooklyn, N. Y. Apparatus for macerating bagasse. No. 1,346,594; July 13; v. 276; p. 311.
De Fram, Joseph. (See Stipes, R. B., and De Fram.)
Del Solar, Aristides, assignor to A. B. Shrigley, trustee, Boston, Mass. Torpedo-director. No. 1,346,273; July 13; v. 276; p. 249.
Denis, Louis, Liege, Belgium. Sawing-machine. No. 1,346,446; July 13; v. 276; p. 283.
Denne, Mark T., Rushden, England. Stitch-forming mechanism for sewing-machines. No. 1,346,183; July 13; v. 276; p. 230.
Derungs, Ernest A., assignor to Societe Anonyme Ateliers Otis Pifre, Paris, France. System of haulage. No. 1,346,447; July 13; v. 276; p. 283.
De Waters, Enos A., Flint, assignor to General Motors Corporation, Detroit, Mich. Lubricating means for valve-operating devices. No. 1,346,116; July 13; v. 276; p. 218.
Dewey, Ellsworth A., Tampa, Fla. Block-making machine. No. 1,346,640; July 13; v. 276; p. 321.
Dickinson, Thomas A., Youngstown, Ohio. Self-filling fountain-pen. No. 1,346,184; July 13; v. 276; p. 231.

Zayotti, A. Harold, Philadelphia, Pa. Worsted waste and noils. No. 132,218; July 13; v. 276; p. 397.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 13TH DAY OF JULY, 1920.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Absorbing and purifying composition. J. C. Tate. No. 1,346,349; July 13; v. 276; p. 264.
Advertising device. F. Vogelzang. No. 1,346,775; July 13; v. 276; p. 348.
Advertising or amusement device. C. H. Leggett. No. 1,346,219; July 13; v. 276; p. 237.
Advertising specialty. C. Kolin. No. 1,346,658; July 13; v. 276; p. 324.
Aeroplane. A. Alberico. No. 1,346,107; July 13; v. 276; p. 216.
Aeroplane-drive. H. F. McNutt. No. 1,346,327; July 13; v. 276; p. 260.
Aeroplane safety device. L. Kovacs. No. 1,346,214; July 13; v. 276; p. 236.
Agricultural-implement blade. E. A. Schmutte. No. 1,346,261; July 13; v. 276; p. 246.
Air-diffusion machine. V. Slater. No. 1,346,471; July 13; v. 276; p. 287.
Airplane. A. R. Smith. No. 1,346,472; July 13; v. 276; p. 288.
Airplane. H. P. Van Keuren. No. 1,346,570; July 13; v. 276; p. 307.
Alarm: *See*—
Lock and burglar-alarm.
Alkali metal minerals, Decomposition of. E. Bergve. No. 1,346,365; July 13; v. 276; p. 266.
Alloy of iron, chromium, and titanium, and the production thereof. H. C. Sicard. No. 1,346,343; July 13; v. 276; p. 263.
Alloys, Producing chromium-containing. F. A. Fahrenwald. No. 1,346,187; July 13; v. 276; p. 231.
Ammonium salts, Purification of. V. Bredlik. No. 1,346,106; July 13; v. 276; p. 216.
Ammunition-hoisting apparatus. A. T. Dawson and J. Horne. No. 1,346,302; July 13; v. 276; p. 254.
Amusement device. P. J. Coburn. No. 1,346,634; July 13; v. 276; p. 320.
Amusement device. J. C. Welch. No. 1,346,576; July 13; v. 276; p. 308.
Angle-indicator, Automatic. J. R. Lackland. No. 1,346,547; July 13; v. 276; p. 303.
Arch-support. S. Darling. No. 1,346,444; July 13; v. 276; p. 282.
Armband. A. L. Herrmann. No. 1,346,374; July 13; v. 276; p. 268.
Armchair and bed, Combined. E. Jantsch. No. 1,346,206; July 13; v. 276; p. 234.
Arrow. I. L. Davis. No. 1,346,639; July 13; v. 276; p. 321.
Asbestos, Bleaching. C. L. Hill. No. 1,346,316; July 13; v. 276; p. 257.
Assorting and distributing machine, Product. F. H. Ballou. No. 1,346,438; July 13; v. 276; p. 281.
Astronomical instrument. E. Meitner. No. 1,346,412; July 13; v. 276; p. 275.
Automatic brake. V. Barningham and S. G. Ashby. No. 1,346,628; July 13; v. 276; p. 318.
Automatic regulator. H. R. Davies. No. 1,346,181; July 13; v. 276; p. 230.
Automatically-operated support. S. E. Sudbury. No. 1,346,773; July 13; v. 276; p. 347.
Automobile attachment, Life-saver. M. Doujak. No. 1,346,486; July 13; v. 276; p. 290.
Automobile-bumper. L. Baumgartl. No. 1,346,478; July 13; v. 276; p. 289.
Automobile-lock. T. C. Fischer. No. 1,346,371; July 13; v. 276; p. 267.
Automobile-lock. A. A. Ritchie. No. 1,346,135; July 13; v. 276; p. 221.
Automobile-signal. P. A. Stover. No. 1,346,567; July 13; v. 276; p. 307.
Automobile-ventilator. J. W. Raab and R. Edwards. No. 1,346,383; July 13; v. 276; p. 270.
Automobiles and other vehicles, Spring mechanism for. E. P. Dargin. No. 1,346,300; July 13; v. 276; p. 254.
Automobiles, Automatic gear-shift for. H. K. Altick. No. 1,346,151; July 13; v. 276; p. 224.
Automobiles, Control-lever lock for. D. Morris and W. Levy. No. 1,346,762; July 13; v. 276; p. 345.
Automobiles, Load-carrier for. W. K. Yost. No. 1,346,581; July 13; v. 276; p. 309.
Automobiles, Spring-eye protector for. H. K. Reinoehl. No. 1,346,682; July 13; v. 276; p. 329.
Automobilist's caution-signal. W. W. Kuhlmann. No. 1,346,714; July 13; v. 276; p. 335.
Awning device. H. E. Thompson. No. 1,346,351; July 13; v. 276; p. 264.
Awning-roller support. J. C. Williams. No. 1,346,622; July 13; v. 276; p. 317.
Bag supporting and clamping mechanism. J. E. Schmandt. No. 1,346,260; July 13; v. 276; p. 246.
Bags, cases, and the like. Body structure for traveling. J. Heinel. No. 1,346,495; July 13; v. 276; p. 292.
Bagasse, Apparatus for macerating. N. Deerr. No. 1,346,594; July 13; v. 276; p. 311.
Bait, Fish-. G. E. Pickup. No. 1,346,674; July 13; v. 276; p. 327.
Bar: *See*—
Boring-bar.
Bearing. L. Golly. No. 1,346,121; July 13; v. 276; p. 218.
Bearings and manufacturing same, Ball-holder for ball-. K. W. Lindman. No. 1,346,323; July 13; v. 276; p. 259.
Bearing, Combined radial and thrust ball-. N. A. Palmgren. No. 1,346,417; July 13; v. 276; p. 276.
Bearing construction, Roller-. L. C. Bayles and F. M. Slater. No. 1,346,163; July 13; v. 276; p. 226.
Bearing, Roller or ball. A. E. Dabbs, S. W. Savage, and A. H. Hindle. No. 1,346,443; July 13; v. 276; p. 282.
Bearing, Self-oiling metal. N. W. Kinney. No. 1,346,377; July 13; v. 276; p. 268.
Bearing structure, Semispherical ball-. G. W. Dover. No. 1,346,400; July 13; v. 276; p. 273.
Bearing, Universal roller-. E. P. Webster. No. 1,346,147; July 13; v. 276; p. 223.
Bed, Extensible chair-. A. Zwolinski. No. 1,346,582; July 13; v. 276; p. 309.
Bedpan, Sanitary. E. W. Stoler and H. Trease. No. 1,346,388; July 13; v. 276; p. 271.
Beet blocker, Sugar-. S. Nordenberg and S. Donner. No. 1,346,332; July 13; v. 276; p. 261.
Belts, Apparatus for producing driving-. A. Carlsen. No. 1,346,700; July 13; v. 276; p. 333.
Binder. F. L. Manny. No. 1,346,328; July 13; v. 276; p. 260.
Binder, Loose-leaf. C. Cutler and D. F. Morand. No. 1,346,180; July 13; v. 276; p. 230.
Binding machine, Loose-leaf-. H. M. Crippen. No. 1,346,179; July 13; v. 276; p. 229.
Binding-post. F. G. Beetem. No. 1,346,525; July 13; v. 276; p. 298.
Bit: *See*—
Drilling-bit.
Blank-positioning mechanism. W. Cameron. No. 1,346,589; July 13; v. 276; p. 310.
Blanks, Machine and method for shaping and assembling. A. W. George. No. 1,346,490; July 13; v. 276; p. 291.
Block-making machine. E. A. Dewey. No. 1,346,640; July 13; v. 276; p. 321.
Blood-transfusion and aspirating apparatus, Combined. M. L. Janes. No. 1,346,127; July 13; v. 276; p. 220.
Blower. R. Rosner. No. 1,346,796; July 13; v. 276; p. 353.
Board: *See*—
Drawing-board.
Boilers, Water-heater for. P. A. Petrucci. No. 1,346,334; July 13; v. 276; p. 261.
Bolt-fastening. W. E. Windsor. No. 1,346,578; July 13; v. 276; p. 309.
Bookmark. J. J. Vanderveer. No. 1,346,729; July 13; v. 276; p. 338.
Book or pamphlet covering machine. C. A. Juengst. No. 1,346,799; July 13; v. 276; p. 353.
Boring-bar. L. Mediavilla and J. L. Canales. No. 1,346,230; July 13; v. 276; p. 239.
Bottle, &c., stopper. H. P. Roberts. No. 1,346,510; July 13; v. 276; p. 295.
Bottle-closure attachment. S. T. Whitaker. No. 1,346,621; July 13; v. 276; p. 317.
Bottle, Hot-water. A. R. Chambers. No. 1,346,176; July 13; v. 276; p. 229.

Bottles and similar receptacles, Cap for milk-. J. A. Loyster. No. 1,346,757; July 13; v. 276; p. 344.
Box: *See*—
Cash-carrier box. Phonograph sound-box.
Lunch-box. Watch-display box.
Packing-box.
Box-fasteners. E. W. Stamm. No. 1,346,566; July 13; v. 276; p. 307.
Box-staying machine. C. F. Walz and F. D. Morris. No. 1,346,573; July 13; v. 276; p. 308.
Boxes, cases, and other receptacles having lids, Bolt-fastenings for the lids of. C. C. Gossage. No. 1,346,450; July 13; v. 276; p. 283.
Brace. W. L. Allee. No. 1,346,736; July 13; v. 276; p. 340.
Bracket: *See*—
Shade-bracket.
Brake: *See*—
Automatic brake. Gun-brake.
Car-brake.
Brake and coaster, Back-pedaling. E. Enström and E. H. W. Welbull. No. 1,346,118; July 13; v. 273; p. 218.
Brassière-hook. G. T. Colter. No. 1,346,702; July 13; v. 276; p. 333.
Brooder. A. F. Shuler. No. 1,346,688; July 13; v. 276; p. 330.
Brush-cutter. F. Gross. No. 1,346,197; July 13; v. 276; p. 232.
Brush-cutter and ground-evener. F. Pomijè. No. 1,346,382; July 13; v. 276; p. 270.
Buckle, Belt-. C. A. Beule. No. 1,346,795; July 13; v. 276; p. 353.
Bumper. R. T. Newton. No. 1,346,667; July 13; v. 276; p. 326.
Bumper. R. T. Newton. No. 1,346,668; July 13; v. 276; p. 326.
Burglar-proof lock. A. Yurow. No. 1,346,364; July 13; v. 276; p. 266.
Burner: *See*—
Gas-burner. Oil-burner.
Hydrocarbon-burner. Oil-gas burner.
Button. E. C. Lakey. No. 1,346,660; July 13; v. 276; p. 325.
Button-fastener. D. E. Tweeddale. No. 1,346,352; July 13; v. 276; p. 264.
Cabinet, Heat and vapor bath. E. B. Ullman, E. B. Simmonds, and A. F. Atkinson. No. 1,346,353; July 13; v. 276; p. 264.
Cabinet, Kitchen-. F. H. Schroeder. No. 1,346,470; July 13; v. 276; p. 287.
Cabinet, Printer's drying-. A. J. Chavannes. No. 1,346,781; July 13; v. 276; p. 349.
Cabinet, Shoe-shining. L. H. Arter. No. 1,346,585; July 13; v. 276; p. 310.
Calendar. E. G. Pennington. No. 1,346,764; July 13; v. 276; p. 346.
Camera. H. J. Perrier. No. 1,346,461; July 13; v. 276; p. 286.
Can-filling machine. C. E. Steere. No. 1,346,141; July 13; v. 276; p. 222.
Can holder and protector, Milk-. R. D. Green. No. 1,346,451; July 13; v. 276; p. 283.
Can lever mechanism, Oil-. G. Lidseen. No. 1,346,130; July 13; v. 276; p. 220.
Cans, Measuring attachment for. P. M. Rosenwasser. No. 1,346,558; July 13; v. 276; p. 305.
Car-brake. S. N. Brinker. No. 1,346,171; July 13; v. 276; p. 228.
Car-coupling. N. P. Kemmer. No. 1,346,603; July 13; v. 276; p. 313.
Car-hoist. A. H. McDougall. No. 1,346,324; July 13; v. 276; p. 259.
Car loader, Box-. H. D. Pratt. No. 1,346,678; July 13; v. 276; p. 328.
Car loader, Box-. H. D. Pratt. No. 1,346,680; July 13; v. 276; p. 328.
Car, Railway motor-. C. G. Mahana, E. D. Glidden, and M. P. Laurent. No. 1,346,227; July 13; v. 276; p. 238.
Car-roof. W. D. Thompson. No. 1,346,281; July 13; v. 276; p. 250.
Car-seat, Pedestal. F. Smolar. No. 1,346,386; July 13; v. 276; p. 270.
Car-unloader. H. D. Pratt. No. 1,346,681; July 13; v. 276; p. 329.
Cars, Wheel-attaching device for mine-. F. H. Gibbs. No. 1,346,193; July 13; v. 276; p. 232.
Carbureter. F. B. Hays. No. 1,346,201; July 13; v. 276; p. 233.
Carbureter-regulator, Automatic. J. T. Young. No. 1,346,734; July 13; v. 276; p. 339.
Carbureter, Vacuum-feed. P. P. Gilles. (Reissue.) No. 14,912; July 13; v. 276; p. 354.
Card, Statistical-record. W. H. Bassett. No. 1,346,162; July 13; v. 276; p. 226.
Carrier: *See*—
Hay-carrier.
Cartridge, Hydraulic-joint. E. Rimailho. No. 1,346,722; July 13; v. 276; p. 337.
Cash-carrier box. M. A. Pond. No. 1,346,676; July 13; v. 276; p. 328.
Caster. W. H. Noelting. No. 1,346,240; July 13; v. 276; p. 241.
Caster-connecting device. R. J. Ellsworth. No. 1,346,641; July 13; v. 276; p. 321.
Caster-socket. W. H. Noelting. No. 1,346,239; July 13; v. 276; p. 241.
Cement-stave machine. S. E. Anderson. No. 1,346,779; July 13; v. 276; p. 349.
Chain, Antiskid-. M. Mager. No. 1,346,226; July 13; v. 276; p. 238.
Chain, Eyeglass-. A. Scott. No. 1,346,559; July 13; v. 276; p. 305.
Chain, Harness-trace. E. P. Belz. No. 1,346,439; July 13; v. 276; p. 281.
Chains, Making. F. Müller. No. 1,346,507; July 13; v. 276; p. 294.
Chair: *See*—
Toy swinging chair.
Chair. H. A. Atwood. No. 1,346,110; July 13; v. 276; p. 216.
Chair attachment, Rocking-. P. Pietrobono. No. 1,346,675; July 13; v. 276; p. 327.
Chart-holder. C. W. Babcock. No. 1,346,691; July 13; v. 276; p. 331.
Chuck. F. C. Palosky. No. 1,346,245; July 13; v. 276; p. 242.
Cigar-lighter, Electric. C. F. Cuno. No. 1,346,368; July 13; v. 276; p. 267.
Clamp: *See*—
Joiner's clamp.
Cleaner: *See*—
Teeth-cleaner.
Clip: *See*—
Pen or pencil clip.
Clipper. J. W. Price. No. 1,346,249; July 13; v. 276; p. 243.
Closet: *See*—
Water-closet.
Closet-seat and bidet, Combination. D. L. Rathbone. No. 1,346,252; July 13; v. 276; p. 244.
Cloth, Device for opening and guiding webs of. W. I. Lewis. No. 1,346,549; July 13; v. 276; p. 303.
Clothesline-coupling. H. F. Doyle. No. 1,346,487; July 13; v. 276; p. 290.
Clothespin, Wire. C. S. Pratt. No. 1,346,608; July 13; v. 276; p. 314.
Coal-oil generator. H. G. Epps. No. 1,346,370; July 13; v. 276; p. 267.
Coffee or like beverages, Device for the preparation of. M. de Arrigunaga. No. 1,346,485; July 13; v. 276; p. 290.
Coin-assorting apparatus. J. Leja. No. 1,346,457; July 13; v. 276; p. 285.
Coke-producing apparatus. A. M. Smith. No. 1,346,515; July 13; v. 276; p. 296.
Composition and manufacture. J. F. Cavanagh. No. 1,346,397; July 13; v. 276; p. 272.
Compressors, Automatic control for turbo-. E. H. Sherbondy. No. 1,346,563; July 13; v. 276; p. 306.
Compressors, Supercharging device for turbo-. E. H. Sherbondy. No. 1,346,564; July 13; v. 276; p. 306.
Concrete conduit, Reinforced-. G. M. Schofield. No. 1,346,687; July 13; v. 276; p. 330.
Concrete construction, Reinforced. E. L. Peterson. No. 1,346,673; July 13; v. 276; p. 327.
Concrete-form support and bracket. E. C. Marqua. No. 1,346,131; July 13; v. 276; p. 221.
Concrete pipe, Reinforced-. G. C. Bartram. No. 1,346,620; July 13; v. 276; p. 319.
Concrete roof construction. G. A. Hurst. No. 1,346,752; July 13; v. 276; p. 343.
Cone-baking machine. G. O. Robinson. No. 1,346,338; July 13; v. 276; p. 262.
Container. C. H. Congdon. No. 1,346,298; July 13; v. 276; p. 254.
Container, Collapsible. S. L. Walker and J. M. Laurenson. No. 1,346,731; July 13; v. 276; p. 339.
Container, Toilet-accessory. M. J. Harding. No. 1,346,541; July 13; v. 276; p. 301.
Conveyer, Pneumatic. L. C. Vanderlip. No. 1,346,144; July 13; v. 276; p. 223.
Conveying mechanism. A. B. Hazard. No. 1,346,314; July 13; v. 276; p. 257.
Cookers, Baffle-plate device for electric fireless. M. Murphy. No. 1,346,666; July 13; v. 276; p. 326.
Cooling system. W. W. Muir. No. 1,346,331; July 13; v. 276; p. 260.
Cotton-picking machine. J. B. Tibbs. No. 1,346,282; July 13; v. 276; p. 251.
Countersink, Adjustable. C. O. Bosse. No. 1,346,105; July 13; v. 276; p. 216.
Coupling: *See*—
Car-coupling. Hose-coupling.
Clothesline-coupling. Universal coupling.
Crank-pins and eccentrics and truing-shafts, Means for turning. T. Smith. No. 1,346,271; July 13; v. 276; p. 248.
Cultivator. C. S. Sharp. No. 1,346,512; July 13; v. 276; p. 295.
Cultivator, Two-row. J. V. Holstein. No. 1,346,317; July 13; v. 276; p. 258.
Cultivator-wheel adjustment. O. W. Howard. No. 1,346,318; July 13; v. 276; p. 258.
Cups and similar articles, Carton for. S. Bergman. No. 1,346,792; July 13; v. 276; p. 352.
Current-motor. T. H. Walker. No. 1,346,285; July 13; v. 276; p. 251.

Curtain-pole and window-shade holder. E. Mikolyn. No. 1,346,233; July 13; v. 276; p. 240.
Cutlery-renovating machine, Knife-controlling mechanism for. C. H. J. Dilg. No. 1,346,804; July 13; v. 276; p. 354.
Cutter: *See*—
Brush-cutter.
Cutter-heads, Knife-scouring means for. G. L. Kraher. No. 1,346,215; July 13; v. 276; p. 236.
Cutting-machine. C. W. Bailey and J. H. Stewart. No. 1,346,626; July 13; v. 276; p. 318.
Cylinder, Garnet-. H. V. Coulston. No. 1,346,637; July 13; v. 276; p. 320.
Dental crown-making machine. I. Navarro M. No. 1,346,710; July 13; v. 276; p. 336.
Deodorizing material. R. C. Roark. No. 1,346,337; July 13; v. 276; p. 262.
Diagnostic instrument. A. S. Harris. No. 1,346,200; July 13; v. 276; p. 233.
Direction-preindicator. E. H. Hebern. No. 1,346,453; July 13; v. 276; p. 284.
Disk for flexible couplings and making same. R. J. Stokes. No. 1,346,612; July 13; v. 276; p. 315.
Door. E. A. Smith. No. 1,346,268; July 13; v. 276; p. 247.
Door-closer, Automatic. H. L. Claesson. No. 1,346,366; July 13; v. 276; p. 266.
Doors, Combined locking and circuit-controlling device for double. F. A. Boedtcher. No. 1,346,111; July 13; v. 276; p. 216.
Draft-rigging. W. J. Regan. No. 1,346,556; July 13; v. 276; p. 304.
Drawing-board. H. de Clercq. No. 1,346,593; July 13; v. 276; p. 311.
Drier: *See*—
Grain-drier.
Drilling bit, Well-. P. G. Midgett. No. 1,346,133; July 13; v. 276; p. 221.
Drinking-fountain. N. F. Green and J. Peterka. No. 1,346,122; July 13; v. 276; p. 219.
Drum, Practice-. H. A. Bower. No. 1,346,588; July 13; v. 276; p. 310.
Drums, Door-locks for revolving. R. F. Settlage. No. 1,346,263; July 13; v. 276; p. 247.
Dry separator. F. M. Smith. No. 1,346,610; July 13; v. 276; p. 315.
Dustpan. F. J. Morris. No. 1,346,380; July 13; v. 276; p. 269.
Dynamo, Continuous-current. F. Kesselring. No. 1,346,213; July 13; v. 276; p. 236.
Ear, Mechanical bone-conductive. J. Prenn. No. 1,346,721; July 13; v. 276; p. 337.
Earth-working machines, Attachment for. L. H. Towner. No. 1,346,432; July 13; v. 276; p. 280.
Egg-boiling rack. F. J. Vierling, F. R. Bartholomew, and M. H. Smith. No. 1,346,283; July 13; v. 276; p. 251.
Electric-arc furnace. L. Lombardi. No. 1,346,223; July 13; v. 276; p. 238.
Electric heater. W. O. Bunnell and Q. A. Gates. No. 1,346,793; July 13; v. 276; p. 352.
Electric-incandescent-lighting apparatus. M. Pattay and E. Jaquemot. No. 1,346,671; July 13; v. 276; p. 327.
Electric machines, Brush-rigging for dynamo-. E. F. Andrews and R. E. Acre. No. 1,346,108; July 13; v. 276; p. 216.
Electric switch. W. J. Newton. No. 1,346,553; July 13; v. 276; p. 304.
Electrical apparatus. C. M. Petersen and O. J. Boden. No. 1,346,606; July 13; v. 276; p. 314.
Electrical condenser. E. A. Bayles and H. Higham. No. 1,346,694; July 13; v. 276; p. 332.
Electrical superheater. S. D. Colvin. No. 1,346,741; July 13; v. 276; p. 341.
Elevators, Feed-drum for pneumatic. G. and J. Bernert. No. 1,346,293; July 13; v. 276; p. 253.
Elevators, Safety device for. W. J. Springer. No. 1,346,274; July 13; v. 276; p. 249.
Engine: *See*—

Tire-tread. W. Barber. No. 1,346,627; July 13; v. 276; p. 318.
Tire, Vehicle-. J. A. Prince and A. L. Gilles. No. 1,346,766; July 13; v. 276; p. 346.
Tire, Vehicle-. R. S. Reed. No. 1,346,336; July 13; v. 276; p. 261.
Tire, Vehicle-. W. and J. G. Small. No. 1,346,514; July 13; v. 276; p. 296.
Tire-vulcanizer. G. B. Cooper. No. 1,346,483; July 13; v. 276; p. 290.
Tire-vulcanizing machine, Continuous. T. F. Baily and F. T. Cope. No. 1,346,158; July 13; v. 276; p. 225.
Tires, Inner-tube covering for. F. S. Bennett. No. 1,346,632; July 13; v. 276; p. 319.
Tires, Making cushion-. F. W. Strang. No. 1,346,389; July 13; v. 276; p. 271.
Tires, Resilient inner tube for vehicle-. F. P. Woodward. No. 1,346,290; July 13; v. 276; p. 252.
Tobacco, Method of and means for preserving. C. C. Dula. No. 1,346,533; July 13; v. 276; p. 300.
Toilet package. M. B. Cannon. No. 1,346,441; July 13; v. 276; p. 282.
Toilet, Sanitary. E. G. Friedrich. No. 1,346,311; July 13; v. 276; p. 256.
Tongs, Power-operated. S. E. Barlow. No. 1,346,160; July 13; v. 276; p. 226.
Tool, Combination-. A. L. Lucas. No. 1,346,409; July 13; v. 276; p. 275.
Tool or work holding device. W. J. Burger and M. E. Lange. No. 1,346,295; July 13; v. 276; p. 253.
Tool, Percussion-. A. Schinkez. No. 1,346,341; July 13; v. 276; p. 262.
Tool, Valve-grinding. C. Gieser and G. Shaffer. No. 1,346,783; July 13; v. 276; p. 350.
Toothbrush. J. J. Fitz-Gibbon. No. 1,346,536; July 13; v. 276; p. 300.
Torpedo-controlling mechanism. W. G. Shelton. No. 1,346,264; July 13; v. 276; p. 247.
Torpedo-director. A. del Solar. No. 1,346,273; July 13; v. 276; p. 249.
Torpedo-trap. V. H. Masters and M. G. Shoop. No. 1,346,551; July 13; v. 276; p. 303.
Towboat, Screw-propelled chambered-stern. T. R. Tarn. No. 1,346,279; July 13; v. 276; p. 250.
Tower-spirals, Machine for forming clay. B. M. Hood. No. 1,346,786; July 13; v. 276; p. 351.
Toy balloons, Machine for forming rolls on. H. R. Gill. No. 1,346,706; July 13; v. 276; p. 334.
Toy swinging chair. C. L. Wecht. No. 1,346,620; July 13; v. 276; p. 317.
Tractor. E. Flaiz. No. 1,346,644; July 13; v. 276; p. 322.
Tractor. J. H. Sissel. No. 1,346,771; July 13; v. 276; p. 347.
Tractor-shoe-dirt eliminator. E. Erik. No. 1,346,186; July 13; v. 276; p. 231.
Trap: *See*—
Torpedo-trap.
Tractor-wheel. H. Vass. No. 1,346,145; July 13; v. 276; p. 223.
Train, Road-. E. Rimailho. No. 1,346,723; July 13; v. 276; p. 337.
Trimming the ends of articles, Machine for. H. J. Wheeler. No. 1,346,288; July 13; v. 276; p. 252.
Truck, Elevating. C. M. Hendershott. No. 1,346,710; July 13; v. 276; p. 335.
Truck frame, Motor-. C. B. Flinchbaugh. No. 1,346,744; July 13; v. 276; p. 341.
Truck, Loading and hauling automobile-. O. Amos and E. A. McKee. No. 1,346,152; July 13; v. 276; p. 224.
Truck, Swivel-. J. H. Rose. No. 1,346,466; July 13; v. 276; p. 286.
Turbine control-housing. E. H. Sherbondy. No. 1,346,565; July 13; v. 276; p. 306.
Turbine, Explosion gas-. V. Olhovsky. No. 1,346,509; July 13; v. 276; p. 295.

Turbine, Steam-condensing. E. Mühl. No. 1,346,413; July 13; v. 276; p. 276.
Type compressor, Oscillating-. C. D. Havenstrite. No. 1,346,404; July 13; v. 276; p. 273.
Typewriter line-indicating device. L. P. Carhart and S. Shaughenessy. No. 1,346,115; July 13; v. 276; p. 217.
Typewriting and computing machine, Combined. C. B. Corell. No. 1,346,367; July 13; v. 276; p. 267.
Typewriting-machine. G. F. Mapes. No. 1,346,605; July 13; v. 276; p. 314.
Typewriting-machine. J. Phelps. No. 1,346,607; July 13; v. 276; p. 314.
Typographic plate. L. M. Adams. No. 1,346,583; July 13; v. 276; p. 309.
Underfeed-stoker furnace. J. H. Roach. No. 1,346,465; July 13; v. 276; p. 286.
Universal coupling. G. T. Rayfield. No. 1,346,253; July 13; v. 276; p. 244.
Universal joint. H. L. Washburn. No. 1,346,776; July 13; v. 276; p. 348.
Unsheathing and pulverizing machine. C. Field. No. 1,346,119; July 13; v. 276; p. 218.
Upholstery slat-support. M. Stadtler. No. 1,346,347; July 13; v. 276; p. 263.
Vacuum-feed mechanism. C. C. Bradbury. No. 1,346,482; July 13; v. 276; p. 289.
Valve. L. G. Wilbur. No. 1,346,289; July 13; v. 276; p. 252.
Valve. W. A. Atteberry. No. 1,346,737; July 13; v. 276; p. 340.
Valve-actuating mechanism. W. E. Ellis. No. 1,346,401; July 13; v. 276; p. 273.
Valve, Fuel-. F. G. Slonek. No. 1,346,267; July 13; v. 276; p. 247.
Valve, Globe-. W. H. Johnson. No. 1,346,210; July 13; v. 276; p. 235.
Valve-grinder. J. Ralston. No. 1,346,420; July 13; v. 276; p. 277.
Valve, Hydrocarbon-engine. R. M. Hvid. No. 1,346,204; July 13; v. 276; p. 234.
Valve mechanism. I. M. Uppercu. No. 1,346,617; July 13; v. 276; p. 316.
Valve mounting, Bottle-. F. H. Silverthorne. No. 1,346,137; July 13; v. 276; p. 221.
Valve-operating devices, Lubricating means for. E. A. De Waters. No. 1,346,116; July 13; v. 276; p. 218.
Valve-spring compressor. C. H. Newton. No. 1,346,416; July 13; v. 276; p. 276.
Valve, Thermo safety-. K. F. Triggs. No. 1,346,791; July 13; v. 276; p. 352.
Valves, Machine for trimming. A. E. Schlieder. No. 1,346,259; July 13; v. 276; p. 246.
Vehicle, Combination motor-. R. A. Wornstaff. No. 1,346,778; July 13; v. 276; p. 349.
Vehicle construction, Motor-. C. W. McKinley. No. 1,346,326; July 13; v. 276; p. 259.
Vehicle, Manually-propelled. L. M. Tucker. No. 1,346,727; July 13; v. 276; p. 338.
Vehicle, Motor-. F. A. Whitten. No. 1,346,149; July 13; v. 276; p. 224.
Vehicle, Motor-. H. D. Church. No. 1,346,530; July 13; v. 276; p. 299.
Vehicles, Repair of the axles of motor-. E. Hodges. No. 1,346,202; July 13; v. 276; p. 233.
Vehicles, Roof-deck for. M. R. Hull. No. 1,346,203; July 13; v. 276; p. 234.
Vehicles, Towing-dolly for. L. T. and D. S. Kimmerle. No. 1,346,712; July 13; v. 276; p. 335.
Velocipede and wagon, Combined. E. J. Doyle. No. 1,346,596; July 13; v. 276; p. 312.
Ventilator: *See*—
Automobile-ventilator.
Ventilator. O. E. Cloud. No. 1,346,633; July 13; v. 276; p. 319.
Ventilizer and shade, Combined. V. M. Allen. No. 1,346,800; July 13; v. 276; p. 354.
Vessel, Submersible destroying or salvaging. L. Fink. No. 1,346,743; July 13; v. 276; p. 341.
Vibrator. H. F. Liedtke. No. 1,346,221; July 13; v. 276; p. 237.
Vulcanizer. J. C. Heintz and G. Ruf. (Reissue.) No. 14,913; July 13; v. 276; p. 355.
Wagon-loader. H. D. Pratt. No. 1,346,679; July 13; v. 276; p. 328.
Wagon, Side-dumping. H. C. Weitzel. No. 1,346,575; July 13; v. 276; p. 308.
Warp-threads, Spacing-clamp for. C. Lea. No. 1,346,498; July 13; v. 276; p. 293.
Washing-machine. C. H. J. Dilg. No. 1,346,595; July 13; v. 276; p. 312.
Washing-machine cylinder. W. Bartholomew. No. 1,346,291; July 13; v. 276; p. 252.
Watch-display box. W. C. Cook. No. 1,346,591; July 13; v. 276; p. 311.
Water-closet, Sanitary. W. C. Rees. No. 1,346,255; July 13; v. 276; p. 244.
Water-distillation system. A. E. Flowers. No. 1,346,537; July 13; v. 276; p. 301.
Water-heater. D. L. Rathbone. No. 1,346,251; July 13; v. 276; p. 244.
Wave-energy motor. W. A. Crawford-Frost. No. 1,346,399; July 13; v. 276; p. 272.
Weaner, Calf and colt. J. Reichert. No. 1,346,557; July 13; v. 276; p. 305.
Wearing-apparel. H. W. Ewing. No. 1,346,448; July 13; v. 276; p. 283.
Weighing-machines, Automatic compensator for. H. Richardson. No. 1,346,684; July 13; v. 276; p. 329.
Welding generator, Arc-. A. M. Bennett. No. 1,346,164; July 13; v. 276; p. 226.
Welding process, Electrical. E. A. Taylor. No. 1,346,350; July 13; v. 276; p. 264.
Wheel: *See*—
Tractor-wheel.
Wheel. E. H. Lewis. No. 1,346,756; July 13; v. 276; p. 344.
Wheel-defect and coupling-limit gage. A. McCormick. No. 1,346,224; July 13; v. 276; p. 238.
Wheel or pulley. R. H. Rogers. No. 1,346,511; July 13; v. 276; p. 295.
Wheel-rim. C. F. Christopher. No. 1,346,178; July 13; v. 276; p. 229.
Wheel rim, Vehicle-. J. C. Theberath. No. 1,346,569; July 13; v. 276; p. 307.
Wheel tread, Automobile-. J. Serediuk. No. 1,346,262; July 13; v. 276; p. 246.
Wheels, Rim for pneumatic-tired. G. Rubino. No. 1,346,468; July 13; v. 276; p. 287.
Winding-machine. J. F. Comstock. No. 1,346,635; July 13; v. 276; p. 320.
Window-blind rollers, curtains, valences, and the like, Support for. H. Umphrey. No. 1,346,354; July 13; v. 276; p. 264.
Window-cleaning device. A. Sundh. No. 1,346,348; July 13; v. 276; p. 263.
Window-frame, Revolving. A. P. McClair. No. 1,346,663; July 13; v. 276; p. 325.
Windshield attachment. G. Glaudel. No. 1,346,402; July 13; v. 276; p. 273.
Windshield screen. F. McMahon and R. A. Houston. No. 1,346,664; July 13; v. 276; p. 325.
Wireless or other telegraph mechanism, String message-holder for. M. M. Wood. No. 1,346,476; July 13; v. 276; p. 288.
Wires, Arrangement and connector for the jointing of electrical. J. S. Möllerhoj. No. 1,346,506; July 13; v. 276; p. 294.
Wood and bending same, Bent ply-. O. H. Basquin. No. 1,346,161; July 13; v. 276; p. 226.
Wood, Fireproofing. H. F. Weiss. No. 1,346,287; July 13; v. 276; p. 251.
Work-holding device. A. O. Mathison. No. 1,346,504; July 13; v. 276; p. 294.
Wrench: *See*—
Socket-wrench.
Wrench. R. Les. No. 1,346,716; July 13; v. 276; p. 336.
Yoke, Cattle-. J. Switzyk. No. 1,346,278; July 13; v. 276; p. 250.

ALPHABETICAL LIST OF DESIGNS.

Air and water dispenser casing, Combined. A. A. Ewald. No. 55,762; July 13; v. 276; p. 361.
Aquarium-stand. F. S. Crowell. Nos. 55,751–4; July 13; v. 276; p. 359.
Article-holder, Individual. P. F. Denning. No. 55,756; July 13; v. 276; p. 360.
Auto signal-light. J. P. Becker. No. 55,739; July 13; v. 276; p. 356.
Automobile-body. F. Richard. No. 55,816; July 13; v. 276; p. 371.
Automobile signal-light. C. A. Vories. No. 55,833; July 13; v. 276; p. 374.
Automobile-tool. P. L. Hudgins. No. 55,792; July 13; v. 276; p. 367.
Badge. J. Archer. No. 55,736; July 13; v. 276; p. 356.
Bracelet, Novelty picture-. J. B. Griffin. No. 55,788; July 13; v. 276; p. 366.
Bulletin-board. H. J. Mahin. No. 55,805; July 13; v. 276; p. 369.
Button and tie-slide or similar article, Combined collar-. H. Esch, Jr. No. 55,761; July 13; v. 276; p. 361.
Cart. M. J. Carls and H. F. Prucha. No. 55,743; July 13; v. 276; p. 357.
China, glass, or like articles, Surface decoration for. A. Martin. No. 55,807; July 13; v. 276; p. 369.
Clamping-dog. C. R. Townsend. Nos. 55,830–1; July 13; v. 276; p. 373–4.
Crumb set. T. B. Easby. Nos. 55,757–8; July 13; v. 276; p. 360.
Cycle, Kiddie-. A. P. Spiringer. No. 55,825; July 13; v. 276; p. 372.
Display-rack. F. W. Gibson. No. 55,778; July 13; v. 276; p. 364.

Doll. E. Malavarca. No. 55,806; July 13; v. 276; p. 369.
Emblem, banner, or armband. E. A. Klapp. No. 55,798; July 13; v. 276; p. 368.
Emblem, pin, button, watch-charm, medal, or similar article. E. C. Heathcote. No. 55,790; July 13; v. 276; p. 366.
Emblem pin or button, Hero-. E. A. Klapp. No. 55,799; July 13; v. 276; p. 368.
Filter, Light-. B. Irwin. No. 55,793; July 13; v. 276; p. 367.
Flag. J. C. Young. No. 55,836; July 13; v. 276; p. 375.
Flatiron, Internally-heated. H. G. Heckmann. No. 55,791; July 13; v. 276; p. 366.
Fountain bowl, Drinking-. H. W. Taylor. No. 55,828; July 13; v. 276; p. 373.
Garter. J. A. Stih. No. 55,826; July 13; v. 276; p. 373.
Glass, Light cover. H. P. Gage and E. Pascucci. No. 55,777; July 13; v. 276; p. 364.
Glassware article. P. Ebeling. No. 55,759; July 13; v. 276; p. 360.
Hairpin. A. D. E. Sessions. No. 55,821; July 13; v. 276; p. 372.
Hat. A. J. Ziv. No. 55,837; July 13; v. 276; p. 375.
Hatpin and point-protector, Combined. T. Delikat. No. 55,755; July 13; v. 276; p. 359.
Heater, Electric. W. W. Hale. No. 55,789; July 13; v. 276; p. 366.
Lamp. C. L. Tippett. No. 55,829; July 13; v. 276; p. 373.
Lamp, Portable. J. T. Robb. No. 55,818; July 13; v. 276; p. 371.
Lamp-stand. H. C. Atherly. No. 55,737; July 13; v. 276; p. 356.
Lighting-globe. E. B. Gillinder. Nos. 55,779–80; July 13; v. 276; p. 364.
Mixing-machine beater. B. D. Pinkney. No. 55,815; July 13; v. 276; p. 371.
Pin, emblem, or article of similar nature. A. M. French. No. 55,769; July 13; v. 276; p. 362.
Plate or similar article. E. E. Tatler. No. 55,827; July 13; v. 276; p. 373.
Punch-board. L. Reisfeld. No. 55,817; July 13; v. 276; p. 371.
Raincoat. B. Greenberg. No. 55,787; July 13; v. 276; p. 366.
Range. E. P. Cole. Nos. 55,744–5; July 13; v. 276; p. 357.
Range-body. E. P. Cole. No. 55,746; July 13; v. 276; p. 358.
Range, Warming-oven for a. E. P. Cole. No. 55,747; July 13; v. 276; p. 358.
Rug. A. H. Waldo. No. 55,834; July 13; v. 276; p. 374.
Scale. W. S. Smith. No. 55,824; July 13; v. 276; p. 372.
Scale-tower. W. S. Smith. No. 55,823; July 13; v. 276; p. 372.
Shoe. M. F. Pasquarelli. No. 55,814; July 13; v. 276; p. 371.
Sifter-top can or similar receptacle. M. H. Connor. Nos. 55,749–50; July 13; v. 276; p. 358.
Snap-hook. H. J. Roebuck. No. 55,819; July 13; v. 276; p. 371.
Speedometer face-plate. J. Berge. Nos. 55,740–1; July 13; v. 276; p. 357.
Statuette. I. A. Withers. No. 55,835; July 13; v. 276; p. 374.
Statuette or similar article. C. E. Johnston. No. 55,795; July 13; v. 276; p. 367.
Stove-door or similar article. E. P. Cole. No. 55,748; July 13; v. 276; p. 358.
Support. H. Kapneck. Nos. 55,796–7; July 13; v. 276; p. 367.
Switch-casing. R. H. Rogers and P. O. Dorer. No. 55,820; July 13; v. 276; p. 372.
Tablet, Memorial. J. R. Klepser. No. 55,800; July 13; v. 276; p. 368.
Tableware, Article of hollow. V. Gaertner. Nos. 55,773–6; July 13; v. 276; pp. 363–4.
Tableware, Gallery-mount for hollow. V. Gaertner. Nos. 55,771–2; July 13; v. 276; p. 363.
Talking-machine. J. A. Fern. Nos. 55,763–7; July 13; v. 276; pp. 361–2.
Teapot or similar article of hollow ware. G. E. Ball. No. 55,738; July 13; v. 276; p. 356.
Thermometer. C. E. Erickson. No. 55,760; July 13; v. 276; p. 361.
Timepiece-hands. F. A. Goodrow. Nos. 55,781–6; July 13; v. 276; pp. 365–6.
Tire, Automobile-. A. S. Fox. No. 55,768; July 13; v. 276; p. 362.
Tire-casing. W. C. Owen. No. 55,813; July 13; v. 276; p. 370.
Tire-cover. P. M. Lockwood. Nos. 55,803–4; July 13; v. 276; p. 369.
Tire, Elastic vehicle-. E. H. Trump. No. 55,832; July 13; v. 276; p. 374.
Tires, Tread of vehicle-. J. A. McLane. No. 55,808; July 13; v. 276; p. 370.
Toothpick-holder, Porcupine. A. Jardella. No. 55,794; July 13; v. 276; p. 367.
Toy, Figure. L. Morse. No. 55,810; July 13; v. 276; p. 370.
Tray or similar article, Bread-. V. Gaertner. No. 55,770; July 13; v. 276; p. 362.
Typewriter-frame. S. K. Ouzoun-Boghossian. Nos. 55,811–2; July 13; v. 276; p. 370.
Vehicles, Radiator-shell for motor-. W. W. Simpson. No. 55,822; July 13; v. 276; p. 372.
Vending and display stand, Combined. M. Metzger. No. 55,809; July 13; v. 276; p. 370.
Vending-cabinet. E. C. Booth. No. 55,742; July 13; v. 276; p. 357.
Watch-fob, locket, or pendant. H. Allen. No. 55,735; July 13; v. 276; p. 356.
Wheel, Metal. M. Lachman. No. 55,801; July 13; v. 276; p. 368.
Windshield. A. C. Lillie. No. 55,802; July 13; v. 276; p. 369.

ALPHABETICAL LIST OF TRADE-MARKS.

Air-compressor equipments and parts thereof, Unitary. The United States Air Compressor Co. No. 133,193; July 13; v. 276; p. 404.
Alloy wire for electrical purposes. J. E. Dockendorff & Co. No. 133,120; July 13; v. 276; p. 401.
Alloys of copper, tin, zinc, &c. The Phosphor Bronze Smelting Company. No. 133,175; July 13; v. 276; p. 403.
Aviators' supplies. A. V. Roe & Co. No. 133,178; July 13; v. 276; p. 403.
Baseballs. J. de Beer & Son. No. 133,114; July 13; v. 276; p. 401.
Beating and mixing machines, Electrically-driven. Hobart Manufacturing Company. No. 133,143; July 13; v. 276; p. 402.
Belting, hose, machinery packings, &c. Imperial Belting Company. No. 133,144; July 13; v. 276; p. 402.
Belting, hose, machinery packing, and non-metallic tires. Imperial Belting Company. No. 133,145; July 13; v. 276; p. 402.
Boards, Ouija-. A. S. Crockett. No. 133,112; July 13; v. 276; p. 401.
Bottle-washing machines. Geo. J. Meyer Manufacturing Co. No. 133,164; July 13; v. 276; p. 403.
Candy. C. A. Crane. No. 133,111; July 13; v. 276; p. 401.
Candy-bars. M. Williams. No. 133,197; July 13; v. 276; p. 404.
Cheese-cutters, Computing. Computing Cheese Cutter Co. No. 133,110; July 13; v. 276; p. 401.
Chemicals and chemical oils for use in the manufacture of fertilizer. Eugene Suter & Company. No. 133,189; July 13; v. 276; p. 404.
Chemicals, medicines, and pharmaceutical preparations. Società Industrie Chimiche Ittiolo. No. 133,184; July 13; v. 276; p. 403.

Clock and watch dials. T. Bargman. No. 133,100; July 13; v. 276; p. 401.
Clothing. Cisco, Inc. No. 133,109; July 13; v. 276; p. 401.
Clothing. L. Potter. No. 133,176; July 13; v. 276; p. 403.
Conduits, conductors, and electrical merchandise. The Thomas & Betts Co. No. 133,191; July 13; v. 276; p. 404.
Cordage, Hemp. Società Anonima Filature e Tessiture Riunite. No. 133,183; July 13; v. 276; p. 403.
Cotton piece goods. Fearing, Whiton & Co. No. 133,128; July 13; v. 276; p. 402.
Cream, Toilet. B. E. Lapeyre. No. 133,155; July 13; v. 276; p. 402.
Cutlery, machinery, and tools, and parts thereof. Chicago Pneumatic Tool Company. No. 133,108; July 13; v. 276; p. 401.
Cutlery, machinery, and tools, and parts thereof. Ingersoll-Rand Company. No. 133,147; July 13; v. 276; p. 402.
Cutlery, machinery, and tools, and parts thereof. National Equipment Company. No. 133,169; July 13; v. 276; p. 403.
Dental, medical, and surgical appliances. C. Dewitt Lukens Surgical Manufacturing Co. No. 133,158; July 13; v. 276; p. 403.
Dolls. E. Shaver. No. 133,181; July 13; v. 276; p. 403.
Dolls. New Toy Co. No. 133,173; July 13; v. 276; p. 403.
Electrical supplies. J. E. Dockendorff & Co. Nos. 133,118–9; July 13; v. 276; p. 401.
Electrical apparatus, machines, and supplies. Cherry Tree Machine Company. No. 133,107; July 6; v. 276; p. 401.

Electrical apparatus, machines, and supplies. J. E. Dockendorff & Co. No. 133,117; July 13; v. 276; p. 401.
Fancy goods, furnishings, and notions. Herbert Terry & Sons. No. 133,100; July 13; v. 276; p. 404.
Food-choppers, combination meat and food cutters, &c. Griswold Manufacturing Company. No. 133,135; July 13; v. 276; p. 402.
Foods, Prepared sea-. Charles Noble, Jr., Company. No. 133,174; July 13; v. 276; p. 403.
Games and toys. The A. C. Gilbert Company. No. 133,132; July 13; v. 276; p. 402.
Gear reducers, power-transmission machinery, &c., Spur-. W. A. Jones Foundry & Machine Co. No. 133,151; July 13; v. 276; p. 402.
Glassware, Table and fancy. George Borgfeldt & Co. No. 133,104; July 13; v. 276; p. 401.
Gloves, Knit. Morgan Knitting Mills. No. 133,166; July 13; v. 276; p. 403.
Golf-clubs. A. G. Spalding & Bros. No. 133,185; July 13; v. 276; p. 403.
Grease-cups. The Lunkenheimer Company. Nos. 133,159–60; July 13; v. 276; p. 403.
Hats, Men's felt. Frank Schoble & Co. No. 133,179; July 13; v. 276; p. 403.
Hats, Women's, misses', and children's trimmed. David Baird and Son. No. 133,099; July 13; v. 276; p. 401.

Hardware supplies. National Brass Company. No. 133,168; July 13; v. 276; p. 403.
Heaters and parts thereof. J. H. Grayson Mfg. Co. No. 133,134; July 13; v. 276; p. 402.
Heating, lighting, and ventilating apparatus. Hammer-Bray Co. No. 133,139; July 13; v. 276; p. 402.
Hosiery. The Fair. No. 133,127; July 13; v. 276; p. 402.
Iron and steel. Federal Tool & Alloy Steel Corporation. No. 133,129; July 13; v. 276; p. 402.
Irrigation systems, and valves and parts of such systems, Lawn and garden. Hadden Automatic Sprinkler Company. No. 133,136; July 13; v. 276; p. 402.
Knitted, netted, and textile fabrics. Jennings Lace Works Corp. No. 133,149; July 13; v. 276; p. 402.
Knitted underwear. Everett Knitting Works. No. 133,126; July 13; v. 276; p. 401.
Limbs, Artificial. O. E. Worman. No. 133,199; July 13; v. 276; p. 404.
Liquors, Distilled alcoholic. Boord & Son. No. 133,103; July 13; v. 276; p. 401.
Lubricators, Mechanical. The Lunkenheimer Company. No. 133,161; July 13; v. 276; p. 403.
Machinery and tools and parts thereof. L. L. Gilcrease. No. 133,133; July 13; v. 276; p. 402.
Machinery and tools, dies, jigs, and parts thereof. Special Tool Engineering Manufacturing Company. No. 133,186; July 13; v. 276; p. 403.
Metal, Babbitt. United American Metal Corporation. No. 133,192; July 13; v. 276; p. 404.
Metal ingots, Non-ferrous. Eastern Brass and Ingot Corporation. No. 133,124; July 13; v. 276; p. 401.
Metals and metal castings and forgings. Blue Ridge Metals Corporation. No. 133,102; July 13; v. 276; p. 401.
Milk, Dry. The Dry Milk Company. No. 133,122; July 13; v. 276; p. 401.
Millstones, Electrically-operated grinders for. R. G. Haskins Company. No. 133,140; July 13; v. 276; p. 402.
Nails, Molders'. The Fowler Nail Co. No. 133,130; July 13; v. 276; p. 402
Oils and adhesive core compounds, Core-. Detroit Soluble Oil Co. No. 133,116; July 13; v. 276; p. 401.
Oils and greases. Johnson Oil Refining Company. No. 133,150; July 13; v. 276; p. 402.
Oils and greases. Sun Company. Nos. 133,187–8; July 13; v. 276; p. 408.
Ointment, Healing-. Seminole Chemical Co. No. 133,180; July 13; v. 276; p. 403.
Packing, Composition. P. S. Dodd. No. 133,121; July 13; v. 276; p. 401.
Paints, pigments, colors ground in japan, oil-stains, &c. Kent & Purdy Paint Company. No. 133,152; July 13; v. 276; p. 402.
Paper, Collodion self-toning printing-out. J. L. Lewis. No. 133,157; July 13; v. 276; p. 403.
Patches, Tube-. Leach Patch Company. No. 133,156; July 13; v. 276; p. 402.
Photographic film. Eastman Kodak Company. No. 133,125; July 13; v. 276; p. 401.
Picture apparatus and accessories, Motion-. United Theatre Equipment Corporation. No. 133,194; July 13; v. 276; p. 404.
Picture films, Moving-. S. H. Hadley. No. 133,137; July 13; v. 276; p. 402.
Picture films, Moving-. C. E. Hallgren. No. 133,138; July 13; v. 276; p. 402.
Pipe-wrenches. Walworth Manufacturing Company. No. 133,196; July 13; v. 276; v. 404.
Plumbing and steam-fitting supplies. International Couplers Company. No. 133,148; July 13; v. 276; p. 402.
Printed sheets. National Geographic Society. No. 133,170; July 13; v. 276; p. 403.
Rock-drills. Ingersoll-Rand Company. No. 133,146; July 13; v. 276; p. 402.
Sanitary goods. M. S. George. No. 133,131; July 13; v. 276; p. 402.
Saws and machine, cane, &c., knives. Sheffield Works, Inc. No. 133,182; July 13; v. 276; p. 403.
Screw and chucking machines. The New Britain Machine Company. No. 133,171; July 13; v. 276; p. 403.
Spark-plugs. Aircraft & Motor Products Co. No. 133,097; July 13; v. 276; p. 401.
Spoons, Wooden. J. H. Mulholland. No. 133,167; July 13; v. 276; p. 403.
Sprinklers, Automatic. R. W. Newton. No. 133,172; July 13; v. 276; p. 403.
Surgical appliances. Dental Products Company. No. 133,115; July 13; v. 276; p. 401.
Syrups, Corn and maltose. Young & Wile. No. 133,200; July 13; v. 276; p. 404.
Theaters, Miniature. E. Moore. No. 113,165; July 13; v. 276; p. 403.
Timepieces. F. W. Alter. No. 133,098; July 13; v. 276; p. 401.
Tin, Pig-. Richards and Co. No. 133,177; July 13; v. 276; p. 403.
Tires and tubes, Automobile and truck. Mason Tire & Rubber Co. No. 133,162; July 13; v. 276; p. 403.
Tires and tubes, Rubber. C. Kenyon Company. No. 133,153; July 13; v. 276; p. 402.
Tires, Inner tubes for vehicle-. Dural Rubber Corporation. No. 133,123; July 13; v. 276; p. 401.
Toilet and manicure sets. Herculean Products Company. Nos. 133,141–2; July 13; v. 276; p. 402.
Toys, O. M. Burton. No. 133,105; July 13; v. 276; p. 401.
Tungsten. Metal & Thermit Corporation. No. 133,163; July 13; v. 276; p. 403.
Twines, string, and cordage. C. C. Davis. No. 133,113; July 13; v. 276; p. 401.
Typewriters. Blickensderfer Manufacturing Company. No. 133,101; July 13; v. 276; p. 401.
Valves, Compressor-. Bury Compressor Company. No. 133,106; July 13; v. 276; p. 401.
Watches. Knickerbocker Watch Co. No. 133,154; July 13; v. 276; p. 402.
Woodworking-machines. S. A. Woods Machine Co. No. 133,198; July 13; v. 276; p. 404.

ALPHABETICAL LIST OF TRADE-MARK TITLES.

(REGISTRATION APPLIED FOR.)

Acoustic appliances. J. Maser. No. 96,675; July 13; v. 276; p. 377.
Alloy, Ferrotungsten, The Continuous Reaction Comp'y. No. 118,957; July 13; v. 276; p. 380.
Alloys and steel and iron castings and forgings, Metal. C. Vos. No. 131,094; July 13; v. 276; p. 392.
Alloys, Cupronickel. Branford Electric Company. No. 118,461; July 13; v. 276; p. 380.
Alloys, Ferronickel. Branford Electric Company. No. 118,462; July 13; v. 276; p. 380.
Anesthetics. The Abbott Laboratories. No. 128,639; July 13; v. 276; p. 386.
Apple-butter. The Red Wing Company. No. 132,813; July 13; v. 276; p. 899.
Apples, Boxed. The Winthrop Orchards. No. 127,679; July 13; v. 276; p. 384.
Apples, Fresh. S. E. Gillinsky. Nos. 126,797–8; July 13; v. 276; p. 383.
Armbands, garters, suspenders. Slonim Brothers. No. 124,695; July 13; v. 276; p. 382.

Dairy rations, horse feed, and scratch-grains. The Beacon Feed Company. No. 119,626; July 13; v. 276; p. 381.
Dental appliances. The Ransom & Randolph Company. No. 116,974; July 13; v. 276; p. 379.
Dish, scrub, and sponge cloth, cotton duck, &c. Hooper Sons' Manufacturing Company. No. 132,864; July 13; v. 276; p. 400.
Dress-shields and garters. I. B. Kleinert Rubber Company. No. 131,337; July 13; v. 276; p. 393.
Dresses and rompers, Infants' and children's. B. A. Collins & Co. No. 127,040; July 13; v. 276; p. 384.
Dresses, Women's. B. S. Ginsberg. No. 129,496; July 13; v. 276; p. 388.
Electric meters. National Carbon Company. No. 132,753; July 13; v. 276; p. 399.
Engines, pumps, &c., Stationary, marine, truck, and tractor. Petroleum Engine & Manufacturing Co. No. 127,486; July 13; v. 276; p. 384.
Fabrics, Pile. Sanford Mills. No. 128,050; July 13; v. 276; p. 385.
Feed, Dairy and stock. American Mutual Seed Co. No. 116,733; July 13; v. 276; p. 379.
Fillers, Metallic. Aluminum Brazing Solder Company. No. 132,420; July 13; v. 276; p. 398.

Fish—viz, canned pilchards. Nootka Packing Company. No. 123,075; July 13; v. 276; p. 381.
Flavoring extracts, egg substitute, and pie-fillers. Campbell Products Corporation. No. 132,465; July 13; p. 276; p. 398.
Flavoring extracts for foods and dessert preparations. V. V. Campbell. No. 132,168; July 13; v. 276; p. 396.
Food, Baby. V. J. Hoyt. No. 131,480; July 13; v. 276; p. 394.
Food-drink. L. Fultz, Jr., E. L. McKenzie, and F. W. Korsmeyer. No. 117,487; July 13; v. 276; p. 379.
Food products. Price Specialty Company. No. 118,970; July 13; v. 276; p. 381.
Food products, Pure. W. Diehnelt. No. 113,279; July 13; v. 276; p. 378.
Freighting-outfits. The Holt Manufacturing Company. No. 105,358; July 13; v. 276; p. 377.
Fruits, Fresh. Meyers, Darling & Hinton Co. No. 132,805; July 13; v. 276; p. 399.
Furniture and automobile polish or gloss for any woodwork. J. Wexler. No. 130,457; July 13; v. 276; p. 390.
Games, game-boards, toy vehicles, &c., Card. Ambler Toy Manufacturing Company. No. 128,641; July 13; v. 276; p. 396.
Garment-hanger, Combination. Dean & Williams Co. No. 132,138; July 13; v. 276; p. 396.
Garment-pressing machines, Tailors'. F. A. Patrick & Co. No. 130,927; July 13; v. 276; p. 392.
Germicide, disinfectant, deodorant, &c. The Yardley Chemical Corporation. No. 128,634; July 13; v. 276; p. 386.
Glass baking and cooking utensils, tubings, &c. Gill Brothers Company. No. 127,506; July 13; v. 276; p. 384.
Glass bottles. *Berney-Bond Glass Company. No. 131,140; July 13; v. 276; p. 392.
Glass spoons and sippers, Combined. Hirsch-Malgood Co. No. 131,424; July 13; v. 276; p. 394.
Gum and candy, Chewing-. Listerated Gum Corporation. No. 130,481; July 13; v. 276; p. 390.
Hair-nets. Reichman & Faust. No. 123,574; July 13; v. 276; p. 381.
Ham and bacon. Hansen Packing Company. No. 129,843; July 13; v. 276; p. 388.
Hats, coats, raincoats, &c. Waterproof Garment Co. No. 125,141; July 13; v. 276; p. 382.
Hose, sheet-packing of rubber and fabric, Fabric and rubber. The Gutta Percha & Rubber Manufacturing Company. No. 127,966; July 13; v. 276; p. 385.
Hosiery. Elite Hosiery Company. No. 124,887; July 13; v. 276; p. 382.
Jacks, Lifting-. Arrow-Grip Manufacturing Co. No. 130,638; July 13; v. 276; p. 391.
Jam, jelly, &c. The Welch Grape Juice Company. No. 132,618; July 13; v. 276; p. 399.
Jam, jelly, fruit preserves, conserves. The Welch Grape Juice Company. No. 132,333; July 13; v. 276; p. 397.
Jam, jelly, fruit preserves, conserves. The Welch Grape Juice Company. No. 132,280; July 13; v. 276; p. 397.
Knives, cleavers, and steels. American Tap and Die Co. No. 130,311; July 13; v. 276; p. 390.
Laces and button-hooks, Shoe-. Dorothy Dodd Shoe Company. No. 132,596; July 13; v. 276; p. 399.
Laces, Shoe-. Saylor & Co. No. 133,500; July 13; v. 276; p. 400.
Lamps, Electric. Lux Manufacturing Co. No. 132,183; July 13; v. 276; p. 396.
Lard, ham, bacon. Patrick-Young Company. No. 132,059; July 13; v. 276; p. 396.
Lead and ready-mixed paints, White. The Tripod Paint Co. No. 129,357; July 13; v. 276; p. 387.
Leather, Artificial. Armstrong Cork Company. No. 130,081; July 13; v. 276; p. 388.
Leather, Polish for incidentally dyeing. G. C. Thomsen & A. A. Adams. No. 130,701; July 13; v. 276; p. 391.
Leavening material or compound composed of baking-powder and eggs. Technical Food Products Company. No. 114,840; July 13; v. 276; p. 378.
Lenses, Projection-. Projection Optics Co. No. 129,568; July 13; v. 276; p. 388.
Lubricating systems. Standex Manufacturing Corporation. No. 117,070; July 13; v. 276; p. 379.
Lumber and staves, Dressed. Bencoe Lumber Company. No. 126,095; July 13; v. 276; p. 383.
Machinery-patterns. L. S. Packwood. No. 131,232; July 13; v. 276; p. 393.
Machinery, tools, &c. The National Supply Company. No. 118,058; July 13; v. 276; p. 380.
Middy-blouses. Z. & S. Middy Co. No. 125,333; July 13; v. 276; p. 382.
Milk, evaporated. Freeport Condensed Milk Co. No. 131,789; July 13; v. 276; p. 395.
Milk, Evaporated. Federal condensed Milk Company. No. 132,349; July 13; v. 276; p. 397.
Milk, Powdered. M. C. Peltason. No. 131,353; July 13; v. 276; p. 394.
Mill-white. The Tripod Paint Co. No. 129,358; July 13; v. 276; p. 387.
Motors, Gasolene-. Herschell-Spillman Motor Company. No. 131,865; July 13; v. 276; p. 395.
Nails and tacks. United Shoe Machinery Corporation. No. 130,247; July 13; v. 276; p. 389.
Needles, hair and hat pins, buttons, &c. Waldes & Co. No. 121,077; July 13; v. 276; p. 381.
Oakum. George Stratford Oakum Co. No. 106,733; July 13; v. 276; p. 377.
Optical and scientific appliances. Spencer Lens Company. No. 126,825; July 13; v. 276; p. 384.
Optical and scientific appliances. Spencer Lens Company. No. 126,972; July 13; v. 276; p. 384.
Organdie piece goods. Trippe, Barker & Co. No. 131,134; July 13; v. 276; p. 392.
Ovens for baking bread. Meek Oven Manufacturing Company. No. 130,727; July 13; v. 276; p. 391.
Packings and jointings. James Walker & Co. No. 123,677; July 13; v. 276; p. 382.
Packing, Sheet-. James Walker & Co. No. 123,675; July 13; v. 276; p. 382.
Packing, Sheet-. The Continental Supply Company. No. 126,615; July 13; v. 276; p. 383.
Packing, Steam and hydraulic. James Walker & Co. No. 123,676; July 13; v. 276; p. 382.
Periodical, Monthly. Interstate Employment System. No. 114,882; July 13; v. 276; p. 378.
Piano and furniture polish. H. Vincent. No. 130,779; July 13; v. 276; p. 392.
Pickles, mustard, salad-dressing. C. Trearchis. No. 116,801; July 13; v. 276; p. 379.
Picture films, Motion-. National Picture Theatres. No. 131,447; July 13; v. 276; p. 394.
Pipe-fittings, Cast-iron. Hercules Foundries. Nos. 131,169–71; July 13; v. 276; p. 393.
Piston-rings. Nilson-Miller Company. No. 127,737; July 13; v. 276; p. 385.
Placket and glove fasteners, needles, buttons, &c. Waldes & Co. No. 121,081; July 13; v. 276; p. 381.
Pork and beans. Kingan & Company, Limited. No. 128,310; July 13; v. 276; p. 385.
Potatoes. Wolter Bros. No. 130,633; July 13; v. 276; p. 391.
Powders, face-creams, perfumes, rouges, Face-. Pierre Namron Company. No. 129,151; July 13; v. 276; p. 387.
Radiator shutters, Automobile-. American Metals Corporation. No. 131,766; July 13; v. 276; p. 395.
Receptacles, Trash-. National Sanitary Street System. No. 129,643; July 13; v. 276; p. 388.
Remedy for sore throat, cuts, burns, &c. The Yardley Chemical Corporation. No. 128,635; July 13; v. 276; p. 386.
Remedy for treatment of pyorrhea, infected teeth, &c. The Yardley Chemical Corporation. No. 128,636; July 13; v. 276; p. 386.
Ribbon novelties. H. Broder. No. 128,540; July 13; v. 276; p. 386.
Roofing materials and shingles, Fireproof. Stowell Manufacturing Co. No. 131,093; July 13; v. 276; p. 392.
Rope, Wire. The Firth Company. No. 116,130; July 13; v. 276; p. 378.
Rubber shoes, aprons, belts, &c., Sanitary. I. B. Kleinert Rubber Company. No. 127,724; July 13; v. 276; p. 385.
Rubber shoes, aprons, belts, &c., Sanitary. I. B. Kleinert Rubber Company. No. 127,726; July 13; v. 276; p. 385.
Salts, Effervescent. The Abbott Laboratories. No. 128,640; July 13; v. 276; p. 386.
Sardines. Portland Products Company. Nos. 132,550–1; July 13; v. 276; p. 398.
Shaving-cream, shampoo, and antiseptic soaps. Blumauer-Frank Drug Company. No. 130,361; July 13; v. 276; p. 390.
Shoe dressing, Leather-. Waterproof Oil Products Co. No. 117,077; July 13; v. 276; p. 379.
Shoe-polish and hat-cleaning material. N. Piccoli. No. 128,518; July 13; v. 276; p. 386.
Skins, Roller-. John Ormerod & Sons Ltd. No. 127,260; July 13; v. 276; p. 384.
Soap. H. A. Knapp. No. 131,706; July 13; v. 276; p. 395.
Soap. J. A. Clark. No. 132,629; July 13; v. 276; p. 399.
Soap. Schuster Bros. No. 118,128; July 13; v. 276; p. 380.
Soap. Tyson & Co. No. 132,712; July 13; v. 276; p. 399.
Soap. W. T. Gillett. No. 133,209; July 13; v. 276; p. 400.
Soap, Automobile-. Harley Soap Company. No. 132,604; July 13; v. 276; p. 399.
Soap, Toilet. Haskins Bros. & Company. No. 132,920; July 13; v. 276; p. 400.
Soaps, Cake, bar, paste, &c. J. H. Karp. No. 133,422; July 13; v. 276; p. 400.
Soaps, soap and scouring powders, &c. Grand Union Tea Co. No. 124,894; July 13; v. 276; p. 382.
Spark-plug and contact-point cleaner. The Duro Company. No. 130,130; July 13; v. 276; p. 389.
Steel. The National Pressed Steel Company. No. 130,768; July 13; v. 276; p. 391.
Steel, Rolled. The Superior Sheet Steel Company. No. 125,911; July 13; v. 276; p. 383.
Suspenders. J. A. Harps. No. 133,217; July 13; v. 276; p. 400.
Tablets and powdered cleanser, Laundry-. T. R. Ponto. No. 116,151; July 13; v. 276; p. 378.
Tax-registers. W. Silverberg. No. 118,022; July 13; v. 276; p. 380.

Telephone-concealing device. H. W. Knight. No. 130,600; July 13; v. 276; p. 391.
Tires. The Dunlop Rubber Company. No. 130,092; July 13; v. 276; p. 389.
Tires and tubes for vehicles. Racine Rubber Company. No. 130,494; July 13; v. 276; p. 390.
Tires for motor-cars and other vehicles, Rubber. E. B. Killen. No. 113,809; July 13; v. 276; p. 378.
Tires, Vulcanizing outfits for rubber. The Williams Foundry & Machine Co. No. 122,743; July 13; v. 276; p. 381.
Tractors, Farm-. Tioga Manufacturing Company. No. 130,778; July 13; v. 276; p. 391.
Tractors, gas and kerosene internal-combustion engines. American Tractor & Foundry Company. No. 128,816; July 13; v. 276; p. 387.
Trimmings and garnitures for ladies', infants', and children's wearing-apparel. M. H. Amick. No. 128,949; July 13; v. 276; p. 387.
Tubes, Inner. The Ohio Rubber Co. No. 130,286; July 13; v. 276; p. 390.
Tubings, Base-metal. Summerill Tubing Company. No. 132,150; July 13; v. 276; p. 396.
Turpentine, Synthetic Venice. J. L. Hopkins & Co. No. 129,012; July 13; v. 276; p. 387.
Varnish. The I. D. George Company. No. 131,038; July 13; v. 276; p. 392.
Varnish, Spirit-. John W. Masury & Son. No. 129,941; July 13; v. 276; p. 388.
Vehicles, automobiles, motor-trucks, Motor-. Oshkosh Motor Truck Mfg. Co. No. 130,550; July 13; v. 276; p. 391.
Velocipedes, Children's. The Arrow Toy Mfg. Co. No 128,950; July 13; v. 276; p. 387.
Wagons, trailers, radiators for motor-vehicles. The Holt Manufacturing Company. No. 130,367; July 13; v. 276; p. 390.
Wall-board and building-paper. The Beaver Company. No. 132,004; July 13; v. 276; p. 396.
Washing compound. S. Bernstein. No. 130,355; July 13; v. 276; p. 390.
Window and door frames, Wooden. Andersen Lumber Company. No. 131,458; July 13; v. 276; p. 394.
Worsted waste and noils. A. H. Zayotti. No. 132,218; July 13; v. 276; p. 397.

CLASSIFICATION OF PATENTS

ISSUED JULY 13, 1920.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 6: 1,346,157
7: 1,346,415
23: 1,346,715
36: 1,346,247
2— 60: 1,346,320
79: 1,346,683
90: 1,346,733
95: 1,346,448
4— 5: 1,346,362
18: 1,346,255
1,346,311
19: 1,346,388
25: 1,346,252
5— 29: 1,346,347
39: 1,346,579
46: 1,346,582
48: 1,346,206
61: 1,346,089
7— 3: 1,346,302
8— 1: 1,346,153
1,346,154
20: 1,346,902
1,346,903
9— 24: 1,346,554
10— 89: 1,346,295
147: 1,346,235
11— 4: 1,346,799
12— 4: 1,346,156
1,346,167
1,346,256
42: 1,346,248

Notice of Cancelation.

Department of the Interior,
United States Patent Office.
Washington, D. C., July 19, 1920.

Alfred Victor Brokhahne, his assigns or legal representatives, take notice:

An application has been filed in this Office by Sigmund Isaacs, of New York, N. Y., to effect the cancelation of the trade-mark registration of Alfred Victor Brokhahne, of New York, N. Y., No. 12,417, dated July 21, 1885. The Office having been unable to secure service upon said Alfred Victor Brokhahne at the said address, notice is hereby given that unless said Alfred Victor Brokhahne, his assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the cancelation will be proceeded with as in case of default.

This notice will be published in the Official Gazette for three consecutive weeks.

R. F. WHITEHEAD,
First Assistant Commissioner.

Amendments.

In order to insure the prompt delivery of amendments to the proper examining division, applicants are requested in their actions on applications to give the division number and the room number appearing on the last Office letter, as well as the date of such letter.

Amendment of Rules of Practice.

Under the provisions of section 483, Revised Statutes, and with the approval of the Secretary of the Interior, Rule 139 of the Rules of Practice of the United States Patent Office is amended as follows:

By inserting after the word "appeal" in line 4 of the fourth paragraph of that rule the words *and whenever in his opinion substantial justice shall require it,* and by omitting from line 6 of that paragraph the words "he will," so that the rule as amended will read as follows:

139. The Examiners-in-Chief in their decision shall affirm or reverse the decision of the Primary Examiner only on the points on which appeal shall have been taken. (See Rule 133.) Should they discover any apparent grounds not involved in the appeal for granting or refusing Letters Patent in the form claimed, or any other form, they shall annex to their decision a statement to that effect with such recommendation as they shall deem proper.

Should the Examiners-in-Chief recommend the refusal of Letters Patent in the form claimed, their recommendation will stand as a rejection and will reopen the case for amendment or showing of fact, or both, before the Primary Examiner, responsive to that rejection. The recommendation of the Examiners-in-Chief is binding upon the Primary Examiner unless an amendment or showing of facts not previously of record be made which, in the opinion of the Primary Examiner, overcomes the recommendation. The applicant may waive the right to prosecution before the Primary Examiner and have the case reconsidered by the Examiners-in-Chief upon the same record, and from an adverse decision of the Examiners-in-Chief on reconsideration, appeal will lie to the Commissioner, as in other cases. The applicant may also waive reconsideration by the Examiners-in-Chief and appeal directly to the Commissioner.

Should the Examiners-in-Chief recommend the granting of Letters Patent in an amended form, the applicant shall have the right to amend in conformity with such recommendation, which shall be binding upon the Primary Examiner in the absence of new references or grounds for rejection.

If the Commissioner, in reviewing the decision of the Examiners-in-Chief, discovers any apparent grounds for refusing Letters Patent not involved in the appeal, he will, before or after decision on the appeal, and whenever in his opinion substantial justice shall require it, give reasonable notice thereof to the applicant, and if any amendment or action based thereon be proposed, remand the case to the Primary Examiner for consideration.

Rule 72, as Amended April 17, 1919.

Rule 72. After the completion of the application the Office will not return the specification for any purpose whatever. If applicants have not preserved copies of the papers which they wish to amend, the Office will furnish them on the usual terms.

The drawing may be withdrawn only for such corrections as cannot be made by the Office; but a drawing cannot be withdrawn unless a photographic copy has been filed and accepted by the Examiner as a part of the application. Permissible changes in the construction shown in any drawing may be made only by the Office and after an approved photographic copy has been filed. Sketches filed to show proposed changes in construction must be in permanent ink. (See Rule 30.) Substitute drawings will not be admitted in any case unless required by the Office.

2182

APPLICATIONS UNDER EXAMINATION.

Condition at Close of Business July 24, 1920.

Room No.	Divisions and subjects of invention.	Oldest new application and oldest action by applicant awaiting office action.		No. of applications awaiting action.
		New.	Amended.	
314	1. Closure Operators; Fences; Gates; Harrows and Diggers; Plows; Planting; Scattering Unloaders; Trees, Plants, and Flowers.	Feb. 24	Mar. 1	526
128	2. Bee Culture; Curtains, Shades, and Screens; Dairy; Medicines: Pneumatics; Preserving; Presses; Tents, Canopies, Umbrellas, and Canes; Tobacco.	Dec. 3	Feb. 11	968
175	3. Electric Heating and Rheostats; Electrochemistry; Heating; Metal-Founding; Metallurgical Apparatus; Metallurgy; Metal Treatment; Plastic Metal Working.	Feb. 13	Jan. 6	603
234	4. Conveyers; Conveyers, Fluid-Current; Elevators; Excavating; Handling—Hand and Hoist-Line Implements; Hoisting; Material or Article Handling; Pneumatic Despatch; Pushing and Pulling Implements; Railway Mail Delivery; Store-Service; Traversing Hoists.	Nov. 12	Apr. 19	1,487
167	5. Book-Making; Books, Strips and Leaves; Harvesters; Jewelry; Manifolding; Music; Printed Matter; Tying Cords or Strands.	Mar. 31	Apr. 26	417
318	6. Bleaching and Dyeing; Chemicals; Explosives; Fertilizers; Liquid Coating Compositions; Plastic Compositions; Substance Preparation.	Feb. 28	Jan. 26	552
312	7. Games and Toys; Optics; Photography; Velocipedes	Mar. 22	May 10	880
131	8. Beds; Chairs and Seats; Flexible-Sheet Securing Devices; Furniture; Kitchen and Table Articles; Store Furniture; Supports.	May 10	June 7	351
221	9. Air and Gas Pumps; Hydraulic Motors; Injectors and Ejectors; Motors, Fluid; Motors, Fluid-Current; Pumps.	Feb. 10	Mar. 4	550
235	10. Carriages and Wagons; Land-Vehicles; Land-Vehicles—Bodies and Tops; Land-Vehicles—Dumping; Land-Vehicles, Wheel Substitutes; Motor Vehicles.	Feb. 6	June 1	920
154	11. Boot and Shoe Making; Boots, Shoes, and Leggings; Button, Eyelet, and Rivet Setting; Harness; Leather Manufactures; Nailing and Stapling; Spring Devices; Whips and Whip Apparatus.	Mar. 1	Mar. 30	804
222	12. Machine Elements	Nov. 13	May 1	1,121
329	13. Bolt, Nail, Nut, Rivet, and Screw Making; Button Making; Chain, Staple, and Horseshoe Making; Driven, Headed, and Screw-Threaded Fastenings; Gear Cutting, Milling, and Planing; Metal Drawing; Metal Forging and Welding; Metal Rolling; Metal Tools and Implements, Making; Metal Working; Needle and Pin Making; Turning.	Nov. 13	May 22	1,209
323	14. Compound Tools; Cutting and Punching Sheets and Bars; Farriery; Metal-Bending; Sheet-Metal Ware, Making; Tools; Wire Fabrics and Structure; Wire-Working.	Jan. 12	Apr. 13	669
308	15. Bread, Pastry, and Confection Making; Coating; Glass; Laminated Fabrics and Analogous Manufactures; Paper-Making and Fiber Liberation; Plastic Block and Earthenware Apparatus; Plastics.	Nov. 6	Apr. 13	1,141
	16. Radiant Energy; Telegraphy; Telephony	Nov. 15	Dec. 11	887
111	17. Label Pasting and Paper Hanging; Nut and Bolt Locks; Ornamentation; Paper Manufactures; Printing; Type Casting; Sheet Material Associating or Folding; Sheet Feeding or Delivering; Type Setting.	May 3	May 17	190
307				
229	18. Liquid Heaters and Vaporizers; Motors, Expansible Chamber Type; Power Plants; Speed Responsive Devices; Steam and Vacuum Pumps.	Jan. 12	Mar. 9	1,116
236	19. Automatic Temperature and Humidity Regulation; Furnaces; Heating Systems; Stoves and Furnaces; Domestic Cooking Vessels; Thermostats and Humidostats.	Dec. 12	Jan. 28	620
179	20. Artificial Body Members; Builders' Hardware; Closure-Fasteners; Cutlery; Dentistry; Locks and Latches; Safes; Undertaking.	Apr. 17	Apr. 26	710
212	21. Brakes and Gins; Carding; Cloth-Finishing; Continuous-Strip Feeding; Cordage; Felt and Fur; Knitting and Netting; Silk; Spinning; Weaving; Winding and Reeling.	Dec. 19	June 4	485
249	22. Aeronautics; Firearms; Ordnance	Apr. 22	May 10	286
217	23. Acoustics; Coin-Handling; Horology; Recorders; Registers; Sound Recording and Reproducing; Time-Controlling Mechanism.	Jan. 6	Apr. 26	718
144	24. Apparel; Apparel Apparatus; Garment Supporters; Sewing-Machines	Jan. 17	June 2	638
315	25. Agitating; Butchering; Centrifugal Bowl Separators; Mills; Threshing; Vegetable Cutters and Crushers; Gas Separation.	June 28	June 14	192
105	26. Electricity, Generation; Motive Power; Prime Mover Dynamo Plants	Nov. 17	Jan. 5	726
214	27. Abrading; Brushing and Scrubbing; Laundry; Washing Apparatus	Mar. 20	Apr. 2	602
225	28. Internal-Combustion Engines	Feb. 9	Apr. 15	704
147	29. Boring and Drilling; Chucks or Sockets; Coopering; Rod Joints or Couplings; Wheelwright-Machines; Wood-Sawing; Wood-Turning; Woodworking; Woodworking Tools.	Jan. 15	May 24	596
152	30. Illuminating-Burners; Illumination; Liquid and Gaseous Fuel Burners; Type-Writing Machines	Jan. 12	June 1	1,142
172	31. Alcohol; Ammonia, Water, and Wood Distillation; Charcoal and Coke; Fuel and Igniting Devices; Gas, Heating and Illuminating; Hides, Skins, and Leather; Hydraulic Cement and Lime; Mineral Oils; Oils, Fats, and Glue; Sugar and Salt.	Nov. 17	Feb. 18	1,203
278	32. Gas and Liquid Contact Apparatus; Heat Exchange; Refrigeration	Nov. 10	Apr. 5	1,233
70	33. Bridges; Hydraulic and Earth Engineering; Masonry and Concrete Structures; Metallic Building Structures; Roads and Pavements; Roofs.	Mar. 3	Apr. 17	505
304	34. Electricity-Transmission to Vehicles; Railways; Railway Rolling Stock; Railway Switches and Signals; Railways, Surface Track; Railway Wheels and Axles; Track-Sanders; Vehicle-Fenders.	Jan. 29	Mar. 3	262
57	35. Buckles, Buttons, Clasps, Etc.; Card, Picture, and Sign Exhibiting; Signals and Indicators; Toilet	June 11	June 7	520
204	36. Automatic Weighers; Driers; Geometrical Instruments; Measuring Instruments; Force Measuring	Jan. 28	Mar. 3	1,179
107	37. Electric Lamps; Electricity, Circuit Makers and Breakers; Electricity, General Applications	Mar. 6	Mar. 1	1,341
378	38. Animal Husbandry; Earth Boring; Fishing, Trapping and Vermin Destroying; Mining, Quarrying, and Ice-Harvesting; Stationery; Stone-Working; Wells.	Feb. 28	Apr. 24	795
220	39. Fluid Pressure Regulators; Joint Packings; Multiple Valves; Packed Shaft or Rod Joints; Pipe Joints or Couplings; Valved Pipe Joints or Couplings; Valves; Water Distribution.	Oct. 15	Nov. 14	1,095
273	40. Baggage; Bottles and Jars; Check-Controlled Apparatus; Cloth, Leather, and Rubber Receptacles; Deposit and Collection Receptacles; Metallic Receptacles; Package and Article Carriers; Paper Receptacles; Special Receptacles and Packages; Wooden Receptacles.	Jan. 2	Feb. 25	893
125	41. Land Vehicles, Wheels and Axles; Resilient Tires and Wheels	Dec. 3	Apr. 24	830
114	42. Electricity, Conductors; Electrical Conduits and Housings; Electric Signaling	Jan. 14	Mar. 4	1,023
382	43. Baths and Closets; Dispensing; Dispensing Beverages; Electricity, Medical and Surgical; Fire-Extinguishers; Sewerage; Surgery; Water Separation or Purification.	Dec. 13	Mar. 15	958
253	44. Air-Guns, Catapults, and Targets; Ammunition and Explosive Devices; Ammunition and Explosive Charge Making; Boats and Buoys; Filling and Closing Portable Receptacles; Marine Propulsion; Railway Draft Appliances; Ships.	Mar. 29	Apr. 13	293
379	45. Journal-Boxes, Pulleys, and Shafting; Lubrication; Motors	Jan. 14	May 11	661
264	46. Educational Appliances; Fire-Escapes; Ladders; Fluid Sprinkling, Spraying, and Diffusing; Paper Files and Binders; Wooden Buildings; Scaffolds.	Jan. 17	Apr. 19	517

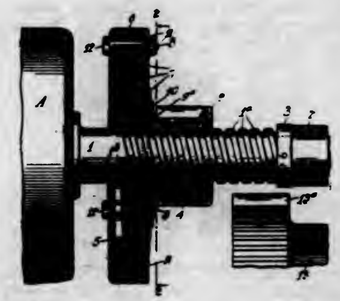
PATENTS

GRANTED AUGUST 3, 1920.

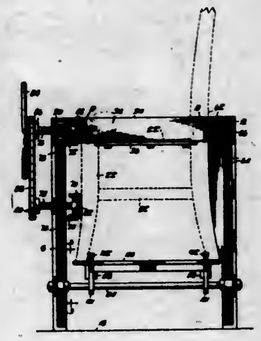
1,348,145. COLLAPSIBLE ROD. THOMAS RAYMOND ARDEN, New York, N. Y. Filed Dec. 19, 1918. Serial No. 267,463. 14 Claims. (Cl. 42—92.)

11. A collapsible rod, comprising a plurality of rod sections, a support therefor having serrated slots in its walls, a flexible connector for connecting the rod sections with the support, a casing in said support having a spring pressed movable head at one end thereof, one end of said connector being connected to said head, a lever pivotally mounted on said casing and adapted to tension and untension said connector, and projections on said lever adapted to engage the serration in said slots.



1,348,146. PISTON-RING. EDWARD BEECHER, St. Louis, Mo., assignor to McQuay-Norris Manufacturing Company, a Corporation of Missouri. Filed Sept. 3, 1918. Serial No. 252,421. 3 Claims. (Cl. 74—109.)

1. A one-piece piston ring comprising a resilient split metal band having its ends disengaged when free, and terminating in transverse abutting edges extending the width of the band contiguous to the inner face of the band, tongue extensions on the outer face of the band having inner sloping corners at their free ends and projecting beyond the transverse edges aforesaid disposed respectively contiguous to the opposite sides of the band, an outwardly facing depression leading from each transverse edge in an opposite direction from the tongue, the band being contractible by a movement of its free ends toward one another in the general plane of the band, whereby a tongue at one end in such contacting movement, is received by and guided into the depression opposite thereto at the other end, the transverse edges aforesaid being brought into contiguous relation with a complete closing of the band.



1,348,147. ENGINE-STARTER. VINCENT BENDIX, Chicago, Ill. Filed Dec. 17, 1917. Serial No. 207,459. 14 Claims. (Cl. 74—7.)

1. An engine starter drive or transmission, comprising a rotatable member, and an operating member mounted thereon for longitudinal movement thereof and rotary movement therewith, said operating member being formed of two parts, one a control member mounted on said rotatable member and having an outer bearing surface of uniform diameter, and the other a driving member having a smooth bore fitting onto said bearing surface of the control member whereby the driving member is adapted to

slide longitudinally on the control member and also rotate thereon, and means separate from the said two parts and forming the driving connection between them.

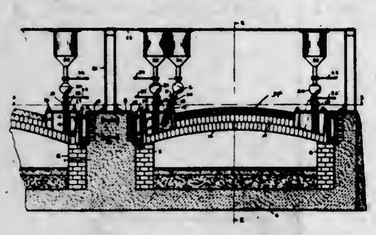
1,348,148. CHAIR-CLAMP. OSCAR BERGSTROM, Chicago, Ill., assignor to Handy Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 17, 1919. Serial No. 338,564. 6 Claims. (Cl. 144—289.)

1. In mechanism of the class described, a retaining frame of sufficient size to permit a chair to be clamped to be inserted within it to a point where the chair seat is at approximately the top of the frame, a chair leg supporting table vertically mounted in the lower portion of the frame, means for independently adjusting different portions of said supporting table with reference to the frame.

1,348,149. CARPET AND RUG FASTENER. THOMAS WILLIAM BUAN, New York, N. Y. Filed Feb. 25, 1920. Serial No. 361,274. 2 Claims. (Cl. 16—3.)

1. A carpet and rug fastening device consisting of a plate member adapted to be secured to a floor and pro-

vided in the bottom thereof with a longitudinal groove or recess which opens outwardly at one end thereof, and a



prong member provided with a shank adapted to be inserted into and retained in said groove or recess when said plate is secured to a floor or other surface.

1,348,150. CASTER. JOHN S. CANTELO, Boston, Mass. Filed Dec. 1, 1916, Serial No. 134,256. Renewed Dec. 10, 1919. Serial No. 343,816. 12 Claims. (Cl. 16—4.)

3. A caster comprising a body having a wheel journaled thereto equipped with a guard adapted to prevent the clinging of waste to the tread thereof, said wheel having saiffening fins at its outer side with the edges thereof rounded to prevent clingiug of waste or the like thereto.

1,348,151. ORE REDUCING AND REFINING FURNACE. HENRY L. CHARLES, Butte, Mont. Filed Nov. 6, 1917. Serial No. 200,614. 1 Claim. (Cl. 263—46.)

In combination with a furnace of the class described, ore inlets at the sides of said furnaces, and hollow water circulating boxes through which said ore inlets may be shifted.

1,348,152. MARINE TORPEDO. FREDERICK CONLIN, Elizabeth, N. J. Filed May 29, 1915. Serial No. 31,125. 10 Claims. (Cl. 114—20.)

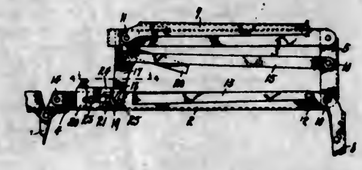
1. A marine torpedo having an electric current as its source of power, a propeller, an electric motor for driving the same, and means for preventing the high speed of the propeller when the same begins to rotate.

1,348,153. PHOTOGRAPH-NEGATIVE-DEVELOPING FRAME. ELIJAH B. COBB, Yonkers, N. Y. Filed Sept. 18, 1919. Serial No. 324,892. 2 Claims. (Cl. 95—100.)

1. A frame comprising, skeleton side members; means for pivotally connecting said members at the lower end thereof; lateral flanges extended from said members to infold or to interlead, for holding the side members in spaced relation; a plurality of brace members, each mounted on one of the side members and inset therefrom, said

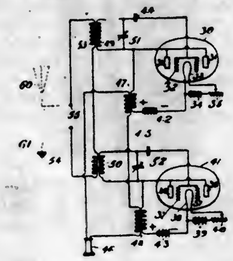
brace members being juxtaposed in active service relation, and having integrally formed therewith, end extensions projecting beyond the lateral edges of the frame for suspending the frame in the liquid bath; and means for holding said braces in juxtaposed relation.

1,348,154. GREASE-CUP. SIDNEY DAWSON, Chicago, Ill., assignor, by direct and mesne assignments, to Dawson Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed May 10, 1919. Serial No. 296,067. 9 Claims. (Cl. 184—38.)



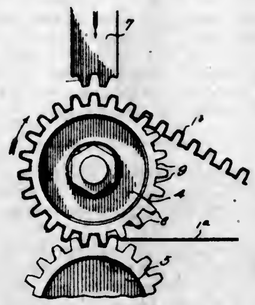
5. A grease cup comprising a cap member, a base member, a squared stem rigidly secured in the base member adapted to permit the flow of grease to pass through the base member, a disk in said cap member, locking springs struck from said disk and bent to contact against opposite sides of the squared stem to hold the cap member in an adjusted position, and a cupped retainer having star teeth integrally formed on the margin thereof to permit the retainer to be rigidly secured in said cap member against said disk to hold the disk rigidly secured in the cap member to be rotated thereby when the cap member is manually operated.

1,348,155. OPHTHALMIC MOUNTING. GEORGE H. DAY, Rochester, N. Y., assignor to E. Kirstein Sons Company, Rochester, N. Y., a Corporation of New York. Filed Aug. 5, 1918. Serial No. 248,248. 4 Claims. (Cl. 88—53.)



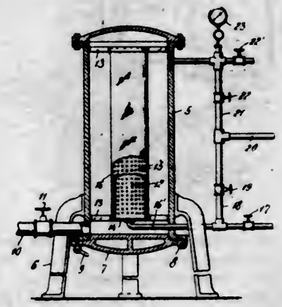
1. An ophthalmic mounting comprising a bridging portion, laterally deflected portions at the ends of the bridging portions, and a composition nose pad lying under the bridging portion and molded about said laterally deflected portion to permanently secure the pad to the mounting.

1,348,156. FOLDABLE BED-FRAME. PETER J. DE DOES, Toledo, Ohio, assignor to The Toledo Parlor Furniture Company, Toledo, Ohio, a Corporation of Ohio. Filed Nov. 8, 1916. Serial No. 130,269. 9 Claims. (Cl. 5—49.)



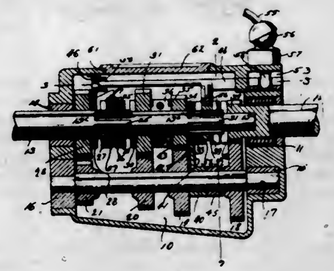
1. A plurality of foldably related major and minor bed frame sections, in combination with complementary catch members carried by different major sections of the bed frame and automatically operable to lock said sections in folded relation when the bed frame is folded, and vice versa, one of said members being carried by a major section for pivotal movements only relative thereto and connected to and movable with an adjoining minor section.

1,348,157. APPARATUS FOR AMPLIFYING PULSATING ELECTRIC CURRENTS. LEE DE FOREST, New York, N. Y., assignor to De Forest Radio Telephone and Telegraph Company, New York, N. Y., a Corporation of Delaware. Filed July 22, 1915. Serial No. 41,332. 4 Claims. (Cl. 250—8.)



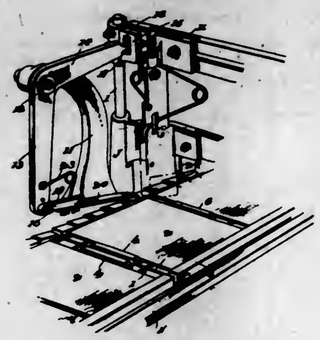
1. A source of electrical energy, a plurality of oscillating audions, each of said audions having an oscillating circuit connected between two of its electrodes, and means for locally connecting all of said oscillating circuits with said source.

1,348,158. PROCESS FOR MAKING MACHINE ELEMENTS. WALTER G. DOTY, Dayton, Ohio, assignor to The Wagner Engineering Company, Dayton, Ohio, a Corporation of Ohio. Filed Dec. 26, 1917. Serial No. 208,959. 13 Claims. (Cl. 22—203.)



2. The herein described process of forming gears, comprising forming a corrugated tooth rim embedding said rim in a suitable mold, rigidly limiting the expansion of said rim independent of the mold, and pouring molten metal within the rim the expansive tendency of which against the unyielding rim insures uniform contact of the cast body with the rim.

1,348,159. METHOD OF AND APPARATUS FOR FILTERING. NORMAN B. DOWN, Sewell, Chile, assignor to Braden Copper Company, a Corporation of Maine. Filed Jan. 2, 1920. Serial No. 348,959. 7 Claims. (Cl. 210—183.)



1. A method of separating solids from liquids and producing substantially dry filter cake which comprises, depositing the solids upon a curved filter surface through which the liquid is permitted to pass, withdrawing the surplus unfiltered material and passing a gaseous medium through the cake formed by the solids on said surface, the curvature of said surface being such that cracks, forming in the cake as the material dries, do not extend through the cake to said surface.

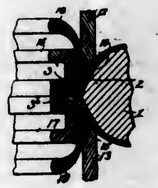
1,348,160. TRANSMISSION-GEAR. JAMES H. DOWNIE, San Antonio, Tex. Filed Sept. 15, 1919. Serial No. 323,755. 1 Claim. (Cl. 74—59.)

In a transmission including alined drive and driven shafts, the latter being stepped and having splines at the extremities of its steps, the combination with a driving gear fixed on the driving shaft, a counter shaft having fixed gears one of which meshes with said driving gear, gears connected with its other fixed gears and loose on the driven shaft, said loose gears and the driving shaft gear disposed in pairs and provided with clutch jaws facing each other, and a split collar fast on the driven shaft between the contiguous members of said pairs; of clutches slidable on said splines, means for actuating them selectively, a housing inclosing the mechanism, an arm on the housing having a flange engaging one loose gear at a point radially beyond its jaws, and a hub loose on the counter shaft and having a radial arm with a flange engaging another loose gear beyond its jaws, as described.

1,348,161. FEEDING MECHANISM FOR STAPLING-MACHINES. JAMES C. DOSHER, Baton Rouge, La. Filed Sept. 6, 1919. Serial No. 322,152. 2 Claims. (Cl. 1—14.)

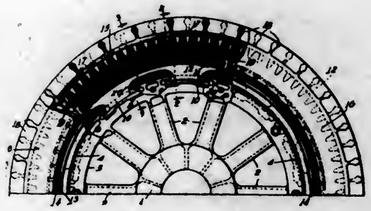
2. The combination with a stapling machine provided with a reciprocating member, reciprocating stapling hammers operatively connected thereto, means for feeding stock to the hammers, comprising a racked form carrying the stock and movable under the hammers, a block carried by said reciprocating member and provided with a slot elongated in the direction of the reciprocations of said member, a rocker arm, a pawl pivotally connected at one end of said arm and engaging the teeth on the raked form, the other end of said arm extending into said slot and said other end of the arm having a width less than the length of said slot so as to provide a lost-motion device, substantially as described.

1,348,162. INDICATOR. ARTHUR G. FENN, Hartford, Conn. Filed Oct. 21, 1919. Serial No. 332,168. 6 Claims. (Cl. 33—172.)



1. In an indicator of the class described, the combination with a base, a pivoted indicating pointer having a fixed part, and a lever operatively connected to the pointer adjacent the pivot of the latter, of a rotary stud carried by the base and spaced from the pivot of said pointer, a pair of springs carried by the stud and engaging said part fixed on said pointer, and means for rotating said stud.

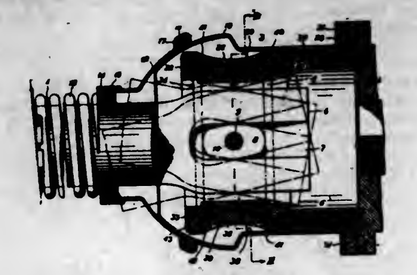
1,348,163. RUBBER-SOLE SHOE. GEORGE FERGUSON, Wollaston, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Dec. 11, 1917. Serial No. 206,688. 25 Claims. (Cl. 36—18.)



1. As an article of manufacture, an outer sole for shoes comprising a vulcanized rubber body molded to sole contour through the forepart and the shank and having a heel seat portion the outer surface of which is molded to provide a continuously convexed seat substantially complementary to the continuously concaved heel seat of a previously completed heel and which is arranged to terminate a distance within the periphery of the heel seat portion of a shoe and to be concealed by the previously completed heel when it is attached to the shoe.

1,348,164. METHOD FOR PUTTING BEADS ON TIRE-CARCASSES. WILLIAM G. FORDING, Cleveland, Ohio, assignor to John T. Lister, Cleveland, Ohio. Filed Mar. 10, 1916. Serial No. 83,216. 4 Claims. (Cl. 154—14.)

1. The process of forming a bead on a split tire carcass having loose extensions upon both sides of the inner peripheral split which consists in pressing oppositely disposed ring like members against the opposite sides of the carcass adjacent the place thereon at which the bead is to be formed, pressing the rings with uniform pressure simultaneously applied to all of the rings and folding the loose extensions around the ring like member and pressing the extension into contact with all portions of the ring like member.



1,348,165. VEHICLE-WHEEL. FRANKLIN A. FROMMANN, Chicago, Ill. Filed June 21, 1917. Serial No. 176,195. 10 Claims. (Cl. 152—36.)

1. A vehicle wheel including a body member, a rim member, elastic cushioning means interposed therebetween adapted to permit a relative lateral movement of said members, and means associated with said cushion and one of said members for preventing relative radial movement of said member and said cushion.

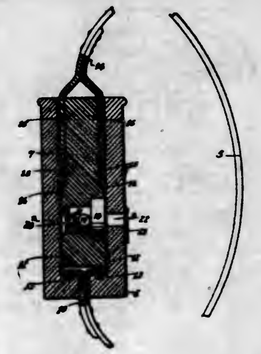
1,348,166. TRANSMISSION. HARRY B. GARMAN, Detroit, Mich., assignor to Charles E. Thompson, Cleveland, Ohio. Filed Aug. 1, 1919. Serial No. 314,743. 9 Claims. (Cl. 64—89.)

1. In a transmission, the combination of driving and driven members; an intermediate universal joint comprising an element supported by one of said members and adapted to rock in one plane relatively thereto, and a second joint element adapted to rock in a transverse plane; means for pivotally securing together said joint elements; and means, in combination with the last-mentioned means, for pivotally securing together said first-mentioned joint element and the other member, and for

securing together said member and the second-mentioned joint element so that they rock together and are relatively longitudinally movable.

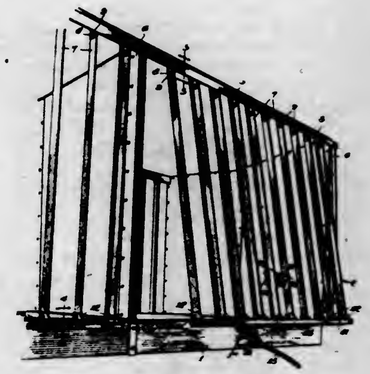
1,348,167. ART OF DYEING OR SIMILARLY TREATING TEXTILES. EUGENE S. GRAVES, Providence, R. I. Filed July 5, 1919. Serial No. 308,775. 13 Claims. (Cl. 8—5.)

6. A method of preparing fibrous filaments for dyeing or similar processes consisting in winding the same in combination with strands of a coarser material with the strands disposed in open relation to form a porous mass.



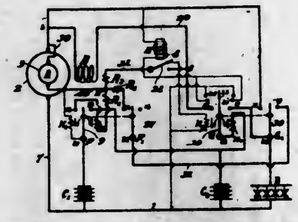
7. An improved cop or package for use in dyeing or otherwise treating textiles composed of strands of different materials interwound therein.

1,348,168. CHAIN-TIGHTENER. CARL C. GRAY, Minneapolis, Minn. Filed Oct. 13, 1919. Serial No. 330,366. 9 Claims. (Cl. 24—68.)



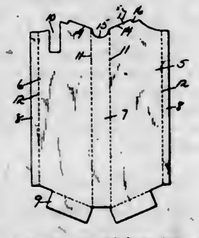
6. A tightening device comprising a bearing plate provided with a hook member and parallel side walls having pivoting sockets at their free edges, a locking lever disposed between said walls and having parallel side walls provided with pivoting slots, a pintle extending from a short arm of said lever to engage said sockets, and a hook member disposed between the walls of said lever and provided with a pivot pin adapted to travel in said slots and a seat intermediate its ends to engage the pivoted end of said lever.

1,348,169. AUTOMOBILE-TIRE LOCK. RAYMOND K. GRAY, Chicago, Ill., assignor, by direct and mesne assignments, to The Graynic Corporation, Chicago, Ill., a Corporation of Illinois. Filed Nov. 3, 1919. Serial No. 335,397. 1 Claim. (Cl. 70—17.)



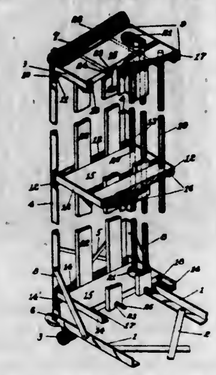
A locking device comprising a flexible member, a casing to which said member is secured at one end, a block to which the other end of said member is secured, said block being adapted to enter the casing, slidable bolts carried by the block and adapted to be projected from opposite sides thereof to enter keeper apertures in the casing, and a key-operated rotatable member carried by the block and operatively connected to the bolts for advancing and retracting the same, said member being housed in the casing when the block is inserted thereinto, and the casing having an aperture for entry of the key for operating said member.

1,348,170. SIDE-DOOR-CAR CONSTRUCTION. OTIS TIFFANY GREGG and WILLIAM BURR GREGG, Hackensack, N. J., assignors to The Gregg Company, Limited, Hackensack, N. J., a Corporation of New York. Filed Aug. 2, 1916. Serial No. 112,740. 9 Claims. (Cl. 39—88.)



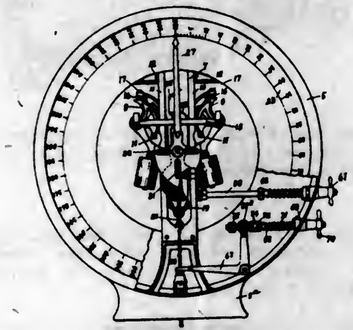
1. In cars, a side-door therefor comprising vertically disposed stake-bars connected together by a bottom rail, and a Z-shaped supporting belt-rail disposed with its outer flange extending downwardly and its inner flange upwardly, the upper ends of the stake-bars having a hinged connection with the belt-rail.

1,348,171. SWITCHING-OVER DEVICE FOR ELECTRICAL LIGHTING INSTALLATIONS FOR RAILWAY-TRAINS AND THE LIKE. HUGO GROB, Zurich, Switzerland. Filed Nov. 9, 1915. Serial No. 60,507. 10 Claims. (Cl. 171—313.)



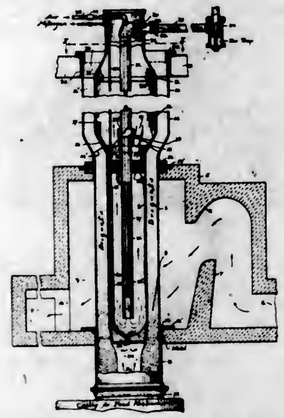
1. In apparatus of the class described, in combination, a generator, a field coil therefor, a substantially constant current resistance connecting one end of said coil to one of the terminals of said generator, a battery connecting said same end to another terminal of said generator, and protective means for disconnecting said battery when a maximum field current is reached.

1,348,172. MAGAZINE FOR FIREARMS. GRANT HAMMOND, New Haven, Conn., assignor of one-third to Alva C. Washburne, Pittsfield, Mass., and one-third to Frederick G. Crane, Dalton, Mass. Filed Feb. 28, 1918. Serial No. 219,591. 1 Claim. (Cl. 42—50.)



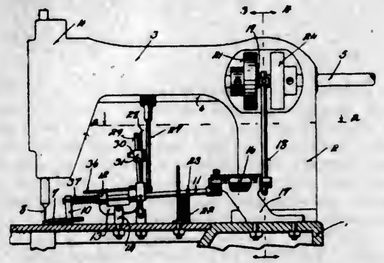
A magazine blank comprising two side sections each having a portion of one end located at an angle to a longitudinal line through said sections, and each angularly disposed end terminating in notches, and said notches terminating in curved portions extending to opposite edges of the blank.

1,348,173. CUT-SOLE RACK. WILLIAM PARKER HAMMOND, Boston, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Jan. 30, 1915. Serial No. 5,243. 9 Claims. (Cl. 211—14.)



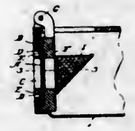
1. A rack comprising a plurality of horizontally extending frames, each having a series of fillers in its plane, said fillers registering across the series of frames, and partition members, each extending transversely across the planes in which said frames and fillers lie, said members lying between the fillers and forming pockets for the reception of articles carried by the rack.

1,348,174. WEIGHING-SCALE. HALVOR O. HEM, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed Aug. 14, 1916. Serial No. 114,786. 35 Claims. (Cl. 265—62.)



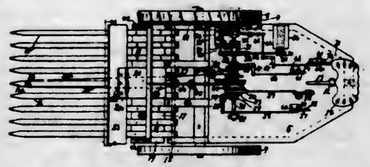
1. In a scale and in combination with the load-offsetting mechanism thereof, a pair of indicator hands, connections for driving said hands from the load-offsetting mechanism, means for locking one of said indicator hands while permitting the movement of the other, and means set in motion simultaneously with the locking means adapted to contact the free hand for returning such hand to zero position after the first-mentioned hand is locked.

1,348,175. FURNACE. CHARLES P. HIDDEN, Providence, R. I., assignor to Nitrogen Products Company, a Corporation of Rhode Island. Filed Jan. 27, 1919. Serial No. 273,456. 20 Claims. (Cl. 23—13.)



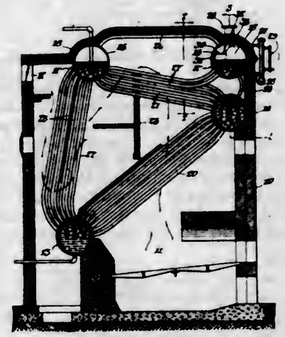
1. A furnace for fixing nitrogen which comprises two concentrically disposed retort sections, one within the other, the common axis of said sections being substantially vertical, means to heat the exterior section, auxiliary means to heat the interior section, means to receive material which descends through the annular space between said sections, said material having the form of a hollow column and said receiving means having provisions for cooling said column both interiorly and exteriorly while preventing adhesion of the charge to any part of the retort during the cooling operation, said cooling provisions including means to direct a relatively cool stream of nitrogen into contact with the lower end of said column.

1,348,176. GLOVE-SEWING MACHINE. FRANK G. HOTKA, Cudahy, Wis. Filed Feb. 17, 1919. Serial No. 277,506. 5 Claims. (Cl. 112—132.)



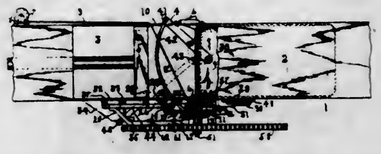
1. In a machine of the class described, means for forming tucks in flexible material comprising a rock shaft, a tucking arm carried by the shaft, means for oscillating the rock shaft on its axis, and means for oscillating the rock shaft in the plane of its axis, said oscillations being simultaneous to swing the tucking arm in two directions at the same time.

1,348,177. LIMITING COMBUSTION OF PICTURE-FILMS. CHARLES FRANCIS JENKINS, Washington, D. C. Filed Aug. 3, 1918. Serial No. 248,164. 2 Claims. (Cl. 88—17.)



1. In motion picture machines, the combination with a casing having an exposure aperture in its front wall and provided with a door, of a heavy heat conducting frame surrounding said aperture, arranged to be moved to and from the inner face of the wall and provided with a shallow central vertical channel, of spring-pressed bars for holding the perforated marginal portions of the film in contact with the vertical sides of the frame, access to the door side of the film passage being cut off normally by the projecting marginal portion of the frame and the closely fitting door.

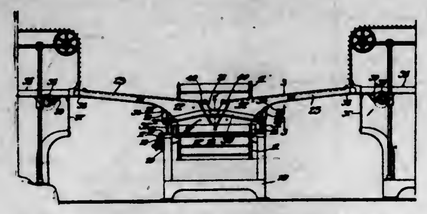
1,348,178. HAY-STACKING MACHINE. LAWRENCE KELLY, St. Paul, Minn. Filed Dec. 6, 1919. Serial No. 343,091. 3 Claims. (Cl. 56—27.)



1. In a machine of the kind described, a wheel supported frame, a fork-shaped rake pivoted to the front end of the frame, so as to swing up and down with its forwardly extending tines, a motor on the frame, means for applying the motor to the rake to raise, lower and hold it at various inclinations below and above horizontal position: operative connection between one of the ground wheels and the motor for going backward and forward on the ground; and an ejecting device guided to slide back and forth on the tines of the rake, and operative connection between said ejector and the motor; said ejecting device comprising a head guided to slide on the middle tines of the rake and having an upstanding wing by which to move the load forward and beyond the points of the tines.

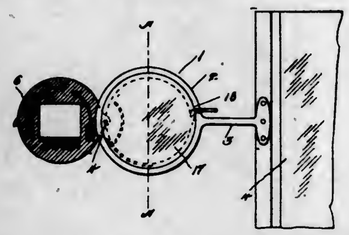
1,348,179. STEAM-BOILER. EDGAR KIDWELL, Philadelphia, Pa. Filed Mar. 4, 1919. Serial No. 280,581. 5 Claims. (Cl. 122—297.)

1. A steam-boiler having a continuous main water circulation path and a supplemental water circulation path, said main path including a steam-and-water receptacle, wherein the steam is disengaged from the water, and said supplemental path comprising a steam-and-water-receptacle from which the steam is discharged from the boiler, said latter receptacle being outside the main path of circulation, means whereby a relatively small portion of water is diverted from the main path of circulation and caused to flow into the discharge receptacle, and means located within the heating zone of the furnace whereby a corresponding flow of water from the discharge receptacle back to the main path of circulation is effected, and means for conducting the steam from the steam disengaging receptacle to the steam discharge receptacle.



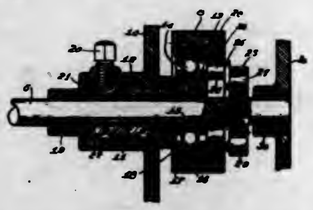
1,348,180. BINDING ATTACHMENT FOR BALING-PRESSES. WILLIAM H. LEAVITT, Wichita Falls, Tex. Filed Sept. 26, 1919. Serial No. 326,453. 4 Claims. (Cl. 100—20.)

1. The combination with a baling-press, of means for placing bale-ties around each bale, twisters for twisting or tying the ends of the bale-ties together, shafts on which the twisters are mounted, wire cutting knives and gears on said shaft, a rack engaging said gears for operating said twisting and cutting members in alternately reverse directions for twisting and severing the wires, and means actuated by the baling-press for imparting intermittent reciprocating motion to said rack.



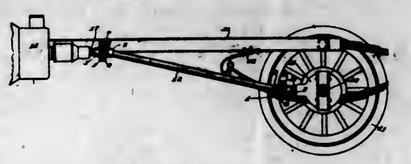
3. The combination with a baling-press, of means for placing wire around each bale, shears for severing the wire into bale-ties, means including a shaft for actuating said shears, a gear wheel on said shaft, a rack for imparting intermittent motion to the gear wheel, and a bracket actuated by the press-plunger to operate said rack.

1,348,181. SPLINT-FEEDING MECHANISM FOR MATCH-MACHINES. MICHAEL PARIDON, Barberton, Ohio, assignor to The Diamond Match Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 29, 1919. Serial No. 286,183. 7 Claims. (Cl. 144—64.)



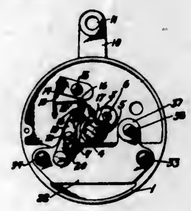
1. In a match machine, the combination with a splint-inserting device and a hopper overlying the same, of two independent splint-feeding structures extending over said hopper from each end of the latter, and means for vibrating said structures longitudinally of the hopper, each of said structures comprising an upwardly and outwardly inclined chamber, means leading to the outer end wall of the chamber for supplying splints thereto, and a stationary member constituting the inclined inner end wall of said chamber.

1,348,182. AUTOMOBILE-SIGNAL. STANLEY M. PONTIER, Philadelphia, Pa. Filed Feb. 17, 1919. Serial No. 277,563. 10 Claims. (Cl. 40—67.)



1. A vehicle signal consisting of a plurality of alining sign plates, one of which has an opening to expose a sign therebehind, and a casing in which the plates are mounted.

1,348,183. BELT-TIGHTENER. CHARLES L. RAYFIELD, Chicago, Ill. Filed Mar. 19, 1918. Serial No. 223,257. 2 Claims. (Cl. 64—53.)

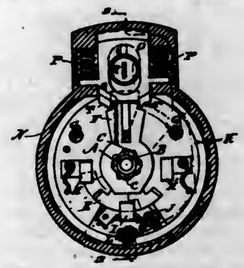


1. The combination of a rotary shaft, an eccentric adjustably thereon, a rotary member journaled on the eccentric and having a series of circular apertures circularly arranged in a lateral face thereof, a disk secured to said shaft and rotatable therewith and having a corresponding series of circular apertures circularly arranged in a lateral face thereof, and connecting members comprising a central portion and pins integral therewith extending laterally on each side thereof adapted to engage said apertures, said pins being offset relatively to each other to allow for the eccentric mounting of said rotary member.

1,348,184. FLEXIBLE COUPLING. CHARLES L. RAYFIELD, Chicago, Ill. Filed Mar. 19, 1918. Serial No. 223,259. 1 Claim. (Cl. 64—96.)

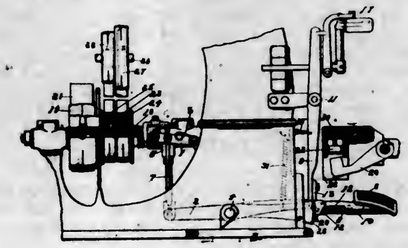
In a device of the class described, the combination of rotary members adapted to rotate about intersecting axes, and a plurality of overlapping circular plate springs of even diameter interposed between and connecting said rotary members, the points of attachment of said spring plates being spaced at equal intervals around said rotary members and separated less than a semicircle, and each spring plate comprising a complete circle only.

1,348,185. INTERRUPTER MECHANISM. WILLIAM H. RICHTER, Philadelphia, Pa., assignor to Arthur Atwater Kent, Ardmore, Pa. Filed June 26, 1919. Serial No. 306,850. 13 Claims. (Cl. 200—30.)



11. Interrupter structure comprising relatively movable interrupter contacts, a base member carrying one of said contacts, a housing of insulating material carried upon said base member, a condenser within said housing, and a second interrupter contact supported upon said housing.

1,348,186. FOOD PRODUCT AND PROCESS OF MAKING SAME. JOSEPH F. RUMSEY, Oklahoma, Okla. Filed Apr. 19, 1917. Serial No. 163,270. 3 Claims. (Cl. 99—10.)



1. A process of making a food product which comprises making a dough comprising cotton seed flour, and cereal flour, baking the same, comminuting the product, moistening the product, making the same into cakes and again baking.

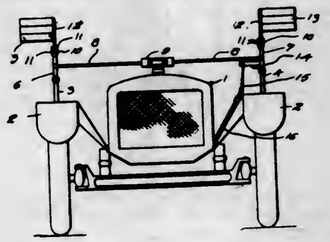
1,348,187. IGNITION-LOCK. ALBERT W. SARGESSER, Granite City, Ill., assignor to Liberty Auto Lock Co., St. Louis, Mo., a Corporation of Missouri. Filed Sept. 11, 1919. Serial No. 323,056. 4 Claims. (Cl. 200—44.)

2. A device of the character described, comprising an ignition switch having contacts and operative wires, a key-controlled automatic lock effecting locking control of said switch when the switch is open, a guard plate operated by said switch and having a key opening registering with said automatic lock when the switch is open, but covering said automatic lock when the switch is closing, substantially as described.

1,348,188. TREADLE MECHANISM. CYRIL FELLS STACEY, London, England, assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Dec. 13, 1916. Serial No. 136,768. 14 Claims. (Cl. 74—81.)

1. In a machine of the class described, a driver operatively connected to a source of power, driven devices adapted to be operated at different speeds from the driver, speed controlling mechanism comprising a speed controlling element and operative connections between said element and said driver, and locking means for said speed controlling element organized to hold said element in speed controlling position and to be rendered operative or inoperative by rocking movements of said element.

1,348,189. SPROCKET-CHAIN. SAMUEL V. TENCH, Wilkes-Barre, Pa. Filed May 19, 1919. Serial No. 298,244. 3 Claims. (Cl. 74—43.)



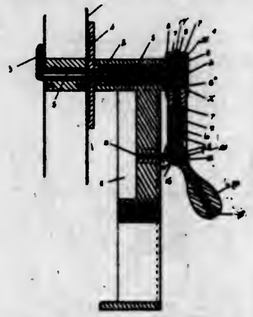
1. In a drive or conveyer chain, a rigid integral link, comprising side bars, a cross bar to connect the side bars near one end thereof, the cross bar having oppositely flattened faces; and a hook or coupling to connect the opposite ends of the side bars, the hook or coupling having a cylindrical bearing the cross bar being of sufficient width to easily pass through the opening between the bill and the shank of the hook; a cylindrical bushing of greater diameter than the width of the opening between the bill and the shank of the hook, and insertible endwise into the bearing through one end thereof, independently of the cross bar, for free rotation in the bearing, the bushing having formed longitudinally thereof a radial slot with flattened side walls and of a width substantially as great as the width of the opening between the bill and shank of the hook, to register therewith and form a seat for the cross bar of the adjacent link, the latter adapted to be freely inserted into, and removed from its seat in the bushing, through the opening between the bill and shank of the hook and rotatable with the bushing, to interpose that part of the bushing forming the bottom wall of the slot, between the inner face of the cross bar and the bearing in the hook, the flattened sides of the cross bar confronting the flattened side walls of the bushing, the cross bar being loosely seated in the bushing to permit the ready disengagement of the cross bar from the bushing and its removal through the opening between the bill and shank of the hook, while the bushing lies in the bearing in the hook, and thereby enable the substitution of a new bushing.

1,348,190. CHUCK FOR BUTTON-CUTTING MACHINES. GEORGE E. WAHL, Chicago, Ill. Filed May 12, 1919. Serial No. 296,605. 2 Claims. (Cl. 79—16.)

1. A device of the kind described comprising a chuck having a slotted end, a tubular cutting tool having a slotted end and a hollow cylindrical member adapted to slide into the said end of the chuck and over said end of the tool, means for compressing the slotted end of the chuck to grip said member, and means for expanding the tool to bring it into frictional engagement with said member.

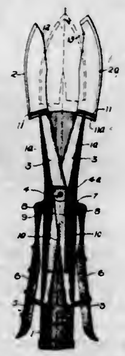
1,348,191. COURSE-INDICATOR. LENNOX G. WEAVER, Portland, Oreg. Filed Apr. 9, 1919. Serial No. 288,767. 1 Claim. (Cl. 116—52.)

A course indicator comprising supporting brackets secured to an automobile, supporting members hinged to the brackets, means connecting the supporting members so as to cause them to move in unison, cups formed upon the upper ends of the supporting members and bifurcated to form gripping fingers, stems located within said cups and held therein by the fingers, signaling members secured to the stems, and means connected to one of the supporting members for causing said supporting members to move laterally of the automobile in either direction.



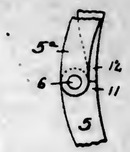
1,348,192. TRACTOR. ARTHUR B. WEBB, Watertown, Wis., assignor to William N. Smith, Chicago, Ill. Filed Sept. 22, 1919. Serial No. 325,593. 1 Claim. (Cl. 180—19.)

A tractor including a pair of laterally spaced apart coaxial vehicle wheels; a spur gear co-axial with said wheels and in driving relation to one of them; a spur pinion in mesh with said spur gear; a friction disk coaxial with and fixed with respect to said pinion; a second friction disk at right angles to and having its periphery in frictional engagement with a face of the aforesaid friction disk; an engine; a shaft driven by the engine and upon which the second aforesaid friction disk is splined to turn therewith while movable therealong; a frame upon which the engine is mounted; a pair of handle bars secured to and extending rearwardly from said frame; a bearing extending longitudinally of the tractor



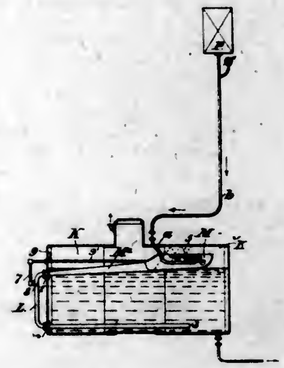
and supported at the rear ends of said handle bars; a hand controlled shaft extending forwardly from and journaled at its rear end in said bearing and provided upon the rear side of said bearing with a hand crank whereby it may be turned; a rod extending longitudinally of the tractor and supported upon the aforesaid frame; a shifter for the second aforesaid friction disk slidable upon said rod to slide this disk upon the engine shaft, said hand controlled shaft having its forward end in threaded engagement with said shifter whereby the second aforesaid disk may be moved toward or from the center of the first aforesaid disk.

1,348,193. REELING APPARATUS. WILLIAM WENDERHOLD, New York, N. Y., assignor to Cru Patents Corporation, a Corporation of New York. Filed Dec. 13, 1917. Serial No. 206,948. 3 Claims. (Cl. 74—33.)



1. The combination with a part to be rotated, of a crank arm slidably mounted around the part to be driven, and provided with a movable member therein, a pivotally mounted handle for said crank arm, means for maintaining said movable member in yielding contact with said handle, means for shifting said movable member upon pivotal movement of said handle to cause said member to brake the part to be rotated when said handle is in one position, and means for establishing a positive connection between said crank arm and said part to be rotated when said handle is in a second position.

1,348,194. TROCAR. WILLIAM BURTON WESCOTT, Wellesley, Mass., assignor to Kalmus, Comstock & Westcott, Inc., Boston, Mass., a Corporation of Massachusetts. Filed Nov. 28, 1919. Serial No. 341,253. 10 Claims. (Cl. 128—347.)

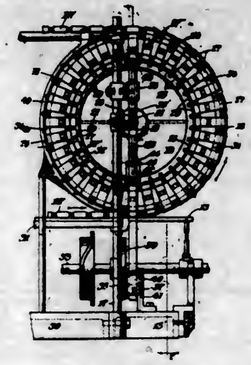


1. A trocar comprising a cannula, a perforator blade at the forward end of the cannula divided into two sections, and a pair of levers pivoted to the cannula, the two blade sections being fixed respectively to the forward ends of the two levers.

1,348,195. DEVICE FOR TRANSFERRING AND DOUBLING KNITTED WEBS. LOUIS N. D. WILLIAMS, Ogontz, Pa. Filed Jan. 22, 1918. Serial No. 213,197. 4 Claims. (Cl. 66—32.)

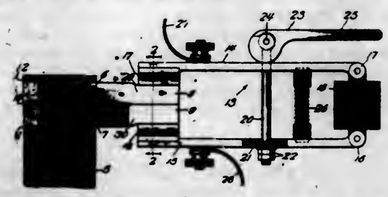
1. In a device for doubling the stitches of a knitted web, the combination of two sets of stitch-receiving points, a carrier for each set, and a hinge for connecting said carriers so that one may be folded over the other, said hing comprising laterally adjustable blocks and hinge plates adjustable longitudinally on said blocks, whereby either adjustment can be effected independently of and without affecting the other.

1,348,196. APPARATUS FOR TREATING FEED-WATER. IGNAC PIOTR WINER, Warsaw, Russian Poland. Filed Mar. 11, 1916. Serial No. 83,612. 1 Claim. (Cl. 122—433.)



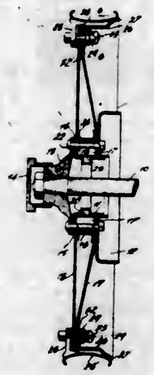
The combination of a steam boiler, a tank disposed therein and comprising an open bowl projecting above the normal water line into the steam space and an inclined tube connected with the lower part of said bowl and extending below said water line through the shell of the boiler to the exterior thereof, a pipe connected with the projected end of said tube, extending downward and discharging into the water space of the boiler, a feed water supply pipe, a sprayer disposed in said open bowl, connected with said supply pipe and comprising upward spraying nozzles operative to project the feed water into contact with the steam of the steam space, said bowl being operative to catch the returned sprayed feed water and condensed steam commingled therewith and hold it under the reduced pressure due to the steam condensation until it attains the temperature of the steam, a pipe connected with said bowl above the normal water level thereof and extended to the exterior of the boiler, and a water gage connected with the first and last named pipes for determining the water level within the bowl.

1,348,197. MACHINE FOR MAKING BOXES. CHARLES F. WRIGHT, Barberton, Ohio, assignor to The Diamond Match Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 23, 1919. Serial No. 325,798. 12 Claims. (Cl. 93—36.)



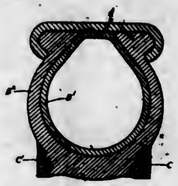
1. In a box-likemaking machine, the combination with a traveling box-conveyer, of a series of pressing elements

arranged adjacent the path of travel of the conveyer and movable concurrently therewith, and means for actuating



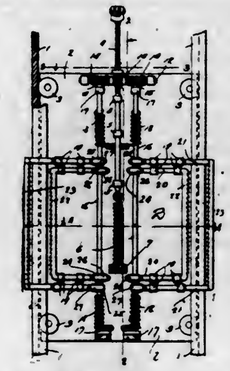
said elements to project and retract them at intervals into and from clamping relation with the walls of the boxes adjacent thereto within the conveyer.

1,348,198. METHOD OF BUILDING INDUCTOR ELEMENTS FOR DYNAMO-ELECTRIC MACHINES. VINCENT G. APPLE, Dayton, Ohio. Filed May 20, 1918. Serial No. 235,689. 5 Claims. (Cl. 171—206.)



1. The method of making inductors for dynamo electric machines which consists in separating the inducing conductor bars by insulation; drawing the ends of the bars together out of alinement with the body part of one or both and welding the ends at contacting surface to produce molecular continuity through the joined ends.

1,348,199. METAL WHEEL. WILLIAM BARBER, Brooklyn, N. Y. Filed Feb. 18, 1919. Serial No. 277,806. 4 Claims. (Cl. 21—69.)



4. In a metal wheel, a hub sleeve extending completely through the center thereof and provided with an upturned flange on the exterior surface thereof to form one side of a circular channel, a pair of sheet metal disks fitting into said channel and positively secured therein, a spreading device interposed between said disks at the central portion thereof, the peripheral edges of said disks being brought together into contact with each other and secured together substantially as shown and described.

1,348,200. MANUFACTURE OF TIRES FOR THE WHEELS OF ROAD-VEHICLES. WILLIAM WORBY BEAUMONT, Westminster, London, England. Filed Apr. 28, 1920. Serial No. 377,245. 1 Claim. (Cl. 152—14.)

For use on the wheels of road-vehicles, a tire composed of rubber of different degrees of hardness for the main portion and for the edges of the tread, integrally combined; the former being composed of material possessing good load-carrying qualities, and the latter, composed of tough and comparatively soft rubber adapted to yield to the load and to maintain the edges of the tread in a sharply angular condition.

1,348,201. SAFETY MECHANISM FOR ELEVATORS. CARL POSEY BEAVER, Ducktown, Tenn. Filed Oct. 20, 1919. Serial No. 331,822. 8 Claims. (Cl. 187—86.)

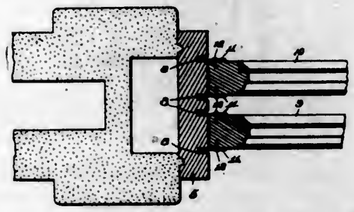
1. A safety mechanism for elevators, comprising a longitudinally movable rack bar, a pair of shafts paralleling said rack bar, means gearing said rack bar to the shafts, to rotate the latter, clutch members arranged to grip the elevator rails, and means operated by the rotation of the shafts to close the clutch members over the rails.

1,348,202. APPLICATION OF POWER. BYRON L. BEEBE, Wellington, Kans. Filed July 8, 1919. Serial No. 309,271. 2 Claims. (Cl. 74—7.)

1. In combination, a revolvable shaft, a toothed wheel and a hub rigidly carried thereby; an eccentric disk ro-

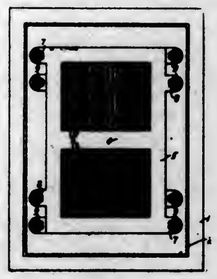
tatably mounted upon said hub and means for controlling and fixing the position of said disk; an outer wheel enveloping the toothed wheel, a drum rigidly attached to said outer wheel; roller members arranged intermediate the inner face of said drum and the eccentric disk; a plurality of roller members arranged in said outer wheel, one for each tooth of said toothed wheel, all substantially as specified and for the purposes set forth.

1,348,203. SPRING TENSION FOR POWER OR HAND PUMPS. CARL F. BRANDENBERGER, Fort Madison, Iowa. Filed Feb. 12, 1919. Serial No. 276,541. 1 Claim. (Cl. 74—48.)



In a device of the class described, a cylindrical casing; a cap threaded on one end of the casing; a plunger slidable in the cap and provided at its inner end with a head located in the casing; a socket threaded on the outer end of the plunger and having spaced lower arms; a compression spring surrounding the plunger within the casing and abutting at its ends against the cap and the head, the spring serving to hold the socket normally in engagement with the cap, the upper end of the casing being enlarged and tapered to facilitate the insertion of the plunger and the head into the casing and being bifurcated to form upper arms which are through-shaped in cross-section; a connecting element uniting the upper arms; and a connecting element uniting the lower arms.

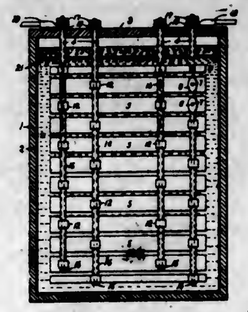
1,348,204. BULLET-PROOF ARMOR. GUY OTIS BREWSTER, Dover, N. J. Filed Aug. 13, 1917. Serial No. 186,034. 21 Claims. (Cl. 89—36.)



18. A bullet proof armor comprising a frame adapted to be readily put on or taken off, and a head and body protecting bullet proof armor carried by the front of said frame, and a leg protecting bullet proof armor carried by said body protecting armor, pads carried by said frame and interposed between said frame and the body, similar pads carried by said leg protecting armor, said pads being positioned to absorb and distribute the shock of impact of a projectile against said armor to non-sensitive and non-vital parts of the body.

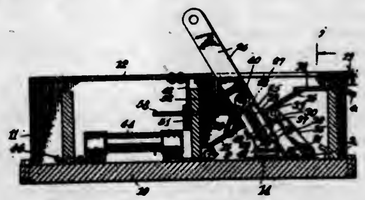
1,348,205. COMBINATION METAL WEATHER-STRIP AND GUIDE FOR WINDOW-SASHES. ROBERT S. CADE, Canton, Ohio. Filed Jan. 3, 1919. Serial No. 269,413. 2 Claims. (Cl. 20—69.)

1. The combination with a window frame including a pair of sliding sash sections, of relative narrow grooves being formed in the opposed faces of the vertical members of the frame, one of said grooves being disposed at opposite sides of each of said sash sections and having their inner walls in alinement with the corresponding faces of the latter, and flat metallic strips secured on opposite sides of each of said sash sections and projecting into said grooves in contacting relation with the inner walls thereof, said metallic strips having their edge portions within the grooves formed to provide folded portions disposed in contacting relation with the outer walls of the latter.



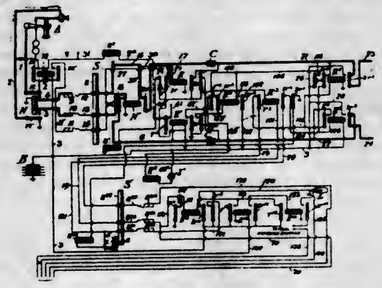
1,348,206. PLATE FOR ELECTROLYTIC CELLS. LEWIS W. CHUBB, Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 4, 1917. Serial No. 159,656. 7 Claims. (Cl. 175—318.)

1. An electrode for electrolytic condensers, lightning arresters, rectifiers and the like comprising a frame of relatively thick film-forming material provided with an opening and a plurality of relatively thin strips of film-forming material extending across the opening with their ends imbedded in opposite sides of the frame.



1,348,207. ELECTROLYTIC CELL. LEWIS W. CHUBB, Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 4, 1917. Serial No. 159,657. 7 Claims. (Cl. 175—318.)

7. An electrolytic cell comprising a container of film-forming material, an electrolyte therein, and a plurality of electrodes of film-forming material disposed within the electrolyte, with alternate electrodes connected to ter-

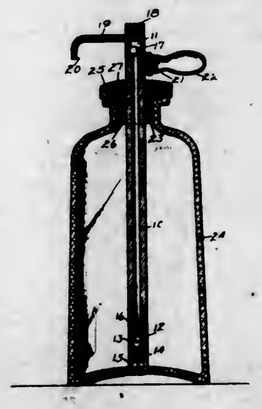


minals of opposite polarity, each outer electrode having a supficial area of substantially one-half of that of an intermediate electrode.

1,348,208. CIRCUIT-CLOSER. JOHN D. CLAY, Port Washington, N. Y. Filed Apr. 27, 1917. Serial No. 164,828. 6 Claims. (Cl. 200—73.)

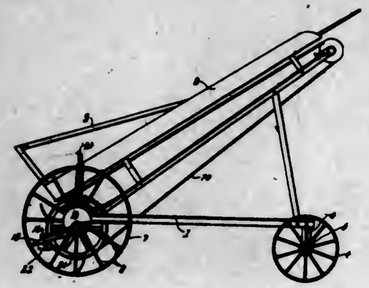
1. In a switch of the class described, a movable support; a circuit closing element carried thereby; terminals with which said circuit closing element is adapted to engage; a spring operatively connected with said support and tending to move the same in a direction to open the circuit controlled by the switch; a movable switch closing member; toggle mechanism adapted to hold the switch in a closed condition; means independent of said toggle mechanism through which said support may be moved by said switch closing member to close the circuit controlled by the switch; and means operatively connected with said switch closing member for breaking said toggle mechanism to release the switch and permit said spring to open the same.

1,348,209. TELEPHONE-EXCHANGE SYSTEM. EDWARD E. CLEMENT, Washington, D. C., assignor, by mesne assignments, to James R. Garfield, trustee, Cleveland, Ohio. Filed July 15, 1907. Serial No. 383,874. 7 Claims. (Cl. 179—27.)



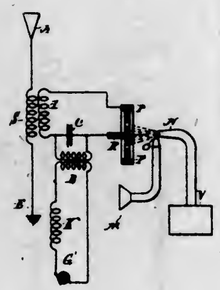
3. In a telephone exchange system, a number of subscribers' lines, a number of trunks less than the number of lines, each trunk terminating at one end in a primary selector switch and at the other end in a first selector switch, a plurality of operator's circuits and apparatus, each including a telephone set and a sending device, and an automatic switch associated with each of said trunks and containing terminals of a number of said operator's circuits, together with driving means for the primary selector switches controlled by the calling subscribers, and driving means for the operator's switches controlled by the primary selector trunks, substantially as described.

1,348,210. CASING FOR METAL THERMOMETERS AND THE LIKE. EDWARD P. COLE, Chicago, Ill. Filed Aug. 2, 1919. Serial No. 314,939. 8 Claims. (Cl. 73—52.)



1. A casing comprising a box member formed with a bottom and side and end members, one pair of opposite members being longer than the other, a dial member formed with parallel projecting folds arranged to fit over said longer members, and a cover frame formed with a display opening and having marginal flanges arranged to receive said dial member.

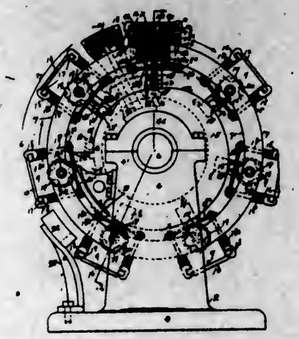
1,348,211. FOUNTAIN-PEN-FILLING DEVICE. ALONZO TOWNSEND CROSS, Providence, R. I. Filed Apr. 11, 1919. Serial No. 289,382. 3 Claims. (Cl. 128—231.)



1. A fluid dispenser for bottles consisting of a dispensing tube having intake and outlet valves and provided with a discharge spout, a hand compressible bulb connected with said tube and in communication with its bore between said valves, a bottle closing plug around and shiftable along said tube, and a cap around the tube nad rotatable on the plug said cap and said plug having openings parallel to the axis of the tube and movable into and out of registry with one another by virtue of rotation of the cap.

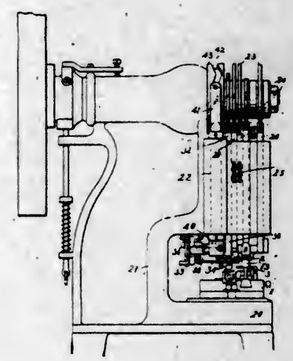
1,348,212. HAY-LOADER. ARTHUR E. DANKE, Neenah, Wis., assignor to Sterling Manufacturing Company, Sterling, Ill., a Corporation. Filed Nov. 7, 1918. Serial No. 261,489. 6 Claims. (Cl. 56—352.)

1. The combination with the rear axle and wheels of a hay loader, of a tine carrying drum secured to the axle, eccentrics for raising and lowering the drum and means for clutching the wheels to the axle.



1,348,213. RADIOTELEPHONE SYSTEM. LEE DE FOREST, New York, N. Y., assignor to De Forest Radio Telephone and Telegraph Company, New York, N. Y., a Corporation of Delaware. Filed Aug. 26, 1916. Serial No. 117,034. 2 Claims. (Cl. 250—6.)

1. In a radio transmitting system, an oscillating circuit including a spark gap therein comprising separated electrodes, means for directing a continuous jet of air against one of said electrodes, and means controlled by sound waves for directing said jet of air against the other of said electrodes.



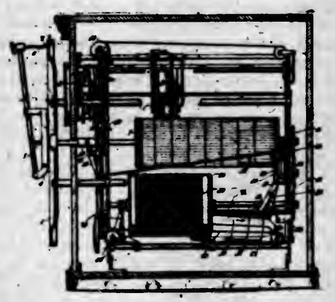
1,348,214. MACHINE FOR MAKING COMPOSITION PLUGS. IRA E. FARR, Watertown, N. Y., assignor of one-half to Mathew M. Bagg, Watertown, N. Y. Filed July 5, 1919. Serial No. 308,758. 10 Claims. (Cl. 92—59.)

1. A machine for making composition plugs, including a frame, a rotatable drum journaled in said frame, said drum having a plurality of radial slots, a plurality of molds arranged in pairs mounted on the periphery of said drum in line with said slots, plungers reciprocatable in said molds, a pair of similar cams carried by said frame,

and means connecting said plungers with said cams for effecting the compression strokes of the cams.

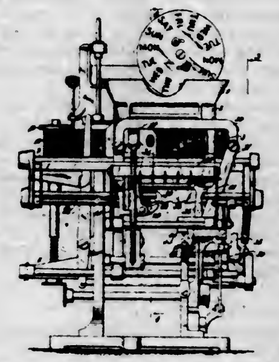
1,348,215. METAL-BENDING MACHINE. SAMUEL H. GIBSON, Cleveland, Ohio, assignor to The Fanner Manufacturing Company, Cleveland, Ohio, a Corporation of Ohio. Filed Apr. 30, 1917. Serial No. 165,359. 13 Claims. (Cl. 153—13.)

1: In a machine of the character described and in combination a bed die having a recess formed therein, oppositely disposed movable members normally located above and at the sides of the recess in the bed die, the front faces of said movable members forming continuations of the sides of the recess in the bed die and serving as parts of said die during the initial bending of a strip of metal, said movable members being adapted to receive and support a strip of metal to be formed, a forming die mounted above said movable members and adapted to descend to press the strip of metal between said movable members and into the recess in the bed die, means for operating the said movable members to reciprocate them across the recess in the bed die thereby to fold the said strip of metal about the forming die and a heading die mounted above the forming die and adapted to descend and press the metal strip which has been folded about the forming die.



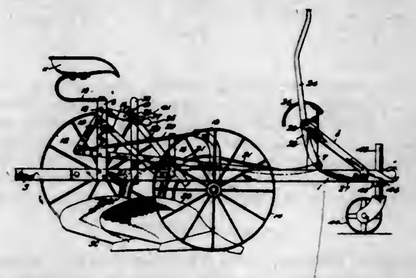
1,348,216. JOINTED DOLL. CHRISTOPH A. GIEBELER-WANKE, New York, N. Y. Filed July 26, 1918. Serial No. 246,817. 8 Claims. (Cl. 46—40.)

1. In a doll, the combination with a body portion having limb engagement sockets, of limb members, each comprising a pair of tubular members adapted to be swung relatively to each other, said members being provided at their adjacent ends with coöperating balls and sockets, and opposed inclined surfaces intersecting the surfaces of said balls and said sockets, the center of the inner edges of said inclined surfaces being substantially central of the longitudinal length of said inclined surfaces, said balls being each provided with a longitudinal bore and a radial slot extending from said bore to the surface of said member and unobstructed throughout the longitudinal length of said member, said slot extending unobstructed from said centers of the inner edges of said inclined surfaces, said



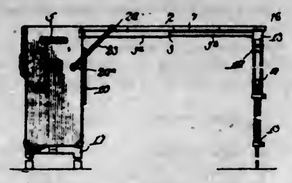
limb members being provided at one end with a ball joint member engaging the sockets of said body portion, an extremity member at the other end of said limb members, and connection means extending from said extremity member through said tubular members to a point of attachment within said body portion, a portion of said connection means adapted to be disposed substantially at right angles to said inclined surfaces in the engagement position thereof, and adjacent the centers of the inner edges thereof to exert a positive force to hold said surfaces in engagement with each other.

1,348,217. RECORDER. HARRY T. GOSS, Rutherford, N. J., and JAMES W. BRYCE, Binghamton, N. Y. Filed May 8, 1919. Serial No. 295,764. 9 Claims. (Cl. 234—46.)



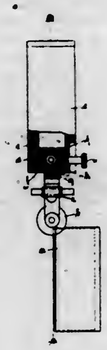
1. In a time recorder the combination with the means for operating the same to print the time of registry by workmen, of a record sheet carrier for recording such impressions, and a finder control sheet carrier, the record sheet carrier being longitudinally movable, a row of punches over the finder control sheet, spring seated pins passing through the punches, means movable over the entire row of punches and adapted to normally operate the last one of the row, a connection between the same and the machine operating means for effecting such movement and that of the record sheet carrier, a stop carried by said punch operating means and a connection between the same and the intermediate moving mechanism adapted to encounter any punch pin which may pass through a previously punched perforation in the finder control sheet and to thereby disconnect the moving means and lock the punch operating means and the record sheet carrier at points determined by the pin which has passed through a hole.

1,348,218. TIME-RECORDER. HARRY T. GOSS, Rutherford, N. J., and JAMES W. BRYCE, Binghamton, N. Y. Filed May 8, 1919. Serial No. 295,765. 5 Claims. (Cl. 234—43.)



1. In a time-recording machine for workmen's cards, the combination with the means for operating the same and a card receiver movable transversely to the impression point thereby, of a row of punches carried by or with the receiver, a series of spring-actuated pins passing through said punches, a pivoted stationary arm and means controlled by its movement when encountered by a pin which has passed through a previously punched hole in a card to arrest the card-receiver at a point with reference to the impression point determined by the position of the punched hole in the card.

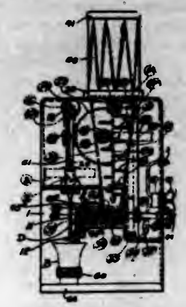
1,348,219. PLOW. AMMON K. JONES, Neosho, Mo. Filed Apr. 26, 1919. Serial No. 292,811. 6 Claims. (Cl. 97—36.)



1. The combination with a wheeled frame having a rigid cross bar at its front end, a second cross bar mounted for rocking movement in the sides of the frame in rear of and adjacent the rigid cross bar, flexible connections between the said cross bars, plows secured rigidly at their front ends to the said rear cross bar, and means on the frame connected with the plows to raise or lower the same.

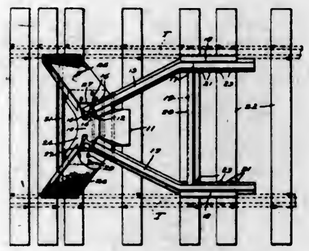
1,348,220. COMBINED CABINET AND TABLE. THOMAS H. E. HATHAWAY, Chicago, Ill. Filed July 16, 1919. Serial No. 311,193. 3 Claims. (Cl. 190—12.)

1. A camper's cabinet comprising, in combination, a casing open at its upper end, a table comprising a plurality of leaves hinged together so as to be capable of being folded either into a compact stack or in extended relation, one end leaf being connected to the upper edge of one side wall of the case and adapted when the leaves are in compact relation to close the upper end of the case and also serve as a support for the remaining leaves, and means cooperating with the case to support the leaves of the table in extended relation, said means including an arm detachably connected with the case at the upper end thereof and having a supporting leg at its free end, said case being made of such height that while in upright or normal position it will, together with said leg, support the table at a substantial distance above the ground, and the case being in the extended relation of said leaves open at its upper end so as to be readily accessible.



1,348,221. MACHINE FOR SKIVING LEATHER. CARL ALBERT HIRTH, Cannstatt, near Stuttgart, Germany, assignor to Fortuna-Werke Albert Hirth, Cannstatt, Germany. Filed Sept. 8, 1911. Serial No. 648,346. 6 Claims. (Cl. 69—9.5.)

1. A machine for skiving leather, comprising a ring-knife, a pressure-member for the work fed thereto, having a work contacting surface conforming to the cutting edge of said knife, and an adjustable carrier for said pressure-member having an axis of adjustment located in the surface of contact between such member and the work and at a lateral edge of said surface of contact.



1,348,222. DRINK MIXER AND DISPENSER. ANDREW E. HOLMES, New York, N. Y. Filed Apr. 15, 1920. Serial No. 374,133. 6 Claims. (Cl. 259—24.)

1. A device of the character described, the combination of a revoluble spindle for mixing drinks, motor mechanism for actuating the spindle, means controllable at the will of the operator for throwing said motor mechanism into action in order to cause the spindle to mix the drink, a dispensing device connected with said motor mechanism and driven thereby for dispensing a measured amount of material in the form of a loose powder during the time the drink is being mixed, and mechanism connected with

said motor mechanism and controllable by movements thereof for automatically regulating the discharge of said powder and for throwing said motor mechanism out of action when the mixing of the drink is finished.

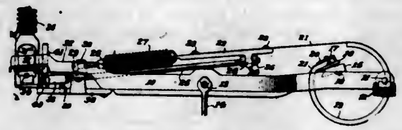
1,348,223. BUMPING-POST FOR FREIGHT-CARS. ELMER KEEDLER, Chicago, Ill., assignor to The Mechanical Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 14, 1919. Serial No. 337,963. 10 Claims. (Cl. 104—254.)

1. In a bumping post for freight cars and the like adapted for insertion intermediate the rails of the track, a bumping element embodying a pair of downwardly and rearwardly extending portions, a pair of angularly disposed supports having their lower ends shaped to conform to the shape of the flanges of the track rails and secured thereto and their upper ends secured to said downwardly extending portions, downwardly and forwardly extending braces secured to said bumping element and said track rails the point of contact of said supports with said flanges being on an arc having as its center the point of connection of said braces to said track rails and passing through said bumping element.

2. In a bumping post for freight cars and the like, adapted for insertion intermediate the rails of the track, a bumping element embodying a pair of downwardly extending portions, a pair of angularly disposed supports having their lower ends shaped to conform to the shape of the flanges of the track rails and secured thereto and their upper ends secured to said downwardly extending portions, said downwardly extending portions being provided with shoulders abutting the upper ends of said supports, downwardly and forwardly extending braces secured to said bumping element and said track rails the point of contact of said supports with said flanges being on an arc having as its center the point of connection of said braces to said track rails and passing through said bumping element.

3. In a bumping post for freight cars and the like adapted for insertion intermediate the rails of the track, a bumping element embodying a pair of downwardly extending portions, a pair of angularly disposed supports having their lower ends shaped to conform to the shape of the flanges of the track rails and secured thereto and their upper ends secured to said downwardly extending portions, said downwardly extending portions being shaped to conform to the shape of said supports and providing shoulders abutting the upper ends thereof, downwardly and forwardly extending braces secured to said bumping element and said track rails the point of contact of said supports with said flanges being on an arc having as its center the point of connection of said braces to said track rails and passing through said bumping element.

4. In a bumping post for freight cars and the like adapted for insertion intermediate the rails of the track, a bumping element, a bracing member for said bumping element secured to said bumping element and to the tracks and a support for said bumping element engaging the flange of the track with its lower end and abutting the bumping element with its upper end, the point of contact of said support with said flange being on an arc having as its center the point of connection of said bracing member to said tracks and passing through said bumping element.

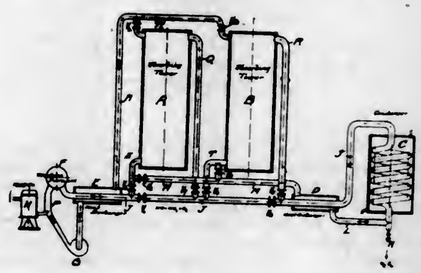


5. In a bumping post for freight cars and the like adapted for insertion intermediate the rails of the track, a bumping element embodying a pair of downwardly extending portions, a pair of forwardly diverging braces secured at their upper ends to said bumping post and at their lower ends to the rails of the track, and a pair of angularly disposed supports having their lower ends engaging the flanges of the rails and their upper ends abutting said downwardly extending portions and secured thereto, the point of contact of said supports with the flanges of the rails being on an arc having as its center the point of connection of said forwardly diverging braces with the rails of the track and extending through said bumping element.

1,348,224. TOY GRENADE. WALTER DEWITT KEMP, New York, N. Y. Filed July 11, 1919. Serial No. 310,108. 7 Claims. (Cl. 46—46.)

1. An unrestrained hand ball, comprising a sphere and means in combination therewith for producing noise and emitting smoke upon concussion of a predetermined point on the surface of the ball with a solid surface.

1,348,225. THERMOSTATIC DEVICE FOR SCALES. BERT W. KING, Detroit, Mich., assignor to Detroit Automatic Scale Company, Detroit, Mich., a Corporation of Indiana. Filed Apr. 30, 1919. Serial No. 293,738. 12 Claims. (Cl. 265—69.)

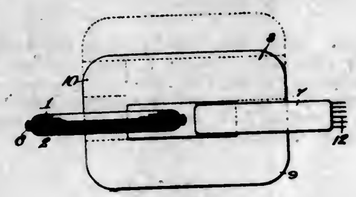


1. In a scale, in combination, a lever, a fulcrum therefor, means carried by the lever for enabling the goods to be weighed to rock the lever on said fulcrum, a counterbalancing spring, a connection between the spring and the lever, a temperature-responsive member in the form of an open ring arranged in the plane of the lever's movement, having one end mounted on the lever, means connecting the other end of the temperature-responsive member to the said spring connection to shift the same as the temperature varies and including a spring adapted to prevent shifting of said spring connection by the weight of the goods being weighed.

1,348,226. SHUT-OFF DEVICE FOR CARBURETERS AND THE LIKE. GEORGE E. KIPP, Niverville, N. Y., assignor of one-fourth to Robert J. Kipp, one-fourth to Charles H. Winslow, and one-fourth to Paul T. Winslow, Niverville, N. Y. Filed Feb. 13, 1920. Serial No. 358,473. 2 Claims. (Cl. 137—92.)

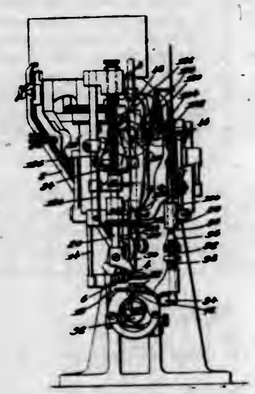
1. The combination of a valve casing, a valve therein having its stem projecting beyond the casing, a latch pivoted on the casing and extending across and bearing on the end of the valve stem, a socket in the valve casing having an open outer end and having an opening through its top, and a fuse wire for normally holding the valve in one position having its lower end extending through the opening in the top of the socket and provided with a stop fitting closely in the socket, the upper end of the fuse engaging the free end of the latch and provided with a stop bearing upon the upper side of the latch.

1,348,227. PROCESS FOR THE ABSORPTION OF NITROUS GASES. JENS LASSEN LA COUR, Christiania, Norway, assignor to Norsk Hydro-elektrisk Kvaelstofaktieselskab, Christiania, Norway. Filed Oct. 22, 1918. Serial No. 259,294. 5 Claims. (Cl. 23—13.)



1. The process of absorbing nitrous gases, which comprises condensing a substantial portion of the gases from an electric furnace for the production of nitrogen compounds and re-heating the residual uncondensed nitrogen oxid gases to absorbing temperature, and absorbing said gases in dry bases at a raised temperature.

1,348,228. METHOD OF AND MEANS FOR VULCANIZING RUBBER TIRES. JOSEPH LEDWINKA, Philadelphia, Pa., assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Dec. 11, 1916. Serial No. 136,247. Renewed Jan. 8, 1920. Serial No. 350,064. 7 Claims. (Cl. 18—6.)

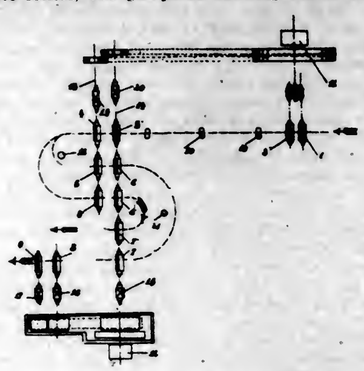


1. The method of vulcanizing which consists in applying the article to be vulcanized to a forming core and

inclosing the article and forming core within a metal mold, then threading the core of an electric transformer through the mold and through the primary coil of the

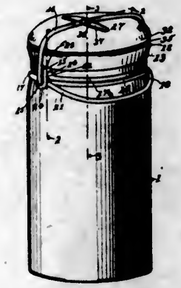
transformer, whereby the mold and forming core become the secondary of the transformer, and finally supplying current to the primary coil of the transformer.

1,348,229. BUTTON-ATTACHING MACHINE. BERNARD T. LEVEQUE, Wenham, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Feb. 26, 1918. Serial No. 219,315. 16 Claims. (Cl. 112—108.)



1. A sewing machine having, in combination, stitch forming mechanism including a uniformly reciprocating needle, mechanism for actuating the same to sew a predetermined group of stitches in each of a succession of sewing cycles, and mechanism for automatically shifting the work during a reciprocation of the needle between successive cycles to secure an unstitched space between successive groups of stitches.

6. A sewing machine having, in combination, stitch forming mechanism comprising a reciprocating needle and a loop taker, and mechanism for preventing the taking of the needle loop by the loop taker and for spacing the work after a predetermined series of stitch forming cycles.

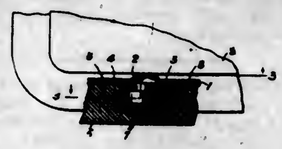


1,348,230. MILL-TRAIN FOR THE MANUFACTURE OF SMALL AND MEDIUM IRON BARS. RAYMOND LINARD, Ougreé, Belgium. Filed Mar. 22, 1919. Serial No. 284,386. 3 Claims. (Cl. 80—35.)

3. A semi-continuous mill train comprising two motors, two, two-high sets of roughing rollers and a first and second pair of intermediate rollers actuated by one of said motors, all said rollers working continuously, a conveyer for bringing the roughed bar to the first pair of intermediate rollers, another pair of intermediate rollers duplicating the aforesaid second pair of intermediate rollers, two groups of finishing rollers actuated

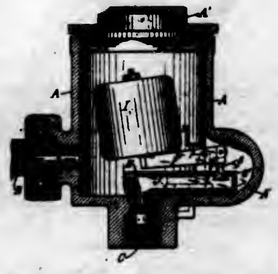
by the second motor, one of these groups being so arranged as to admit of being also alternately actuated by the first motor.

1,348,231. GLASS VESSEL. GEORGE F. MCDONNELL, Charleston, and JOHN JOSEPH DANDOY, Dunbar, W. Va. Filed Feb. 13, 1919. Serial No. 276,767. 2 Claims. (Cl. 215—88.)



1. In a jar of the character described, the combination of a body provided with a wide mouth having an annular thickened glass ring at said mouth integral with said body, opposite downwardly open recesses extending upwardly into said thickened glass ring, said recesses contracting toward their upper ends and open radially outward, and a bead integral with said body located below and slightly spaced from the lower edge of said annular thickened glass ring forming annular spaces at opposite sides of said body between said annular thickened glass ring and said bead, the bottoms of said annular spaces being concentric with the axis of said body, forming guiding channels concentric with said axis, said guiding channels merging into said recesses to guide the inwardly presented inwardly pressing ends of a wire structure received against said bottoms, in said annular spaces about said body and into said recesses, whereby said upwardly contracting walls of said recesses hold said inwardly presented inwardly pressing ends of said wire structure against upward movement on said body.

1,348,232. ANTIRATTLER. HERMAN C. MAISE, Detroit, Mich., assignor, by mesne assignments, to Edward G. Budd Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 28, 1917. Serial No. 151,391. 1 Claim. (Cl. 16—77.)

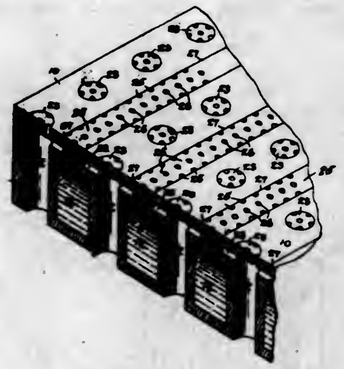


In a device of the kind described, a door member having a recess, a block of resilient material fitting said

recess, a plate covering said recess, said plate having an aperture of smaller dimension than the recess, a hollow semi-spherically shaped sheet metal member having an annular edge flange fitting said recess, and resting on

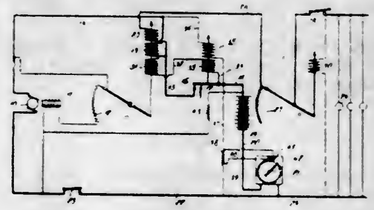
said resilient block, the semi-spherically shaped portion of said member protruding through the aperture in said plate, said plate serving to retain the flange of said semi-spherically shaped member and said resilient block within said recess.

1,348,233. OUTLET-VALVE. HARRY M. MILLER, Milwaukee, Wis. Filed Jan. 17, 1916. Serial No. 72,529. 6 Claims. (Cl. 137—113.)



1. An outlet valve for radiators, including the combination of a casing provided with a side inlet and an outlet in its bottom, and having a lateral extension of the casing cavity located opposite the inlet, an outlet chamber having a tubular outlet projection fitted to the casing outlet, said chamber having an inlet port in its top, a valve within said chamber adapted to close said inlet port against fluid pressure, a lever pivotally supported above said chamber and linked to said valve, and a float having its bottom centrally connected to said lever; said lever having its valve supporting arm in the extension cavity, and its float supporting arm substantially in line with the inlet passage, said lever and the lower portion of the float being in the unobstructed direct path of the fluid entering the casing through said inlet, and subject to fluid momentum pressures and scouring effects of the incoming stream of water.

1,348,234. LOCK. JAMES C. MOCK and BENJAMIN F. WILLISTON, Detroit, Mich., assignors to John M. Fitzgerald, River Forest, Ill. Filed Mar. 11, 1920. Serial No. 364,913. 5 Claims. (Cl. 70—108.)

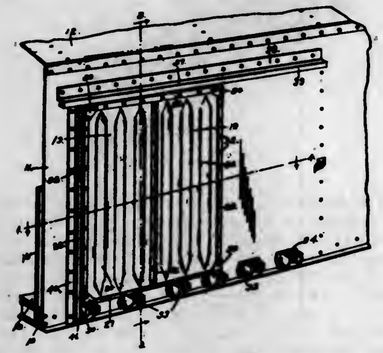


2. In combination, a housing-like lock body, a threaded locking element rotatably mounted and inclosed therein against substantial movement in its axial directions, a holding part having an end portion loosely extending into the lock body, said end portion being also threaded and being in threaded engagement with said locking element, and means within the lock body operable by a key projecting thereinto for rotating the locking element, the arrangement being such that the rotation of the locking element moves the holding element.

1,348,235. FORCED-DRAFT WATER-GRATE. HARRY F. MORRIS, Collingswood, N. J. Filed Nov. 3, 1919. Serial No. 335,295. 2 Claims. (Cl. 122—371.)

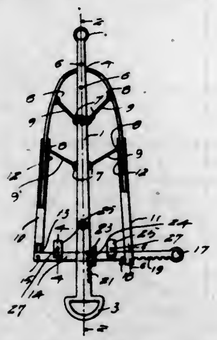
1. The combination in a water grate having a continuous circulation of water therethrough and having cored openings therein, of an air chamber, means for admitting air from said chamber to said openings, disks, tapering in form and having openings therein adapted to be positioned in the said grate openings to regulate the volume of air to be admitted to said grate, grooves provided in the body of said grate, disks, having openings therein, adapted to be positioned in said grooves and air communications between the various disks whereby the volume of air to be admitted to said grate may be increased.

1,348,236. SYSTEM FOR CHARGING STORAGE BATTERIES. THOMAS L. MOUNT, New York, N. Y. Filed June 19, 1918. Serial No. 240,824. 15 Claims. (Cl. 171—313.)



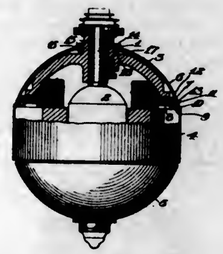
1. In a system of the character described, the combination of a generator, a storage battery, circuit connections between the generator and the battery, a regulator for said generator provided with a main series winding in the charging circuit and a second series winding wound to assist said main series winding but which is normally ineffective, and means for rendering said second series winding effective in conjunction with said main series winding to regulate the generator when the battery reaches a predetermined condition of charge.

11. In a system of the character described, the combination of a generator, a storage battery, circuit connections between the generator and the battery, a regulator for



said generator provided with a main series winding in the charging circuit, and a second series winding wound to assist said main series winding, a switch adapted to establish a short circuit about said second series winding to render the same ineffective while the battery is being charged, a coil for controlling said switch, means for causing said controlling coil to be energized to open said switch and render said second series winding effective in conjunction with said main series winding to regulate the generator when the battery reaches a predetermined condition of charge, and a second coil associated with said switch and connected in series with said second series winding for holding said switch open while said second series winding is effective in regulating the generator.

1,348,237. RAILWAY-CAR-DOOR CONSTRUCTION. CLINTON C. MURPHY, Chicago, Ill.; Edna Blanke Murphy, executrix of said Clinton C. Murphy, deceased, assignor to Walter P. Murphy, New York, N. Y. Filed Aug. 11, 1916. Serial No. 114,396. 4 Claims. (Cl. 20—22.)

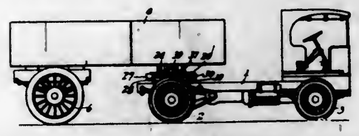


1. A railway box car comprising, in combination, Z-bar members at the upper, lower and forward edges of the door, the first named member having an additional outwardly extending web along its upper edge, and a channel member at the rear edge of the door, corner devices for fastening said members together to constitute a rigid frame, and a sheet metal panel composed of a single thickness of metal secured to said framework and formed with substantially parallel corrugations which terminate within the edges of the panel so as to rigidify the same.

1,348,238. FUR-STRETCHER. DAVID E. PAYNE, Magnolia, Minn. Filed May 7, 1919. Serial No. 295,298. 6 Claims. (Cl. 149—21.)

6. A fur spreader of the class described including a central bar, a frame connected with the central bar, links connecting the central bar with the frame and arranged to spread the said frame, a spreader bar connected with the central bar and with the sides of the frame, said spreader bar being provided with slots, approximately U-shaped clamps operating in the slots for engaging the fur and provided with adjusting means for maintaining them in such engagement.

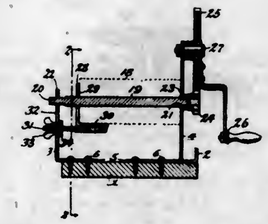
1,348,239. ELECTRIC MOTOR. OSCAR H. PIEPER and ALPHONSE F. PIEPER, Rochester, N. Y. Original application filed May 27, 1912, Serial No. 699,938. Divided and this application filed Nov. 12, 1917. Serial No. 201,546. 3 Claims. (Cl. 172—36.)



1. The combination with an electric motor casing, of an annular supporting flange fixed to the casing, a ring of resilient material arranged on said supporting flange, a cover section carrying an inwardly projecting flange which rests on said ring of resilient material, and a retaining ring threaded on the casing for holding the cover in position and clamping said ring of resilient material between said flanges.

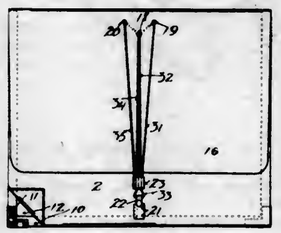
1,348,240. PULLEY-GUARD. OSCAR H. PIEPER and ALPHONSE F. PIEPER, Rochester, N. Y. Filed May 21, 1919. Serial No. 298,754. 8 Claims. (Cl. 74—51.)

1. The combination with a support and a rotatable pulley thereon, of an adjustable pulley guard pivotally carried by said support for a swinging movement into and out of proximity with said pulley, a belt retaining portion on said guard and parts on said guard embracing said support in frictional engagement therewith to retain said guard as adjusted in operative or inoperative relation to said pulley.



1,348,241. MOTOR-VEHICLE. JACOB H. PASS, Chicago, Ill. Filed Nov. 12, 1915. Serial No. 61,098. 2 Claims. (Cl. 280—33.1.)

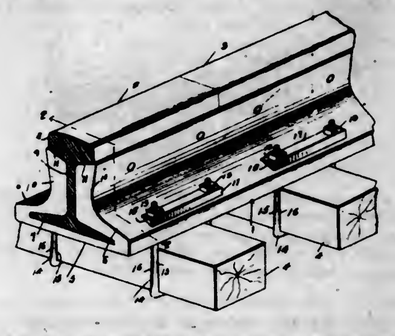
1. The combination of a motor driven vehicle comprising a frame, front and rear axles, front and rear supporting wheels and suspension springs connected with the rear axle and frame, a trailer including a frame and means for carrying the rear end portion thereof, and



means for yieldably and pivotally supporting the forward portion of the trailer upon the rear axle of the vehicle independently of the vehicle frame and springs, said last mentioned means comprising auxiliary leaf springs disposed longitudinally of the vehicle frame and pivotally connected with the rear axle of the vehicle to rock in a vertical plane longitudinally of the vehicle frame, and bearings for said auxiliary springs carried by the means for securing the vehicle springs to the rear axle of the vehicle.

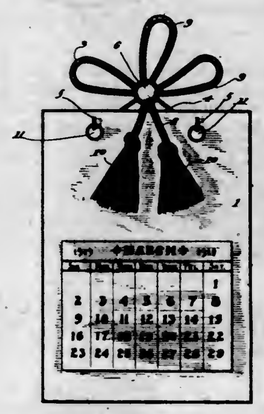
1,348,242. REWINDING-MACHINE. ADAM ROSS, Buffalo, N. Y. Filed July 8, 1919. Serial No. 309,377. 3 Claims. (Cl. 242—76.)

3. A rewinding machine comprising a rewinding shaft, a standard having a bearing in which one end of said shaft is journaled and also provided with a vertical slot, a gage adapted to be engaged by the periphery of the roll which is to be wound on said shaft, an end guide connected with said gage and provided with an upright slot which receives said shaft, a screw shank carrying said gage and guide and passing through said slot, and clamping screws arranged on said shank and engaging with opposite sides of said standard.



1,348,243. ENVELOP. GEORGE ROTTMAN, New York, N. Y. Filed Apr. 23, 1917. Serial No. 163,774. 3 Claims. (Cl. 229—77.)

1. An article of the class described comprising an envelop having a flap, and closing means therefor, said closing means comprising a flexible band, means for engaging the band at spaced positions on the envelop and flap whereby the band will extend across the edge of the flap to hold the flap closed, and slidable means associated with the band for shortening or lengthening the latter between said engaging means for the purpose set forth, said sliding means having coöperating portions which impinge the band between them to resist the movement of the sliding member on the band.



1,348,244. RAIL-JOINT. JOHN SHEPARD, Pittsburgh, Pa. Filed Feb. 28, 1919. Serial No. 279,685. 1 Claim. (Cl. 238—205.)

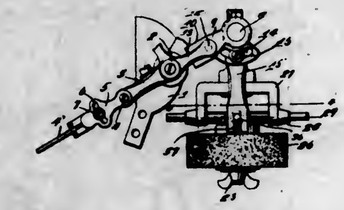
In a device of the class described, the combination with a pair of rail sections and supporting ties therefor, of a rail chair arranged to receive the meeting terminals of the rail sections, flanges formed on the rail chair and arranged to conform to the configuration of the rail sections and to snugly receive the same, said chair having a pair of spaced apertures formed therein, U-shaped bolts embracing the ties and having the terminals thereof extended through the apertures, said terminals being tapered from the intermediate portions of the bolts toward their ends, longitudinally extending plates extending from one

bolt to the other and having apertures formed therein and arranged to receive the terminals of the bolts, the lower surfaces of the plates being beveled to bear snugly upon the upper surface of the chair and the upper surfaces of the plates being level to provide holding surfaces, and nuts fitted on the free ends of the bolts to hold the same against displacement.

1,348,245. CALENDAR-HANGER AND THE LIKE. PHILIP SIEWENIE, Chicago, Ill. Filed Apr. 9, 1919. Serial No. 288,728. 5 Claims. (Cl. 40—107.)

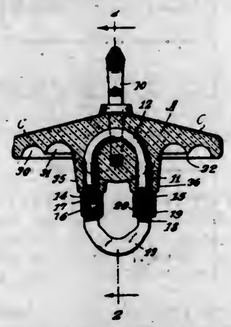
1. A hanger comprising a member provided with an eye having arms extending therefrom, the ends of said arms being extended to form hooks, a button detachably connected to the eye, and a cord secured between the eye and button.

1,348,246. SHEET-FEEDING APPARATUS FOR PAPER-SORTING MACHINES. GEORG SPIESS, Leipzig-Reudnitz, Germany. Original application filed Dec. 28, 1915, Serial No. 69,047. Divided and this application filed Aug. 8, 1918. Serial No. 249,039. 1 Claim. (Cl. 271—76.)



In a paper sorting machine, a sheet feeding apparatus for sheets cut from a moving web, grippers, flexible members for carrying the grippers, guiding means for the gripper carriers, means for varying the speed of the flexible

members whereby spaces can be produced between successive sheets with the speed of the sheet at the place of inspection equal to the unwinding speed of the paper web, said speed varying means comprising a beveled gear on the gripper driving shaft, a driven bevel wheel of said

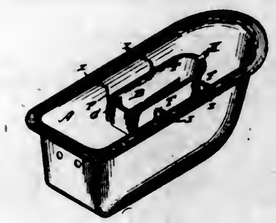


gear being mounted to rotate with the driving wheel of the drive for the flexible member on the shaft, and a transmitting bevel wheel likewise rotatable with respect to said shaft and a roller arm on a support of said wheel engaging a cam driven from said shaft.

1,348,247. BRUSH DEVICE FOR TRIMMING-MACHINES. WILLIAM J. STEERE, Rockwood, Tenn. Filed May 21, 1917, Serial No. 170,107. Renewed Dec. 13, 1919. Serial No. 344,758. 1 Claim. (Cl. 112—26.)

A brush attachment for a trimming machine, comprising a supporting bracket, a brush supporting shaft carried thereby, a swinging arm overhanging said bracket, a reciprocating bar, means for supporting said reciprocating bar, a head adjustably mounted upon said reciprocating bar, said arm engaging said head, and adapted to reciprocate said bar, as said arm is swung from side to side, a rack bar engaging said head, means for holding said rack bar in proper alinement, a pinion carried by said shaft, and engaging said rack bar, a brush secured upon said shaft, and adapted to be oscillated therewith.

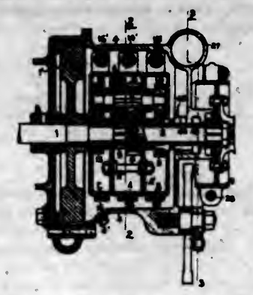
1,348,248. DISK SUSPENSION-INSULATOR. LOUIS STEINBERGER, Brooklyn, N. Y. Filed Jan. 24, 1917. Serial No. 144,109. 5 Claims. (Cl. 173—366.)



1. As an article of manufacture, a unitary structure consisting of a disk insulator provided with strain members embedded therein and projecting from opposite sides thereof, one entire side of which from the projecting strain member to the periphery of the same is provided with a continuous layer of waterproof metallic paste, the juncture between the insulating material and the layer of metallic paste being close and intimate, the path between said metallic edge and the other strain member, requiring less voltage to break it down than the path between said strain members.

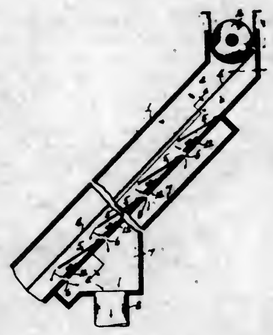
1,348,249. INSULATING-KNOB. LOUIS STEINBERGER, Brooklyn, N. Y. Filed Jan. 17, 1918. Serial No. 212,336. 5 Claims. (Cl. 178—110.)

1. An insulating knob for telegraph keys consisting of a finger portion, a shank and an insulating shield extending a material distance radially from the shank and at a point adjacent the finger portion, the said shield forming an insulated finger rest and protector for the remaining inactive fingers of the hand of the operator.



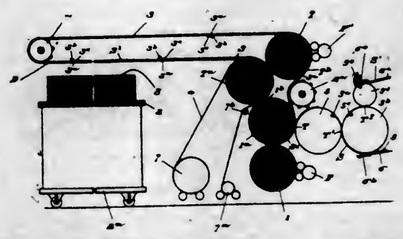
1,348,250. BATHTUB. GEORGE CANNING STRACHAN, Detroit, Mich. Filed Jan. 8, 1919. Serial No. 270,115. 1 Claim. (Cl. 4—27.)

A device of the character described, comprising a bath tub, brackets secured to the bottom of said tub, a plurality of rods extending transversely through said brackets, means for securing the rods in said brackets when adjusted, fittings secured to the outer end of said rods, vertically adjustable members extending into said fittings for supporting the tub at different altitudes upon the walls of a relatively larger tub, and means for securing said vertically adjustable members in rigid relation to the fittings when adjusted.



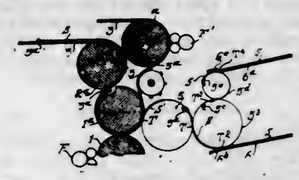
1,348,251. APPARATUS FOR CHANGE SPEED OF MOTOR-CARS. SHINKICHI TAMURA, Kobe, and MASANORI WATANABE, Tokyo, Japan; said Watanabe assignor to said Tamura. Filed Aug. 1, 1918. Serial No. 247,884. 5 Claims. (Cl. 74—34.)

1. In a variable speed gearing apparatus for motor cars, the combination with the driving and driven shafts, of a casing surrounding the meeting ends of the shafts, drums loose on the shafts, variable planetary gearings mounted in the drums and on the shafts, brake bands encircling the drums, a slidably and rotatably mounted member designed to act in conjunction with any one of these bands, spring tensioned means associated with the member for causing an application of any one of the brake bands, a brake drum on the driven shaft, a brake band surrounding the brake drum, and a lever mechanism designed to be moved a predetermined extent for acting against the



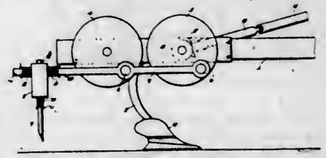
spring tensioned means to permit of an adjustment of the slidable member and to actuate the last mentioned brake band when moved beyond such predetermined extent.

1,348,252. SEPARATOR. ALEXANDER B. TODD, San Francisco, Calif. Filed Dec. 19, 1919. Serial No. 346,078. 6 Claims. (Cl. 83—54.)



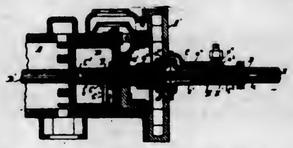
1. A separator comprising an open ended box mounted at an inclination adapted to effect the passage therethrough of the material, by gravity, said box having in its floor, an opening; a baffle plate within said box, rising from its floor in the direction of the foot of the box, the elevated lower edge of said plate lying in substantially the plane of the opening in the box floor, to effect a drop of the material over said opening; and means for producing a suction pressure outwardly through said opening to withdraw therethrough the lighter particles from the falling aggregate.

1,348,253. PRINTING-PRESS. BURT F. UPHAM, Boston, Mass., assignor to United Printing Machinery Company, Boston, Mass., a Corporation of Massachusetts. Filed Sept. 16, 1919. Serial No. 324,072. 20 Claims. (Cl. 101—231.)



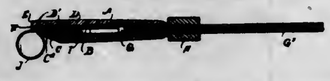
4. In a printing press, a printing couple including a plate cylinder and means coacting therewith for making an impression; and means for inking said cylinder; with means for carrying sheets between the members of the printing couple to be impressed thereby, said means also passing between the plate cylinder and the inking means.

1,348,254. SHEET-FEEDING MECHANISM. BURT FROST UPHAM, Boston, Mass., assignor to United Printing Machinery Company, Boston, Mass., a Corporation of Massachusetts. Original application filed Sept. 16, 1919, Serial No. 324,072. Divided and this application filed Jan. 27, 1920. Serial No. 354,325. 12 Claims. (Cl. 271—9.)



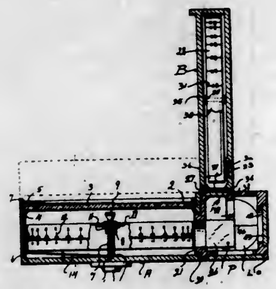
2. In combination printing mechanism; and a feed table from which the sheets are to be fed; with a gripper cylinder for removing sheets from the table; and a second gripper cylinder receiving sheets from the first cylinder and transferring same to the printing mechanism; whereby the sheets are reversely bent between the table and the printing mechanism.

1,348,255. AGRICULTURAL IMPLEMENT. JOHN VERSTEEG, St. Johns, Oreg. Filed Apr. 30, 1920. Serial No. 377,906. 3 Claims. (Cl. 97—53.)



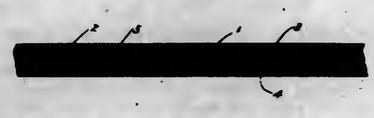
1. In combination with the plow and the means for supporting the same, of a blade for cutting the soil turned by the plow, a link upon which said blade is mounted to move longitudinally and vertically, means for cushioning the blade against the link, said means for moving the link comprising disks journaled on the plow support, the disks having eccentric journal pins on which the link is pivoted.

1,348,256. STEAM-ENGINE. FRANK L. O. WADSWORTH, Pittsburgh, Pa., assignor to Skinner Engine Company, Erie, Pa., a Corporation of Pennsylvania. Filed Dec. 12, 1916. Serial No. 136,460. 6 Claims. (Cl. 121—181.)



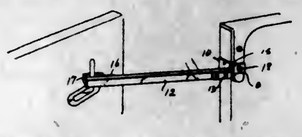
1. The combination in a steam engine, of a hollow piston, circulating mechanism including a cylinder and piston in communication with said hollow piston adapted to receive steam and cause it to circulate through said hollow piston, said cylinder having a steam inlet port adapted to be uncovered by the piston therein at the end of one stroke of the engine piston to permit steam to flow into said cylinder; means to regulate the flow of steam through said inlet port during the time it is uncovered; and means to convey steam away from said circulating mechanism, substantially as set forth.

1,348,257. COMBINATION INLAY AND ORTHODONTIA CLAMP. LOUIS P. WAGNER, Milwaukee, Wis. Filed Jan. 2, 1919. Serial No. 269,239. 3 Claims. (Cl. 32—17.)



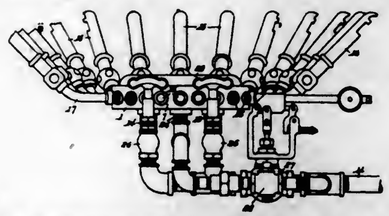
1. A beveled clamp for banding teeth, comprising the combination with an adjustable band engaging clamp, a holder adapted to receive the clamp, and provided with an open ended slot into which a band engaged by the clamp may be drawn, said holder having a beveled surface at one side, converging in the direction of the slot, and a fulcrum shoulder on the other side, substantially in a plane common to the beveled surface.

1,348,258. SURVEYING INSTRUMENT. HUGH C. WATSON, Denver, Colo. Filed Dec. 22, 1919. Serial No. 346,470. 2 Claims. (Cl. 88—23.)



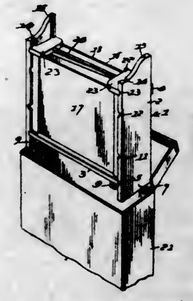
1. In an instrument of the class described, a casing, a compass rotatably mounted therein, a sight box embodying the usual sight lenses, a tubular connection between said sight box and said casing whereby said sight box is rotatably mounted with relation to said casing, said compass embodying a dial arrangement adjacent said tubular connection, means within said sight box whereby the indicia of said compass dial may be read, a casing pivotally connected to said sight box and adapted to be swung to raised and lowered position, a sight opening in said last named casing, a sight opening formed in said sight box adapted to coact with the sight opening of said last named opening when the casing is in raised position, a clinometer mounted within said last named casing and embodying a dial and means arranged within said sight box whereby the indicia of the dial of said clinometer may be read.

1,348,259. ROOFING MATERIAL AND PROCESS OF PREPARING THE SAME. HUGH L. WILBER, Kansas City, Mo., assignor to The Wilberite Roofing Company, Cleveland, Ohio, a Corporation of Ohio. Filed Oct. 14, 1916. Serial No. 125,596. 3 Claims. (Cl. 154—51.)



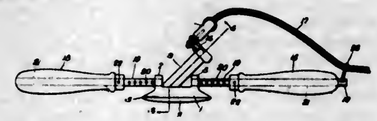
1. The process of preparing roofing material consisting of perforating a sheet of absorbent material, subjecting the treated sheet to a bath of preservative fluid and subjecting the treated sheet to a bath of bituminous material to coat the sides of the sheet and bond the side coats through the perforation of the inclosed sheet.

1,348,260. DOOR-HOLDING DEVICE FOR AUTOMOBILES. EDMOND A. BOYER, Princeton Junction, N. J. Filed July 19, 1919. Serial No. 311,937. 1 Claim. (Cl. 292—262.)



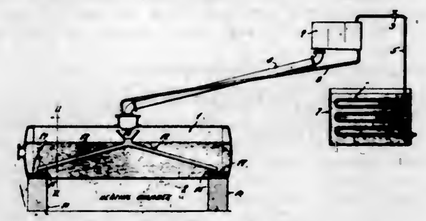
A door holding attachment for automobiles comprising an angular bracket having ears adapted to be applied to the corner of the side wall of the automobile door opening, an arm, a connecting member comprising a strip of metal secured to the side of one end portion of the arm and extending partially over the end of the arm, the end portion of said strip being beaded to provide a socket, said socket extending over the other portion of said end, a pintle for detachably pivoting said bead between the ears of the bracket, and expansible means carried by the other end of said arm for connecting said arm to a partially opened door to prevent movement of said door in either direction.

1,348,261. GAS-BURNER. CHARLES F. BRAND, Wheeling, W. Va. Filed Oct. 20, 1919. Serial No. 331,899. 7 Claims. (Cl. 158—105.)



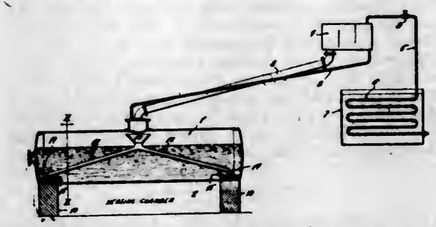
3. A multiple-burner manifold for furnaces, comprising a body having a central hub-like portion encircled by separate inclosed chambers located in superposed relation and at a suitable distance from its outer edge wall, said wall having therein a plurality of radial openings for the reception of individual burner elements, separate radially disposed passages with which said openings communicate, one or more of said passages being adapted to supply pilot burners therethrough, means for conducting gas to the last-mentioned passages, the remainder of said passages communicating at their inner ends with the upper and lower of said chambers in alternation, and separate supply passages leading to said chambers.

1,348,262. CONVERTIBLE TOY. SCOTT A. BROCKWAY, Laurel, Nebr. Filed Mar. 3, 1920. Serial No. 362,919. 8 Claims. (Cl. 45—70.)



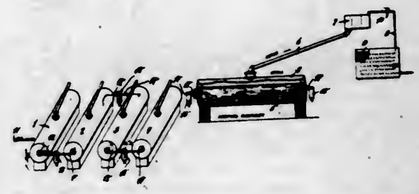
5. In a toy of the kind set forth, the combination with a container, of a knock down toy adapted to be converted into different articles of furniture, said toy comprising a plurality of furniture sections, coöperating with each other to form a second container to enter the first container, and adapted to receive certain of the other furniture sections.

1,348,263. ELECTRICALLY-HEATED SHOE-TREEING IRON. EDWIN N. CHANDLER, Braintree, Mass. Filed Nov. 23, 1915. Serial No. 62,968. 4 Claims. (Cl. 219—21.)



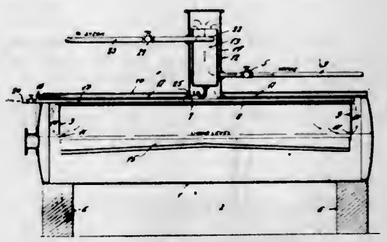
1. An electrically heated treeing iron, comprising a treeing tool, a carrier for an electric heating unit, said carrier constituting a conductor for the heat supply wires out of the way of the treeing tool and a heat insulated handle detachably secured to said tool.

1,348,264. APPARATUS FOR CRACKING HYDROCARBONS. JOHN W. COAST, Jr., Tulsa, Okla., assignor to The Process Company, a Corporation of Maryland. Filed Mar. 22, 1917. Serial No. 156,645. Renewed June 14, 1920. Serial No. 389,006. 2 Claims. (Cl. 196—3.)



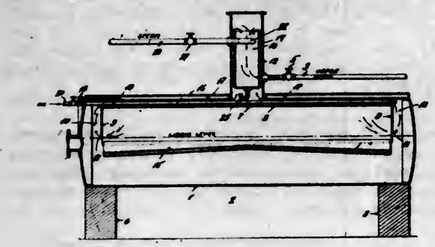
1. In an apparatus for cracking petroleum hydrocarbons, a pressure still provided with a heating chamber and a condenser, the heating chamber being below the still bottom and one end portion of said bottom being protected from the direct action of the heat of the heating chamber, means for conducting reflux condensate into the still, and a conductor for directing such reflux condensate to the protected end portion of the still bottom.

1,348,265. ART OF CRACKING HYDROCARBONS. JOHN W. COAST, Jr., Tulsa, Okla., assignor to The Process Company, a Corporation of Maryland. Filed Mar. 22, 1917. Serial No. 156,646. Renewed June 14, 1920. Serial No. 389,007. 1 Claim. (Cl. 196—25.)



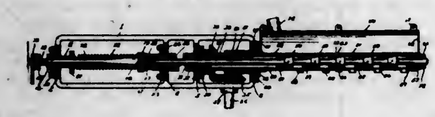
In the art of cracking petroleum hydrocarbons, the method which comprises confining such hydrocarbons in a still, transmitting heat directly to the middle portion of the still bottom, maintaining the end portions of the still bottom in a relatively cool condition, maintaining the contents of the still under pressure, conducting vapor from the still to a main condenser, also condensing the high boiling point fractions and conducting such condensate through the liquid contents of the still depositing it on the relatively cool end portions of the still bottom, preventing the relatively heavy coke-forming fractions of said condensate from circulating away from said relatively cool end portions, and permitting the lighter fractions of said condensate to circulate freely in the contents of the still.

1,348,266. ART OF CRACKING HYDROCARBONS. JOHN W. COAST, Jr., Tulsa, Okla., assignor to The Process Company, a Corporation of Maryland. Filed Mar. 27, 1917. Serial No. 157,629. Renewed June 14, 1920. Serial No. 389,008. 1 Claim. (Cl. 196—25.)



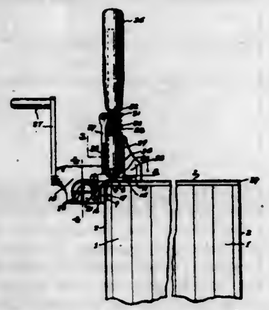
In the art of cracking hydrocarbons, the method which comprises maintaining the contents of a battery of horizontal cylindrical cracking stills under pressure, and in free communication with each other so as to equalize the pressure in the several stills, introducing the oil to be cracked into the battery of stills by conducting the oil into one of the stills and permitting it to overflow in a liquid state into the other stills, the overflowing oil being conducted from the lower portion of one still through a coke-trap and into another still so as to carry coke-forming fractions from the bottom of the overflowing still to the coke trap, and heating the bottoms of the stills to maintain the oil at a cracking temperature.

1,348,267. ART OF CRACKING HYDROCARBONS. JOHN W. COAST, Jr., Tulsa, Okla., assignor to The Process Company, a Corporation of Maryland. Filed Apr. 9, 1917. Serial No. 160,822. Renewed June 14, 1920. Serial No. 389,009. 3 Claims. (Cl. 196—25.)



1. In the art of cracking petroleum hydrocarbons, the method which comprises vaporizing a hydrocarbon liquid in a horizontal cylindrical still, maintaining the liquid and vapor under pressure, maintaining the upper portion of the still in a relatively cool condition, deflecting vapor to an end portion of the still and then along the relatively cool upper portion so as to condense the vaporized fractions having relatively high boiling points, and conducting the remaining vapor from the still to a condenser.

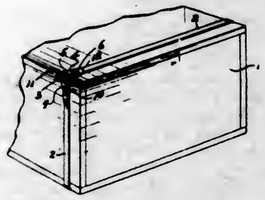
1,348,268. APPARATUS FOR CRACKING HYDROCARBONS. JOHN W. COAST, Jr., Tulsa, Okla., assignor to The Process Company, a Corporation of Maryland. Filed Apr. 16, 1917, Serial No. 162,384. Renewed June 14, 1920. Serial No. 389,010. 9 Claims. (Cl. 196—8.)



1. A cracking still having a vapor outlet, and vapor cooling means including a baffle device arranged within the still and extending from a point near one end of the still to a point near the opposite end, said baffle device being located near, and separated from, the top wall of the still to form a restricted passageway for the vapor flowing to said outlet, said baffle device being in the form of an inverted trough, closed at the top and open at the bottom to provide a vapor trap, and the lower edges of said baffle device being located below the liquid level in the still so as to prevent the vapor from flowing around said edges.

1,348,269. DISPENSING APPARATUS. CHARLES A. COSTIGAN, Oakland, Calif. Filed Mar. 17, 1917. Serial No. 155,925. 5 Claims. (Cl. 107—28.)

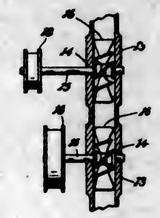
1. A dispensing apparatus comprising; an inner barrel having a plurality of openings, an outer barrel having intake and outlet openings, means for continuously rotating said inner barrel to bring the openings therein into registry successively with said intake and said outlet openings, and a plurality of pistons mounted on a common rod within said inner barrel and cam means revoluble with said inner barrel for imparting a reciprocating movement to said shaft.



1,348,270. BOX-STRAP-APPLYING MECHANISM. EMIL DIETZE, Brooklyn, N. Y. Filed Apr. 25, 1919. Serial No. 292,728. 9 Claims. (Cl. 100—15.)

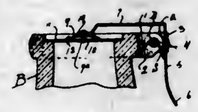
4. In a device of the kind described, a base portion having at its forward side a depending apron disposed at right angles thereto, said base portion and its apron being adapted to be engaged with a corner of a packing case or the like, said base portion having an opening therein through which a box-strap may be passed from beneath the rearward side thereof and thence above the apron, said opening being adapted to straddle a seal device connected with said box strap, a housing extending forwardly from the outer face of said apron and laterally off-set to permit said box strap to extend by the same, a transverse spindle journaled in said housing, an exteriorly projecting drum on said spindle, said drum having open diametrically disposed strap receiving slots extending inwardly thereinto from its free end, a worm gear fixed on said spindle within said housing, a longitudinal shaft mounted in said housing, a worm on said shaft operatively meshing with said worm gear, a crank-handle on the outer end of said shaft, a vertical guideway connected with said base portion and alined with said opening therein, a stamp-element slidably mounted in said guideway, spring means for normally holding said stamp-element in raised position, and a hammer device telescopically connected with the upper end of said stamp-element.

6. In a device of the kind described, the combination with a supporting frame-work of a laterally and freely projecting rotary drum having a spindle journaled in said frame-work, said drum having a diametrically disposed slot extending inwardly from the free end thereof to receive and dispose the end of a box strap at right angles to the axis of said drum whereby rotation of the latter will wind up said box strap end upon the cylindrical surface of said drum to thereby stretch the strap, a worm gear fixed on said spindle, a rotatable worm member mounted in said frame-work to mesh with said worm gear, and a crank-handle connected with said worm member for rotating the same.



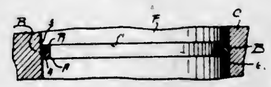
1,348,271. BOX-STRAP-FASTENING MEANS. EMIL DIETZE, Brooklyn, N. Y. Filed Jan. 27, 1920. Serial No. 354,405. 3 Claims. (Cl. 292—325.)

3. A box strap seal to be arranged with an angular edge of a box or the like, comprising a metallic member formed to provide a vertical stirrup portion having a stirrup opening through which one end of a box strap may be passed and doubled back upon itself to attach the same to said seal, an initially upwardly and forwardly inclined main body extending from the upper end of said stirrup portion, and an integral initially perpendicular fastening lug struck downwardly out of said main body, said fastening lug being substantially rectangular in shape and disposed in transversely oblique relation to said main body, and a downwardly directed sharpened spur formed in connection with the free end of said fastening lug at one side thereof, said fastening lug and its spur being adapted to be driven through the opposite end of said box strap positioned beneath said main body by flattening down the latter thereon.



1,348,272. AIR AND GAS MIXER. ALBERT W. ELLING, Latimer, Iowa. Filed Mar. 8, 1919. Serial No. 281,408. 2 Claims. (Cl. 48—180.)

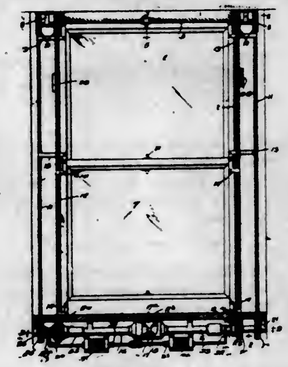
1. A device of the character described comprising a conduit having enlargements providing fan housings positioned in superposed relation, rotatable shafts extending transversely through the fan housings, fans mounted upon the shafts within the fan housings, and pulley wheels



mounted upon the outer end portions of the shafts, the pulley wheels being of different diameters for causing rotation of the shafts at different speeds.

1,348,273. BOTTLE-CLOSURE. BURT EMRICK, Jackson, Mich. Filed Dec. 29, 1919. Serial No. 347,971. 3 Claims. (Cl. 215—34.)

1. A closure for bottles comprising a split ring adapted to engage about a bottle, a handle member pivotally carried by said ring, a disk, a headed member carried by the disk, said handle member being provided with a slot through which said member is directed, and a concavo-convex plate interposed between the handle member and the disk and through which the headed member is also directed whereby said disk is pivoted for angular oscillation with relation to said foot.

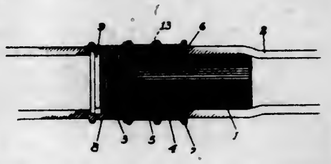


1,348,274. PISTON-RING. CONRAD H. FOLTMER, Wray, Colo. Filed Dec. 27, 1919. Serial No. 347,714. 4 Claims. (Cl. 74—109.)

1. As a new article of manufacture, a piston ring comprising two substantially concentric members, one of said members constituting a male member and the second of said members constituting a female member and being expansible, the male member being V-shape in cross section, with its inclined faces extending to the outer corners of the member to provide feather edges, the opposed face of the female member being provided with a groove substantially V-shape in cross section, with the side walls thereof extending to the outer corners of said female member to provide feather edges, the outer face of the wall member being flush with the feather edges of the female member when said members are assembled.

1,348,275. WINDOW-CONTROLLING DEVICE. EMILIO FONTQUERNI-VILA, New York, N. Y. Filed Mar. 29, 1918. Serial No. 225,599. 2 Claims. (Cl. 268—4.)

1. A device of the class described, comprising a drive shaft, a pair of drive members, a pair of stationary locking members, clutch members splined on the shaft, a rod connecting said clutch members, means normally urging said clutch members to clutching engagement with both the drive members and locking members and means for

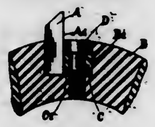


shifting said rod to disengage the clutch members from clutching relation with the locking members and with one of the drive members.

1,348,276. THREAD-CUTTER. LEWIS G. FRITZ, McCutchenville, Ohio, and ALFRED A. HERZBERGER, Indianapolis, Ind. Filed Sept. 5, 1919. Serial No. 321,786. 1 Claim. (Cl. 30—14.)

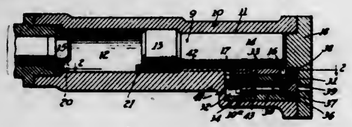
A thread cutter comprising a split ring for engaging the finger, one end of the ring having integral therewith an extension bent over upon the outer face of the ring and shaped to form a sheath, a blade held in the sheath, the sheath being cut away on the edge adjacent to the face of the ring and near the end remote from the connection with the ring to expose the cutting edge of the blade, and a support for the sheath at the cut away portion, said support having an inclined surface for guiding the thread to be cut toward the blade.

1,348,277. COUPLING. EDWARD L. GERRISH, Elk Grove, Calif. Filed Aug. 7, 1919. Serial No. 315,835. 3 Claims. (Cl. 285—13.)



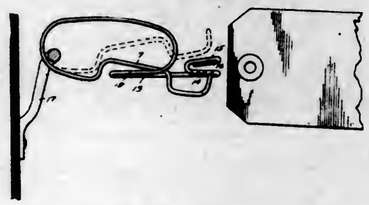
1. A hose coupling comprising a tubular sleeve adapted to be connected to the end of a hose, a threaded portion on the outer end of the sleeve of larger diameter than the same, and a collar on the sleeve threaded for a portion of its length, the collar being adapted for movement on the sleeve from behind the threaded portion thereof to a point where the threaded portion of the collar will project beyond the outer end of the sleeve.

1,348,278. PLASTIC SURFACE-COVERING. GUILFORD CRESSE GLYNN, Kansas City, Kans., assignor of one-half to P. A. Hilderbran, Kansas City, Mo. Filed Jan. 18, 1919. Serial No. 271,914. 1 Claim. (Cl. 94—23.)



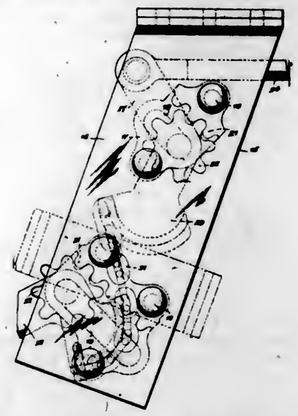
The method of making surface coverings consisting of placing a loose stone surface, filling the voids of the surface with mud, formed from colloid containing soil and bitumen, drying the mass, heating the dried mass and compacting the mass.

1,348,279. METAL-CUTTING TOOL. FREDERICK WILLIAM HEYWOOD, Prahran, Melbourne, Australia. Filed Jan. 29, 1920. Serial No. 354,826. 1 Claim. (Cl. 29—105.)



In a cutting tool, the combination of a body part, a parallel-sided cylindrical recess therein, a cutting tooth of parti-circular cross section located in said recess, a locking piece also of parti-circular cross-section, constituting a wedge and filling said recess, and a set screw extending through said locking piece and screwed into the bottom of the recess eccentrical to said recess substantially as set forth.

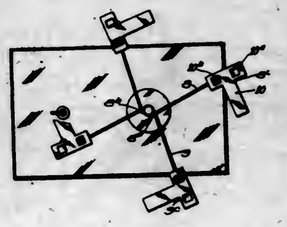
1,348,280. ROCK-DRILL OR IMPACT ENGINE. GEORGE WILLIAM HOWELL, Los Angeles, Calif. Substitute for application Serial No. 45,621, filed Aug. 15, 1915. This application filed Feb. 11, 1920. Serial No. 357,916. 4 Claims. (Cl. 121—15.)



1. In an engine mechanism, the combination of a suitable casing having a cylinder with relatively large and small bores and a valve chamber with relatively large and small bores, a reciprocating piston in the cylinder with large and small ends, a reciprocating valve in the valve chamber with large and small ends, means to conduct an initial fluid pressure to the small valve bore to press against the small end of the valve and move it forwardly, means opened by the valve when so moved to admit the initial fluid pressure to the small cylinder bore to press against the small end of the piston and move it forwardly, means opened by the piston in its forward movement to admit the fluid pressure from the said cylinder bore to the large valve bore to press against the large end of the valve to move it rearwardly to close off the supply of initial fluid pressure to the small cylinder bore, means opened by the valve when moved rearwardly to admit the fluid pressure from the small cylinder bore and from the large valve bore into the large cylinder bore to press against the large end of the piston and move it rearwardly, said last mentioned means including a port leading from the large valve bore to the large cylinder bore, means opened by the piston at the rear end of its movement to directly exhaust pressure from the large cylinder bore and thereby through the communication of the last mentioned port to exhaust pressure from the large valve bore to reduce pressure on the large end of the valve so that the initial pressure at its other end will then move it forwardly, and means including an exhaust port leading from the large valve bore and adapted to be connected with the said last mentioned port when the valve moves forwardly.

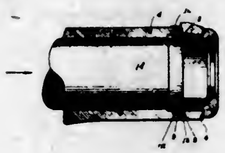
1,348,281. TAG HOLDER AND CONNECTOR. ARTHUR W. JOHNSON, La Crosse, Wis. Filed Jan. 20, 1920. Serial No. 352,698. 4 Claims. (Cl. 40—26.)

2. A device of the character described formed of a single piece of wire bent to form a handle engaging loop and bent at one extremity of the wire to form a bifurcated element and bent at the opposite extremity of the wire to form a laterally extending trigger which springs into a position where it traverses the bifurcated element, under the tension of the wire.



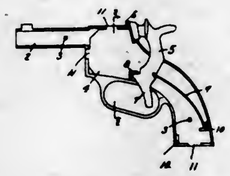
1,348,282. BRAKE APPARATUS. AUGUSTUS F. KLASING, Chicago, Ill., assignor of one-half to Frederick J. Stolpe, Chicago, Ill. Filed May 6, 1919. Serial No. 295,169. 7 Claims. (Cl. 188—24.)

6. In a device of the character described, a support, bodily movable bell-cranks having shiftable fulcrums in the support, means for shifting said bell-cranks bodily during movement on their fulcrums, and connections between said levers arranged to shift one of the levers in a direction relatively opposite to the shifting movement of the other lever.



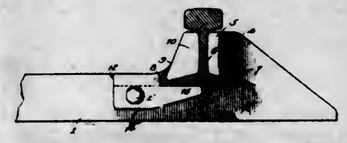
1,348,283. TOY. GEORGE J. KOEHL, San Diego, Calif. Filed Apr. 2, 1919. Serial No. 287,008. 2 Claims. (Cl. 46—59.)

1. In an apparatus of the class described, a base member, a vertical support mounted thereon, a plurality of radial arms pivotally mounted on the upper end of said support, targets pivotally mounted on said supports, means of said supports for holding said targets normally in a horizontal position but permitting them to revolve on



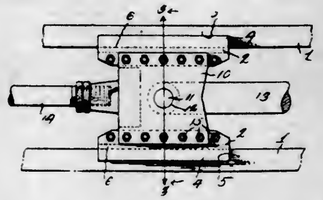
said supports in one direction, a projectile discharging device mounted in said base positioned to discharge a projectile in line with the travel of said targets.

1,348,284. SLIDE-BUSHING FOR PISTOLS. CRAWFORD C. LOOMIS, Ilion, N. Y., assignor, by mesne assignments, to Remington Arms Company, Inc., New York, N. Y., a Corporation of Delaware. Filed Dec. 4, 1919. Serial No. 342,397. 6 Claims. (Cl. 42—3.)



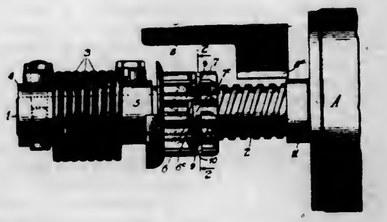
3. In firearms, an action slide formed with a substantially cylindrical passage having an annular recess spaced from the end thereof, and a bushing in said slide having an annular projection extending into said recess and secured in place thereby, said projection being formed by expanding the bushing into the recess.

1,348,285. TOY FIREARM. HERMANN G. LORENTZ, Cromwell, Conn., assignor to The J. & E. Stevens Company, Cromwell, Conn., a Corporation of Connecticut. Filed Apr. 27, 1920. Serial No. 376,902. 2 Claims. (Cl. 42—54.)



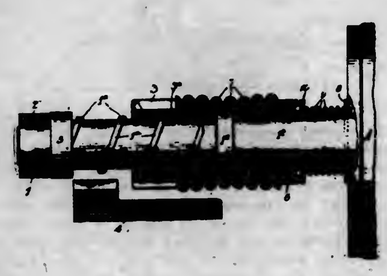
1. A toy fire arm comprising side sections each made up of a barrel part and a stock part integral with each other and stamped from sheet metal, an intermediate section between the side sections, rivets for uniting the side sections, one of the rivets extending through the intermediate section, a hammer on said intermediate section, the latter having a bearing to receive the hammer, and also having a second bearing, and a spring engaging the second bearing and the hammer, both bearings being formed from the intermediate section, the edge portions of the intermediate section engaging the side sections, the said intermediate section having lugs and the side sections being slotted to receive the lugs.

1,348,286. RAILWAY-TRACK. AMEDEO LUCHETTI, Monero, N. Mex. Filed Apr. 19, 1918. Serial No. 229,547. 4 Claims. (Cl. 238—364.)



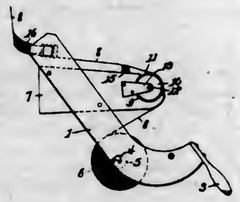
2. In a track construction of the class described the combination with a rail supporting tie provided with a relatively fixed rail engaging member, of a coöperating rail engaging member movable on said tie, a wedge portion provided on said coöperating rail engaging member, an inclined shoulder formed on said tie, a flange provided on said coöperating rail engaging member and adapted to bear upon the under side of the rail, and means located upon one side of the tie and carried by said flange for forcing the aforesaid wedge against the inclined shoulder for clamping the rail ends in position upon the tie.

1,348,287. CROSSHEAD. JOHN O. MCARTHUR, Council Bluffs, Iowa. Filed July 11, 1919. Serial No. 310,247. 2 Claims. (Cl. 74—84.)



1. A crosshead comprising a pair of shoes, each of said shoes being adapted to slidably engage a crosshead guide, said cross head guides engaging channels in said shoes, each shoe comprising two sections, liners disposed between the adjacent edges of the sections of each shoe, wrist pin plates engaging the outer faces of the sections of each shoe and bolts passing transversely through the sections of each shoe whereby liners may be removed from between the sections and placed between the wrist pin plates and the outer faces of the sections of each shoe when the shoes become worn and lateral movement develops.

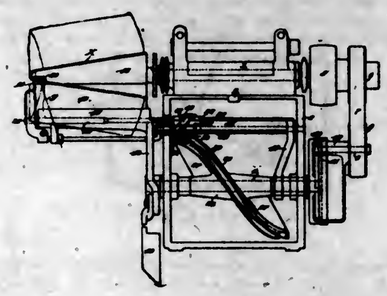
1,348,288. ENGINE-STARTER. WILLIAM L. MCGRATH, Elmira, N. Y., assignor to Eclipse Machine Company, Elmira, N. Y., a Corporation of New York. Filed Mar. 31, 1919. Serial No. 286,322. 26 Claims. (Cl. 74—7.)



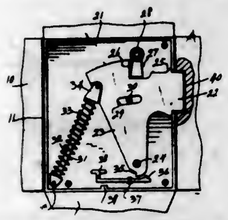
1. In an engine starter drive, means for facilitating the automatic meshing of a driving pinion with a gear of the engine to be started, including, in combination with such pinion, a pilot member located in advance thereof and having a rotarial movement independent thereof.

1,348,289. ENGINE-STARTER. WILLIAM L. MCGRATH, Elmira, N. Y., assignor to Eclipse Machine Company, Elmira, N. Y., a Corporation of New York. Filed Apr. 9, 1919. Serial No. 288,814. 14 Claims. (Cl. 74—7.)

1. An engine starter drive including a rotatable member, a driving member mounted thereon for longitudinal movement thereon and rotary movement therewith, a follower loosely mounted on the rotatable member and yieldingly connected with the driving member, and means for stopping the movement of the follower before the end of the said longitudinal movement of the driving member.



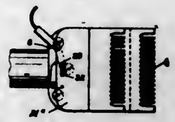
1,348,290. PAPER-HANGING DEVICE. PETER MALACOS and STEVE CANELLOS, Connellsville, Pa. Filed Nov. 1, 1919. Serial No. 334,950. 2 Claims. (Cl. 216—6.)



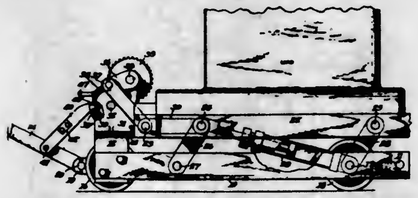
1. In a paper hanging device, a mounting for a roll of paper, a paste reservoir having an approximately flat top surface, said reservoir being disposed over said mounting, a sealing brush located over the forward end of said reservoir, said reservoir having its rear wall reëntrantly curved in semi-circular form to provide an outwardly and inwardly facing trough; said trough being provided with perforations, and a paste-applying roller rotatable in said trough and substantially conforming to the contour of the latter, said roller being so located with respect to the position of the paper roll and said brush that, in unwinding from said roll, paper is drawn over said roller and thence passes in a substantially horizontal direction over said flat surface of the reservoir to and under said brush.

1,348,291. CONE-WINDING MACHINE. GEORGE MARCROFT, Providence, R. I., assignor to Universal Winding Company, Boston, Mass., a Corporation of Massachusetts. Filed Oct. 23, 1918. Serial No. 259,344. 16 Claims. (Cl. 242—43.)

1. In a winding machine, the combination with a rotating winding-mandrel, of means to traverse the yarn on the mandrel, means for reciprocating the traversing-means, and means connecting the traversing-means with the reciprocating-means to cause the traverse of the yarn to be continuously advanced in one direction longitudinally of the mandrel whereby to progressively displace the successive layers of winding to build the package with concavo-convex ends.



1,348,292. AUTOMATICALLY-LOCKING SWITCH-STAND. LUTHER B. MARTIN, Rexford, Mont. Filed Mar. 24, 1920. Serial No. 368,302. 3 Claims. (Cl. 246—414.)



1. The combination with a switch stand having a notched table, a rotative mast, a handle member carried by the mast and rotating therewith and resting on the table, and a handle section hinged to the said member and adapted to be depressed into the notches of the table, of a lock casing carried by the handle section and having an opening in one edge wall, a body pivoted at one end in said casing and having a bolt at its end opposite the pivot and projecting through said opening, the upper end of the body being formed with a shoulder adapted to register with a keyhole whereby a key may be inserted to engage said shoulder and retract the body and bolt, a spring engaging the free end of said body and urging the bolt outward, said body having means for limiting its outward and inward movements.

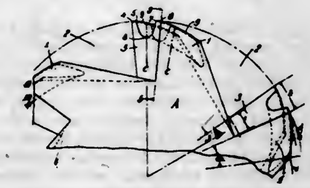
1,348,293. HAIR-CLIPPER. SOLOMON M. MILLER, Chicago, Ill. Filed July 11, 1919. Serial No. 310,242. 4 Claims. (Cl. 30—1.)

1. In a hair clipper having a pair of serrated cutting members, a serrated plate movable transversely with respect to the relative movement between said cutting members, and means for moving said last mentioned serrated plate whereby the same may be disposed in different forward and rearward positions relative to the cutting area and means for moving said last mentioned plate manually during clipping operation.

1,348,294. JACK-TRUCK. JOSEPH F. MOELLER, Chicago, Ill., assignor to Moeller Machine Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 29, 1919. Serial No. 334,179. 10 Claims. (Cl. 254—10.)

1. In a jack truck, the combination of a main frame mounted on wheels, an upper frame, parallel links connecting said main and upper frames, a handle lever pivotally connected to said main frame, a lifting pawl pivoted to said handle lever, a ratchet journaled on said main frame and coöperating with said lifting pawl, a pinion fast with said ratchet, a gear wheel actuated by said pinion, and connections from said gear wheel to said upper frame.

1,348,295. MILLING-CUTTER. FRIEDERICH MÜLLER, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 26, 1918. Serial No. 268,349. 15 Claims. (Cl. 29—103.)



1. A milling cutter for cutting a predetermined contour other than a straight line, comprising a plurality of generally longitudinal teeth each provided with a front cutting face inclined with respect to the cutter axis and having a contour adapted to cut the said predetermined contour, the outer surface of each tooth behind the inclined cutting face being relieved along lines extending backward and inward from the outer edge of the face.

1,348,296. METHOD OF MAKING MILLING-CUTTERS. FRIEDERICH MÜLLER, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 26, 1918. Serial No. 268,350. 14 Claims. (Cl. 76—101.)

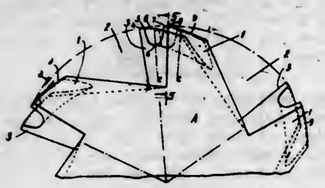
1. The herein described method of shaping a relieved milling cutter adapted to cut a predetermined contour other than a straight line and having helicoidal cutting faces inclined with respect to the axis, the method consisting in forming a preliminary cutter having at planes of intersection transverse to the lines of cutting a shape the same or approximately the same as the predetermined contour and provided with a cutting face with a degree of inclination bearing a predetermined ratio to the degree of inclination of the cutting faces of the final cutter and provided with a degree of relief bearing a ratio to the degree of relief of the teeth of the final cutter which is the inverse of the ratio between the degrees of inclination, and in forming the shape of the relieved final milling cutter from the said preliminary cutter whereby the final cutter is formed with a distorted shape at axial planes of intersection but is adapted to cut the correct contour when rotated.

1,348,297. METHOD OF MAKING MILLING-CUTTERS. FRIEDERICH MÜLLER, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Original application filed May 1, 1918, Serial No. 231,796. Divided and this application filed Dec. 26, 1918. Serial No. 268,351. 3 Claims. (Cl. 76—101.)

1. The herein described method of shaping a spirally relieved milling cutter adapted to cut a predetermined contour other than a straight line and having helicoidal cutting faces, the method consisting in forming a preliminary milling cutter having at axial planes of intersection a shape the same or approximately the same as the predetermined contour and having its teeth provided with helicoidal cutting faces with a longitudinal pitch different from the longitudinal pitch of the helicoidal cutting faces of the final cutter and provided with a degree of spiral relief different from the degree of spiral relief of the teeth of the final cutter, the ratio of the two pitches being the same as the ratio of the two degrees of reliefs, and in forming the shape of the relieved final milling cutter from the said preliminary cutter whereby the final cutter is formed with a distorted shape at axial planes intersection but is adapted to cut the correct contour when rotated.

1,348,298. METHOD OF MAKING MILLING-CUTTERS. FRIEDERICH MÜLLER, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 26, 1918. Serial No. 268,352. 6 Claims. (Cl. 76—101.)

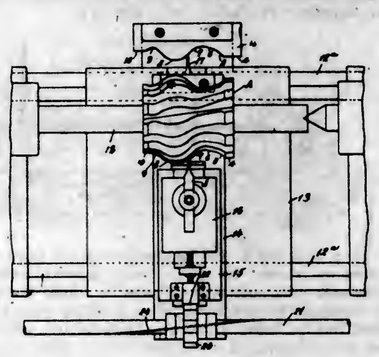
1. The herein described method of shaping a relieved milling cutter adapted to cut a predetermined contour other than a straight line and having cutting faces inclined with respect to the axis, the method consisting in forming a preliminary cutter having the correct predetermined contour at planes of intersection transverse to the lines of cutting and provided with a cutting face with a degree of inclination bearing a predetermined ratio to the degree of inclination of the cutting faces of the final cutter and provided with a degree of relief bearing a ratio to the degree of relief of the teeth of the final cutter which is the inverse of the artio between the degrees of inclination, in forming a lathe tool from the said preliminary cutter, and in cutting the relieved final milling cutter by means of the said lathe tool whereby the final



cutter is formed with a distorted shape at axial planes of intersection but is adapted to cut the correct contour when rotated.

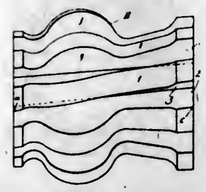
1,348,299. METHOD OF MAKING MILLING-CUTTERS. FRIEDERICH MÜLLER, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 26, 1918. Serial No. 268,353. 5 Claims. (Cl. 76—101.)

1. The herein described method of shaping a relieved milling cutter adapted to cut a predetermined contour other than a straight line and having cutting faces inclined with respect to the axis, the method consisting in forming a reciprocable preliminary tool having the correct predetermined contour at planes of intersection transverse to the lines of cutting and provided with a cutting face with a degree of inclination bearing a predetermined ratio to the degree of inclination of the cutting faces of the final cutter and provided with a degree of relief bearing a ratio to the degree of relief of the teeth of the final cutter which is the inverse of the ratio between the degrees of inclination, and in forming the shape of the relieved final milling cutter from the said reciprocable preliminary tool whereby the final cutter is formed with a distorted shape at axial planes of intersection but is adapted to cut the correct contour when rotated.



1,348,300. METHOD OF MAKING MILLING-CUTTERS. FRIEDERICH MÜLLER, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 26, 1918, Serial No. 268,354. Renewed Apr. 6, 1920. Serial No. 371,739. 6 Claims. (Cl. 76—101.)

1. The herein described method of milling a milling cutter to form spiral relief thereon, the method consisting in placing a rotating preliminary cutter in operative relation to a blank for the final cutter, in slowly rotating the blank, and in feeding the preliminary cutter in such a way that its center moves inward at a rate related to the rate of rotation of the blank but less than the corresponding decrease in radius of the spiral relief.

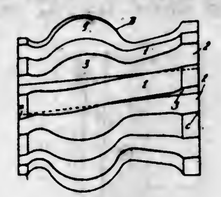


1,348,301. METHOD OF MAKING MILLING-CUTTERS. FRIEDERICH MÜLLER, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Aug. 3, 1918. Serial No. 248,190. 13 Claims. (Cl. 76—101.)

1. The herein described method of shaping a spirally relieved milling cutter having helicoidal cutting faces adapted to cut a predetermined contour other than a straight line, the method consisting in axially rotating a blank having teeth with helicoidal front faces, in providing a very narrow cutting tool in position to cut the blank, in feeding the tool from one end of the blank to the other, the amount of feed for each revolution of the blank being less than the width of the tool, in guiding the tool as it

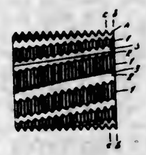
is fed to follow the said contour, and in reciprocating the tool as it is fed in timed but varying relation to the rotation of the blank to provide the required relief.

1,348,302. METHOD OF MAKING MILLING-CUTTERS. FRIEDERICH MÜLLER, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Jan. 13, 1919. Serial No. 270,941. 7 Claims. (Cl. 76—101.)



1. The herein described method of shaping a spirally relieved milling cutter having helicoidal cutting faces adapted to cut a predetermined contour other than a straight line, the method consisting in axially rotating a blank having teeth with helicoidal front faces, in providing a former having the predetermined contour of the final cutter and a companion former pin having a predetermined convex shape, in providing a cutting tool having an effective shape different from that of the former pin but related thereto in a predetermined way, and in cutting the contour of the relieved final milling cutter by means of the cutting tool, the tool being guided by the said former and former pin to develop the predetermined contour and being reciprocated in timed but varying relation to the rotation of the blank to provide the required relief.

1,348,303. METHOD OF MAKING MILLING-CUTTERS. FRIEDERICH MÜLLER, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Jan. 13, 1919. Serial No. 270,942. 3 Claims. (Cl. 76—101.)

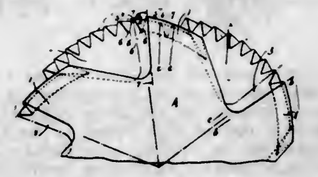


1. The herein described method of shaping a spirally relieved milling cutter having helicoidal cutting faces adapted to cut a predetermined contour other than a straight line, the method consisting in axially rotating a blank having teeth with helicoidal front faces, in providing a former having the predetermined contour of the final cutter and a companion former pin having a predetermined convex shape, in providing a preliminary milling cutter having an effective shape different from that of the former pin but related thereto in a predetermined

way, and in milling the contour of the relieved final milling cutter by means of the preliminary cutter, the cutter being guided by the said former and former pin to develop

the predetermined contour and being reciprocated in timed but varying relation to the rotation of the blank to provide the required relief.

1,348,304. THREAD-MILLING HOB. FRIEDERICH MÜLLER, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Feb. 1, 1919. Serial No. 274,529. 6 Claims. (Cl. 29—103.)



1. A milling cutter for cutting a predetermined composite contour consisting of a number of equal elemental contours arranged at uniform distances, the said cutter being provided with a plurality of generally longitudinal helical teeth each having a helicoidal front cutting face, the outer edge of each cutting face having a contour adapted to cut the said predetermined composite contour and the outer surface of each tooth behind the cutting face being relieved along lines extending backward and inward from the outer edge of the face in planes perpendicular to the axis.

1,348,305. METHOD OF MAKING THREAD-MILLING HOBS. FRIEDERICH MÜLLER, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Feb. 1, 1919. Serial No. 274,530. 10 Claims. (Cl. 76—101.)

1. The herein described method of shaping a relieved milling cutter having helicoidal cutting faces adapted to cut a predetermined composite contour consisting of a number of equal elemental contours arranged at uniform distances, the method consisting in axially rotating a blank having teeth with helicoidal cutting faces, in providing and positioning a cutter having a distorted effective contour whereby it is adapted to correctly cut one of the said elemental contours, in moving the cutter toward and from the blank axis during the cutting action in timed relation to the blank rotation to effect relieving, in moving the cutter longitudinally of the blank after the cutting action to position it for cutting another of the said elemental contours, in varying the timed relation of the relieving movements in proportion to the said longittudinal movement and in accordance with the inclination of the helicoidal cutting faces, and in repeating the said series of cutter movements until the final milling cutter has been shaped with the required number of elemental contours.

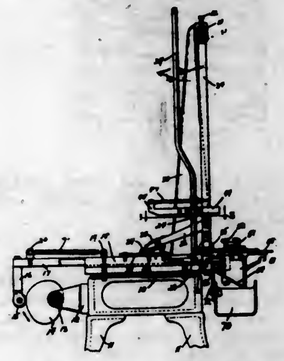
1,348,306. METHOD OF MAKING THREAD-MILLING HOBS. FRIEDERICH MÜLLER, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Feb. 1, 1919. Serial No. 274,531. 7 Claims. (Cl. 76—101.)

1. The herein described method of shaping a relieved milling cutter having helicoidal cutting faces adapted to cut a predetermined composite contour consisting of a number of equal elemental contours arranged at uniform distances, the method consisting in axially rotating a blank having teeth with helicoidal cutting faces, in providing and positioning a non-rotary lathe tool having a distorted shape whereby it is adapted to correctly cut one of the said elemental contours, in moving the tool toward and from the blank axis during the cutting action in timed relation to the blank rotation to effect relieving, in moving the tool longitudinally of the blank after the cutting action to position it for cutting another of the said elemental contours, in varying the timed relation of the relieving movements in proportion to the said longitudinal movement and in accordance with the inclination of the helicoidal cutting faces, and in repeating the said series of tool movements until the final milling cutter has been shaped with the required number of elemental contours.

1,348,307. MILLING-CUTTER. FRIEDERICH MÜLLER, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Mar. 31, 1919. Serial No. 286,521. 17 Claims. (Cl. 29—103.)

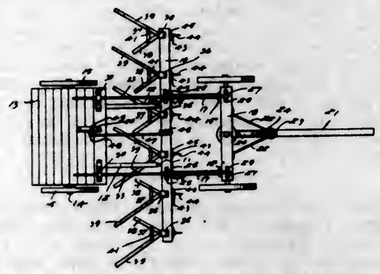
1. A milling cutter for cutting a predetermined contour other than a straight line, comprising two sets of generally longitudinal teeth provided respectively with front cutting faces oppositely inclined with respect to the cutter axis, the said cutting faces having contours adapting them to cut the said predetermined contour and the outer surfaces of the teeth behind the inclined cutting faces being relieved along lines extending backward and inward from the outer edges of the faces to provide an effective contour behind each cutting face which is the same at successive surfaces of intersection inclined similarly to the initial cutting face, whereby the cutter may be ground on the inclined faces without changing the effective contour.

1,348,308. METHOD OF MAKING MILLING-CUTTERS. FRIEDRICH MÜLLER, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Mar. 31, 1919. Serial No. 286,522. 10 Claims. (Cl. 76—101.)



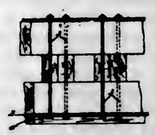
1. The herein described method of shaping a relieved milling cutter adapted to cut a predetermined contour other than a straight line and having different cutting faces oppositely inclined with respect to the axis, the method consisting in forming a preliminary cutting means having at planes of intersection transverse to the lines of cutting a shape the same or approximately the same as the predetermined contour, the said preliminary cutting means being provided with oppositely inclined cutting faces each having a degree of inclination bearing a predetermined ratio to the degree of inclination of the cutting faces of the final cutter and being provided with a degree of relief bearing a ratio to the degree of relief of the teeth of the final cutter which is the inverse of the ratio between the degrees of inclination, and in forming the shape of the relieved final milling cutter from the said preliminary cutting means whereby the final cutter is formed with distorted shapes at axial planes of intersection back of the respective oppositely inclined cutting faces but is adapted to cut the correct contour when rotated.

1,348,309. METHOD OF MAKING MILLING-CUTTERS. FRIEDRAICH MÜLLER, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Mar. 31, 1919. Serial No. 286,523. 7 Claims. (Cl. 76—101.)



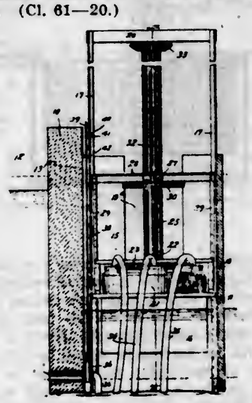
1. The herein described method of shaping a relieved milling cutter adapted to cut a predetermined contour other than a straight line and having different cutting faces oppositely inclined with respect to the axis, the method consisting in forming a preliminary rotary milling means having at planes of intersection transverse to the lines of cutting a shape the same or approximately the same as the predetermined contour, the said preliminary milling means being provided with oppositely inclined cutting faces having a degree of inclination bearing a predetermined ratio to the degree of inclination of the cutting faces of the final cutter and being provided with a degree of relief bearing a ratio to the degree of relief of the teeth of the final cutter which is the inverse of the ratio between the degrees of inclination, and in milling the relieved final milling cutter with the said preliminary milling means whereby the final cutter is formed with distorted shapes at axial planes of intersection back of the respective oppositely inclined cutting faces but is adapted to cut the correct contour when rotated.

1,348,310. GAGING OR ASSORTING MACHINE. SAMUEL A. NORTH, Bridgeport, Conn., assignor, by mesne assignments, to Remington Arms Company, Inc., New York, N. Y., a Corporation of Delaware. Filed May 27, 1919. Serial No. 300,119. 15 Claims. (Cl. 83—92.)



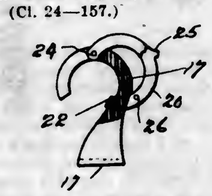
1. In a gaging and assorting machine, a substantially plane surface, a relatively long arm pivoted at one end with its other end normally adjacent said surface and with the arm substantially perpendicular thereto, and means for forcing the body to be gaged over said surface and under said lever, whereby said lever is swung forwardly a distance varying with the length of said body.

1,348,311. FOUR-WHEEL-TRUCK WEEDER. HENRY C. ODENRIDER, Wilbur, Wash. Filed Oct. 1, 1919. Serial No. 327,619. 6 Claims. (Cl. 97—34.)



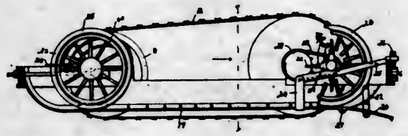
1. A weeding machine comprising a transverse beam, a front truck, links connecting the front truck to the beam, a rear truck, members attached to the rear truck and swingingly connected to the beam at the rear thereof, ground working implements attached to the beam and vertically movable therewith, and means pivotally mounted on one of said trucks and adjustably engaging the other truck for raising or lowering the beam.

1,348,312. REINFORCEMENT FOR WOODEN KEELS AND KEELSONS. RIOHEI OGAWA, Tokyo, Japan. Filed Oct. 9, 1919. Serial No. 329,578. 3 Claims. (Cl. 114—83.)



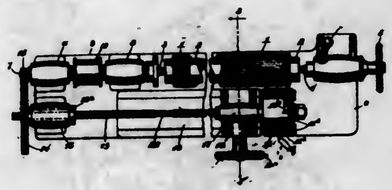
1. A reinforcement for wooden keels and keelsons including metallic plates secured to the upper surface of the keelson and the under surface of the keel.

1,348,313. SYSTEM FOR DEVELOPING POWER BY TIDAL MOVEMENT. VINCENZO PASSANO, Isola Siri Superiore, Italy, assignor of one-half to P. Di Milia, Boston, Mass. Filed Dec. 20, 1919. Serial No. 346,274. 3 Claims. (Cl. 61—20.)



1. A system for developing power by tidal movement, comprising a reservoir into which water flows with the rising tide, means for retaining the water therein during ebb tide, a float-supported fluid motor exterior of said reservoir and adapted to rise and fall with the tide, and flexible tubular means for conducting water from the reservoir to said motor, said means being fixed at one end to and in communication with the reservoir, and at the other end connected with said motor and adapted to rise and fall with the latter.

1,348,314. SAFETY-CATCH. LOUIS A. PAGE, Providence, R. I., assignor of one-half to Edwin B. Evans, Providence, R. I. Filed May 14, 1920. Serial No. 381,268. 4 Claims. (Cl. 24—157.)

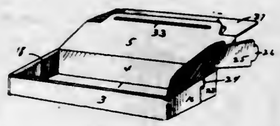


3. A safety catch comprising two hook-shaped arms folded closely together to form a hook-shaped central body member, a gate member having a pair of arms straddling said body and pivoted thereto to swing and close the mouth of said hook, and a crossbar connecting the swinging ends of said arms arranged to engage the body portion and limit their opening swinging motion.

1,348,315. TRACTOR. CHARLES H. PECK, Philadelphia, Pa. Filed Mar. 15, 1919. Serial No. 282,843. 4 Claims. (Cl. 180—9.1.)

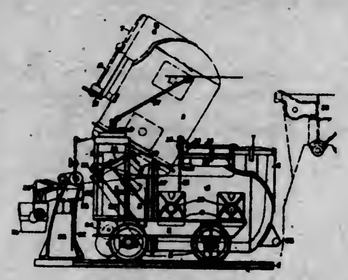
1. In a tractor, two crawler units, bars for adjustably securing the units together, a track rigidly secured to the inside of each of the units, inclines pivoted to each of the crawler units in such manner that the inner ends of said inclines will register with the rear ends of the tracks when the outer ends of said inclines are lowered, and toggle levers for locking the inclines in their operative positions.

1,348,316. MEANS FOR CUTTING RINGS AND WASHERS FROM RUBBER TUBING. JOSEPH E. PERRAULT, Watertown, Mass., assignor to Hood Rubber Company, Watertown, Mass., a Corporation of Massachusetts. Filed Oct. 9, 1919. Serial No. 329,486. 10 Claims. (Cl. 164—69.)



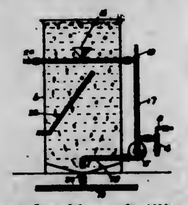
1. In combination, a support for a tube or roll of material with means for rotating it, and a juxtaposed cutter head having a plurality of spirally arranged knives with means for continuously rotating said cutter head to cause said knives to gradually and successively enter and leave the tube or roll.

1,348,317. CLOSURE FOR CANS AND CONDUIT-BUSHINGS. VICTOR E. RANDALL, Battle Creek, Mich. Filed Nov. 18, 1919. Serial No. 338,988. 4 Claims. (Cl. 220—42.)



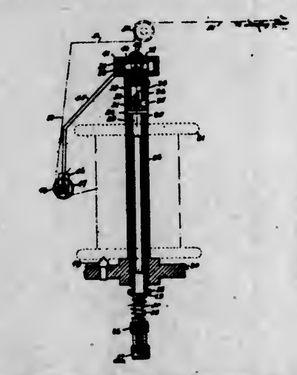
2. In a device of the class set forth, the combination with the nozzle or neck of a container, of a cover comprising a dished bottom the side walls of which impinge the inner surface of said nozzle or neck, and formed with an outwardly burred rim seated on said nozzle or neck and having its edge turned inwardly and upwardly to overhang said dished bottom.

1,348,318. DISPLAY AND DISPENSING PACKAGE. PERCY REEVES, Chicago, Ill. Filed July 29, 1918. Serial No. 247,087. 3 Claims. (Cl. 206—44.)



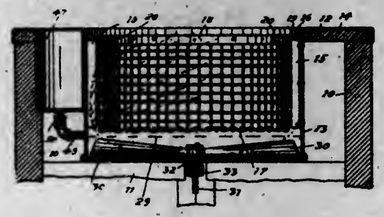
1. A container comprising a blank consisting of a single sheet of material cut and scored and folded to provide a bottom wall, a front wall, two side walls, a rear wall and a cover, the front and side walls consisting of double thicknesses of material and the front and rear walls equipped at their side edges with integral tongues provided with interengaging formations and engaged with each other and lying in the hollow spaces of the end walls whereby the front, rear and end walls are firmly held in proper position relatively to the bottom wall, tongues projecting from the rear ends of the end walls, a slot in the cover, and a cover-supporting member adapted to engage in the slot in the cover and with slots in which said last-named tongues are adapted to engage for firmly securing said supporting member in place and firmly holding said cover in open position.

1,348,319. METAL-TRANSFER CAR. EDGAR J. REILLY, Youngstown, and ALFRED C. NELSON, Lakewood, Ohio, assignors to The William B. Pollock Company, Youngstown, Ohio, a Corporation of Ohio. Filed Apr. 14, 1920. Serial No. 373,935. 7 Claims. (Cl. 105—272.)



1. A hot metal transfer device, comprising a support, and a container mounted on said support to tilt upwardly and forwardly in the direction of the longitudinal axis of the container, said container having a filling opening at its rear end, and a delivery opening at its forward end, substantially as described.

1,348,320. METHOD OF MAKING FERTILIZER FROM CITY AND LIKE WASTE. CYRUS WM. RICE, Philadelphia, Pa., assignor to Chemo-Mechanical Water Improvement Company, Philadelphia, Pa. Filed Sept. 30, 1915. Serial No. 53,445. 13 Claims. (Cl. 71—8.)

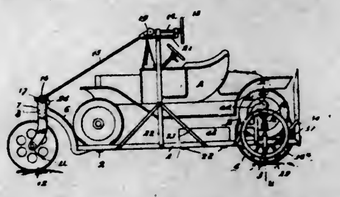


6. In the process of making a fertilizer from sewage the improved step which consists in adding muck, the product of the process to raw sewage preparatory to its treatment substantially as described.

1,348,321. UNWINDING DEVICE. SAMUEL ROGERS, Anderson, Ind., assignor to The Remy Electric Company, a Corporation of Indiana. Filed Dec. 6, 1918. Serial No. 265,484. 25 Claims. (Cl. 242—128.)

1. In an unwinding device, the combination with a rotatably mounted unwinding finger; of a friction device for retarding the free movement of the finger; and a yielding connection between said finger and the friction device.

1,348,322. DISH-WASHING MACHINE. EVEN J. ROHNE, Minneapolis, Minn., assignor to Rohne Dishwasher Company, Minneapolis, Minn. Filed Oct. 22, 1914, Serial No. 867,952. Renewed Feb. 18, 1916. Serial No. 79,197. 3 Claims. (Cl. 141—9.)



2. A dishwashing machine comprising a cylindrical tank, a plurality of vertical plates extending radially inwardly from the inner wall of the tank and having their lower ends spaced from the bottom of the tank, a reticulate receptacle for dishes removably held inside of said plates in the tank with its bottom in approximately the plane of the bottoms of the plates, and means for rotating a body of water at the bottom of the tank beneath said receptacle and plates.

1,348,323. DRESSING-TOOL. WILLIAM E. ROSS, Cleveland, Ohio, assignor to The Ross Manufacturing Company, Cleveland, Ohio, a Corporation of Ohio. Filed May 13, 1919. Serial No. 296,899. 8 Claims. (Cl. 125—37.)

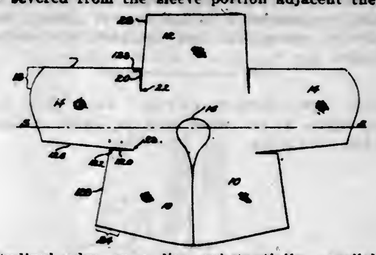
6. A dressing tool comprising, a dressing element; a rotatable spindle; a supporting member provided with spindle bearings; means for adjustably securing said spindle in said supporting member; and means for securing said dressing element to said spindle so that the same may rotate together, said means including a spindle bushing secured to and interiorly of said element and formed with a plurality of shoulders; shoulders formed upon said spindle and adapted to engage with the shoulders of said bushing; and means for securing said bushing longitudinally relatively to said bushing.

1,348,324. AUTO-DRIVEN TRACTOR. GEORGE H. SCULLY, Kansas City, Mo., assignor, by mesne assignments, to Automotive Tractor Corporation of America, Kansas City, Mo., a Corporation of Missouri. Filed Nov. 28, 1916. Serial No. 133,844. 13 Claims. (Cl. 180—1.)

1. A tractor comprising a frame for carrying a self propelled vehicle, guide and traction ground members supporting the frame, a standard rising from the frame to extend alongside the self propelled vehicle, steering mechanism connected with the tractor guide members and anchored to said standard, and means for gearing the self propelled vehicle to the tractor to drive the same.

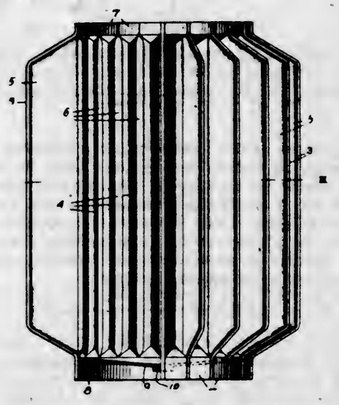
1,348,325. WELL-BORING APPARATUS. THOMAS P. SHEAN, Chicago, Ill. Filed Oct. 26, 1917. Serial No. 198,560. 17 Claims. (Cl. 255—4.)

1. In an apparatus of the class described, the combination with a support, of a head connected to said support, a motor connected to one end of said head, a cutting tool associated with said motor, and a plurality of rods connected to the other end of said head for guiding the apparatus as the same penetrates the cut, said guiding rods extending upwardly from said head and surrounding said support in spaced relation to the latter.



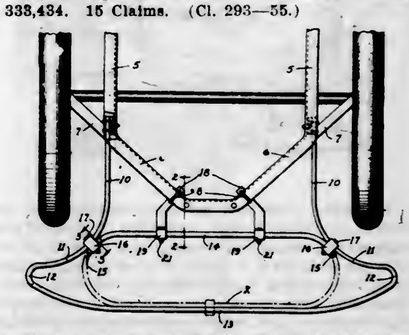
1,348,326. CHILD'S VEHICLE. MAX SKOLNIK, Minneapolis, Minn. Filed Apr. 21, 1919. Serial No. 291,544. 1 Claim. (Cl. 208—30.)

A child's vehicle comprising a main body member, wheels upon which the rear of said body member is supported, a front member, the adjacent edges of said front and body members being concaved and convexed to fit together with a closed joint, angle irons secured to the top and bottom of one of said members adjacent said joint, pins secured to the top and bottom of the other member adjacent said joint, said pins and angle irons interfitting to hinge the two members together, a flat spring located in said members for normally keeping them in alinement with each other, and a guiding wheel for supporting said front member.



1,348,327. ONE-PIECE SLEEVE AND WAIST. SARA E. SLOAN, Denver, Colo. Filed Aug. 9, 1919. Serial No. 316,323. 2 Claims. (Cl. 2—98.)

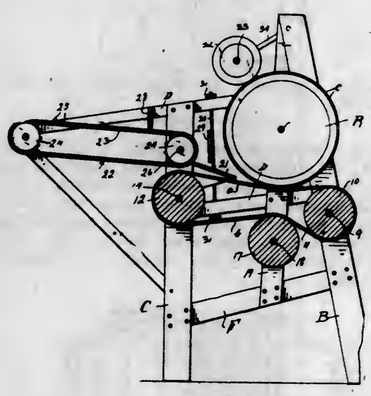
2. A one-piece sleeve and waist pattern, comprising, when lying flat, a sleeve portion having two longitudinal edges and one free end, a waist-back portion extending laterally of one of said longitudinal edges, and a waist-front portion extending laterally of the other of said longitudinal edges, said sleeve portion being partially severed from said waist-back portion adjacent one of said longitudinal edges on a line substantially perpendicular to said one edge, and the waist-front portion being partially severed from the sleeve portion adjacent the other



longitudinal edge on a line substantially parallel with said other edge.

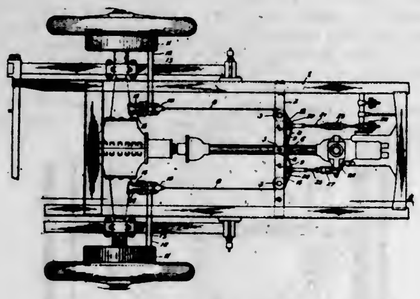
1,348,328. METHOD OF MAKING RADIATING-CASINGS. CHARLES SONNEBORN, West Pittsburg, Pa., assignor to Pressed Metal Radiator Company, a Corporation of Pennsylvania. Original application filed Sept. 21, 1917, Serial No. 192,518. Divided and this application filed Nov. 21, 1917, Serial No. 203,126. Renewed Jan. 6, 1919. Serial No. 269,927. 11 Claims. (Cl. 113—112.)

1. In the method of making radiating casings, the steps which consist in pressing unit blanks to form thereon offset edge portions extending along one of their sides and across their ends, assembling a plurality of such units with the offset edge portions of adjacent units in contact, and welding together said offset portions to form a body having hollow radiating projections.



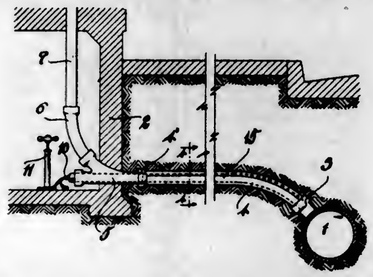
1,348,329. BUMPER FOR VEHICLES. LEWIS F. STAFFORD, Chicago, Ill. Filed Oct. 27, 1919. Serial No. 333,434. 15 Claims. (Cl. 293—55.)

9. The combination with a vehicle frame and springs, of a bumper comprising an outwardly bowed shock-re-



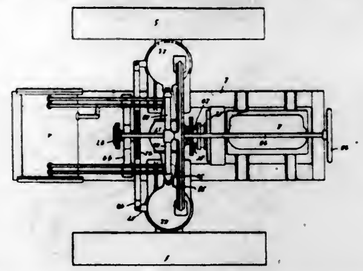
ceiving member, arms connecting said member to said vehicle frame, an oppositely bowed supplementary member slidably connected to said arms, and common devices for securing said springs and supplementary member to said frame.

1,348,330. PRINTING-MACHINE. JOHN AUG. STOLTMAN, Minto, N. D. Filed May 24, 1919. Serial No. 299,482. 3 Claims. (Cl. 101—85.)



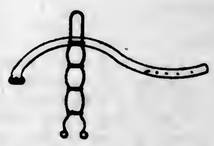
1. A machine of the class described comprising a printing member, an endless bed coacting with the printing member, means for moving said bed, an apron discharging upon the bed, a feed member discharging upon the apron, vertically adjustable rods supported at opposite sides of the apron in advance of the feed member, and a check board connected to said rods and extending across the apron and vertically spaced therefrom.

1,348,331. BRAKE MECHANISM FOR VEHICLES. MELVIN STRINGER, Cleveland, Ohio, assignor of one-fourth to George T. Bauder and one-fourth to Arthur E. Merkel, Cleveland, Ohio. Filed Jan. 9, 1920. Serial No. 350,330. 8 Claims. (Cl. 188—204.)



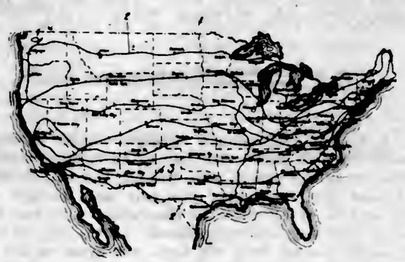
1. In a brake mechanism for motor vehicles, the combination of two brake drums; two pairs of braking members coöperating therewith, one pair to each drum; a foot-operated braking lever; a hand-operated emergency braking lever; two cables each having an end connected reapectively with both members of each end of said pairs of braking members; and means connecting said levers and cables, each of said levers being adapted to actuate its associated cable and both pairs of braking members.

1,348,332. SEWER-PIPE CONSTRUCTION. JOSEPH STREMEL, Spokane, Wash., assignor of one-half to Mrs. Eunice Asher, Spokane, Wash. Filed Nov. 5, 1919. Serial No. 335,973. 4 Claims. (Cl. 25—128.)



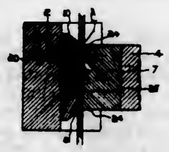
1. The method of constructing a conduit which consists in utilizing a trench with an open sheath therein, of depositing a layer of concrete material in the bottom of said sheath, of tamping same, and laying thereon a collapsible core, of depositing and tamping concrete material between said core and the side walls of said sheath and over and around the top of said core to form a unitary body, and turning the core inside out by pulling one end through the body of the core as its walls are disengaged from the interior of the conduit.

1,348,333. COMBINED LEVELING AND CUSHIONING DEVICE FOR TRACTION-ENGINES. CHARLES SWAN, Cleveland, Ohio. Filed Nov. 17, 1919. Serial No. 338,712. 13 Claims. (Cl. 180—41.)



1. In a vehicle; the combination of a frame, wheels at opposite sides thereof, a vertical cylinder at each side of the frame, a piston working in each cylinder and supported by a wheel, and means to admit fluid pressure to one cylinder and exhaust it from the other to lower and raise the pistons and wheels respectively.

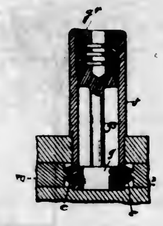
1,348,334. VEHICLE SAFETY BABY-HOLDER FOR USE WITH MOTOR-VEHICLES, BUGGIES, CARRIAGES, &c. HERVEY J. SWEYER, Circleville, Ohio. Filed July 30, 1919. Serial No. 314,580. 1 Claim. (Cl. 155—189.)



In a vehicle safety baby-holder, a piece of suitable material formed into a right angle and braced at a short distance from the free end of the upright of the angle where its outer edges are converged and clipped, then widened for a short distance, then narrowed and clipped again and so on until the free end of the other side or base of the angle has been reached; the upright of the angle having an inner and an outer concave curve.

1,348,335. GAME. HERBERT MILES THOMPSON, Foxcroft, Me. Filed Dec. 13, 1919. Serial No. 344,584. 1 Claim. (Cl. 46—21.)

Amusement apparatus comprising a game board having on one face thereof a map and having route lines indicated thereon leading from one side edge of the board to near the other side edge and traversing the principal points between said side edges and returning to the starting point over a different portion of the map, a series of continuous route lines being provided, the different route lines being of contrasting colors, and each line having at suitable intervals indicating marks dividing the route into equal divisions, sundry of the marks being of greater size than the others for the purpose of defining safety points, and sets of counters of different color for coöperating with the board.

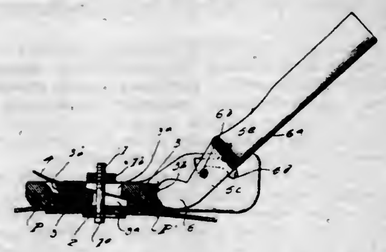


1,348,336. APPARATUS FOR THE MANUFACTURE OF LACE-TIPS. EDWIN F. TOMKINS, Coaticook, Quebec, Canada. Filed Nov. 19, 1919. Serial No. 339,098. 1 Claim. (Cl. 153—1.5.)

In a machine of the type described the combination with the machine frame and a carrier member slidably mounted thereon, of a pair of dies one being mounted upon the frame in fixed position and the other upon the carrier member and movable in unison therewith to and from the fixed die, each die having a concave matrix presenting a plurality of comparatively deep portions and shallow portions between the deep portions and at the ends thereof.

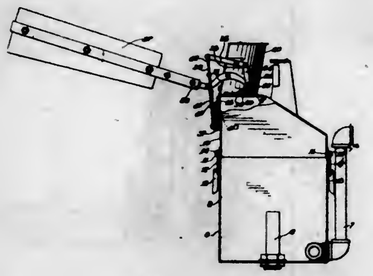
1,348,337. LOCK FOR AUTOMOBILES. CHARLES G. TROSIEN, Pontiac, Mich. Filed June 6, 1918. Serial No. 238,462. 1 Claim. (Cl. 70—126.)

In an apparatus of the kind described, a gear casing, two parallel rods adapted to reciprocate in said casing and to throw the mechanism in and out of engagement and provided with cavities on their adjacent sides, a lock casing perpendicular to the plane through the axes of said rods secured to the gear casing, an integral part adapted to rotate in said lock casing coaxial therewith, said part being formed to enter the cavities in said rods when turned to one angular position and to be withdrawn from said cavities when turned to another angular position, and means for engaging said part with said lock casing when



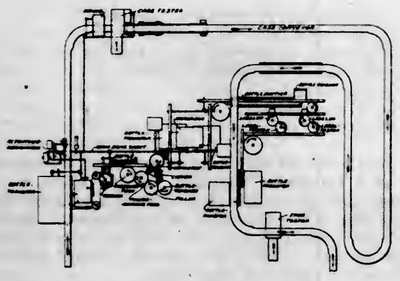
turned to the position to enter said cavities, said lock casing extending to the lower end of said rotating part to support the same, and being cut away to permit the engagement of said part with said rods for the purpose described.

1,348,338. CIRCUIT-CLOSING THERMOSTAT. JAMES N. VANDEGRIFT, Red Bank, N. J. Filed Feb. 17, 1919. Serial No. 277,434. 10 Claims. (Cl. 200—142.)



1. In a device of the character described, the combination of a cup-shaped receptacle through which the insulated wires of an electric circuit are adapted to be passed with a minor portion of the insulation on each wire within said receptacle removed, and a body of readily fusible metallic material mounted and retained above the de-insulated portions of said wires.

1,348,339. BOLTING-UP DEVICE. JAMES W. WARREN, Alexandria, Va. Filed Sept. 9, 1919. Serial No. 322,739. 15 Claims. (Cl. 29—84.)



1. A bolting up device, comprising a bolt adapted to transfix the plates to be bolted up, and having a removable member engaged therewith at one side of the plates; a member on the bolt at the opposite side of said plates; and wedge means on said bolt engaging said last mentioned member and the adjacent plate and adapted to cause the bolt to bind the plates securely together.

1,348,340. TOE-STEAMER. THEODOR J. WILLMA, Milwaukee, Wis., assignor of one-eighth to Peter Waraxa and one-eighth to John T. Willma, Milwaukee, Wis. Filed May 5, 1919. Serial No. 294,723. 8 Claims. (Cl. 12—1.)

1. In a toe steaming device, the combination, with a steam box provided with an opening, of a movable shoe rest, and a valve at the opening and operatively connected to said rest and controlling said opening.

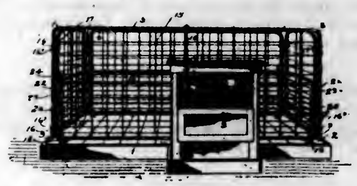
1,348,341. MACHINE FOR PACKAGING MATERIALS. ERASTUS E. WINKLEY, Lynn, Mass. Filed July 13, 1914. Serial No. 850,762. 31 Claims. (Cl. 226—1.)

1. A machine for packaging materials, comprising means for cleaning bottles, means for filling bottles, means for sealing bottles, connected mechanism constructed and arranged to cause the several means to operate automatically in timed relation, and means for performing a characteristic test upon the bottles to determine whether or not an operation preceding the testing operation has been properly performed.

2. A machine for packaging materials, comprising means for cleaning bottles, means for filling bottles, means for sealing bottles, means for sterilizing bottles, means for labeling bottles, connected mechanism constructed and arranged to cause the several means to operate automatically and in timed relation and means for detecting when the several means have functioned imperfectly.

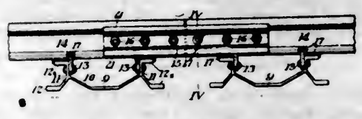
3. A machine for packaging materials, comprising means for cleaning bottles, means for filling bottles, means for sealing bottles, means for sterilizing bottles, means for labeling bottles, connected mechanism constructed and arranged to cause the several means to operate automatically and in timed relation, and means for performing a characteristic test upon the bottles to determine whether a preceding operation has been properly performed.

4. A machine for packaging liquids comprising mechanism for performing a plurality of operations successively upon bottles, and means for transferring the bottles from containers to the mechanism initially, and for transferring the bottles from the mechanism to the containers at the conclusion of the operations.



5. A machine for packaging materials comprising means for performing a plurality of operations successively upon bottles, mechanism for transferring the bottles from containers to the mechanism at the commencement of the operations and from the mechanism to the containers at the conclusion of the operations, and means for operating upon the empty containers during the performance of the operations upon the bottles.

1,348,342. WRENCH. PAUL R. ZIECHE, Moville township, Woodbury county, Iowa, assignor of one-half to Wood Haviland, Moville, Iowa. Filed Nov. 30, 1918. Serial No. 264,843. 2 Claims. (Cl. 81—131.)



1. A wrench comprising a flat-sided handle having a laterally-disposed jaw, a jaw having an opening through which the handle passes, said opening and handle being so related that the second jaw may slide toward and from, and be at all times in parallelism with the first jaw, an adjusting handle positioned on the side of said first handle remote from the jaws, and arms on the adjusting handle extending across and disposed on opposite sides of said first handle and pivoted on the movable jaw, one of said handles being toothed and the other studded for engagement with the teeth.

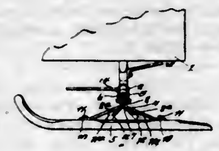
1,348,343. STOCK-RACK. CHARLES P. ZIMMERMAN, Dayton, Ohio, assignor, by mesne assignments, to The Richmond-Standard Manufacturing Company, Richmond, Ind., a Corporation of Indiana. Filed July 17, 1916. Serial No. 109,703. 3 Claims. (Cl. 119—20.)

1. In a structure of the character described, parallel side panels, and end panels detachably connecting the side panels one with another, and bifurcated supporting chairs arranged with their bifurcations alined one with another and with the side panel to be engaged therein within which the lower margins of the side panels are loosely seated, said side panels being capable of oscillatory movement within such bifurcations.

1,348,344. RAIL-TIE. GEORGE H. BARBOUR, Pittsburgh, Pa. Filed Apr. 4, 1916. Serial No. 88,817. 5 Claims. (Cl. 238—64.)

1. A metallic rail-tie, comprising a base portion having upwardly bent portions which carry spaced apart upstanding flanges, whose upper portions are bent into substantially horizontal position to form rail-bearing members, said base portion having members which extend laterally beyond said flanges to provide increased ballast-bearing surface, substantially as described.

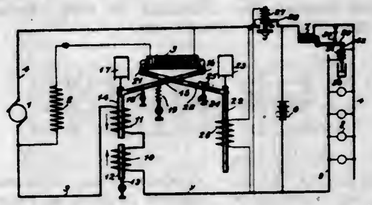
1,348,345. RAIL-JOINT. GEORGE H. BARBOUR, Pittsburgh, Pa. Filed Dec. 6, 1917. Serial No. 205,710. 4 Claims. (Cl. 238—243.)



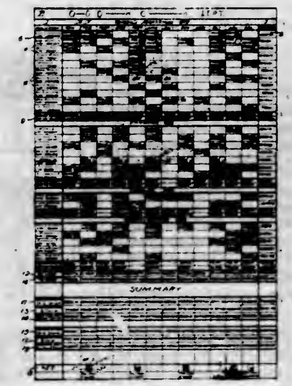
1. A joint plate or splice-bar for railway track rails, comprising a web having upper and lower projecting portions on its inner side, said portions having non-continuous rail bearing projections, substantially as described.

1,348,346. PROCESS OF WIRE-TYING BAGS. ADELMER MARCUS BATES, Chicago, Ill., assignor to Bates Valve Bag Company, Chicago, Ill., a Corporation of West Virginia. Filed Feb. 9, 1918. Serial No. 216,395. 2 Claims. (Cl. 140—93.)

1. The method of closing a bag which consists in placing a tie about its mouth, applying tension by pulling on the ends of such tie and during such tension and entirely independently of such pulling action rotating the ends by hand to tighten the tie about the bag.



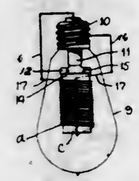
1,348,347. OSCILLATING BOB-KNEE FOR SLEIGH-RUNNERS. RICHARD BUBBRIDGE, Allison, Iowa. Filed Mar. 27, 1920. Serial No. 369,304. 2 Claims. (Cl. 280—27.)



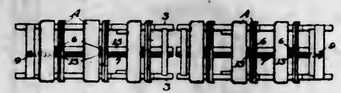
1. As a new article of manufacture, an oscillating bob knee constructed from a single piece of sheet metal rolled upon itself to form a conical sleeve for the reception of and engagement with the spindle of a vehicle axle, means for securing the opposing parts of the bob knee together at a point adjacent the sleeve, thereby reinforcing the sleeve, the other parts of the bob knee extending downwardly and diverging and forming supports, said supports being bent upon themselves to form right angle parts for reinforcing the knee, the terminals of the supports and the right angle parts terminating in forks, adapted to be secured to the upper edge and the sides of a runner.

1,348,348. ELECTRIC REGULATION. JOHN L. CREVELING, Tucson, Ariz., assignor to Gould Coupler Company, a Corporation of New York. Filed Mar. 14, 1916. Serial No. 84,183. 13 Claims. (Cl. 171—229.)

1. Means for regulating an electric circuit comprehending a regulating element affecting said circuit, operating means for affecting said element, responsive means for affecting the operating means comprising a plurality of electromagnetic means in series with each other responding to fluctuations to be regulated and coöperating to cause repulsion of the operating means to increase the regulating effect of the regulating element.

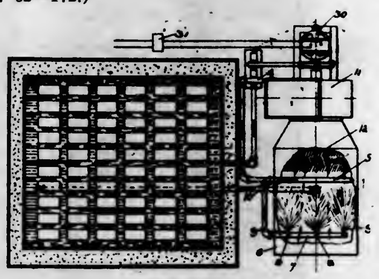


1,348,349. ADVERTISING-RECORD CHART. VICTOR L. CUNNYNGHAM, Chicago, Ill. Filed Nov. 10, 1919. Serial No. 337,099. 2 Claims. (Cl. 283—1.)



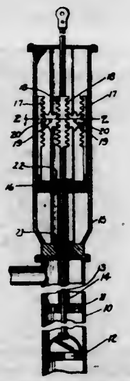
1. An advertising graphic record chart comprising geometrical indicia for the individual entries to be recorded, sub-divided into distinguishable areas, and with their different subdivisions differentiated geometrically; said indicia being arranged in inter-related groups comprising columns and lines corresponding to factors in the record to be produced, and being adapted by their collocation to develop a composite picture graphically expressing the aggregate effect of the items which they severally represent.

1,348,350. INCANDESCENT ELECTRIC LAMP. THERON DAVIS, New York, N. Y. Filed Nov. 14, 1917. Serial No. 202,048. 4 Claims. (Cl. 176—16.)



1. A lamp element for incandescent electric lamps comprising a thin flat highly refractory support formed of two thin sheets of material placed opposite each other, and a filament extending between the sheets and wound externally upon them.

1,348,351. APPARATUS FOR COATING CASTINGS. JOHN DIXON, Monaca, and JOHN M. SHAFFER, New Brighton, Pa., assignors to United States Sanitary Manufacturing Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Jan. 30, 1920. Serial No. 355,238. 6 Claims. (Cl. 91—60.)



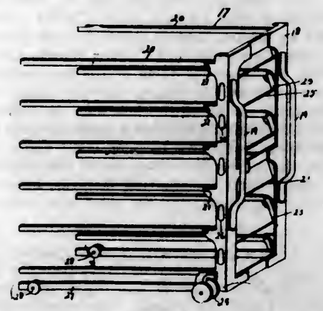
1. Apparatus for use in coating castings, comprising a supporting device having supports arranged in pairs and arranged to support two castings in oppositely inclined positions, and other supporting members arranged intermediate the supports of each pair of the first named supports and adapted to hold said castings in other positions, substantially as described.

1,348,352. METHOD OF AND APPARATUS FOR MAKING ICE. WILLIAM D. EDWARDS, Maywood, Ill., assignor of one-half to Harry W. Page, Maywood, Ill. Filed Feb. 12, 1917. Serial No. 148,053. 8 Claims. (Cl. 62—172.)

1. The method of producing ice which consists in immersing a container for water to be frozen in a brine bath, circulating the brine through a heat interchanger having a wet exterior surface, and causing cold air to flow over said heat interchanger.

1,348,353. DOUBLE-ACTION PUMP. VERLA L. FORMWAY and SAMUEL S. SLONEKER, Plainview, Tex. Filed Nov. 18, 1918. Serial No. 263,051. 1 Claim. (Cl. 103—82.)

In a device of the character described, a well tube, a tubular housing carried by the well tube, the housing having vertically extending side extensions, upper and lower valves slidably mounted in the well tube, a disk slidably mounted in the housing and having side arms extending into the side extensions of the housing to retain the disk against rotary movement, rack bars extending from the arms of the disk through the side extensions of the housing, a hollow rod extending from the disk into the well tube and engaging the upper valve, a pump rod extending from the lower valve through the hollow rod and through the housing and provided with rack teeth positioned between the racks of the disk, and rotatably mounted pinions positioned between and engaged by the racks of the pump rod and disk.

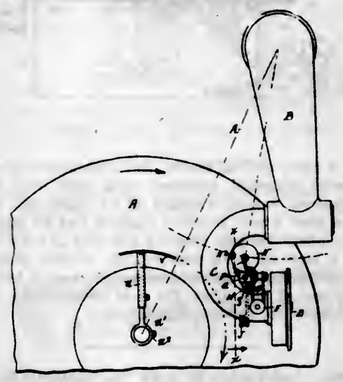


1,348,354. ICE-CAN. THOMAS W. GARNETT and FRED EMANUEL TORGLER, Topeka, Kans. Filed July 29, 1919. Serial No. 314,083. 3 Claims. (Cl. 220—4.)

1. A knock down ice mold comprising a rectangular body portion, which is divided longitudinally into two complemental U shaped sections, adapted to be nested in each other, means for detachably connecting the meeting edges of the sections to form a hollow body for the mold, a bottom plate having marginal portions constructed to receive and interlock with the edges of the body, and means for detachably securing the bottom plate to the body of the mold.

2. A knock down ice mold comprising a rectangular body portion which is divided longitudinally into two complemental U shaped sections adapted to be nested in each other, the meeting edges of the sections overlapping each other when the sections are operatively assembled, fastening members detachably connecting the overlapping edges of the sections, a bottom plate formed with a marginal channel flange receiving the lower edges of the body sections, and means for detachably securing the bottom plate to the body sections.

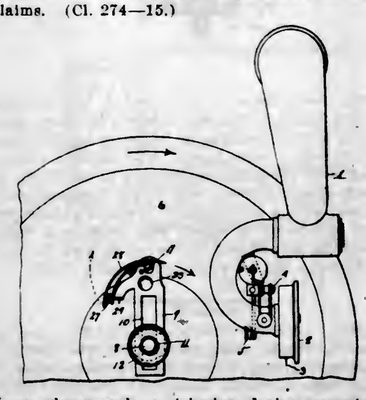
1,348,355. BAKING-OVEN AND LOADING DEVICE THEREFOR. GEORGE L. GAY, Philadelphia, Pa., assignor of one-half to FRANK WHITTMANN, Philadelphia, Pa. Filed May 17, 1919. Serial No. 297,810. 6 Claims. (Cl. 107—56.)



1. In combination with a baking oven, a loading device consisting of a frame mounted upon suitable wheels,

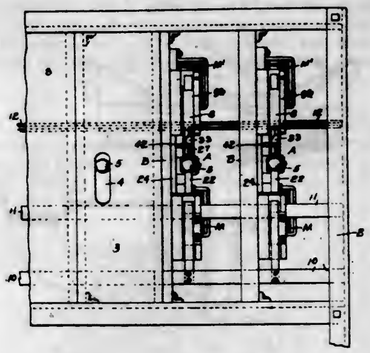
rack arms attached at their inner ends to said frame their outer ends being free, and means for raising and lowering the device.

1,348,356. PROCESS OF REDUCING TUNGSTEN ORES. DAVID J. GILES, McKeesport, Pa. Filed May 3, 1919. Serial No. 294,549. 5 Claims. (Cl. 75—17.)



5. The process of producing tungsten from impure ores of the character described, which consists in treating the ground ore with carbon at a temperature below the fusing point of the mass to thereby reduce the metal constituents, treating the reduced mass with acid to dissolve out the impurity metals, separating the solution from the solid tungsten compound, and treating said solution to recover the impurity metals therefrom.

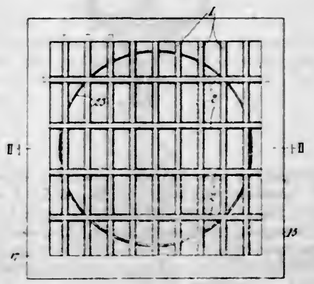
1,348,357. PHONOGRAPH. JOHN B. GRIFFIN, Maple Hill, Conn. Filed July 22, 1918. Serial No. 246,022. 13 Claims. (Cl. 274—15.)



1. In combination with a phonograph reproducer, a detachable clamp adapted to be atached to the gooseneck of a phonograph reproducer arm, a perpendicular rod carried thereby vertically movable therein, a roller carried at the lower extremity of said rod, means for automatically bringing the roller into contact with the surface of the record, means for adjusting the roller so it will travel outward on the record any desired distance, and means for automatically lifting it therefrom.

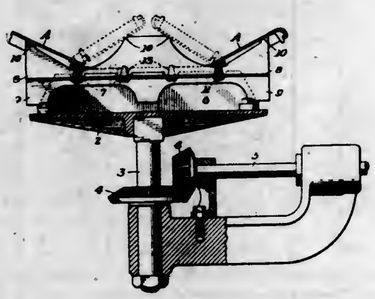
1,348,358. FLEXIBLE TRIPPING DEVICE FOR PHONOGRAPHS. JOHN B. GRIFFIN, Maple Hill, Newington, Conn. Filed Dec. 22, 1919. Serial No. 346,608. 8 Claims. (Cl. 274—15.)

1. In a phonograph, a tripping device comprising a radial arm mounted on the axle of the record for rotation therewith, a tripping head carried by said arm in such a manner as to yield outwardly therefrom.



1,348,359. AUTOMATIC-CIRCUIT-BREAKER SWITCHBOARD. JOHN P. HAYES and JOHN E. BARNHART, Pittsburgh, Pa. Filed Feb. 4, 1919. Serial No. 274,839. 10 Claims. (Cl. 175—298.)

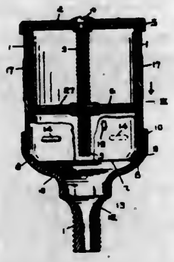
1. A circuit breaker consisting of a pivoted spring-retracted switch member having a circuit closing element and provided with a pivoted spring-actuated abutment dog, a pivoted holding and releasing trigger therefor, a compound toggle jointed lever adapted to engage and disengage the abutment dog, an operating handle therefor, and an actuating device for the releasing trigger.



9. In combination with a vertically arranged panel board and a bus bar passing transversely therethrough having a terminal adapted to be connected with an adjacent spaced terminal; a rotatable circuit breaker pivotally mounted on the face of the panel board having a retracting spring, a switch element adapted to engage said terminals, a pivoted notched abutment dog, a pivoted releasing trigger therefor, a pivoted operating handle and a toggle jointed compound lever arm therefor, an operating handle for said lever, and a magnetically actuated releasing mechanism for the lever.

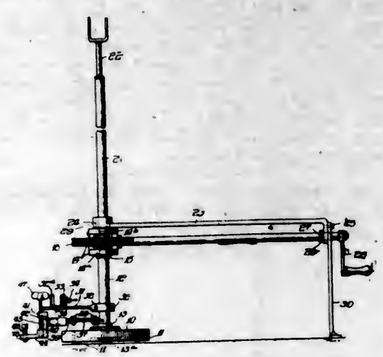
1,348,360. REGISTER OR GRILL. EDWARD DAWSON HOWELL, Springfield, N. Y., assignor to Tuttle Bailey Mfg. Co., New York, N. Y., a Corporation of New York. Filed Dec. 10, 1919. Serial No. 343,868. 14 Claims. (Cl. 98—49.)

12. A register or grill for covering openings, comprising a series of channel bars, elongated in cross section, and having a series of notches therein, and a series of cross channel bars seated in the notches in said first named series of channel bars, and a collar soldered to the under side of said cross bars and reinforcing the register.



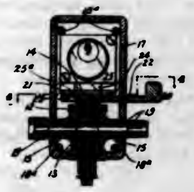
1,348,361. METHOD AND APPARATUS FOR COATING OR ENAMELING METAL. JOHN S. JOBE, Rochester, and JOHN DIXON, Monaca, Pa., assignors to United States Sanitary Manufacturing Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Dec. 10, 1919. Serial No. 343,774. 7 Claims. (Cl. 91—61.)

1. In the art of coating metal castings, the method which consists in supporting the casting to be coated in an inclined position with one of its surfaces exposed to coating operations, coating such surface, and then turning the casting into a reverse inclined position to expose its other surface without removing it from its support and coating such other surface, substantially as described.



7. Apparatus for coating castings comprising a supporting device having supports for holding a plurality of castings each in different inclined positions and to permit the castings to be turned thereon without removal from one of such positions to the other, substantially as described.

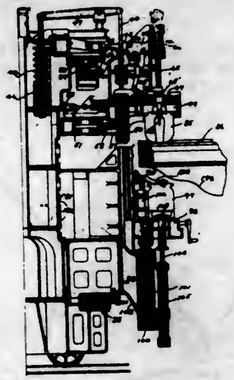
1,348,362. GREASE-CUP. ELI W. K'BURG, Toledo, Ohio. Filed Dec. 12, 1917. Serial No. 206,827. 2 Claims. (Cl. 184—38.)



1. A grease cup base having a mounting stem, a grease reservoir mountable on said base to provide a single wall grease cup, the mounting and reservoir having endless annular opposing tapering seats, there being means adjacent said seats coacting as a wedge holder between the mounting and reservoir in impinging said tapering seats against each other comprising a projection and an opposing wedge guide directly packing said mounting and reservoir at said seat against grease escape from the reservoir past said seats, a piston within the reservoir for applying grease pressure in the reservoir in the region of said seats in the expulsion of grease through the mounting stem, and means remote from the base and movable independently of the reservoir and base holding means for actuating said piston.

1,348,363. OXYACETYLENE CUTTING-MACHINE FOR CIRCULAR PLATES. FRANK KILTS and LOUIS A. PARADIS, Chicago, Ill. Filed May 5, 1919. Serial No. 294,889. 5 Claims. (Cl. 266—23.)

4. In a plate cutting device, the combination of a base, a rotatable standard mounted upon said base, a gear wheel secured to said standard at its upper end, a shaft having a gear wheel mounted thereon and in mesh with said first mentioned gear wheel, a plurality of arms for supporting a blow torch in position, one of said arms being adjustable vertically on said standard, and a holder secured to one of said arms, the said holder being capable of adjustment to various angles.

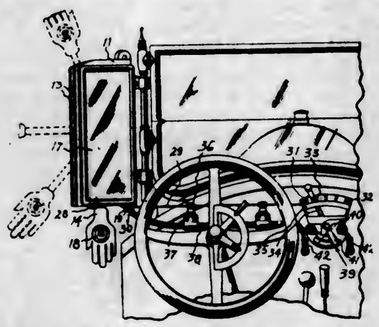


1,348,364. VALVE-LOCK FOR AUTOMOBILES AND THE LIKE. JOHN F. KOEBEL, Buffalo, N. Y. Filed Apr. 14, 1919. Serial No. 289,942. 2 Claims. (Cl. 251—6.)

2. The combination of a valve-case having oppositely-extending branches, a unitary housing inclosing said valve-case and having openings in its walls for the passage of said branches, a valve in said case having a stem, an operating lever applied to said stem and extending through the wall of said housing, and a lock arranged above said valve and having a locking bolt movable parallel with the axis of said valve to engage said lever, said valve, said lock and the part of said valve-stem between the valve and the lock being located wholly within said casing.

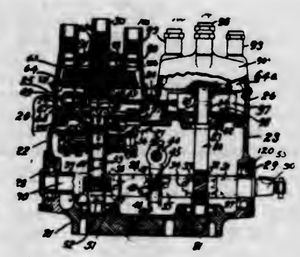
1,348,365. GLASS-FORMING MACHINE. RICHARD LA FRANCE, Toledo, Ohio, assignor to The Owens Bottle Machine Company, Toledo, Ohio, a Corporation of Ohio. Filed Sept. 4, 1917. Serial No. 189,458. 17 Claims. (Cl. 49—5.)

1. The combination with a finishing mold, of a holding device to engage an article in the mold and hold it during the opening of the mold, a piston motor, and means operated and controlled thereby to move the holding device laterally to a position over said article during a portion



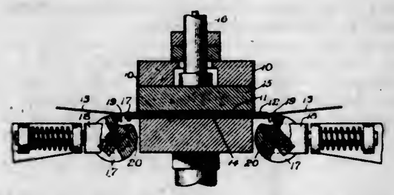
of the piston stroke and downward into engagement with said article during another portion of said stroke.

1,348,366. WRENCH. RUDOLPH LEHNHOFF, Burnham, Ill. Filed May 23, 1919. Serial No. 299,194. 5 Claims. (Cl. 81—157.)



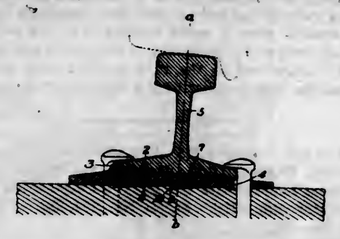
1. In a wrench of the kind described, two relatively movable members, a screw and rack connection for relatively moving members and for holding them in relatively adjusted positions, trigger means for locking the screw in the rack and for swinging the screw out of the rack, a spring resisting separation of the jaws of the wrench, and a friction member movable by said trigger for controlling the closing action of said spring.

1,348,367. AUTOMOBILE TRAFFIC-SIGNAL. SHIGERU MASUMOTO, Los Angeles, Calif. Filed Dec. 11, 1919. Serial No. 344,047. 1 Claim. (Cl. 116—51.)



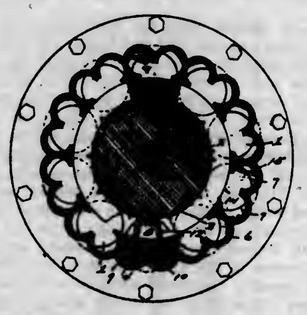
In a vehicle signal, the combination with a casing, of guide members integral with the casing, an arm pivotally mounted within the casing and adapted to swing between said guides, a signal blade disposed on the outer end of said arm, stop-pins holding the guide members in a spaced apart position and limiting the swinging movement of the arm, a pinion member integral with and forming the inner end of the arm, a train of gears mounted within the casing and adapted to operate the pinion member, a rack member to operate the train of gears and disposed longitudinally within the casing, a pin extending transversely within the casing, a pulley at the top of the casing, a coil spring having one end connected to one of the transverse pins, a cable passing over the pulley and having one extremity connected to the spring and the other extremity connected to the rack member, and means for operating the rack member with a reciprocating movement.

1,348,368. IGNITION APPARATUS. WILLIAM H. MOONEY, Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company, a Corporation of Ohio. Filed Mar. 23, 1918. Serial No. 224,299. 13 Claims. (Cl. 200—22.)



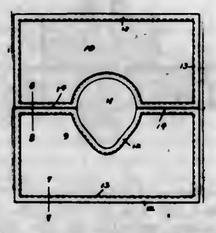
10. In an ignition unit, the combination of a housing having a base and side and end walls, and a bridge member located above the base and connecting the side walls, and a top wall provided with apertures surrounded by flanges for supporting certain of an interchangeable set of distributer heads; a driving shaft supported by the end walls; a plurality of driven shafts geared to the driving shaft and having bearings in the base; bearing plates supported by the end walls and the bridge member, and carrying other bearings for the driven shafts, said bearing plates and bridge member forming a partition dividing the housing into chambers; controlling devices for the driving mechanism located in the lower chamber; ignition timing devices located in the upper chamber, including movable members operably associated with one of the driven shafts and rotors actuated by the driven shafts adapted to cooperate with distributer heads mounted on the housing.

1,348,369. EXTENSION-BOTTOM-BOX-WRAPPING APPARATUS. ALFRED J. MORRISON, Denver, Colo., assignor to Stokes & Smith Company, Summerdale, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Sept. 26, 1919. Serial No. 326,508. 7 Claims. (Cl. 93—54.)



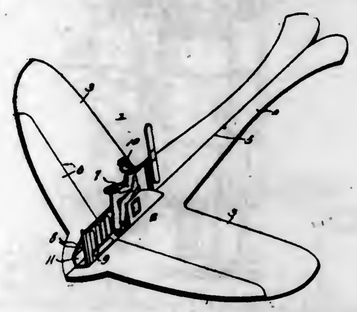
1. In a machine for wrapping extension bottom boxes adapted to pass the box, bottom first, through wrapping mechanism, means operated by the passage of the box to apply the wrapper to the upper face of the extension edge of the box bottom by substantially rolling pressure.

1,348,370. TIE-PLATE. ANDREW MORRISON, Pittsburgh, Pa., assignor to Dilworth-Porter & Company, Incorporated, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed June 11, 1920. Serial No. 388,105. 3 Claims. (Cl. 238—298.)



1. A tie-plate for railway rails having an upper rail seat normal to the line of thrust of the standard coned tread car-wheel and having a series of wide lower bearing surfaces upwardly and inwardly inclined at an oblique angle to the rail seat, said upwardly inclined surfaces being connected by abruptly upwardly and outwardly extending surfaces, said surfaces being gradually merged into each other by convex rounded portions forming anti-cutting edges, substantially as described.

1,348,371. GUIDEWAY AND SLIDING MEMBER THEREFOR. PETER W. MURPHY, Detroit, Mich., assignor to The Murphy Engineering Company, Detroit, Mich., a Corporation of Michigan. Filed May 27, 1918. Serial No. 236,754. 4 Claims. (Cl. 74—85.)

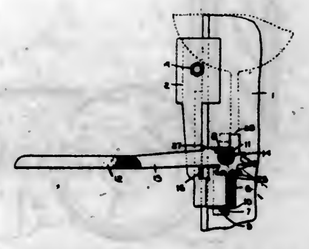


1. A piston rod supporting slide and guideway therefor comprising a slidable member having two connected cylindrical portions with a central depression between them, and a slideway comprising two semicircular grooves adapted to fit said cylindrical portions and having a central portion which extends into said central depression between the cylindrical portions of the slide.

1,348,372. INFANT'S TOILET-SEAT. FRANK M. OAKES, Sioux City, Iowa. Filed Apr. 22, 1919. Serial No. 291,921. 2 Claims. (Cl. 4—18.)

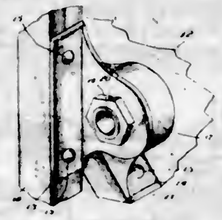
1. A toilet seat comprising a board having an opening and adapted to be mounted on the usual toilet seat, and elastic straps having their end portions secured to the board whereby the usual seat may be positioned between the board and the straps.

1,348,373. TOY AEROPLANE. PERCY PIRACE, Dayton, Ohio. Filed Mar. 6, 1919. Serial No. 280,897. 4 Claims. (Cl. 244—12.)



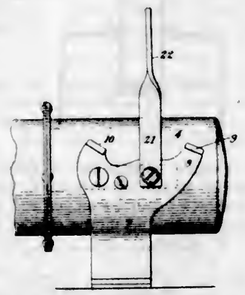
1. A toy aeroplane comprising a blank of sheet material formed to produce integral body, wing and tail portions, and a second blank of sheet material forming a launching medium shaped to provide motor and aviator simulating portions, the latter being bent to present duplicate sides, which terminate at their lower edges in a horizontal securing portion, said latter being suitably secured to said former blank.

1,348,374. AIRPLANE CONSTRUCTION. FRANCIS J. PLYM, Niles, Mich., assignor to Kawneer Manufacturing Company, Niles, Mich., a Corporation of Michigan. Filed Sept. 19, 1917. Serial No. 192,044. 15 Claims. (Cl. 244—31.)



4. In a device of the class described, a leading edge plate having a plurality of laterally extending ribs on its under surface.

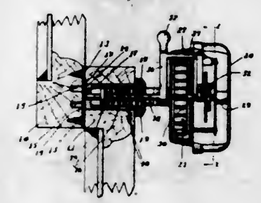
1,348,375. FOLDING SEAT. ALONZO E. RHOADES, Hopedale, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Mar. 4, 1920 Serial No. 363,230. 7 Claims. (Cl. 155—80.)



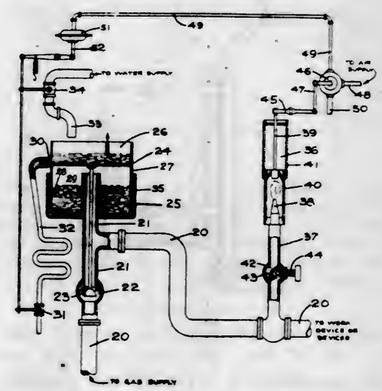
1. A folding seat comprising a bracket and means for attaching it to a machine frame, a support mounted in the bracket for rotation about a vertical axis, a seat provided with an arm mounted on the support for rotation about a horizontal axis, and gearing connections between the arm and the bracket acting upon rotation of the arm to effect the rotation of the support.

1,348,376. WINDSHIELD-HINGE. SAMUEL ROSENBERG, Chicago, Ill.; Dora Rosenberg administratrix of said Samuel Rosenberg, deceased. Filed June 14, 1919. Serial No. 304,142. 7 Claims. (Cl. 296—92.)

5. A wind shield hinge comprising a hinge member having a polygonal projection, the sides of the polygon being slightly concave, and an opening in the center of said projection, a series of elements corresponding in number with the sides of the polygon, the assembled series comprising an annulus adapted to encircle the projection, each of said elements having an inwardly directed face corresponding with a side of the polygon and a lug projecting from a side thereof, an expansible spring encircling the series, a second hinge member having a post adapted to journal within said opening, and a series of channels adapted to receive said lugs and prevent movement of rotation between itself and the series of elements but to permit radial movement of the elements.



1,348,377. MECHANICALLY-ACTUATED HORN. GEORGE J. SEISS, Toledo, Ohio. Filed Apr. 30, 1918. Serial No. 231,729. 2 Claims. (Cl. 116—144.)

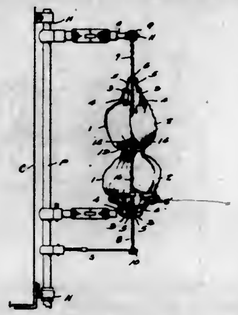


1. In a signal, a hollow body, a diaphragm therein, a bracket having arms partially embracing the body, a shaft rotatably mounted in the body and having means for vibrating the diaphragm, a manually operated oscillatable device having means for rotating the shaft, a member on the rearward end of one of the arms, a member on the forward end of said arms, and projections on the said members to engage and limit the movement of said oscillatable device.

1,348,378. MECHANICAL BURGLAR-ALARM. GENNADY G. SHILOFF, New York, N. Y. Filed June 14, 1919. Serial No. 304,177. 1 Claim. (Cl. 116—16.)

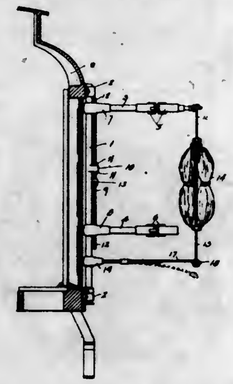
In a burglar alarm, a cylindrical casing closed at one end, a removable cap closing the opposite end of said casing, a bar formed with said cap and having its ends projecting beyond the sides of said cap, a bell supported by said bar, a plunger slidable in said casing and extending through said cap, the closed end of the said casing having an opening through which the inner end of the said plunger is adapted to extend, a spring in said casing tending to force the inner end of the said plunger through the said opening, an arm carried by said plunger and extending into said bell, mechanism in said bell for ringing the latter and including a star wheel and a hammer bar, the said arm locking the said star wheel and hammer bar against operation when the plunger is retracted and releasing the said star wheel and hammer bar for operation when the plunger is moved by said spring.

1,348,379. SYSTEM OF GAS CONTROL. HARRY F. SMITH, Lexington, Ohio, assignor to The Smith Gas Engineering Company, a Corporation of Ohio. Filed Jan. 22, 1917. Serial No. 143,781. 2 Claims. (Cl. 236—1.)



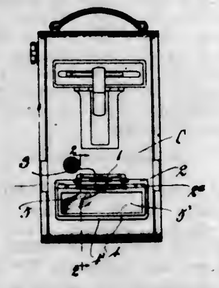
1. In a system for distributing a combustible fluid, the combination with a main adapted to convey the fluid from a source of supply to a place of use; of a valve adapted to control the flow of fluid through the main; a gasometer associated with said valve, the upper bell thereof having a fluid reservoir thereon, and being operatively connected to the stem of said valve; means for supplying a fluid to said reservoir, and other means for permitting the escape of fluid from the reservoir, pressure operated means adapted to operate each of said last named means to cause a flow of fluid to or from said reservoir; means for actuating said pressure operated means; and thermostatic means, responsive to the heat generated by burning a portion of the combustible fluid, for causing said pressure operated means to function.

1,348,380. RAILWAY MAIL-DELIVERY. HERBERT E. SMITH, Spokane, Wash., assignor to Spokane Mail Equipment Company, Spokane, Wash. Filed Oct. 21, 1918. Serial No. 259,050. 2 Claims. (Cl. 258—26.)



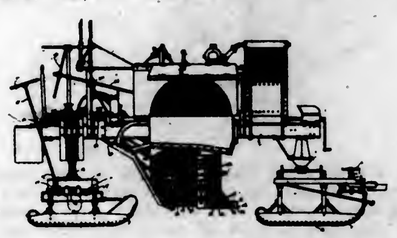
1. In a railway mail exchange, the combination with upper and lower supporting members, of a suspending chain, spaced devices on said chain for supporting the mail pouch, means adapted to encircle the porch and be

attached to said chain, for imposing the weight of the pouch directly on the chain, and a shock absorbing cushion



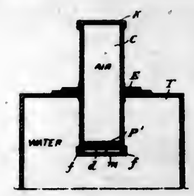
forming part of the chain located between the spaced devices to allow slack in the pouches.

1,348,381. RAILWAY MAIL-DELIVERY. HERBERT E. SMITH, Spokane, Wash., assignor to Spokane Mail Equipment Company, Spokane, Wash. Filed Oct. 21, 1918. Serial No. 259,051. 4 Claims. (Cl. 258—26.)



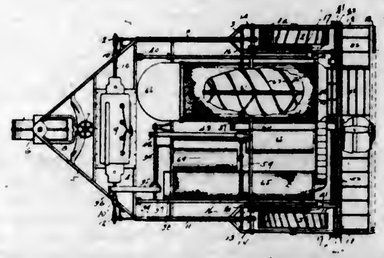
1. The combination in a railway mail exchange with the revoluble standard of a pair of vertically movable receiving arms and a delivery arm, means on one of the receiving arms to co-act with the delivery arm for suspending a pouch to be delivered, and positive means for adjusting the receiving arms.

1,348,382. EXPOSURE-TABLE. LOUIS SMITH, Hillyard, Wash. Filed Jan. 24 1920. Serial No. 353,769. 3 Claims. (Cl. 40—10.)



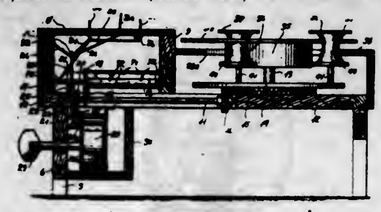
1. The combination with the camera and a fixed base plate, of a parallel offset frame plate hinged to the base plate and a cover frame hinged with a spring joint to the frame plate forming a casing, data cards in the casing, and means therein for holding said cards.

1,348,383. ROTARY SNOW-PLOW AND SNOW-LOADER. WALTER LESLIE STADIG, St. Francis, Me. Filed Aug. 15, 1918. Serial No. 250,075. 4 Claims. (Cl. 37—63.)



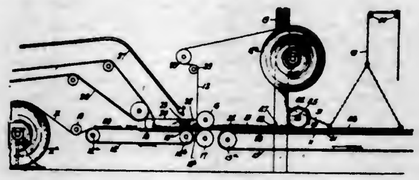
1. In a snow plow, a frame supported on suitable running gear, a cutter chamber, a plow supported from said frame, a rotary cutter supported and driven from said frame and situated to the rear of said plow, and a semi-circular hood extending from the rear wall of said chamber and terminating above said plow.

1,348,384. ANTIBURSTING AND ANTISHOCK DEVICE FOR TANKS, PIPES, &c. JOHN VERRE, Philadelphia, Pa. Filed Feb. 5, 1919. Serial No. 275,238. 3 Claims. (Cl. 137—71.)



1. An air chamber cylindrical in shape, screwed or otherwise attached to the top of a tank, having its lower end within the tank; and its upper end out of it and tightly closed by a cap and means closing the lower end.

1,348,385. MOTOR-VEHICLE. HARDIN E. WINSLOW, Spokane, Wash., assignor of one-fourth to Rolla C. Wisner, Spokane, Wash. Filed Mar. 1, 1919. Serial No. 280,105. 3 Claims. (Cl. 180—27.)

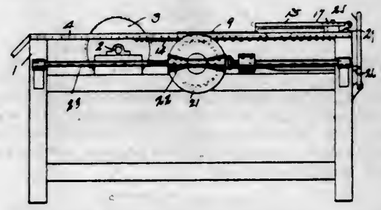


1. The combination in a tractor of an open rectangular frame having attaching means for receiving and supporting a superstructure, and a pair of side traction wheels journaled in said frame, of a rear V-shape frame and a steering mechanism and wheel supported therein, a motor supported on the V-shape frame, and means for transmitting power from said motor to the traction wheels.

1,348,386. MECHANICAL TOY. PIOTR WRONOWSKI, Youngstown, Ohio. Filed Feb. 17, 1920. Serial No. 359,298. 1 Claim. (Cl. 46—40.)

A device of the class described comprising a frame, a spring motor mounted therein, a gear driven by said motor, a relatively long shaft having a gear at each end, one of said last-named gears being in mesh with said first-named gear, a disk pivotally mounted in horizontal position and having an annular rack on the bottom thereof, the other gear on said long shaft lying in mesh with said rack, a plurality of drums pivotally mounted upon said disk, an upright extending rigidly from the center of said disk, a circular platform mounted rigidly in horizontal position upon said upright, a cylindrical member on the underside of said platform concentric therewith, said drums having pivotal contact with said member, openings in said platform, said drums extending upward through said openings, figures mounted upon the tops of said drums, a plurality of figures representing musicians mounted upon said frame, each of said musicians having one arm pivotally attached to the body, cords attached to said arms, a lever pivotally mounted in said frame adjacent said shaft, one end of said lever being forked, said cords connected to the other end of said lever, a wheel pivotally mounted in said frame and rotatable by said motor, spaced apart projections on the periphery of said wheel, said forked end of said lever lying in the path of said projections, resilient means urigng said forked end against said wheel, and means for turning said motor.

1,348,387. ART OF MAKING PLASTER-BOARD. MORGAN K. ARMSTRONG, Winnetka, Ill., assignor to Bestwall Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed Mar. 15, 1919. Serial No. 282,837. 4 Claims. (Cl. 154—1.)



1. The continuous process of making plaster board, which consists of advancing a bottom sheet of fibrous material, of superposing thereon a plastic mixture to form the body of the board, of confining said plastic mix in such a manner on said bottom sheet as to leave marginal parts of said sheet exposed at each side of the same beyond the intended width of the plaster board, of superposing a narrower top sheet of fibrous material on said plastic mix and at the same time spreading the plastic mix evenly over the bottom sheet to the intended thickness of the board, of turning over the projecting marginal parts of the bottom sheet to overlap the marginal parts of the top sheet, first spreading on said projecting parts a small amount of plaster so that said small amount is turned over with the said projecting marginal parts of the bottom sheet upon the marginal parts of the top sheet, the turning-over process being continued so as to depress the marginal parts of the top sheet, and of ironing out and smoothing the board to thoroughly adhere the top and bottom sheets to the body.

1,348,388. WATCH-BOW. HAROLD P. BAILEY, Franklin, N. H. Filed Oct. 15, 1919. Serial No. 330,777. 1 Claim. (Cl. 58—96.)

In a watch, the combination with a case, a tubular pendant projecting therefrom and threaded around its outer end and having an outwardly facing shoulder near its inner end, and the setting mechanism including a stem projecting through the pendant end having a crown at its outer end; of a nut on said threads beneath the crown, a sleeve revolvably mounted on the pendant between its shoulder and said nut, the sleeve having sockets in its opposite sides, and a bow consisting of a split ring whose extremities are mounted in said sockets.

1,348,389. PUSHER-FEED FOR GANG-SAWS. HERBERT L. BARRETT, Opportunity, Wash. Filed July 14, 1919. Serial No. 310,568. 3 Claims. (Cl. 143—51.)

1. The combination in a gang saw machine with the grooved table, of a plurality of pusher feed arms forming a carriage, and an adjustable pusher bar bodily movable with the carriage and pivoted to swing in the plane of the table-top, pivotal connections between each feed arm and said bar, and means for reciprocating said carriage.

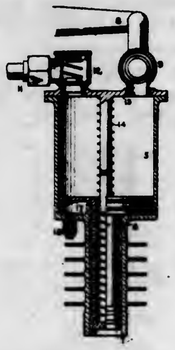
1,348,390. TORCH DISTRIBUTER-HEAD. EMIL L. CLAUS, Milwaukee, Wis. Filed July 26, 1919. Serial No. 313,461. 4 Claims. (Cl. 158—115.)

1. A distributer member comprising a sleeve provided with a series of apertures open at the inner periphery of the sleeve and a core cylinder secured in the sleeve and provided with grooves extending spirally in its peripheral surface, each of said grooves being closed by the sleeve and having one end portion in communication with a corresponding aperture of the sleeve.

1,348,391. REFILLABLE FUSE-PLUG. JOHN G. CLEMENS, Buffalo, N. Y., assignor to Clemens Electrical Corporation, Buffalo, N. Y., a Corporation of New York. Filed July 9, 1919. Serial No. 309,606. 6 Claims. (Cl. 200—130.)

1. In a fuse plug, a fuse chamber having an opening in one wall thereof, a fuse element removably inserted

through the opening and having a contact head, and means interposed between the contact head and the said



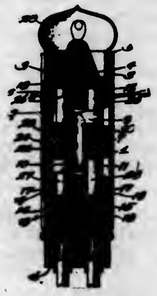
wall of the chamber for sealing the space around said opening.

1,348,392. SHOE-FASTENER. CHARLES M. COOK, Rochester, N. H. Filed Jan. 21, 1919. Serial No. 272,378. 2 Claims. (Cl. 24—205.)

1. The combination with a shoe having a tongue, of a quick closing shoe fastener having a slider connected to operate it, a plate carried by the upper end of said tongue, and an aperture and stud carried one by the plate and the other on the slider and adapted for interlocking engagement to hold the slider in elevated position and the tongue against lateral movement.

1,348,393. INTERNAL-COMBUSTION ENGINE. WILFRED BERRETON CROFTON, Yeoville, Johannesburg, South Africa. Filed May 22, 1918. Serial No. 236,017. 4 Claims. (Cl. 123—59.)

1. In combination with a multi-cylinder four-stroke internal combustion engine, a compressor device having a piston exposed to the explosion in an engine cylinder and thereby driven on its working stroke, said compressor drawing gas from a suitable source such as the engine inlet manifold, and delivering its charge to another engine cylinder to be compressed for ignition therein.

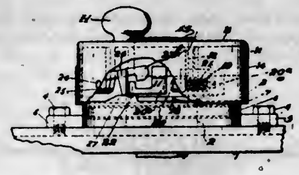


1,348,394. CIRCUIT-CONTINUING DEVICE. HARRY A. DOUGLAS, Bronson, Mich. Filed Aug. 15, 1918, Serial No. 250,021. Renewed Jan. 19, 1920. Serial No. 352,777. 12 Claims. (Cl. 173—328.)

9. A circuit continuing device including co-axial cylindrical contact carrier and socket members in rotative engagement; engageable contacts, one on each member, at the axis of the socket, one of these contacts being a spring contact exerting pressure transversely of the socket upon

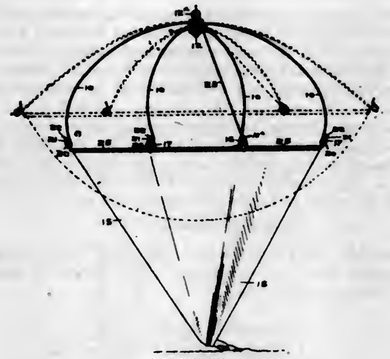
the other contact upon one side of the axis of rotative movement to effect rotative movement of the contact carrier with respect to the socket.

1,348,395. CIRCUIT-CONTINUING DEVICE. HARRY A. DOUGLAS, Bronson, Mich. Filed Aug. 15, 1918, Serial No. 250,020. Renewed Jan. 19, 1920. Serial No. 352,637. 23 Claims. (Cl. 173—328.



1. A circuit continuing device including a shell; a contact carrier surrounded by the shell and having bayonet projection and channel connection therewith, a portion of the bayonet channel leading to the inner or transverse portion sloping inwardly away from the inner termination of the bayonet channel; a second contact carrier connected with the shell; and contacts upon the adjacent ends of said carriers, a contact upon one carrier being in the form of a leaf spring disposed to press toward the outer portion of the bayonet channel and transversely of the shell upon the complemental contact upon the other carrier when the bayonet projection is in the sloping portion and the transverse portion of the bayonet channel.

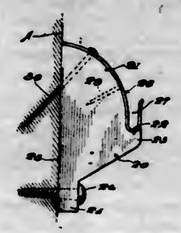
1,348,396. THRESHOLD. ADELARD J. DUBEE, Glens Falls, N. Y. Filed June 6, 1919. Serial No. 302,286. 10 Claims. (Cl. 20—64.)



1. A threshold, a plate below the same provided with a row of holes at different distances from its margins, and screws engaging the threshold and the holes for attaching the plate to the threshold so that it shall project beyond or stand inset from the margin of the threshold, as desired.

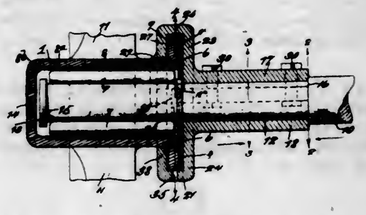
1,348,397. ELECTRIC CONTROLLER. ROBERT R. DUNLOP, Columbus, Ohio, assignor to The Jeffrey Manufacturing Company, Columbus, Ohio, a Corporation of Ohio. Filed Sept. 28, 1916. Serial No. 122,709. 8 Claims. (Cl. 200—9.)

8. In an electric controller, the combination with a rotatable cylinder, of a handle connected to rotate said cylinder and arranged for limited freedom of motion relative thereto, an electric switch adapted to be actuated by the free movement of said handle before the cylinder is moved in either direction.



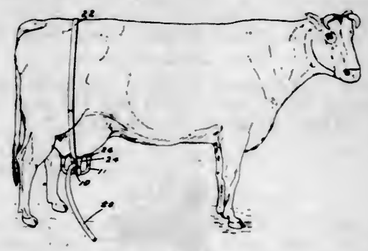
1,348,398. COLLAPSIBLE MINNOW-NET. FERDINAND EBERHARDT, Indianapolis, Ind., assignor to Compac Tent Company, Indianapolis, Ind., a Corporation of Indiana. Filed Nov. 25, 1916. Serial No. 133,434. 2 Claims. (Cl. 43—9.)

2. A device of the above described class comprising a collapsible frame composed of a plurality of ribs, a cord guide on said frame, means for securing one end of the ribs together, a net, means carried by one of the ribs for permanently connecting the net, recesses formed on the outer ends of the remaining ribs for detachably securing the net, and an operating cord connected at one of its ends to the net and the other end extending along the edge of the net to approximately the point of connecting the cord and thence extending through the cord-guide on the frame, for gathering together the edge of the net when the latter is disengaged from the frame.



1,348,399. SUPPORTING-BRACKET. JOHN H. ROWLER, Lewistown, Pa. Filed Oct. 11, 1919. Serial No. 329,928. 11 Claims. (Cl. 156—24.)

11. In a supporting bracket, the combination of a wooden body including a lateral extension upon its outer edge having an upper concaved edge, a depending extension on its lower edge, an attaching member extending through said depending extension at right angles to the back of the body, the outer edge of said body leading to said concaved edge being convexly curved, a metal strip lying in facial abutment with said curved portion and being shaped to form a socket resting upon said con-



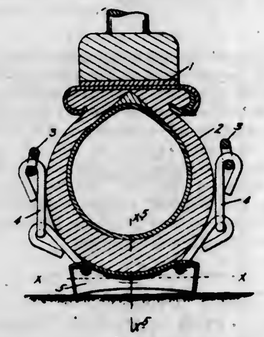
caved edge, and a second attaching member extending through said metal strip and said body at an oblique angle to the first named attaching member.

1,348,400. JOURNAL FOR CAR-WHEELS FOR ALL KINDS OF VEHICLES. HENRY FRAPPART, Kincaid, Ill. Filed Sept. 16, 1919. Serial No. 324,090. 3 Claims. (Cl. 64—10.)

2. In a device for the purpose indicated, an axle having a reduced axle end and provided with a collar located centrally of said reduced axle end, a journal boxing in which a portion of the reduced axle end on one side of the central collar is mounted, a wheel having a hub rotatively and operatively connected with the journal boxing and mounted upon the reduced axle end on the other side of the central collar, a circular ring plate carried by the inner end of the hub and having a central opening in surrounding relation to the periphery of the central collar thereby constituting a lubricant seal.

1,348,401. UDDER ATTACHMENT FOR MILKING-MACHINES. PETER A. FRIMAND, Wilmette, Ill., assignor to The Burton Page Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 20, 1915. Serial No. 67,800. 24 Claims. (Cl. 31—102.)

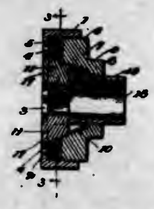
1. In an udder attachment for a milking machine, the combination of a teat cup manifold comprising a flexible rubber hub having flexible rubber tubes extending therefrom adapted to support teat cups at their outer ends in substantially vertical position when said cups are partially applied to the teats of a cow, and means for supporting said attachment in operative position.



2. In an udder attachment for a milking machine, the combination of a teat cup manifold comprising a flexible rubber hub formed with integral flexible rubber tubes extending therefrom adapted to support teat cups at their outer ends in substantially vertical position when said cups are partially applied to the teats of a cow, and means for supporting said attachment in operative position.

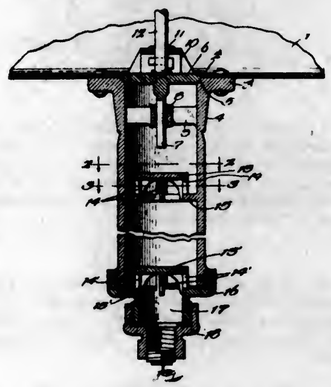
3. In an udder attachment for a milking machine, the combination of a teat cup manifold comprising a flexible rubber hub provided with relatively short flexible rubber tubes extending therefrom in radial arrangement and adapted to support teat cups at their outer ends in substantially vertical position when said cups are partially applied to the teats of a cow, and means for supporting said attachment in operative position.

4. In an udder attachment for a milking machine, a teat cup manifold comprising a rubber hub, and rubber teat cup tubes which extend from said hub, and a core fitted in said hub provided with a suction pipe nipple and with means for supporting said manifold on a surcingle, or the like.



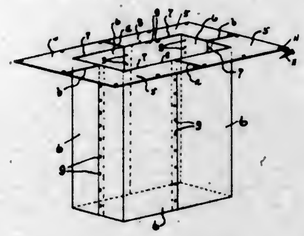
5. In an udder attachment for a milking machine, a teat cup manifold comprising a rubber hub, rubber teat cup tubes which extend from said hub, a core fitted in said hub provided with a suction pipe nipple and with a supporting device, the point of support of which is out of line with the axis of the hub.

1,348,402. NON-SKID SECTIONAL TIRE-CHAIN. FREDERICK A. GAHRING, Minneapolis, Minn., assignor of one-half to Axel Anderson, Minneapolis, Minn. Filed May 29, 1916. Serial No. 100,485. 3 Claims. (Cl. 152—14.)



1. A non-skid device for tires including circumferentially spaced transversely extended metal tread plates that are channel-shaped in cross section and have outstanding flanges, the edges of which are concavely curved so that only the ends thereof will primarily engage the ground.

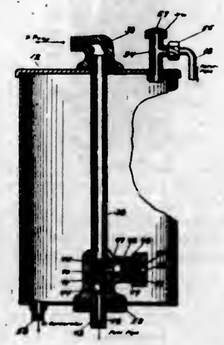
1,348,403. ADJUSTABLE DIE. ALEXANDER ALFRED GERICKE, Detroit, Mich. Filed Sept. 19, 1919. Serial No. 324,761. 5 Claims. (Cl. 10—121.)



1. A die comprising a base member, a plurality of cutters fitted in the base member for movement radially thereof, an adjusting member fitted in the base member for movement longitudinally of the same and adapted to engage the dies and effect radial movement thereof, and means fitted in said adjusting member to lock the cutters in their set position.

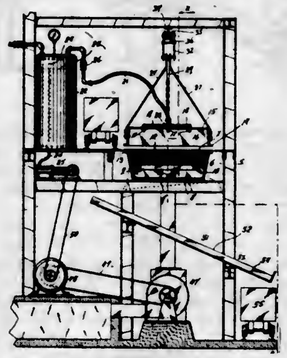
1,348,404. TANK-CAR. GEORGE H. GIBSON, Harvey, Ill. Filed Aug. 18, 1919. Serial No. 318,284. 4 Claims. (Cl. 137—21.)

1. A tank car structure including the tank thereof having a discharge opening in its bottom portion; a nozzle depending from the tank and communicating at its upper end with said discharge opening; a valve for closing said discharge opening and provided with a rod above the same for determining its position; a guard within the bore of the nozzle below said valve, there being space between this guard and the nozzle for the downflow of car contents; a ring within and supported by the nozzle; and a leg structure carried by this ring and connected with the guard to locate and support the latter.



1,348,405. GRAVE-LINING DEVICE. LYLE GOODWIN, Omaha, Nebr. Filed Mar. 31, 1919. Serial No. 286,339. 1 Claim. (Cl. 27—29.)

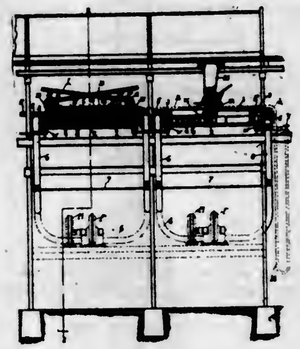
A device of the character described including four L-shaped sections, being counterparts of each other and placed with adjacent edges in overlapping and slidable relation, whereby to form an adjustable rectangle adapted to be placed horizontally on the upper face of the earth about a grave opening, sheets depending from the inner edges of said L-shaped members and passing under, and in close proximity to the vertical walls of the grave, the adjacent edges of said sheets being arranged in overlapping and sliding relation to permit increases and decreases in the size of the box-like formation made by the combined sheets, means for securing the sheets together in spaced relation along the overlapping edges, portions of the upper edges of the sheets being secured to the inner edges of the L-shaped members and portions thereof being left free, hooks on the L-shaped members, whereby



the free edges may be supported, the outer edges of the L-shaped members being perforated, strands adapted to pass through said perforations, and stakes adapted to be driven into the ground and engaging with said strands for holding the L-shaped members in place.

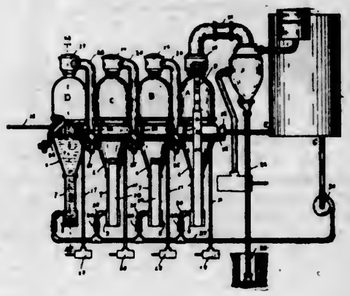
1,348,406. FUEL-FEEDING SYSTEM. CHARLES F. GREEN, Defiance, Ohio, assignor to Industrial Research Corporation, Toledo, Ohio, a Corporation of Delaware. Filed Nov. 18, 1918. Serial No. 262,992. 11 Claims. (Cl. 158—36.)

1. A device of the class described, comprising the combination of an engine, a fuel supply source for the engine, a source of lubricating material for said engine, and a double piston pump adapted to elevate said materials separately from a relatively low to a relatively high level from which they are adapted to flow to said engine.



1,348,407. APPARATUS FOR ROASTING OR SINTERING ORES. JOHN E. GREENAWALT, Denver, Colo. Filed Nov. 18, 1910. Serial No. 592,997. 49 Claims. (Cl. 266—21.)

1. In combination with an open top holder for a charge of material to be treated, an igniting member movable relatively to said holder and adapted to be temporarily positioned over the holder and its charge in nonmovable relation thereto, and operating to ignite the charge at its surface while so positioned.



1,348,408. PROCESS OF TREATING ORES. JOHN E. GREENAWALT, Denver, Colo. Original application filed June 24, 1912, Serial No. 705,495. Divided and this application filed Nov. 25, 1912. Serial No. 733,475. 27 Claims. (Cl. 75—80.)

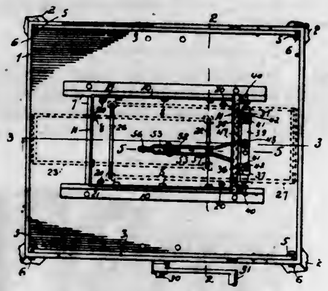
1. In the treatment of ore or other material, the process which consists in subjecting a charge of the material to the traverse of gases through the charge downward from a chamber superposed above the charge, projecting from fixed points above the charge ignition fuel

into said chamber, igniting said fuel, and supplying combusting-supporting gases to the fuel during the period of its projection into the chamber.

1,348,409. APPARATUS FOR THE RECOVERY OF THE CONTENTS OF LIQUIDS. CHARLES P. GRIMWOOD, Los Angeles, Calif. Filed July 15, 1916. Serial No. 109,509. 13 Claims. (Cl. 127—18.)

9. An apparatus for recovering the contents of liquids including a liquid concentrating chamber provided with a heating means, a tapered base at the bottom of the chamber, a leg extending downwardly from the tapered base and in uninterrupted communication with the chamber, a boot at the lower end of the leg, means for introducing an auxiliary supply of unconcentrated liquor at the boot so that it will rise in the leg and wash the precipitates which drop by gravity through the leg into the boot, and a conveyer for continuously removing the precipitates from the boot.

1,348,410. PENHOLDER. HENRY E. HALSETH, Virginia, Minn. Filed Jan. 3, 1920. Serial No. 349,209. 2 Claims. (Cl. 120—101.)



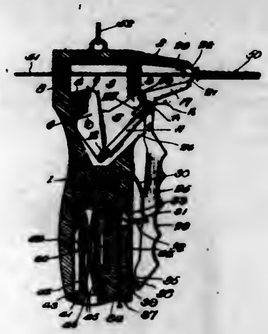
1. A clasp to be used in a manner described formed from a single strand of resilient wire and bent at its mid-point so as to form a U-shaped bearing portion, the terminals of said U-shaped bearing portion bent so as to form offset portions parallel to each other and to the plane of the U-shaped bearing portion, the ends of said

off-set extensions being bent so as to form bearing points from which points the wire is bent so as to form parallel

arms extending over and parallel to the offset extensions and provided with diverging ends which terminate in eye loops.

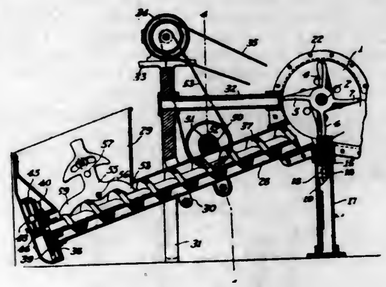
1,348,411. MOLDING-MACHINE. LARS HANSEN, Kansas City, Mo. Filed Apr. 21, 1919. Serial No. 291,695. 11 Claims. (Cl. 25—43.)

1. In a molding machine, a supporting frame, a stationary mold member mounted on said frame, a rock shaft oscillatable in said frame, a swinging mold member carried by the rock shaft and movable to and from an operative position projecting inwardly beyond the upper edge of the stationary mold member, means for oscillating the rock shaft, and a forming tool slidable on said frame over the die plate to and from a position against and extending below said swinging mold member when the latter is in the inwardly projecting position.



1,348,412. SYRINGE. GEORGE V. HARRIMAN, New York, N. Y. Filed Apr. 3, 1919. Serial No. 287,152. 6 Claims. (Cl. 128—234.)

2. As an article of manufacture, a vitreous nozzle tip for syringes having a glass fusing piece fused thereto.



1,348,413. TOOL. FREDERICK J. HARRISON, Indianapolis, Ind. Filed Sept. 20, 1919. Serial No. 325,073. 7 Claims. (Cl. 81—9.5.)

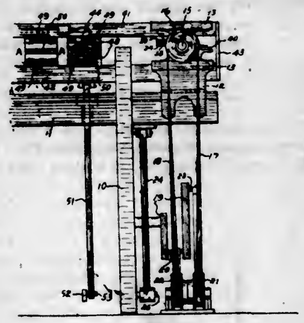
6. In a tool for the purpose set forth, a body, a fixed blade upon the body, a movable blade mounted on the body to coact with the fixed blade, a handle mounted on the body and operatively connected with the movable blade, a variable stop mounted on the body in the path

of said handle, an adjusting rod connected to said stop and extending beyond the body, and means on the body to engage said adjusting rod and hold it in set position.

1,348,414. AUTOMATIC FUEL-FEEDING MECHANISM. JOHN HEBERLING, Rochester, N. Y. Filed Mar. 27, 1917. Serial No. 157,670. 6 Claims. (Cl. 110—115.)

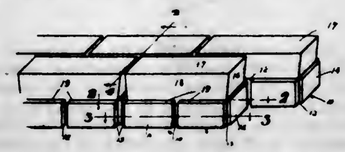
1. An automatic fuel feeding device comprising a chamber having a discharge, a spreader operating in said chamber and having blades engaging the fuel to throw the latter through said discharge, and a yielding device cooperating with the ends of said blades.

1,348,415. PULLEY. ROBERT L. HERBST, Hortonville, Wis. Filed Oct. 13, 1919. Serial No. 330,169. 8 Claims. (Cl. 64—100.)



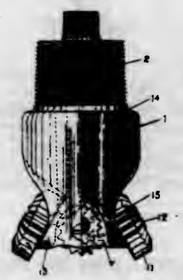
1. A pulley comprising hub and rim members, means holding the rim concentrically and movably around the hub, lugs on each member projecting toward the other, springs connecting said lugs in pairs around the wheel, and means within the rim holding the midlength of each spring diverted away from the hub.

1,348,416. JAR AND CAN LIFTER. SHADOSN A. HILLEY, Leonard, Tex. Filed Feb. 24, 1920. Serial No. 360,654. 2 Claims. (Cl. 294—33.)



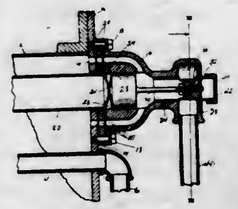
1. As a new article of manufacture, a can lifter formed from a strand of resilient wire bent intermediate its ends so as to form a plurality of loops, arms extending in parallelism from said loops, right angularly integrally extending portions provided at the terminals of said arms, said portions extending in opposite directions from each other and bent at right angles so as to form jaws, integral fingers provided upon said jaws for engaging the bottom of a can.

1,348,417. SHUTTLE-MOTION FOR TWO-BANK LOOMS. ALBERT A. HODGKINS, Bridgeport, Conn. Filed Dec. 26, 1919. Serial No. 347,281. 27 Claims. (Cl. 139—49.)



19. In a two bank narrow ware loom shuttle motion, a shuttle frame carrying shuttle actuating racks, means for reciprocating the shuttle frame, and coöperating means for actuating the shuttle racks, said last mentioned means comprising slides which are provided with rack pins and which are arranged to mesh with a reversibly turning gear wheel.

1,348,418. FLOOR AND PAVING BLOCK. WILLIAM H. HOLLENBECK, Portland, Oreg. Filed Jan. 7, 1920. Serial No. 349,957. 3 Claims. (Cl. 94—14.)

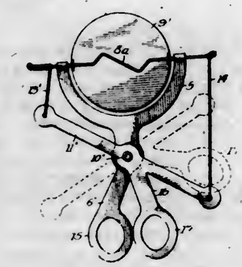


1. A floor and paving block, comprising a relatively rectangular body having the upper portion thereof dovetailed in cross-section, taken transversely, the lower portion being provided with vertical grooves at the sides and corners thereof, to provide projecting portions, said projecting portions forming upwardly facing shoulders with the top portion and the bottom edges of said projecting portions being flush with the bottom of the body.

1,348,419. CROSS-ROLLER DRILL-BIT. HOWARD R. HUGHES, Houston, Tex. Filed Dec. 27, 1919. Serial No. 347,752. 2 Claims. (Cl. 255—71.)

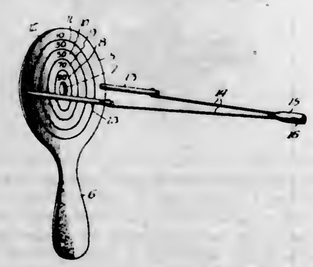
1. In a rotary boring drill, a head, two sets of cross roller cutters on the forward end thereof, said cutters being mounted on shafts supported on a central reinforcing web at one end and on a forwardly extending arm at the other end, said cutters being closely housed by walls extending from said web to said support and inclosing said cutters on all but the cutting side thereof, side cutters on the side faces of said walls and water channels discharging through said head onto said cross roller cutters, said walls having openings to allow passage of water laterally from said cross roller cutters onto said side cutters.

1,348,420. THERMOSTATIC CONTROL FOR COOLING MEDIUMS. FRANK A. HURLBUT, Kansas City, Mo. Filed Nov. 13, 1918. Serial No. 262,354. 3 Claims. (Cl. 236—34.)



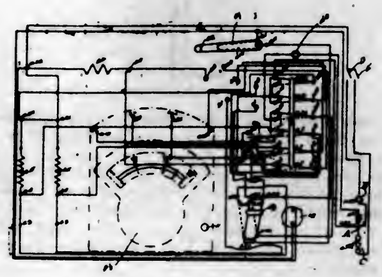
1. A cooling device for heated surfaces, comprising a casing arranged to maintain a liquid cooling medium in contact with a heated surface and under suitable pressure, said casing being provided with an outlet valve, and thermostatic means including a piston member connected with said valve and having one of its faces exposed to the liquid as it approaches said valve, and a thermostatic element projecting within said casing and mounted in engagement with the opposite face of said piston member.

1,348,421. TOY. CHARLES H. HYMAN, Chicago, Ill. Filed Mar. 15, 1919. Serial No. 282,902. 4 Claims. (Cl. 46—14.)



1. A whirligig toy, comprising a holder having an opening, a spindle journaled on said holder and extending diametrically across said opening, a whirling object mounted on said spindle within said opening, and manually operable means for rotating said spindle.

1,348,422. TOY. CHARLES H. HYMAN, Chicago, Ill. Filed Mar. 15, 1919. Serial No. 282,903. 5 Claims. (Cl. 46—14.)

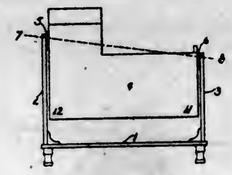


1. A whirligig toy, comprising a holder, a spindle journaled in spaced bearings on said holder, a whirling object mounted on said spindle between said bearings, a lever pivoted between its ends on said holder, and means connecting said lever with said spindle for rotating the latter in both directions from the rocking movements of said lever.

1,348,423. TOY. CHARLES H. HYMAN, Chicago, Ill. Filed Mar. 15, 1919. Serial No. 282,904. 2 Claims. (Cl. 46—60.)

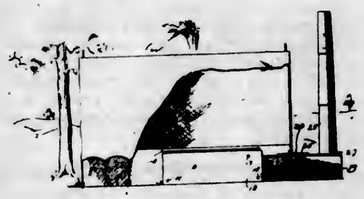
2. A target toy, comprising a wooden target having a hole at its bull's-eye and a series of concentric circles bounding annular zones of different values, a handle rigid with said target, an elastic propulsion cord connected at its ends to diametrically opposite points of said target, and a missile having a sharp pointed forward end adapted to penetrate and stick in said target and a narrow slot or kerf at its rear end for engagement with said cord.

1,348,424. ELECTRICAL-TEST SET. EUGENE A. JOHNSON, Walla Walla, Wash. Filed Apr. 22, 1919. Serial No. 291,974. 6 Claims. (Cl. 175—183.)



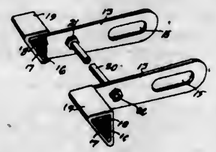
2. In an electrical test set, a current measuring instrument and its work circuit, a plurality of resistances interposed in said circuit, a switch for including any one of the restistances in the circuit and excluding the others, and a switch mechanism for connecting the selected resistance in parallel with the instrument when in one position, and in series with the instrument when in another position.

1,348,425. DIRIGIBLE HEADLIGHT FOR AUTOMOBILES. ANDREW H. KINDLE, Versailles, Mo. Filed Oct. 16, 1919. Serial No. 330,967. 5 Claims. (Cl. 240—62.)



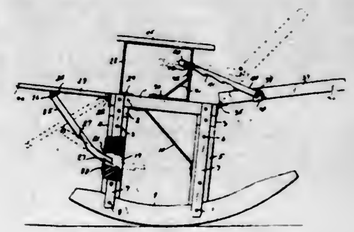
1. In a car, the combination with the steering mechanism, of a dirigible headlight, connections between the headlight and the steering mechanism, said connections embodying a member movable to an operative or an inoperative position, a lighting circuit for the headlight, and means operated upon the closing of the lighting circuit to move said member to its operative position, so that the steering mechanism and the headlight may turn in unison while the headlight is lighted.

1,348,426. CRIB. EMIL V. KLETSCHKA, Minneapolis, Minn. Filed Apr. 27, 1918. Serial No. 231,563. 4 Claims. (Cl. 5—56.)



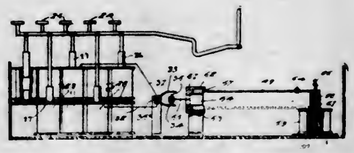
1. In a crib the combination of an oscillatable crib body, a trunnion support for said body at each end thereof, one of said trunnion supports being positioned higher than the other.

1,348,427. FOLDING CAMP-STOVE. WILLIAM M. LANDERS, Gracemont, Okla., assignor of one-third to Clark E. Bair and one-third to John W. Genung, Gracemont, Okla. Filed May 22, 1919. Serial No. 299,057. 1 Claim. (Cl. 126—9.)



A camp stove adapted for use in a tent, comprising a folding main body arranged to be disposed on the ground within the tent, a bottomless extension foldably connected to one end of the body and arranged to protrude beneath one wall of the tent, said extension being arranged to rest on the ground outside of the tent and having hinged outer end and hinged side walls, the top wall of the extension having a stack opening remote from its foldable connection with the main body, a plate of fire-proof insulating material secured on the upper face of the top wall of the extension on which the wall of the tent is adapted to rest, and a vertical baffle wall pivotally mounted within the main body and extending transversely of the rear end thereof, said baffle wall being arranged to rest on the ground and having its upper edge terminating in spaced relation to the top wall of the main body.

1,348,428. HAND-TRUCK BRAKE. CHARLES L. LATHAM, Berkeley, and LUTHER HESTER, Vallejo, Calif. Filed Apr. 4, 1919. Serial No. 287,430. 1 Claim. (Cl. 188—23.)



A brake to be used as described consisting of a pair of plates having wedges thereon, each plate and the wedge thereof being formed from a blank and being formed by bending one end of the plate at right angles thereto to form the top of the wedge, said plate having an extension projecting to one side thereof, the extension being bent along the edge of said plate to form the base of the wedge, said base then being bent to form a flange for engaging said top adjacent one end thereof, thus forming a triangular wedge, a sleeve of frictional material slipped on said wedge, said plate having elongated slots formed therein adjacent their opposite ends and a reinforcing rod connecting said plates together.

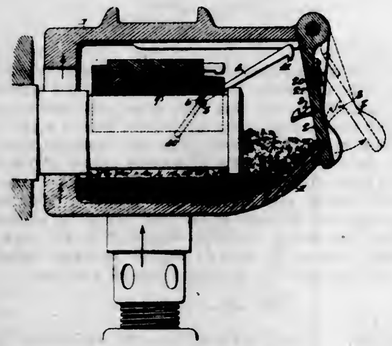
1,348,429. ROCKING-CHAIR. RALPH A. LEWIS, Grangeville, Idaho. Filed June 30, 1919, Serial No. 307,553. Renewed May 15, 1920. Serial No. 381,748. 3 Claims. (Cl. 155—105.)

2. In a rocking chair, the combination with a seat provided with supporting legs having rockers, of a back hingedly connected to the rear edge of the seat, arm rest supporting braces, each being constructed from a single strip of sheet metal, bent rectangular and mounted upon the seat, the rear legs of the supporting braces having elongated slots, diagonal braces for the rear legs of the supporting braces, said diagonal braces having offset extensions adjacent the slots of the rear legs of the supporting braces, and means pivotally connected to the back and passing through the slots to engage the offset extensions to hold the back in different adjusted positions.

1,348,430. TELETYPEWRITER OR PRINTING-TELEGRAPH. EINAR G. C. LOFGREN, Minneapolis, Minn. Filed Apr. 21, 1916. Serial No. 92,646. 18 Claims. (Cl. 178—33.)

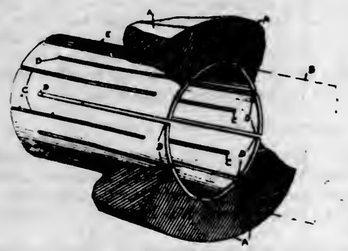
18. A printing telegraph mechanism including upper and lower sets of transmitting keys, upper and lower sets of recording keys, a recording key selecting switch under the control of both sets of transmitting keys, and means under the control of one set of transmitting keys for connecting either set of recording keys to said switch.

1,348,431. MORDANT OR DYE AND PROCESS OF MAKING THE SAME. GERMAN MORALES LOPEZ and ALBERTO QUAGLIA, Buneos Aires, Argentina. Filed June 24, 1919. Serial No. 306,506. 4 Claims. (Cl. 8—13.)



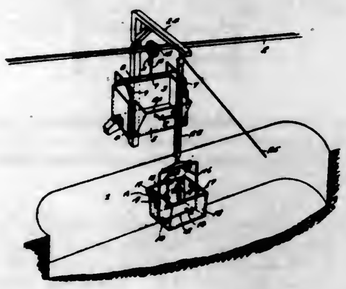
2. The herein-described process of obtaining a new industrial product, consisting in desiccating the fruit of a tree of the genus guaiacum until the volatile juices are lost, and the gummy parts have become dried, subjecting the dried gummy parts to a triturating action, and then screening and compressing the powder thus obtained.

1,348,432. REVERSING PROPELLER. ARTHUR R. LYONS, Carroll, Iowa. Filed Dec. 6, 1917. Serial No. 205,857. 1 Claim. (Cl. 170—163.)



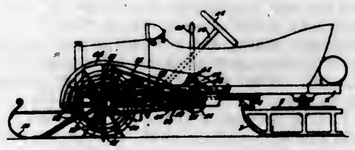
A reversible propeller comprising a hub having a pair of arms extending tangentially from the periphery of the hub and carrying rotatable blades having their longitudinal centers in the same plane as the center of the said hub and adapted to independently rotate, operating levers secured to the propeller blades at the opposite sides of said hub, and means for actuating said levers.

1,348,433. ATTACHMENT FOR OIL-BOXES. FRANK A. MACKIN, Middleport, Ohio. Filed Jan. 10, 1920. Serial No. 350,573. 3 Claims. (Cl. 64—23.)



1. In a journal box of the character described, a locking means including a member mounted in the box and movable with the same, and a member on the box lid, said members having engaging portions operable by the relative movement between the box and axle as the box is jacked up for swinging said lever to release the lid.

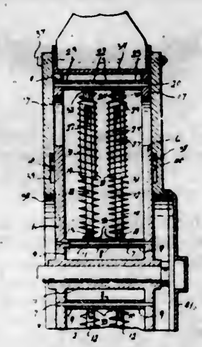
1,348,434. ADAPTER FOR ELECTRODE-HOLDERS. OLIVER J. MARSHICK, Detroit, Mich. Filed Oct. 31, 1919. Serial No. 334,648. 4 Claims. (Cl. 204—64.)



1. A metallic electrode wrapping, consisting of a tube of metal provided with a plurality of series of incomplete lengthwise kerfs arranged alternatingly in suitably spaced relation, those of one series having their open ends at one end of the tube, and those of the other series having their open ends at the other end of the tube, between the blind ends of those of the first named series on either side.

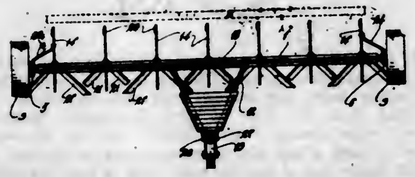
1,348,435. SILO-HOIST. OSCAR MATTHEW, Ford, Kans. Filed June 6, 1919. Serial No. 302,317. 3 Claims. (Cl. 212—97.)

1. A silo hoist comprising a suspended receptacle and a vertically movable receptacle, said suspended receptacle having a tripping bracket, the vertically movable receptacle being pivoted so as to dump, a tripping horn carried by one side of said vertically movable receptacle and so positioned as to engage the tripping bracket of the suspended receptacle when the vertically movable receptacle is moved vertically.



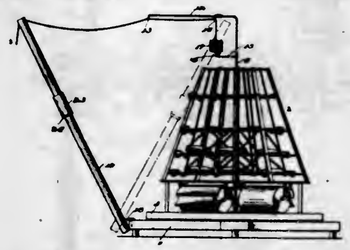
1,348,436. AUTOSLED. ROBERT C. MENZIES, Amsterdam, N. Y. Filed Nov. 8, 1919. Serial No. 336,679. 7 Claims. (Cl. 180—6.)

6. The combination with a vehicle structure including rear steering runners and front runners, of a transverse shaft journaled between the front and rear runners and including a differential, a motor for actuating said shaft, draw frames mounted to swing upon the end portions of the shaft and extending forwardly and lapping the outer sides of the front runners, a propelling wheel journaled within each of the draw frames and supported at the side of a front runner, means for transmitting motion to the propelling wheels from the shaft, a spring mounted for rotation on each end portion of the shaft, arms extending from the spring, one of said arms bearing downwardly on the draw frames, and means under the control of the operator for shifting the other arm of the spring to vary the pressure of the spring upon the draw frames and of the propelling wheels upon the supporting surface.



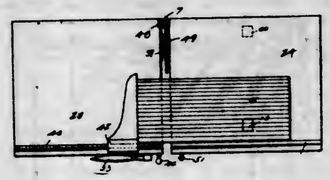
1,348,437. SPRING-HUB. ALFRED S. MIDDLETON, Des Moines, Iowa, assignor of one-half to Walter M. Toole, Des Moines, Iowa. Filed Nov. 19, 1919. Serial No. 339,140. 2 Claims. (Cl. 152—45.)

2. A device of the character described comprising a hub, a wheel having an annular member disposed in annular spaced relation to the hub, a plurality of opposed pinties extending laterally of the annular member and the hub, a plurality of sleeves freely mounted on said pinties for oscillating movement, collars on the end portions of said pinties to prevent sliding movement of the sleeves, lugs projecting from said sleeves, pins pivoted at one of their



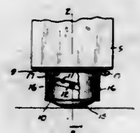
ends to the lugs, the pins of the annular member and hub intersecting each other, and spring means surrounding said intersecting pins.

1,348,438. WEEDING IMPLEMENT. THOMAS S. MOFFETT, Walla Walla, Wash., assignor of one-half to Archie O. Johnson, Walla Walla, Wash. Filed Mar. 20, 1920. Serial No. 367,539. 4 Claims. (Cl. 97—34.)



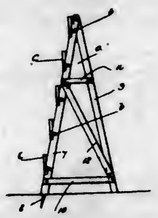
1. The combination with a bolster having pivoted stub axles and end supporting wheels, of a series of draft beams swiveled on the bolster and carrying cutter blades, and braces having fixed relation to the stub axles and slidable connections with the respective end beams, whereby the wheels and beams are turned synchronously.

1,348,439. TWINE-HOLDER. JOHN H. NICKS, San Saba, Tex. Filed July 10, 1919. Serial No. 309,922. 2 Claims. (Cl. 242—143.)



1. In an apparatus for the purpose set forth, the combination of a support, a lateral guide arm at the upper end of the same, a supporting arm below the guide arm, said supporting arm being adapted to carry a ball of cord and the guide arm to sustain the free portion of the cord, a tension bar hinged at its lower end to the support to swing to and from the same, guides for the cord at the upper end of the tension bar, and a tension device carried by said bar and engaging the cord between the guides at the upper end of the bar.

1,348,440. BENCH-SAW. CHARLES L. PARTRIDGE, Omaha, Nebr. Filed May 8, 1917. Serial No. 167,286. 7 Claims. (Cl. 29—69.)

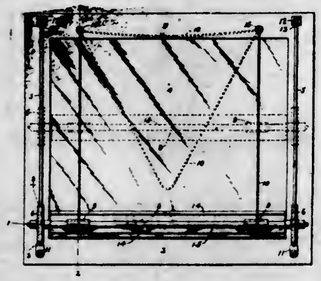


1. In a sewing machine, a base plate, a rotary saw supported upon the base plate, a rotary cutter associated with the saw, a vertically adjustable table arranged laterally of the saw, and means for supporting the table in various positions to support work in position to be operated upon by either the saw or rotary cutter.

1,348,441. FURNITURE-LEVELER. GEORGE R. PERRY, New York, N. Y. Filed June 26, 1919. Serial No. 306,823. 5 Claims. (Cl. 46—13.)

1. An apparatus as characterized comprising, a rotatable foot member; a housing for said member having inclined bearing surfaces; and a shaft extended through said foot member beyond the sides of said housing to provide means for rotating said foot member, said shaft engaging said inclined surfaces to form supports for said housing.

1,348,442. GAME APPARATUS. ANDREW PREBBLE, Altoona, Kans. Filed Feb. 3, 1920. Serial No. 355,970. 1 Claim. (Cl. 124—15.)

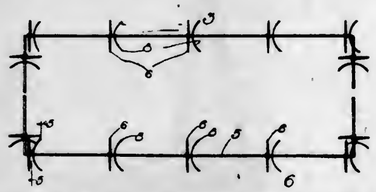


A game apparatus, comprising a frame provided with horizontal bars, numbered targets arranged in rows, hook-shaped hinges secured in pairs to the backs of the said targets and pivoting them to the said bars at points below the centers of gravity of the targets, and stops secured to the bars between the pairs of hinges, each stop being provided with a downwardly projecting arm and a rearwardly projecting arm for limiting the pivotal movements of the target.

1,348,443. WINDOW-CLEANER. JAMES T. PIGGOTT, Parkersburg, W. Va. Filed June 9, 1919. Serial No. 302,762. 4 Claims. (Cl. 15—59.)

1. In a window cleaner, a member comprising a V-bar formed of a single strip of sheet metal and including a

tubular pivot-bearing extending along the apex of its meeting sides, wiping elements at the free edges of said member, a counterweight secured to and extending radially



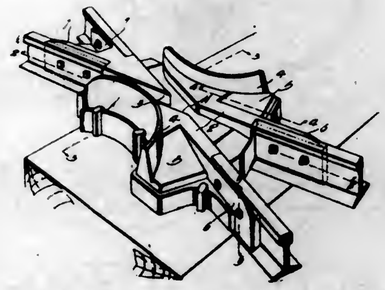
from the said tubular bearing, means to slidably mount the member in operative relation to a window, and means for imparting movement to the member.

1,348,444. STOCKING-SUSPENDER. PAUL PUGNIET, Paris, France. Filed July 24, 1919. Serial No. 313,125. 2 Claims. (Cl. 24—245.)

1. In a suspender, a sheet metal body having an attaching loop at one end and a bendable portion at the opposite end, and further provided, near the center, with upstruck tongues; a flexible loop having its ends attached to said tongues and secured near its ends in tubular members formed in the bendable portion of the body.

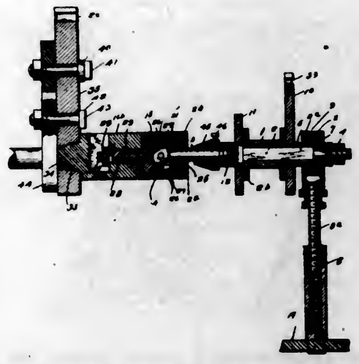
1,348,445. REINFORCED CONCRETE CONSTRUCTION. EARLE P. PRESS, Lake Bluff, Ill. Filed June 2, 1917. Serial No. 172,367. 1 Claim. (Cl. 72—15.)

The combination with the reinforcement rods of a concrete structure, of a head support comprising an apertured frame, a plurality of wires bent to form triangular legs, the ends of which are hooked in the apertures of the frame, to support the frame with the reinforcement rods resting thereon, and wires engaged through other of said frame apertures adapted to be passed around said reinforcement rods to hold the same secured to said frame and properly spaced.



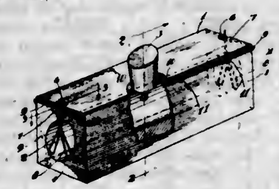
1,348,446. LEAF-SPRING. CLAUDE J. QUICK, Pulaski, N. Y. Filed Aug. 4, 1919. Serial No. 315,070. 2 Claims. (Cl. 267—49.)

1. A spring comprising a series of leaves arranged one above the other in concentric arcs of a circle and in spaced relation vertically, each leaf above the lowermost leaf having a plurality of lugs overlapping upon the op-



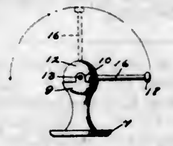
posite longitudinal edges of the next underlying leaf and rollers in the spaces between the leaves and journaled in said lugs.

1,348,447. RAILWAY-FROG. JAMES S. REID, Harrisburg, Ill. Filed Mar. 16, 1920. Serial No. 366,200. 2 Claims. (Cl. 246—456.)



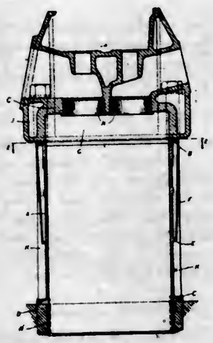
1. In a railway frog, a one-piece frog-body including the usual track-point, the usual wings, track-rail connections extending from said wings, track rail-connections extending from the heel of said track-point, inwardly bowed wheel-guiding walls extending up from the outer sides of said wings, and re-railing surfaces inclined toward the toe end of the frog-body, each of these re-railing surfaces being disposed between one of said wings and one of said guiding walls.

1,348,448. WIRE-LINE SPOOLER. ROBERT B. ROBISON, Caddo, Tex. Filed Mar. 28, 1919. Serial No. 285,800. 4 Claims. (Cl. 242—117.)



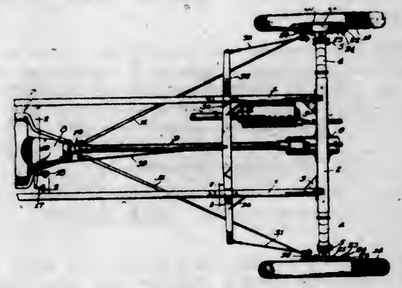
1. In spooling means, a rotatable shaft, a spool carried thereby, a connecting block comprising an inner member and an outer member, universal connections between said inner member and said shaft, means for securing said block members together adapted to permit independent rotation of the inner member, means for normally locking said inner member to the outer block member, and means carried by the outer block member for securing the same to the drive shaft of a well rig for rotation therewith.

1,348,449. ANIMAL-TRAP. ELMER E. RODGERS, ARTHUR W. WENGER, and CLAUDE M. RODGERS, Warsaw, Ind. Filed Sept. 22, 1919. Serial No. 325,360. 2 Claims. (Cl. 43—81.)



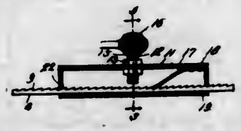
1. An animal trap comprising a body portion having a central bore and an opening communicating with said central bore between the ends of the latter, a spring arm secured to the side of the block at each end, said arm being bent around the end of the block and the end of the arm projecting normally in a downward direction but adapted to be forced against torsion to a horizontal position and a trigger suspended at each end of said central bore and adapted to be engaged by said spring arm to hold the latter in said position and to release the spring arm when moved.

1,348,450. COLLAR-BUTTON. PIERRE A. RONTEY, Coscob, Conn. Filed Apr. 11, 1919. Serial No. 289,233. 4 Claims. (Cl. 24—100.)



1. A collar button comprising a shank, a member pivotally mounted in the shank of said collar button and provided with a bore therethrough having a restricted portion, a rod slidably mounted in said bore, and means on each end of said rod for engagement with said restricted portion to prevent disengagement of the rod with said pivoted member.

1,348,451. CYLINDER FOR INTERNAL-COMBUSTION ENGINES. ARTHUR JOHN ROWLEDGE, London, England, assignor to D. Napier & Son Limited, London, England. Filed Aug. 11, 1919. Serial No. 316,624. 2 Claims. (Cl. 123—173.)

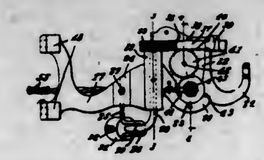


1. In a multicylinder internal combustion engine the combination of a plurality of separate cylinders each of which is open at both ends, an external flange formed at one end of each cylinder and adapted to butt up against and make a gas tight joint with a head casting, an external flange formed toward the opposite end of each cylinder, a water jacketed integral casting constituting detachable heads for all the cylinders in the set, valve seats and inlet and exhaust passages for the several cylinders in this head casting the under side of which is formed so as to make a separable gas tight point with the flanged ends of the several cylinders, a crank case with separate openings into each of which one end of a cylinder is inserted with the flange adjacent to that end of the cylinder butting up against the crank case, and a plurality of bolts extending from the crank case to the detachable head casting and serving to secure this casting on the cylinders and also to keep the cylinders in place as set forth.

1,348,452. MOTOR-CAR REAR-WHEEL-BRAKE MECHANISM. ALPHONSE A. SEBASTIAN and DELBERT R. CAPES, Chicago, Ill., assignors by direct and mesne assignments, to A.-C. Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 10, 1916. Serial No. 82,265. 1 Claim. (Cl. 188—18.)

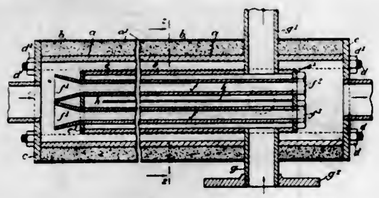
A motor car brake mechanism, comprising brake bands disposed around the wheel drums of the car, an equalizing bar slidably mounted on the chassis sills, means connecting said bar with said brake bands, a rod pivoted centrally to said bar and adapted to actuate the same to apply said brake bands, a pedal to which the other end of said bar is connected and disposed at an angle to the point of connection of said rod with said bar, and springs connected at an angle between said bar on each side of its point of connection with said rod and to the chassis of the motor car and adapted automatically to return said bar to normal position and thereby release said brake bands.

1,348,453. AUTOMOBILE-LOCK. THOMAS H. SIMPSON, Centerville, Iowa. Filed Apr. 23, 1919. Serial No. 292,120. 4 Claims. (Cl. 70—128.)



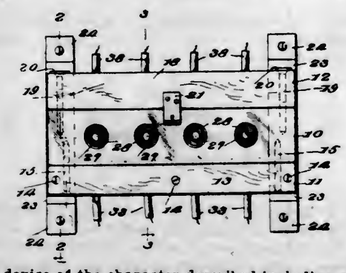
1. In a device of the class described, the combination with a support including an operating lever, of a bar carried by said support, a casing secured to said lever, lock means in the casing for engagement with said bar, a movable plate carried by the casing for releasably holding said bar in engagement with said lock means, and means for releasably locking said plate in a closed position.

1,348,454. CIRCUIT-CLOSER FOR AUTOMOBILE SIGNAL DEVICES. CLARENCE SOLIE, Stanley, Wis. Filed Dec. 19, 1918. Serial No. 267,515. 3 Claims. (Cl. 200—59.)



3. In a circuit closer, a bracket; a shaft journaled in the bracket; a pinion on the shaft; an oscillating switch

journaled on the bracket and including a pinion; a rack bar slidable on the bracket and coöperating with both pinions; an eccentric weight on the shaft and constituting means for rotating the shaft to dispose the switch in open



circuit position; and means under the control of an operator coacting with the rack bar and acting in opposition to the weight to dispose the switch in closed circuit position.

1,348,455. VAPORIZER FOR INTERNAL-COMBUSTION ENGINES. GEORGE SPICER, London, and EDWARD CHARLES SYDNEY CROXSON, Southend-on-Sea, England. Filed May 21, 1918. Serial No. 235,868. 2 Claims. (Cl. 257—241.)

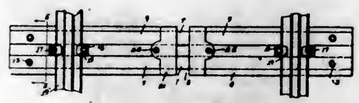
1. A vaporizer comprising a tubular outer casing having closed ends provided with inlet and outlet tubes, a tubular inner casing of less diameter than and arranged in the outer casing, said tubular inner casing having closed ends, pipes extending longitudinally through said inner casing and open at the ends, fuel inlet and outlet pipes extending transversely through the outer casing and connected to the inner casing at a point near one end thereof, and a baffle in said inner casing and extending from said end thereof to a point near the opposite end thereof.

1,348,456. SPARK-INDICATOR AND PLUG-TESTER. JOHN S. STEVENSON, Baltimore, Md. Filed Apr. 29, 1918. Serial No. 231,506. 4 Claims. (Cl. 175—183.)

1. A device of the character described including a casing provided with a sparking chamber, a sleeve opening into the chamber, coacting terminals projecting into the chamber and forming a spark gap therein, one of said terminals being fitted through the sleeve and rotatably adjustable thereon with respect to the other of the terminals, means adjustable upon the sleeve for clamping a circuit wire in engagement therewith, and yieldable means bearing between said first mentioned means and the adjustable terminal for holding such terminal at adjustment and also holding said first mentioned means at adjustment.

1,348,457. PROCESS FOR DEOXIDIZING COPPER AND ITS ALLOYS. ALBERT STRASSER, Rorschach, Switzerland. Filed Feb. 5, 1920. Serial No. 356,546. 4 Claims. (Cl. 75—62.)

1. A process for deoxidising copper and its alloys, which consists in first adding a copper cartridge containing a phosphorus compound to the copper heated above its melting point, for the purpose of converting the impurities into phosphorus compounds, and then, when the copper has reached a higher temperature, adding a second copper cartridge filled with one of the metals of the alkaline earths, for the purpose of oxidising the phosphorus compounds, the reaction being such that the phosphorus compounds burn at the expense of the alkaline earth metal, and the oxids being insoluble in copper, float on the top of the latter.

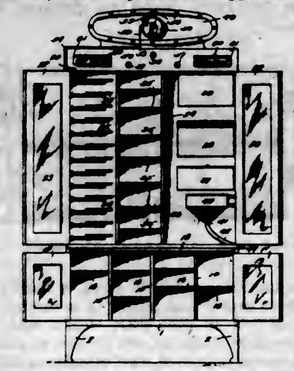


1,348,458. PROCESS FOR DEOXIDIZING ALUMINUM AND ITS ALLOYS. ALBERT STRASSER, Rorschach, Switzerland. Filed Feb. 5, 1920. Serial No. 356,547. 4 Claims. (Cl. 75—58.)

1. A process for dexodizing aluminium and its alloys, which consists in first adding an aluminium cartridge containing a phosphorus compound to the aluminium heated above its melting point, for the purpose of converting the impurities into phosphorus compounds, and then when the aluminium has reached a higher temperature, adding a second aluminium cartridge filled with one of the metals of the alkaline earths, for the purpose of oxidising the phosphorus compounds, the reaction being such that the phosphorus compounds burn at the expense of the alkaline earth metal, and the oxids being insoluble in aluminium, float on the top of the latter.

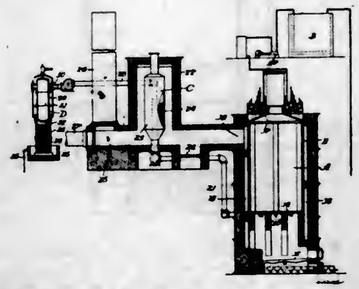
1,348,459. METHOD OF FORMING SHAPED ARTICLES FROM PRECIPITATED SKIN-LIKE COMPOUNDS. CHARLES E. SWETT, Brookline, Mass., assignor to Arthur D. Little, Incorporated, Cambridge, Mass., a Corporation of Massachusetts. Filed Mar. 27, 1919. Serial No. 285,621. 5 Claims. (Cl. 18—57.)

4. The method of making predetermined shapes of insoluble algin compounds which consists in first wetting a porous form with an aqueous solution adapted to precipitate the algin compound from an alkaline solution of the alginate, then applying to the wetted form a solution of the alkaline alginate and finally removing from the form the algin compound formed.



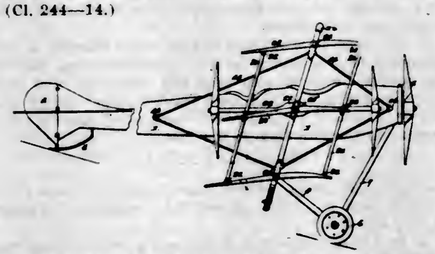
1,348,460. RAIL TIE AND FASTENER. EDWIN T. WADE, Jackson, Miss., assignor of one-third to Albert C. JONES, Jackson, Miss. Filed Dec. 30, 1919. Serial No. 348,260. 2 Claims. (Cl. 238—116.)

1. In a railway tie construction, opposed sections of plastic material, reinforcing elements disposed in the upper surface of both of the sections, and providing means to connect the sections, end plates including parallel members contacting with the upper and lower surfaces of the respective sections, said end plates having openings to accommodate the reinforcing elements, and rail securing means extending through each of the opposed sections.



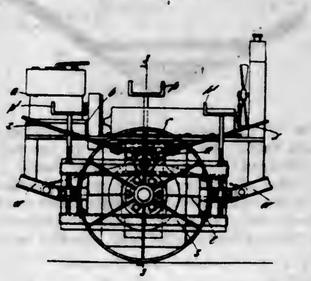
1,348,461. HOTEL OR RESTAURANT CABINET. EARNEST WASHINGTON, Faribault, Minn. Filed Mar. 5, 1920. Serial No. 363,420. 1 Claim. (Cl. 45—16.)

A combined hotel cabinet comprising a lower portion embodying a refrigerator upon one side and compartments upon the other side, a bread-board slidably supported above the same, and a top member supported on the bot-



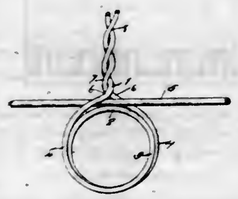
tom portion and over said board and having a central tier of shelving, and compartments on each side thereof, and separate doors for the upper and lower compartments.

1,348,462. METHOD OF AND APPARATUS FOR TREATING WASTE PICKLE LIQUOR. ALBERT T. WEAVER, Joliet, ERNEST W. D. LAUFER, Arlington Heights, and EBERHARD VON WINTZINGERODE, Chicago, Ill., assignors to The American Steel & Wire Company of New Jersey, Hoboken, N. J., a Corporation of New Jersey. Filed Aug. 3, 1916. Serial No. 112,898. 6 Claims. (Cl. 23—13.)



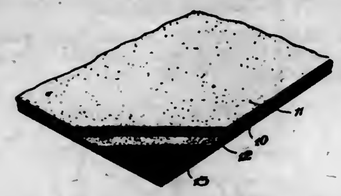
1. In a method of treating a pickle liquor solution including certain sulfates in water and recovering sulfurous and sulfuric acid gases and oxids, the steps of spraying the solution in a finely divided condition into a furnace, conducting the evolved water and sulfurous and sulfuric acid gases from the furnace, condensing the vapors in the presence of steam and depositing the oxid on the floor of the furnace, substantially as described.

1,348,463. AEROPLANE. JEAN F. WEBB, Sr., New York, N. Y. Filed June 8, 1918, Serial No. 238,841. Renewed Feb. 17, 1920. Serial No. 359,314. 9 Claims. (Cl. 244—14.)



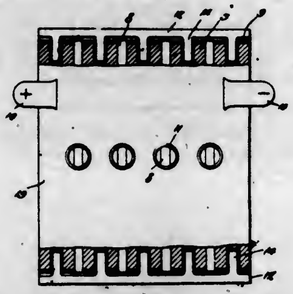
8. The combination in an aeroplane structure, of rigid diamond-shaped trusses and rigid transverse trusses crossing each other at right angles and interlocked together and with the fuselage framework to form a support, longitudinally and transversely, for the planes.

1,348,464. BALANCE-PLOW. DANIEL YELD WHEATLEY, Hythe, England. Filed Sept. 29, 1917. Serial No. 193,949. 2 Claims. (Cl. 180—29.)



1. In a self-propelled plow the combination of a frame, an engine, two wheels mounted on spindles, driving gear between the engine and the wheels, a sleeve on one of said spindles, a drum, chains connecting said sleeve and said drum, worm gearing for rotating said drum, and steering bars for actuating said drum.

1,348,465. CLOTHESPIN. ALLEN WHITLOCK, Pueblo, Colo. Filed Mar. 1, 1920. Serial No. 362,618. 1 Claim. (Cl. 24—139.)



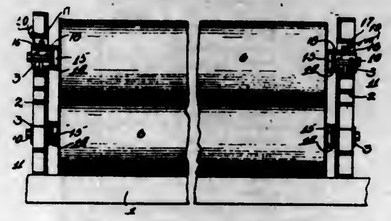
A clothes pin constructed from a single length of spring wire being bent or curved upon itself at a point substantially at its medial portion, thereby forming a medial loop of circular form, portions of the wire beyond the loop being returned in curve formation toward a portion of the loop adjacent where the wire is first bent upon itself, thereby forming a plurality of clothes line engaging coils, the wire material beyond the returned portions of curved formation being permanently twisted and interlocked with each other in close position, thereby forming a handle, said twisted end portions having their free end terminals terminating in close position to each other, said clothes pin adjacent where the end portions are first twisted together at a point where the wire material is first bent or curved upon itself having an opening of substantial size to permit of the reception of the clothes line which engages where the wire material is first bent or curved upon itself and the portions where the handle is first twisted together thereby permitting the clothes pin to slide upon the line as well as swivel on the line and whereby the pin may be disposed at right angles to the line with the loop extending upwardly or downwardly, said twisted portions of the handle being twisted and connected together subsequently to attaching the clothes line to its supporting means, said plurality of coils being yieldable and of substantial diameters thereby constituting clothes clamping jaws capable of disposition substantially parallel with the clothes line whereby articles may be suspended substantially in alinement with the clothes line.

1,348,466. TIRE-PATCH. WINFIELD C. WOOD, Minneapolis, Minn. Filed Feb. 6, 1919. Serial No. 275,364. 1 Claim. (Cl. 152—26.)

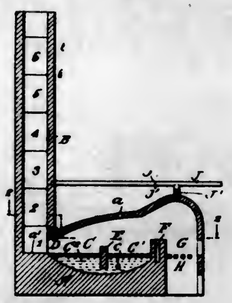
A sheet of tire patch material comprising a layer of vulcanized rubber having a layer of one-way-extensible fabric embedded therein, said fabric being co-extensive with the layer of rubber, a thin layer of adhesive rubber secured to the vulcanized layer throughout the area of one of its faces, and a detachable sheet of protective material covering the exposed face of said adhesive layer.

1,348,467. BATTERY-PLATE. ARTHUR J. ADAMS, Milwaukee, Wis. Filed Oct. 15, 1919. Serial No. 330,716. 2 Claims. (Cl. 204—29.)

1. A storage battery comprising frames carrying active material and provided with peripheral grooves; and a bonding member having flanges entering the grooves.



1,348,468. COMBINATION-SHAKER. SAMUEL L. ADELSON, Chicago, Ill. Filed Aug. 11, 1919. Serial No. 316,527. 1 Claim. (Cl. 65—45.)



A combination shaker of the class described comprising a container, a central partition dividing the container into separate compartments, an apertured stationary cover removably secured on the container, an apertured cover slidable on the stationary cover with the apertures therein adapted to register with the apertures in the stationary cover, downward projections on the slidable cover projecting through slots in the stationary cover for securing the slidable cover to the stationary cover, and a spring between the slidable cover and the stationary cover acting normally to hold the apertures over one compartment in register and the apertures over the other compartment out of register.

1,348,469. CYLINDER FOR PAPER-DRYING MACHINES. JOHN E. ALEXANDER, Port Edwards, Wis. Filed Nov. 26, 1917. Serial No. 204,088. 4 Claims. (Cl. 219—37.)

1. A drier unit comprising a casing, a shaft projecting therethrough to permit said casing to be rotatably mounted, spiders secured on said shaft within said casing, a plurality of connected flat spirals of wire secured on said spiders, and means connected with said flat spirals of wire to permit an electric current to be passed therethrough to heat the same and said casing.

1,348,470. PROCESS OF AND FURNACE FOR REFINING COPPER. FRANK L. ANTISELL, Perth Amboy, N. J. Filed June 6, 1913. Serial No. 772,033. 25 Claims. (Cl. 75—62.)

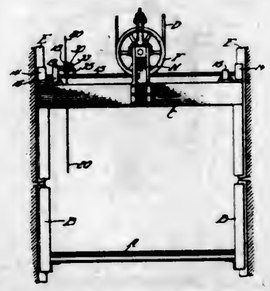
1. The process of refining copper which consists in continuously, progressively and serially pre-heating, roasting and melting copper forms separately and individually.

2. The process of refining copper which consists in continuously, progressively and serially roasting copper forms and then subjecting the said copper forms separately and individually to a melting temperature.

3. The process of refining copper which consists in gradually feeding copper forms to the melting zone where they are melted separately and individually and progressively and serially pre-heating and roasting said copper while being so fed.

4. The process of refining copper which consists in continuously, progressively and serially pre-heating and roasting copper forms and then subjecting the copper forms to a melting temperature so that they are melted separately and individually.

5. The process of refining copper which consists in continuously feeding copper forms to a melting zone, melting the copper forms in said zone and separately and individually, preheating and roasting the copper forms serially by a current of products of combustion passing counterwise to the direction of the feed.



1,348,471. MOWER. JOHN ASPINWALL, Newburgh, N. Y. Filed Dec. 20, 1919. Serial No. 346,268. 8 Claims. (Cl. 56—294.)

1. In a mower, a rotary cutter and a relatively stationary knife bar comprising a relatively tough member and a thin steel knife secured thereto, the steel knife being substantially rectangular in cross section and arranged in upright position on said tough member with the tough

member substantially covering the back flat face of the knife to decrease the tendency of the cutting edge of the knife to become bent or broken.

1,348,472. SAFETY DEVICE FOR ELEVATORS. HENRY BLEYMEHL, Chicago, Ill. Filed Nov. 8, 1919. Serial No. 336,566. 8 Claims. (Cl. 187—90.)

5. The combination with an elevator, vertical guide-tracks therefor, shoes carried by said elevator that travel on said tracks, and movable means housed within said shoes that engage said track, of a stationary vertical rope, a pulley engaging said rope whose bearings are supported by said elevator, a wheel the center of which alines with the axis of said pulley and which is actuated by the same when the elevator descends too rapidly, a centrifugally actuated arm, a link pivoted to said wheel, a transverse rock-shaft, an arm projecting from the shaft, to the outer end of which said link is connected, and devices adapted to impart motion from the shaft to said means.

1,348,473. FASTENER. WINFRED M. BROOKS, West Orange, N. J. Filed Dec. 10, 1918. Serial No. 266,030. 1 Claim. (Cl. 292—316.)

An improved fastener comprising: a straight head-portion weakened at a plurality of points transversely and over a considerable extent of its surface, two prongs connected by said head-portion, one, a main prong bent downwardly substantially at right-angles to the head-portion, and another, an auxiliary prong bent downwardly at an angle greater than a right angle and inclined toward the main prong, the main prong being of greater length than the auxiliary prong.

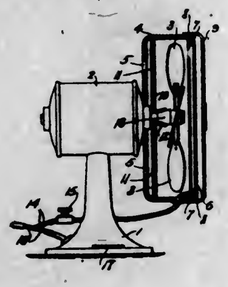
1,348,474. COMBINED CHAIR AND LADDER. ELENA BUDNYK, Vegreville, Alberta, Canada. Filed Jan. 4, 1918, Serial No. 210,279. Renewed Feb. 7, 1920. Serial No. 357,016. 3 Claims. (Cl. 155—42.)

1. The combination with a chair having a back; of ears projecting from the back on opposite sides thereof, spring-pressed plungers extending through the ears and constantly urged in opposite directions, and ladder side engaging elements carried by the outer ends of said plungers.

3. The combination with a chair having a back; of ears projecting from said back rearwardly, plungers passing through said ears and having their inner portions overlapping an eye on the inner end of each plunger, a compression spring surrounding said plungers between said eyes and having its ends engaging the confronting faces of the eyes and inwardly directed forks carried by the outer ends of the plungers and adapted to enter openings in the sides of a ladder.

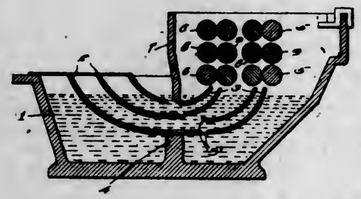
1,348,475. SHOESTRING-FASTENING DEVICE. LEWIS CALVIN BULLOCK, Jr., State College, Pa. Filed Mar. 11, 1920. Serial No. 364,878. 4 Claims. (Cl. 24—117.)

1. A device of the character described including a plate adapted to be secured to the tongue of a shoe and having a rib forwardly projecting therefrom whereby the rib can pass outwardly through the parting between the front edges of the shoe upper, said rib having a hole through which the end portions of the shoe lace can be projected and a notch adjacent said hole whereby a portion of the lace, wrapped to form a loop, can be pulled when the loop is shortened; substantially as described.



1,348,476. WINDING-HANDLE FOR PHONOGRAPHS. HENRY S. CAHN and HARRY SISKIN, Los Angeles, Calif.; said Cahn assignor to said Siskin. Filed Apr. 30, 1919. Serial No. 293,999. 2 Claims. (Cl. 74—33.)

1. In combination a supporting structure; a drawer sliding in said structure; a phonograph mechanism car-

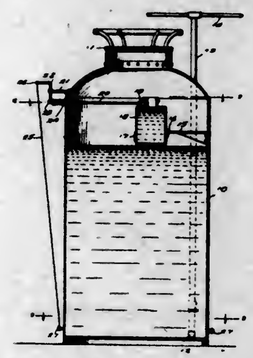


ried in said drawer; and a handle for winding said phonograph mechanism, said handle projecting from the side of the drawer when the drawer is open and having a hinged joint by which it may be folded out of the way when the drawer is closed.

1,348,477. FAN. ALLEN A. CANTON, New York, N. Y., assignor to Canton Fan Heater Co., a Corporation of Delaware. Filed Aug. 20, 1919. Serial No. 318,784. 10 Claims. (Cl. 219—42.)

5. In combination with a fan, a heating element disposed in the path of movement of a current of air from the fan, a source of electrical current for operating the fan and the heating element, independently operable means for controlling the flow of electric current to the fan and heating element, and means for interrupting the current of air from the fan.

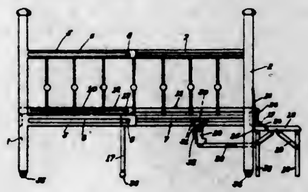
1,348,478. ATTACHMENT FOR METAL-COATING MACHINES. JOHN A. CARRIGAN, New Castle, Pa. Filed Aug. 3, 1917, Serial No. 184,348. Renewed Apr. 21, 1920. Serial No. 375,653. 2 Claims. (Cl. 91—59.4.)



1. In a device of the class described, the combination of a supporting means, pairs of feed-out rollers rotatably supported upon said supporting means, the rollers of each pair being contiguous to each other, while said pairs are spaced from each other, wiping rollers rotatably mounted upon said supporting means, said wiping rollers being interposed between pairs of the feed-out rollers, means for rotating the feed-out rollers at a uniform speed, and means for rotating the wiping rollers in the same direction as that of the feed out rollers and slower than the feed-out rollers, thus causing a sheet of metal to positively pass out between the feed out rollers and the wiping rollers.

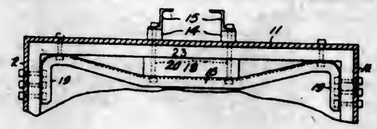
2. In a device of the class described, the combination of a supporting means, pairs of feed-out rollers rotatably supported upon said supporting means, the rollers of each pair engaging each other under normal conditions, said pairs being spaced apart, wiping rollers rotatably supported upon said means and interposed between said feed-out rollers, meshing gears of uniform sizes connected to said feed-out rollers, enlarged gears connected to said wiping rollers, and gears so meshing with the gears of the feed-out rollers and wiping rollers, as to cause the wiping rollers to rotate in the same direction as the feed-out rollers, but at a reduced speed, thus causing the wiping rollers to have a slight dragging action upon a sheet of material moved outwardly between the feed-out rollers to evenly coat such material.

1,348,479. COMPOSITION OF MATTER. MAURICE A. CARTER, Gilby, N. D. Filed Aug. 30, 1918. Serial No. 252,111. 1 Claim. (Cl. 148—30.)



A composition of matter for use in hardening metal, including sweet milk, flaxseed oil, lampblack, rosin, cyanid of potassium, yellow prussiate of potash, ammonia water, salt and water.

1,348,480. AUTOMATICALLY-OPERATED FIRE-EXTINGUISHER. ARLINGTON CHARTER, Covington, Tenn. Filed Feb. 16, 1920. Serial No. 358,943. 2 Claims. (Cl. 169—27.)

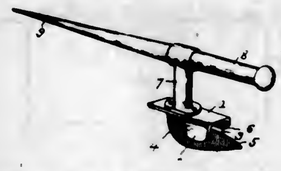


1. In a device of the type described a casing, a tilting receptacle within said casing, a detent holding said receptacle in vertical position, a fusible link holding said detent in engagement with said receptacle and an annular row of spaced guide members arranged about and secured to said casing, said fusible link passing through each of said guide members.

1,348,481. TELESCOPICAL BED AND COLLAPSIBLE-CHAIR COMBINATION. JOHN CHOMOS, Toledo, Ohio. Filed Nov. 28, 1919. Serial No. 341,091. 2 Claims. (Cl. 5—41.)

1. The combination of means for holding a folded chair in place under a bed, comprising rods attached to the bed ends and arranged lengthwise of said bed, a bracket mounted on said rods, an arm pivoted about one end of said bracket and a spring attached at one end to said bracket and arranged to put pressure on said arm for causing said arm to support said folded chair, and a lever for releasing said chair holding means for allowing said chair to be unfolded for use.

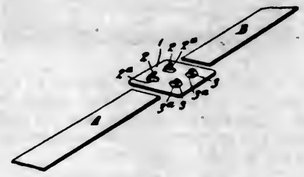
1,348,482. CAR-END REINFORCEMENT. JAMES M. COLEMAN, Montreal, Quebec, Canada, assignor of one-fourth to James W. Coleman, Montreal, Canada. Filed Aug. 26, 1918. Serial No. 251,465. 9 Claims. (Cl. 105—411.)



1. An inside end stiffener for box cars located above and separate from the under frame comprising a one piece compression member arched away from the car end in its central portion and connected to the car end toward its extremities.

1,348,483. REINFORCED CONCRETE CONSTRUCTION. WILLIAM CHARLES DAVIS, Melbourne, Victoria, Australia. Filed Sept. 27, 1917. Serial No. 193,493. 1 Claim. (Cl. 72—85.)

A structure of the class described comprising a framework of longitudinal rods or the like and stay rods therefor, said framework being made in sections, posts inserted between adjacent sections said posts comprising a central rod and a cylindrical wire netting inclosure therefor, said netting being provided with slits for receiving the ends of said longitudinal rods and all of said parts being incased in cement.

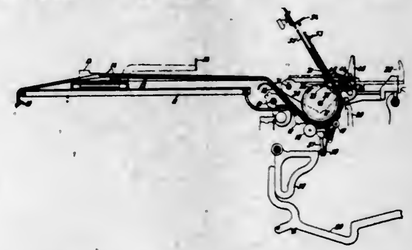


1,348,484. CAN-OPENER. MAE S. DICKSON, Hubbard Woods, Ill. Filed Jan. 26, 1920. Serial No. 353,918. 1 Claim. (Cl. 30—3.)

A can opener of the type described, the combination of a bearing plate carrying guiding and opening means, a stem connected centrally at the mid-length of said plate, and a longitudinally extending hand grip connected at its mid-length to said stem to afford finger grips at each side of the stem, the forward end of the hand grip having a pointed formation.

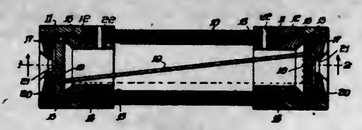
1,348,485. KEY-LOCK BOX-STRAP FASTENER. EMIL DIETZE, Brooklyn, N. Y., assignor to American Casting and Manufacturing Corporation, Brooklyn, N. Y., a Corporation of New York. Filed Aug. 7, 1918. Serial No. 248,796. 1 Claim. (Cl. 24—23.)

A box strap arrangement, comprising a metal strap with overlapping ends and a seal plate by which the strap ends are secured together, having a substantially flat portion unobstructed by projections on its longitudinal central line, on which portion the strap ends rest, said portion having integral struck-up lips alongside of and in contact with the side edges of the strap ends, and having also openings below the said lips where the latter have been struck out, a portion of the strap ends adjoining and in contact with th aforesaid lips overlying the said openings



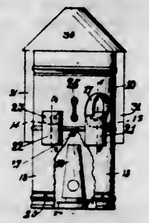
and adapted to be bent so as to lie in the said openings with the lips in close clamping engagement with the exposed surfaces of the bent portions of the strap ends, and said bent portions occupying the said openings out of which the lips have been taken, substantially as described.

1,348,486. COMBUSTION-CHAMBER. PHILIP D'H. DRESSLER, Zanesville, Ohio, assignor to American Dressler Tunnel Kilns, Inc., New York, N. Y., a Corporation of New York. Filed Nov. 20, 1919. Serial No. 339,488. 4 Claims. (Cl. 25—132.)



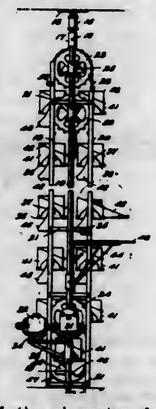
1. In a tunnel kiln, a combustion chamber having its walls formed of sections of refractory material separated by joints transverse to the length of the sections and having shoulders which overlap at the joints to an extent greater than the separation of the sections resulting from normal changes in the kiln chamber and having the overlapping surfaces of the shoulders similarly inclined to the longitudinal axis of the chamber.

1,348,487. TYPEWRITING-MACHINE. JULIUS DUCKSTINE, New York, N. Y., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Aug. 10, 1918. Serial No. 249,222. 26 Claims. (Cl. 197—126.)



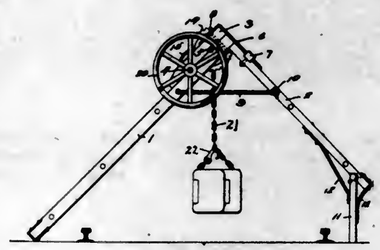
1. In a typewriting machine, the combination with a platen, of a frame on which said platen is journaled, a second frame upon which the first frame is hinged to swing upwardly and rearwardly out of working position, and a system of line-spacing mechanism carried upon said swinging frame.

1,348,488. FUSE. ALFRED L. EUSTICE, Chicago, Ill. Filed May 16, 1918. Serial No. 234,859. 5 Claims. (Cl. 200—132.)



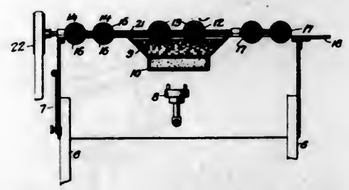
4. In an electric fuse, the combination of a shell, and a closure therefor including a ferrule fitting the outside of the shell, and a sleeve threaded into the shell for preventing shrinkage of the latter and provided with means for holding the ferrule on the shell.

1,348,489. NON-FREEZABLE WATERING DEVICE. CHESTER C. FIFIELD, Des Moines, Iowa. Filed Feb. 10, 1919. Serial No. 276,205. 5 Claims. (Cl. 119—73.)



5. In a device of the class described, a tank, a trough mounted thereon and adapted to be filled therefrom, a heating chamber formed below said tank, adapted to receive a heating device adjacent to the bottom thereof, a shield and heat retaining member extended downwardly from the upper edges of the trough to position spaced below the top of the chamber, said shield being shaped to form an air passage with an outlet opening adjacent to its upper portion and an inlet opening at the bottom thereof, a cover member disposed above the tank and adapted to form a warm air chamber above the tank, means for forming a conducting passageway down the side of the tank, the upper end of which communicates with the warm air chamber and the lower end being open, and means for permitting the hot air in the heating chamber to enter said shield and said conducting passageway at points spaced upwardly from the bottom thereof.

1,348,490. STORING AND DELIVERING APPARATUS. EDWIN R. GILL, Yonkers, N. Y. Filed July 22, 1916. Serial No. 110,664. 4 Claims. (Cl. 45—3.)

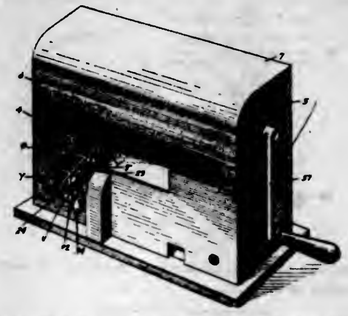


1. In a device of the character described, sprocket wheels arranged over each other, chains on said wheels, and motive means for said wheels and chains; in combination with carriers pivotally suspended from said chains, a fixed stop, and steadying plates on said carriers each having an edge adapted to slide on said stop and suitably shaped to preserve the horizontal position of the carriers during the first portion of the movement over one end of the device.

1,348,491. DRAW-BAR LIFTER AND HOLDER. ARLE GRIGSBY, Olney, Ill., assignor of one-half to John Lynch, Olney, Ill. Filed Aug. 13, 1919. Serial No. 317,257. 1 Claim. (Cl. 254—145.)

In a drawbar lifter and holder, the combination of a plurality of supporting frames disposed at an inclination to each other, means for rigidly but detachably securing said frames one to the other at their upper ends said means including metal straps projecting beyond one of the frames, a winch mounted on the upper end of one of the frames, means for manually operating said winch, and uprights to which the lower end of one of the supporting frames is secured, whereby to raise the apparatus sufficiently to permit a truck to be run under the frame without the supporting frames projecting much beyond the rails of the railroad track.

1,348,492. STOPPING-OUT MACHINE FOR ELECTROTYPERS. PATRICK F. HAGGERTY, New York, N. Y. Filed Jan. 10, 1920. Serial No. 350,683. 5 Claims. (Cl. 91—51.)



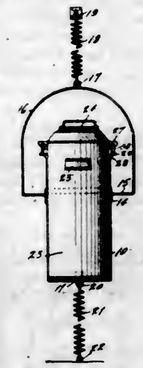
1. In a stopping out machine for electrotypers, the combination of a frame supporting a pan adapted to contain a liquefied non-conductive substance, rollers journaled on the edge of the pan and adapted to carry the non-canductive substance, feeding rollers, and means for heating the pan and the feeding rollers.

1,348,493. ENVELOP SEALING AND STAMPING MACHINE. IRVING HINERFELD, New York, N. Y. Filed Apr. 21, 1919. Serial No. 291,694. 14 Claims. (Cl. 216—3.)

2. Mechanism of the character described embodying means for sealing and stamping an envelop, means for selectively feeding one of a plurality of strips of stamps

of different denominations into a position to be applied to the envelop, and means for severing the stamp to be

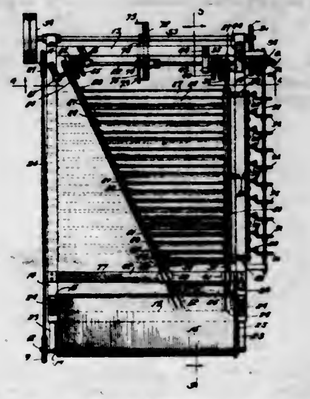
applied from a strip of which it forms a part and simultaneously moistening said stamp.



1,348,494. PROCESS OF TREATING LIME. ABRAHAM E. HORN, New York, N. Y. Filed June 12, 1919, Serial No. 303,590. Renewed June 28, 1920. Serial No. 392,512. 7 Claims. (Cl. 106—27.)

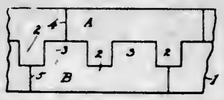
1. The process of treating lime which comprises reacting on quick lime with water sufficient in quantity to produce a dry powder and in adding a fatty acid before hydration is completed.

1,348,495. PHOSPHATIC FERTILIZER AND ART OF MANUFACTURING THE SAME. CARLTON C. JAMES, Honolulu, Hawaii. Filed May 28, 1917. Serial No. 171,575. 17 Claims. (Cl. 71—7.)



17. As a new manufacture the above-described pulverulent phosphatic fertilizer in which phosphoric acid appears principally as a di-calcium phosphate.

1,348,496. CHURNING DEVICE. HERBERT W. JESTER, Dallas, Tex. Filed Oct. 20, 1919. Serial No. 331,904. 2 Claims. (Cl. 259—91.)



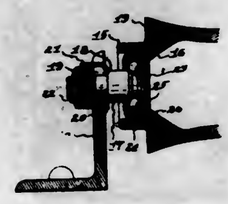
1. In a churning device; a carrier including a substantially U-shaped element, a base bar secured to the bottom of the U-shaped element and extending transversely thereof and having one end bent upwardly to form a stop, a U-shaped guard band secured to the U-shaped element and extending transversely thereof toward the stop; a can removably mounted within the carrier; keepers secured to the can; pivoted elements carried by the U-shaped element to engage the keepers and draw them downwardly; an inverted U-shaped bail substantially larger than the can and connected with the U-shaped element; a removable cover for the can; a spring connected with the bail; and a second spring connected with the U-shaped element.

1,348,497. TOBACCO-LEAF STRETCHING AND SIZING MACHINE. BENJAMIN J. KAHN, Elizabeth, N. J. Filed July 26, 1918. Serial No. 246,812. 1 Claim. (Cl. 131—60.)

In a machine of the class described, having means for feeding along tobacco leaves of varying lengths and stretching said leaves, and means for receiving from said feeding means leaves of respective predetermined lengths and delivering the same to locations selected therefor, whereby the leaves become stretched and sized and the leaves of the respective predetermined sizes collected together, the combination of means whereby the mechanism for feeding along the tobacco leaves is moved intermittently.

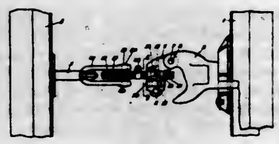
1,348,498. ROOFING. CHARLES L. KELLER, Wyoming, Ohio. Filed Sept. 22, 1919. Serial No. 325,340. 3 Claims. (Cl. 108—7.)

1. That method of cutting out strip shingles for use on a roof which consists in cutting a median line through a piece of roofing material, said line leaving alternate extensions from the material at each side of the cut, and in cross cutting the material into sections or units by staggered lines intersecting the spaces between extensions intermediate the walls of said extensions.



1,348,499. MESSAGE-METER DEVICE. HENRY H. KNIPE, Olney, Ill. Filed Aug. 28, 1919. Serial No. 320,512. 2 Claims. (Cl. 120—1.)

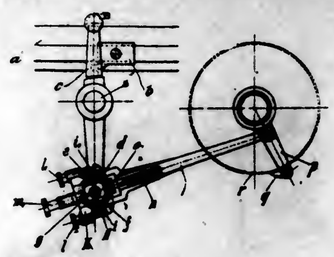
1. As a new article of manufacture, a metal holder of the type described comprising a narrow base plate suit-



able for holding a pad, a raised platform at one end of the plate, upstanding plate portions at the rear of the raised platform said portions being shaped to receive a clock, and a spring secured to the rear of the aforesaid platform and releasably holding the clock in place.

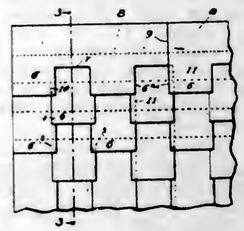
1,348,500. GRAVITY-CARRIER. CHARLES HENRY LISTER, North St. Paul, Minn. Filed May 6, 1918. Serial No. 232,881. 3 Claims. (Cl. 64—36.)

2. A mounting for a conveyer roller comprising a stud adapted to extend through an aperture in a support, said stud being formed with an annular shoulder projecting inwardly from the support, means for locking the stud in the support, a roller formed with a hollow boss at each end, said boss inclosing a socket symmetrically converging toward its inner extremity, an annular ball race upon the inner end of the stud within said socket, a series of balls in said race, and a pair of annular ball retainers arranged one about the other with the outer retainer formed to fit said socket and rotate therein.



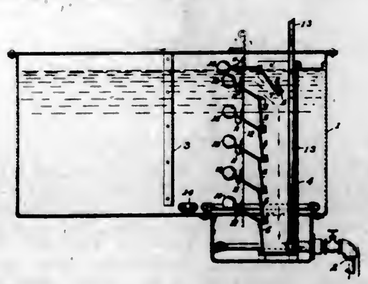
1,348,501. CAR-COUPLING. BURNS D. LOCKWOOD, Bellevue, and GEORGE A. SUCKFIELD, Avalon, Pa., assignors to Pressed Steel Car Company, Pittsburgh, Pa., a Corporation of New Jersey. Filed Dec. 3, 1917. Serial No. 205,069. 3 Claims. (Cl. 213—65.)

1. The combination with a coupler of a knuckle removably secured to said coupler, one end of said knuckle comprising spaced portions, a member extending between and secured to said portions, a block between said portions, trunnions on said block, one of said trunnions being loosely mounted in said knuckle and the other of said trunnions being loosely mounted in said member, and an adjusting member having one of its end portions mounted in said block.



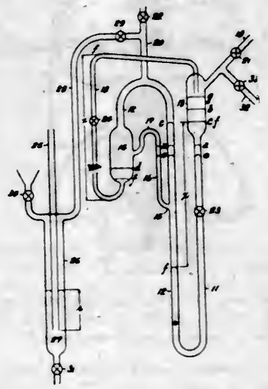
1,348,502. MACHINE-TOOL. JOHANNES LOOSE, Cannstatt-Stuttgart, Germany, assignor to Fortuna-Werke, Specialmaschinenfabrik, G. M. B. H., Cannstatt-Stuttgart, Germany. Filed Sept. 11, 1917. Serial No. 190,764. 4 Claims. (Cl. 51—4.)

1. In a machine tool in combination, a reciprocating table, two stops on said table, a tool feed ratchet gear and a connecting rod connected to it and having a substantially rectilinear motion, two stops on said connecting rod, a double-armed lever adapted to coöperate with either one or the other of said stops to give rectilinear motion



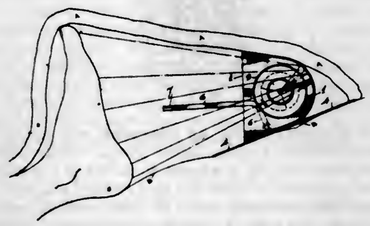
to said rod and means influenced by the stops on said table for reversing said lever.

1,348,503. SHINGLE. ALAN R. LUKENS, Jr., Wyoming, Ohio. Filed Sept. 13, 1919. Serial No. 323,548. 4 Claims. (Cl. 108—7.)



1. A strip shingle unit, adapted for obtaining varieties in panel-like and interlaced effects when laid in overlapping courses without exposure of the roof foundation beneath, said units abutting each other lengthwise of the courses, which unit comprises a body portion having at least one extension projecting laterally therefrom and at least one space along the body portion free of such projection, said extension and space being of different relative widths and the space being of sufficient width to form a panel-like exposure having a substantial body as distinguishable from the lines surrounding it, whereby the bounding line of spaces and projections in a roof laid from such units, will form a continuous line of broken outline transverse the courses.

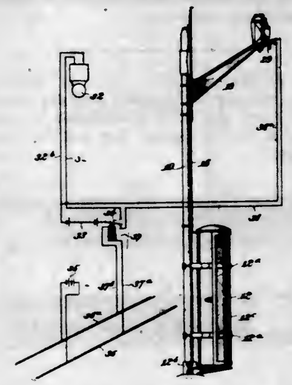
1,348,504. OIL-PUMP TRUNK. GEORGE R. MCDONALD, Berkeley, Calif. Filed Dec. 3, 1918. Serial No. 265,166. 5 Claims. (Cl. 257—198.)



1. An apparatus of the class described comprising a receptacle, a pumping trunk therein, a heating pipe in the receptacle, and movable gates on the side of the trunk whereby the material delivered to the pump by the trunk will always be taken from the upper layers of the fluid in the receptacle.

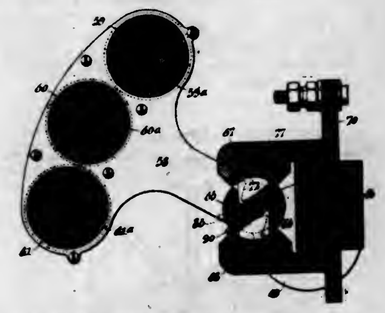
1,348,505. AUTOMATIC VALVE. OTTO MAASS, Montreal, Quebec, Canada. Filed Apr. 15, 1918. Serial No. 228,732. 20 Claims. (Cl. 137—111.)

1. In a device of the character described, high and low pressure conduits, a connection therebetween and liquid means for automatically and intermittently closing the connection between said conduits.



1,348,506. FOOT-WARMER. JOSÉ A. MATA, Berkeley, Calif. Filed Nov. 25, 1919. Serial No. 342,020. 1 Claim. (Cl. 219—45.)

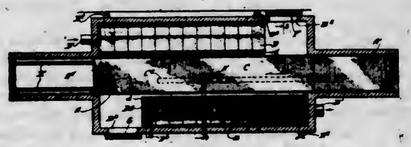
A foot warmer comprising a housing open on one side thereof; lateral supports secured to the lower portion of the housing to retain the open portion thereof in operative position; an electric switch socket mounted in one end of the housing; a lamp mounted within said socket and extending into the housing; and a switch operating lever operatively connected to the socket and extending laterally to the housing and beyond the open side thereof whereby said switch may be operated by foot pressure to extinguish or light the lamp.



1,348,507. RAILROAD-CROSSING WARNING-SIGNAL. ELOF HERMAN MEDÉN, Elizabeth, N. J., assignor to A. G. A. Railway Light & Signal Co., Inc., Elizabeth, N. J., a Corporation of New Jersey. Filed Jan. 4, 1917. Serial No. 140,554. 22 Claims. (Cl. 246—130.)

1. As a means for warning traffic, mechanism adapted to produce light signals and illumination in the path of traffic travel, said mechanism comprising a fixedly-positioned legend-bearing sign, and means associated with the sign support for illuminating the sign and for giving a signal of precaution in the direction of approaching traffic, said means including a light-ray projecting device positioned opposite to and having a lens adapted to project light rays directly on the sign to illuminate it, said device also having a light-concentrating lens facing the direction of approaching traffic, a gas burner within said device and positioned to coöperate with both lenses to produce con-

current precautionary signaling and sign illumination, and means controllable from a remote point for controlling the activity of the light signals.



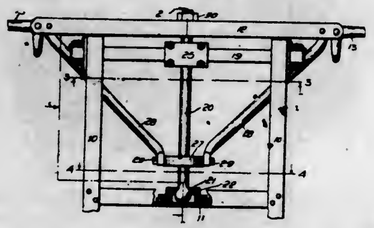
1,348,508. RAILWAY SIGNALING DEVICE. ELOF H. MEDÉN, Elizabeth, N. J., assignor, by mesne assignments, to A. G. A. Railway Light & Signal Co., Inc., Elizabeth, N. J., a Corporation of New Jersey. Filed Feb. 15, 1918. Serial No. 217,299. 10 Claims. (Cl. 246—53.)

7. In a railway signaling device, the combination of a plurality of electro-magnets, rotatable armatures for said magnets, means for causing the said armatures to rotate together, the said means permitting relative rotation of said armatures, and a signal member secured to one of said armatures and rotating therewith.

1,348,509. [WITHDRAWN.]

1,348,510. TUNNEL-KILN. PAUL A. MEEHAN, New Castle, Pa., assignor to American Dressler Tunnel Kilns, Inc., New York, N. Y., a Corporation of New York. Filed Dec. 5, 1919. Serial No. 342,723. 18 Claims. (Cl. 25—142.)

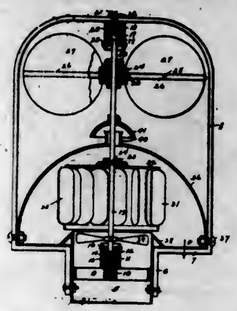
1. In a kiln, the combination with a kiln chamber having a ware inlet and egress port and means for maintain-



ing a high temperature zone displaced longitudinally of the kiln from said port, of a carrier adapted to reciprocate in said kiln to alternately carry ware back and forth between said port and said zone.

1,348,511. TUNNEL-KILN. PAUL A. MEEHAN, New Castle, Pa., assignor to American Dressler Tunnel Kilns, Inc., New York, N. Y., a Corporation of New York. Filed Dec. 5, 1919. Serial No. 342,724. 6 Claims. (Cl. 25—142.)

1. A combustion chamber structure for kiln heating provided at one end with air and fuel inlets and an outlet for products of combustion, and formed internally with two passages or chambers extending longitudinally of the structure and communicating, one with said inlets and the other with said outlets at the one end of the structure, and in communication with one another at the opposite end of the structure.

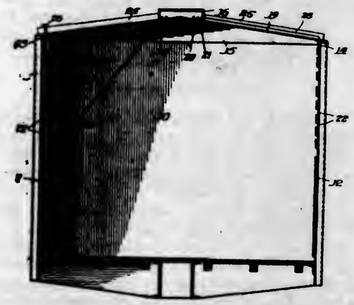


1,348,512. FRONT-END SUSPENSION STRUCTURE FOR SELF-PROPELLED VEHICLES. CLAUD E. MILLS, Des Moines, Iowa. Filed July 16, 1919. Serial No. 311,376. 3 Claims. (Cl. 280—112.)

1. In a device of the class described; a frame; a front axle adjacent thereto, a rod secured to said front axle and extending longitudinally of said frame, and connected with said frame by means of a universal joint, a spring supported on said frame, said rod being operatively connected with said spring between said axle and said universal joint, a collar on said rod between said spring and said universal joint, and a brace rod extending from said collar to said axle on opposite sides of said rod.

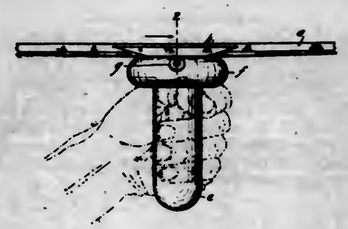
1,348,513. VENTILATOR. WORTHIE W. MOREY, Columbus, Ohio. Filed Aug. 25, 1919. Serial No. 319,545. 5 Claims. (Cl. 98—2.)

3. A ventilator comprising a stem, a weather-hood of inverted bowl shape and of considerably greater diameter than the stem, overlying said stem and having its lower edge disposed below the level of the top of the stem, a centrifugal fan of inverted cup shape disposed above the mouth of the stem the hollow interior thereof receiving the air from said stem, said fan comprising blades which eject the air from the interior thereof to the interior of the weather-hood, the curved walls of the latter deflecting said air downwardly and out of the space between the stem and the lower part of the weather-hood, an axially acting



fan within the stem, for directing air into the interior of the centrifugal fan, a spindle by which both of said fans are carried, and a propeller upon said spindle.

1,348,514. THERMAL CIRCUIT-CONTROLLER. NAGAKATA NISHI and NAGASUMI NISHI, Berkeley, Calif. Filed Jan. 11, 1919. Serial No. 270,728. 14 Claims. (Cl. 200—139.)

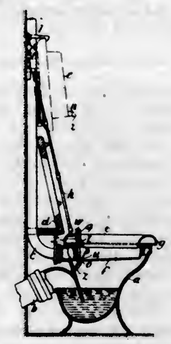


9. In an electric iron, an expansible and contractible stud mounted on the base of the iron, a contact mounted on said stud, an arm, a contact on said arm for engaging said other contact to close the iron circuit, and means for automatically swinging said arm and breaking said contacts when the iron reaches a predetermined degree of heat.

1,348,515. RAILWAY-CAR. SPENCER OTIS, Chicago, Ill., assignor to National Dump Car Company, a Corporation of Maine. Filed Mar. 29, 1918. Serial No. 225,401. 8 Claims. (Cl. 105—377.)

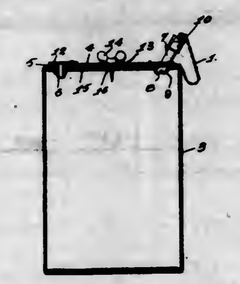
1. In a railway car having a permanent roof, the combination of a roof frame member, and a door pivotally connected thereto for a downward movement into the car whereby the car may be loaded.

1,348,516. RESILIENT SUPPORT FOR PLASTERERS' HAWKS. ERNEST J. PECK, Portland, Oreg. Filed Mar. 25, 1920. Serial No. 368,772. 4 Claims. (Cl. 72—136.)



1. A hand-cushion for hawks consisting of an annular hollow body provided with a valve for inflation, said valve being located in a plane oblique to the horizontal for the purpose specified.

1,348,517. REMOVABLE SELF-HOLDING WASHER FOR CLOCK-MOVEMENTS. WILSON E. PORTER, New Haven, Conn., assignor to New Haven Clock Co., New Haven, Conn., a Corporation. Filed Sept. 6, 1919. Serial No. 322,021. 1 Claim. (Cl. 85—8.)



In a clock-movement, the combination with a stud having a peripheral groove, of a removable self-holding washer having a central opening large enough to permit it to be passed over the said stud and registered with the said groove, and the said washer having a weakening-notch in its outer edge and a radial opening-and-closing notch intersecting its outer edge and the said opening, whereby the said washer may be closed for the entrance of the edges of its said opening into the said groove.

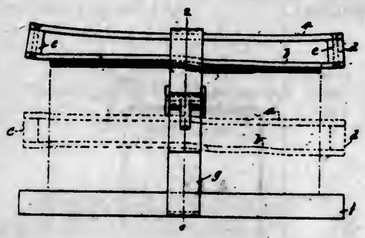
1,348,518. BIDET. DAVID ALEXANDROVITCH RUFFMAN, Hyde Park, London, England. Filed Jan. 18, 1919. Serial No. 271,836. 7 Claims. (Cl. 4—25.)

1. A bidet designed for use in connection with a water closet comprising a basin and a hollow rim which latter forms the seat of the bidet and into which hollow rim the water is introduced, the basin of the said bidet being provided with a discharge nozzle through which the contents of the bidet can be discharged into the water closet pan.

1,348,519. COMBINED CAN-OPENER, COVER, AND DISPENSER. WILLIAM F. SIMMONS, St. Louis, Mo. Filed July 19, 1919. Serial No. 312,099. 1 Claim. (Cl. 221—23.)

A combined can opener, cover and dispenser comprising a plate, a tubular member provided with a cutting edge secured to one end of said plate and answering as a punch for perforating the end of a can and also as a vent for dispensing the contents thereof, a cover plate pivotally secured to the plate and adapted to open and close said tubular member, a straight and inclined tubular pouring member mounted in the opposite end of said plate and having its lower end slitted, a cap adapted to be mounted on the end of the said pouring member, a flexible connection between said cap and plate, a gasket mounted on said tubular members, and a thumb screw mounted in the plate between said tubular members and adapted to be screw seated in an opening formed through the end of the can for securing the device to the can.

1,348,520. GAME. WILLIAM I. SMITH, Oak Park, and JAMES R. IRVIN, Chicago, Ill. Filed Aug. 16, 1919. Serial No. 317,984. 7 Claims. (Cl. 46—41.)

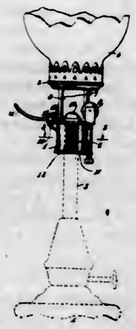


3. In a game, the combination with a rectangular body including a bottom wall, a pair of longitudinal side walls, a pair of end walls, and a transparent top wall, a goal carried by the bottom wall and engaging one of the end walls and arranged in spaced relation to the longitudinal side walls, said goal having an entrance opening formed therein opposite to the end wall of the body engaged by the goal, upstanding plates arranged adjacent to the entrance opening, and a third plate arranged in front of the entrance opening in angular relation to the first named plates.

1,348,521. PRESS-BOARD FOR STACKS OF SOLES. JOHN A. STONE, Derry, N. H., assignor to Irving L. Keith, Haverhill, Mass. Filed June 23, 1919. Serial No. 306,126. 3 Claims. (Cl. 100—57.)

1. A pressing device for the purpose described, comprising a pair of resilient boards disposed in parallelism

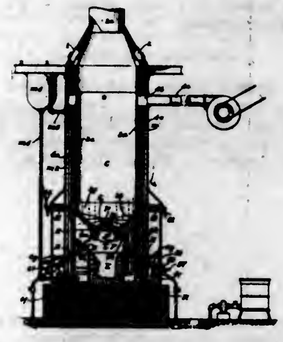
and spacing devices disposed between said boards, at their ends, to hold them in spaced relation and to permit them



to be flexed toward each other, at points between said spacing devices.

1,348,522. SPRING-TIRE. MARTIN O. SWEIVEN, Olivia, Minn. Filed Nov. 14, 1918. Serial No. 262,565. 3 Claims. (Cl. 152—37.)

1. A tire comprising an annular tread section, a separate laterally expansible rim-engaging section adapted to seat upon the usual channeled rim, and to support said tread section in movable relation thereto, means for laterally expanding said rim-engaging section to secure it upon the rim, and cushioning means disposed between and connected to said tread section and rim-engaging section for controlling the relative movement of said tread section and rim-engaging section and being effective to transversely contract the latter when said expanding means is released.

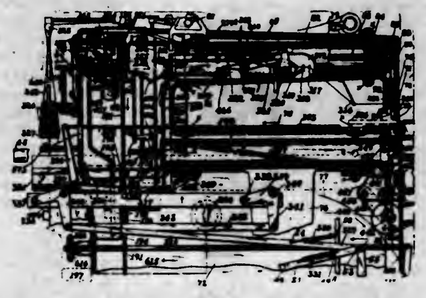


1,348,523. LAMP. EMILE VIOLLET, Paris, France. Filed Feb. 3, 1919. Serial No. 274,831. 6 Claims. (Cl. 67—13.)

1. In a lamp, the combination of a support slidable vertically upon the burner tube, a chimney socket fixed to said slidable support, and a spring clamp having side projecting members for the operation thereof mounted in said support and adapted to engage the burner tube and hold the support in adjusted position.

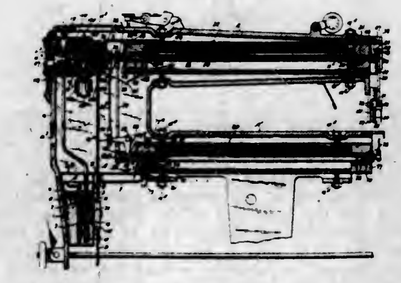
1,348,524. [WITHDRAWN.]

1,348,525. SMELTING-FURNACE. RANDOLPH G. WARD, New York, N. Y., assignor to Independent Mines Smelting Company, Inc., New York, N. Y., a Corporation of Delaware. Filed June 19, 1918. Serial No. 240,860. 59 Claims. (Cl. 263—27.)



31. In a smelting-furnace of the character described, in combination, an upper charge-chamber; a lower combustion chamber; a horizontally-disposed furnace-hearth interposed between said upper and lower chambers, consisting of an annular charge-supporting and transversely-curved metal-surface, constituting a hearth-wall, located in substantial coincidence with symmetrically and oppositely disposed arcs, and having between them a hearth-opening, said wall also having a narrow inner zone tangential to a line which substantially coincides with the normal angle-of-repose of the material resting thereon.

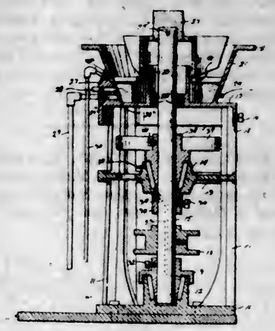
1,348,526. SEWING-MACHINE AND CUTTING MECHANISM THEREFOR. JOHN PETER WEIS, Nyack, N. Y., assignor, by mesne assignments, of one-half to Metropolitan Sewing Machine Corporation, Nyack, N. Y., a Corporation of Delaware. Filed Oct. 16, 1914, Serial No. 867,005. Renewed Dec. 24, 1919. Serial No. 347,189. 95 Claims. (Cl. 112—2.)



1. The combination in a machine having a pattern-cam control, of a main shaft; a fly and driving wheel loose on the shaft, the wheel having a laterally-projecting rim; a spider fixed on the shaft and located within said rim, the spider being provided with spring plates for engaging said rim; clutch-levers pivotally mounted on the spider and constructed to engage the spring-plates; a slidable member on the shaft constructed to engage and disengage the levers; means for moving said member, such means comprising a rockable starting-post; trolley rails and link connections operatively connected with the starting post; a cam mechanism for raising and lowering the trolley rails; operative connections between the latter and the trolley rails; an implement-carrying head; a pattern cam; operative connections between the pattern cam and the

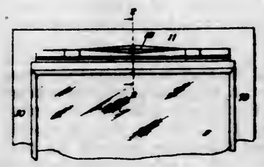
implement-carrying head, for moving the latter; and a stop mechanism under the control of the trolley rail and

constructed and operating to arrest the operation of the implement carried by said head.



1,348,527. LUBRICATING SYSTEM AND SEWING-MACHINE CONSTRUCTION. JOHN PETER WEIS, Nyack, N. Y., assignor of one-half to Metropolitan Sewing Machine Corporation, Nyack, N. Y., a Corporation of Delaware. Original application filed Oct. 16, 1914, Serial No. 867,005. Divided and this application filed Apr. 29, 1916, Serial No. 94,354. Renewed Dec. 24, 1919. Serial No. 347,190. 11 Claims. (Cl. 112—256.)

1. The combination of a sewing-machine head having lengthwise chambered upper and under arms with a tube fixed in the upper arm chamber; top-shaft bearings for supporting a top shaft in said tube; a tubular top shaft; a tube fixed in the under arm chamber; bearings for supporting a looper shaft in the latter tube; a tubular looper shaft; means operatively connecting the top and looper shafts to secure simultaneous movement of such shafts; a stop motion for the top shaft; a drive pulley; and means for giving endwise movement to the looper shaft; and means for conveying oil to the tubular shafts.



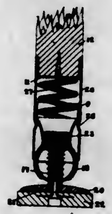
1,348,528. CRUDE-OIL BURNER. JOHN WESTALL, Fall River, Mass. Filed Jan. 14, 1920. Serial No. 351,340. 12 Claims. (Cl. 158—28.)

1. In a burner of the character described, a combined burner plate and oil chamber having a centrally disposed shaft opening, a series of air inlet openings arranged around the shaft opening, an upstanding wall exteriorly of the air openings, a shaft extending upward through the burner plate, a breaker and mixer mounted upon the shaft and having blades disposed above the bottom of the burner plate and oil chamber, means for rotating the shaft,

and means for discharging oil within the oil chamber and carrying off overflow therefrom.

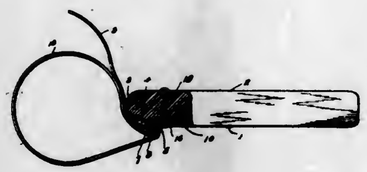
1,348,529. METAL-FRAME CONSTRUCTION. CHARLES O. WHITNELL, Des Moines, Iowa. Filed July 8, 1919. Serial No. 309,408. 2 Claims. (Cl. 108—16.)

1. In a sheet metal window frame; a substantially flat flashing, having at its inner edge a frame member bent to stand at right-angles with relation to the flashing, said flashing and frame member having an upwardly inclined rib between their ends along their line of junction, said rib being tapered from its central portion toward its ends.



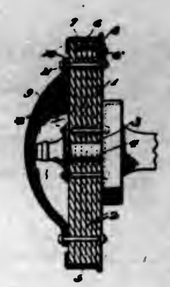
1,348,530. ELECTRODE-HOLDER. THOMAS WILLARD, San Bruno, Calif. Filed July 25, 1919. Serial No. 313,929. 3 Claims. (Cl. 219—8.)

2. An electrode holder for electric welding comprising an insulated member having a metallic cap on one end



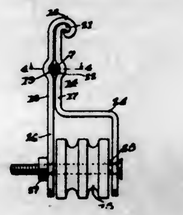
thereof; a threaded metallic rod slidably mounted within said member and cap and having a metallic head on the outer end thereof; means for connecting a metallic conductor to the other end of the rod; and insulated means rotatably mounted upon the insulated member and engaging the threaded portion of the rod whereby rotation of said insulated means will move the rod longitudinally within the insulated member to engage and retain an electrode between the head and metallic cap.

1,348,531. FOOT FOR CRUTCHES, WALKING-STICKS, LADDERS, AND THE LIKE. HARRY HENVILLE AMADIO, Redfern, near Sydney, New South Wales, Australia. Filed June 3, 1919. Serial No. 301,525. 4 Claims. (Cl. 135—54.)



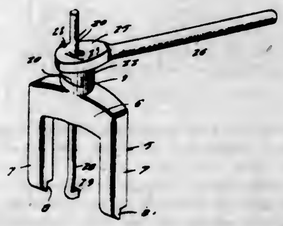
4. A foot of the kind hereinbefore described comprising a shoe member, a socket member, two hemispherical, cup-shaped parts fitting within the socket member, a resilient element urging the cup-shaped parts in opposite directions, a buffer spring interposed between the ball and socket joint and the crutch or other article, a projection on one of said cup-shaped parts, and a stem provided on the cup-shaped part having the projection and extending through an aperture in the other of said parts; the extremity of said stem and the socket member being connected, one to the crutch or other article and the other to the shoe member, while the said projection is adapted to move in a chamber having cushioned walls.

1,348,532. JAR-OPENER. OSCAR ARNDT, Detroit, Mich., assignor of one-half to Roman Arndt, Detroit, Mich. Filed Mar. 22, 1919. Serial No. 284,272. 1 Claim. (Cl. 81—3.1.)



A jar opener comprising a lever, a plate mounted thereon at a point between the ends thereof and carrying at one end a bar which is spaced from the intermediate portion of the plate and at its other end a tooth which is embedded in the material of which the lever is composed, a strap having one end portion inserted between the plate and the lever and the securing device passing transversely through the plate, strap and lever.

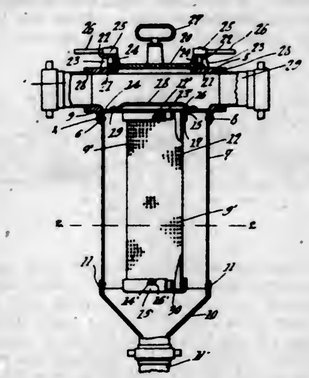
1,348,533. VEHICLE-WHEEL. HARRY N. ATWOOD, Smithfield, N. C., assignor to The Veneer Products Company, Smithfield, N. C. Filed Jan. 23, 1919. Serial No. 272,655. 2 Claims. (Cl. 21—69.)



1. In a vehicle wheel, a body comprising veneer laminæ united face to face, and a face plate also comprising veneer laminæ united face to face, the said face plate being secured at its peripheral portion to the outer face of the body.

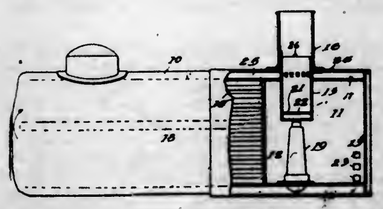
1,348,534. INSULATOR-BRACKET. CHARLES H. BEINE, Kenosha, Wis., assignor of one-half to George C. Brown, Milwaukee, Wis. Filed June 29, 1918. Serial. No. 242,562. 3 Claims. (Cl. 173—321.)

1. A wire support comprising two members, means providing a substantially hinged connection between said members at their upper ends, opposed curved portions in said members providing a wire receiving opening, the lower end of one of the members being substantially straight and the lower end of the other member being directed outwardly and downwardly to provide a space between the lower ends of said members, an insulating member disposed in the space between the lower ends of said members, and common means for securing a wire within the wire receiving opening and the insulating member between the lower ends of said members.



1,348,535. RAIL-BENDER. PEARL M. BIBB, Minden, W. Va. Filed Apr. 18, 1917. Serial No. 162,927. 1 Claim. (Cl. 153—38.)

A rail bender including a substantially U-shaped frame having parallel legs and a relatively thick web, the ends

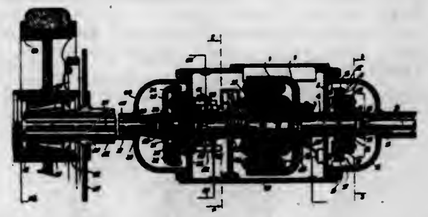


of the legs having one of their side faces provided with alined cutout portions forming shoulders, an enlargement formed on the outer face of the central portion of the web provided with spiral faces, a draw rod slidably mounted in the web portion and enlargement, wedge collar rotatably engaged with the outer face of the enlargement and slidably mounted on the draw rod, a reduced polygonal extension carried by the wedge collar, a handle non-rotatably engaged with the polygonal extension, said draw rod having the lower end thereof bent to provide a hook to cooperate with the shoulders of the legs of the frame, and an adjustable pin carried by the draw rod for engaging the wedge collar and handle, whereby relative movement between the handle, draw rod and wedge is eliminated when the device is in operation, as and for the purpose specified, and whereby the device may be quickly applied to the member to be bent from the side thereof.

1,348,536. MILK-STRAINER. WILLIAM T. BILLINGS and FREMONT SCHRYVER, Ithaca, N. Y. Filed Jan. 19, 1920. Serial No. 352,402. 2 Claims. (Cl. 210—154.)

1. In a straining device, a head, a body portion depending from the head and having a funnel-shaped member connected to the lower end thereof, an annular shoulder formed at the upper end of the body portion, a straining device comprising a relatively long tubular member having laterally extending pins secured adjacent to the upper end thereof, a circular plate resting on the shoulder and having a depending flange, said flange having slots formed therein, said slots adapted to receive the pins of the straining member for removably securing the straining member to the circular plate, and a removable bottom supported on the lower end of the straining member.

1,348,537. SMOKE-CONSUMING DEVICE FOR LOCOMOTIVES. THOMAS K. BISHOP, Powell Station, Tenn. Filed Apr. 12, 1917. Serial No. 161,535. 5 Claims. (Cl. 162—4.)

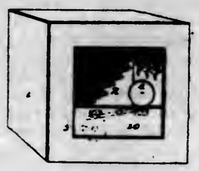


4. The combination with a locomotive boiler and a steam exhaust nozzle therein, of a pipe slidably fitted in the stack of the boiler and having an opening in its lower end and also provided with circumferentially disposed openings formed in the upper portion thereof, the pipe being located above the exhaust nozzle, a shell interiorly of the locomotive boiler to form an annular space, baffle plates arranged longitudinally between the shell and said boiler for dividing the space into upper and lower compartments, said shell having a plurality of openings in said forward end for establishing communication between the smoke box and the lower compartment, a disk mounted in the lower portion of the pipe and having an opening of considerably less size than the opening in the bottom thereof to effect back pressure of steam in the pipe from said steam exhaust nozzle for the automatic raising of the pipe, and a stop for limiting the sliding movement of the pipe.

1,348,538. TANK-MOUNTING. ROBERT FULTON BLAKE, Boston, Mass., assignor to Submarine Signal Company, Portland, Me., a Corporation of Maine. Filed Feb. 9, 1916. Serial No. 77,148. 4 Claims. (Cl. 181—5.)

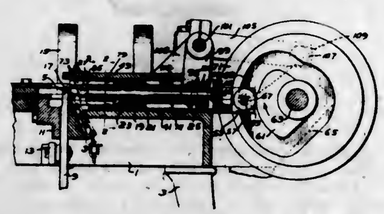
1. Apparatus for submarine signaling comprising a ship's hull, a tank located against the ship's hull, said tank containing a liquid in contact with the ship's hull below the water line, a submarine signaling mechanism located in said liquid whereby said signaling mechanism will be put in good acoustic connection with the water exterior to said ship, and both acoustical and electrical insulating means located between said tank and said ship's hull adapted to prevent liquid leakage from said tank.

1,348,539. ELECTRIC MOTOR. JULIUS M. BREITENBACH, New York, N. Y. Filed Mar. 23, 1917. Serial No. 156,924. 4 Claims. (Cl. 172—36.)



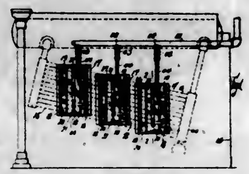
2. In an electric motor, a field magnet and an armature rotating in opposite directions, a casing inclosing the said motor elements, independent drive shafts extending through and having bearings in respective ends of the casing and carrying the field magnet and armature respectively, opposite driven members maintained in axial alinement with the drive shafts, and gearing between each drive shaft and the adjacent driven shaft, one gearing driving its driven shaft in a direction opposite to that of its driving shaft, and gearing housings carried by the casing, the casing and said housings constituting lubricant containers and dust excluding means.

1,348,540. AUTOMATIC SAFETY-TARGET. GEORGE F. BAIGGS, Beaumont, Tex. Filed Apr. 17, 1920. Serial No. 374,652. 9 Claims. (Cl. 124—15.)



1. In a target device, a plurality of targets, each adapted to assume an inoperative and an operative posi-

tion, and means separate from but adapted to be engaged by said targets whereby the movement of one of said



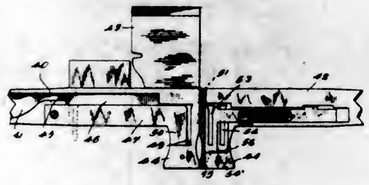
targets from operative to inoperative position causes another of said targets to move from inoperative to operative position.

1,348,541. CHAIN-MAKING MACHINE. EDWIN CHARLES CHRISTIE, St. Catharines, Ontario, Canada, assignor to The Columbus McKinnon Chain Company, Columbus, Ohio, a Corporation of Ohio. Filed Jan. 10, 1919. Serial No. 270,548. 12 Claims. (Cl. 59—16.)

1. In a chain forming machine, the combination of a former, rigid members which are unyielding relative to each other to engage a link blank at opposite sides of a point midway between the ends of the blank, and actuating means for said members to cause the latter firmly to hold the blank against the former.

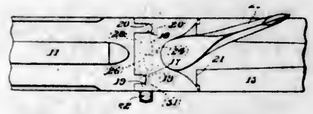
1,348,542. TUBE-CLEANER. CHARLES T. COE, Kearney, N. J., assignor, by mesne assignments, to Diamond Power Specialty Company, Detroit, Mich., a Copartnership composed of Raphael Herman and Samuel J. Herman. Filed June 3, 1911. Serial No. 631,105. 5 Claims. (Cl. 122—392.)

1. In a tube cleaner for a boiler the combination of a supply pipe, a flexible conduit extending from said pipe, an adjustably supported stand pipe connected to the conduit, a ball supported in a bearing on the side of the boiler and an outlet nipple extending from the said stand pipe through said ball, said stand pipe being adapted in its movement to impart longitudinal as well as lateral movement to the outlet nipple.



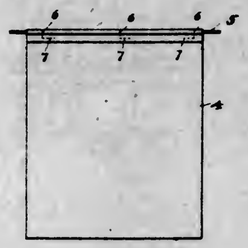
1,348,543. TRAP-GUN. ARTHUR CROCKETT, Kansas City, Mo. Filed June 3, 1919. Serial No. 301,508. 10 Claims. (Cl. 43—84.)

1. A trap gun of the class described comprising a breech, firing mechanism therein including a firing pin and trigger operating bait sustaining means, and a ground support for said gun connected with the mechanism for holding the bait means in accessible position and



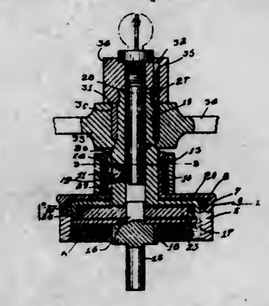
movable to cock the mechanism, said pin being free to move to the support after cocking of said mechanism and without movement of said support in firing the gun.

1,348,544. AUTOMATIC NAILING-HAMMER. JAY CRUMPACKER, McPherson, Kans. Filed Feb. 12, 1920. Serial No. 358,182. 5 Claims. (Cl. 1—45.)



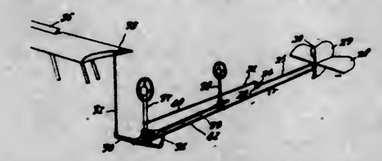
4. In a magazine hammer, a hammer body including a handle and head, said handle having a nail ordering slot therein leading to the head and formed with a lateral terminal part in the head, a trigger plate slidable over the terminal end of the slot and having a nail receiving slot positioned to aline with the terminal slot at one position, a second slot in the head offset from the first and open on the driving face of the head, said trigger plate being movable to aline the nail receiving slot with said discharge slot in the head, means to operate the trigger plate, and means to releasably engage a nail in the head at the outer part of the discharge slot, said trigger having a lug movable to extend across the discharge slot close above a nail engaged by said holding means.

1,348,545. BOLTING MECHANISM FOR GUNS. ARTHUR P. CURTIS, Ithaca, N. Y., assignor to Ithaca Gun Company, Ithaca, N. Y., a Corporation of New York. Filed May 17, 1919. Serial No. 297,812. 4 Claims. (Cl. 42—44.)



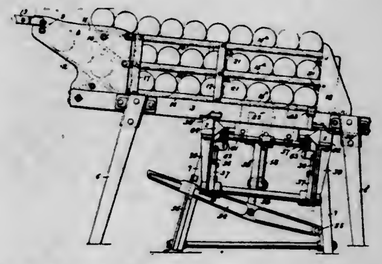
2. In a gun having hingedly connected body and barrel the engaging faces of which are respectively provided with grooves and keeper extensions adapted for reception therein when the gun is closed, one of said extensions having a keeper opening and the other having a keeper recess in axial alinement with said opening, a bolt transversely slidable in said body, positioned in said recess and opening at one extremity of its movement, the said bolt having a side notch adapted for the free movement of one of said extensions therethrough, when the bolt is at the other extremity of its movement with its inner end spaced from the path of travel of the other extension.

1,348,546. CARD-SUSPENDING DEVICE. WILLIAM C. CUTLER, North Glendale, Calif. Filed Mar. 9, 1920. Serial No. 364,561. 4 Claims. (Cl. 40—27.)



1. In a device of the class described in combination with a card and supporting and wearing means for the card, binding means for rigidly tying the card to the supporting and wearing means, and a cover for engaging the binding means and the card so as to prevent a disengaging of the binding means from the card thereby uniformly holding the several parts together.

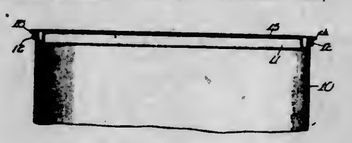
1,348,547. STEERING-WHEEL LOCK. GEORGE R. DAVIDSON, Lenox, Mich. Filed Jan. 14, 1920. Serial No. 351,306. 3 Claims. (Cl. 70—129.)



1. In a steering wheel lock, a supporting ring having connection with the steering column, an extension having connection with the supporting ring and having a lateral opening formed therein, a wheel supporting shank extending through the extension and having an opening in registry with the lateral opening of the extension, means for connecting a steering wheel to the wheel supporting shank, a locking ball disposed within the opening formed in the wheel supporting shank, and lock controlled means for forcing the locking ball into the opening formed in the extension, for locking the wheel supporting shank to the supporting ring.

1,348,548. AEROPLANE CONTROL. VINCENT DE DOMINICIS and FRANK A. REIP, East Orange, N. J. Filed Dec. 20, 1919. Serial No. 346,338. 4 Claims. (Cl. 244—29.)

1. In aeroplane control, the combination of a hollow stick, means whereby said hollow stick may be supported to swing both longitudinally and transversely, connections between said stick and the ailerons and affected only by the transverse swinging of said stick to cause adjustment of the ailerons, connections between said stick and the aeroplane elevators and adapted to be actuated only when the stick is swung longitudinally for raising and lowering the elevators, a steering shaft journaled in said hollow stick, a steering wheel on the stick for turning said shaft, and connections between said shaft and the aeroplane rudder for steering the aeroplane from said stick, said last named connections including a universal joint for allowing the movement of the stick longitudinally and transversely without disturbing the rudder control, substantially as described.

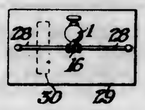


1,348,549. CAN-BOXING MACHINE. HAYWOOD G. DEWEY, Westminster, Md., assignor to The Fred H. Knapp Company, Baltimore, Md., a Corporation of Maryland. Filed Mar. 1, 1916. Serial No. 81,449. 38 Claims. (Cl. 226—15.)

1. In a can boxing machine, the combination of a runway for cans to be boxed, means for ejecting a series of cans from the runway into boxing position comprising a plunger adapted to engage the series of cans, and means for moving said ejecting means whereby a substantially curvilinear movement of the same is converted into a substantially horizontal movement thereof.

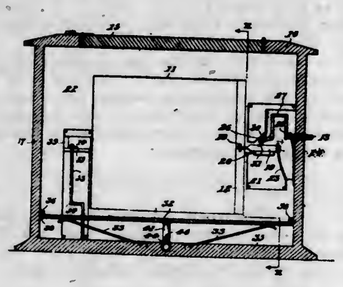
24. In a can boxing machine, the combination of means for supporting a series of cans in position to be boxed, and a box support arranged below said means and spaced therefrom whereby to constitute a guide for positioning the box over the series of cans, and means for moving said box support longitudinally.

1,348,550. CAN. JOSEPH DISTER, Hamilton, Ohio, assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 20, 1917. Serial No. 192,261. 1 Claim. (Cl. 220—42.)



A can body having a pair of opposed friction seat walls extending inwardly from its open end and having the outer of said walls located in contact against the side wall of said body, whereby said wall is strengthened and maintained in undistorted cylindrical form for engagement by a corresponding friction wall of the cover, and a friction cover having a pair of friction seat walls disposed within the said opposed friction seat walls of the body.

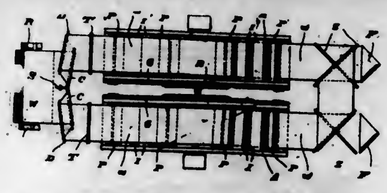
1,348,551. LUBRICATOR. OSSON W. DOOLITTLE, Glenside, Pa. Filed Oct. 8, 1918. Serial No. 257,345. 3 Claims. (Cl. 184—55.)



3. In a lubricator, the combination with a receptacle for lubricant having a screw threaded outlet at the bot-

tom thereof; of a valve body having a vertical tubular branch fitted to said outlet, and two tubular discharge branches; a conical valve chamber in said body, having a port opening from said receptacle; a rotary conical plug valve in said chamber, having a transverse port adapted to register with the port in said valve body, and a valve chamber, extending transversely in said plug valve, in communication with said transverse port; a plunger valve in said transverse valve chamber, free to reciprocate therein; abutments at respectively opposite ends of said transverse valve chamber, each having a lubricant

discharge port, adapted to register with one of said discharge branches; and conduits respectively extending from the opposite branches of said valve body and respectively communicating with opposite ends of the piston chamber in a double acting engine; whereby said plunger valve may be reciprocated to alternately discharge lubricant from said valve body into said conduits, by fluctuations in pressure incident to the operation of said engine, and said plug valve may be turned to close one of said discharge branches while maintaining the other in communication with said vertical branch.

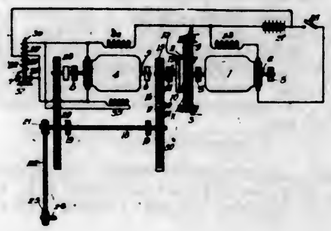


1,348,552. GROCERYMAN'S BOX. FRANK DOSCHEK, Colorado Springs, Colo. Filed Apr. 5, 1919. Serial No. 287,851. 1 Claim. (Cl. 16—101.)

A device of the class described comprising a box having a forward entrance opening, a door for the entrance opening, a bar slidably mounted within the box having a link connection at one of its ends with said door, tensioned means associated with the other end of said bar for normally holding the door in its closed position, a tensioned bell crank lever pivoted within said box adapted to engage the sliding bar to hold the same projected against the tension of the resilient means connected to said bar with the door in its open position and manually operable means for said bell crank lever to release the same from said bar to permit the bar tensioning means to operate said bar and close the door.

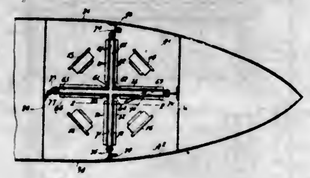
1,348,553. WEB-PRINTING PRESS. ARTHUR E. DOWELL, Washington, D. C. Filed Nov. 20, 1918. Serial No. 263,329. 6 Claims. (Cl. 270—5.)

1. In printing apparatus of the character specified, the combination of two rotary web printing presses arranged side by side; with means for supporting a wide roll of web adjacent one end of the presses, the axis of the web roll being parallel with the axes of the cylinders of the presses; means for slitting the web between the web roll and the presses; and means for separating the sections



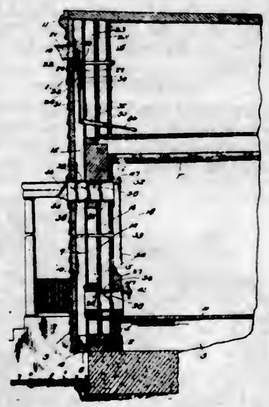
of the web while maintaining the same general direction of movement thereof away from the web roll and directing them to the printing mechanism to be printed thereby.

1,348,554. SAND-GUARD FOR IRRIGATION-DITCHES. ERNEST DRINGMAN, Paxton, Nebr. Filed May 3, 1917. Serial No. 166,195. 9 Claims. (Cl. 61—22.)



1. The combination with the head gate of an irrigation ditch, of a sand guard consisting of an inclined shelf or platform arranged in front of the head gate and extending from one end thereof to the other, said guard having its high end up stream and arranged substantially on the level with the floor or bottom of the head gate.

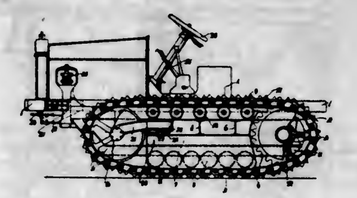
1,348,555. ENGINE STARTER AND GENERATOR. THOMAS R. DU BOIS, Niagara Falls, N. Y., assignor, by mesne assignments, to U. S. Light & Heat Corporation, Niagara Falls, N. Y., a Corporation of New York. Filed Mar. 4, 1915, Serial No. 11,979. Renewed Sept. 10, 1919. Serial No. 322,984. 8 Claims. (Cl. 290—36.)



1. In an engine starter and generator, in combination, a motor and a generator having their respective armatures mounted on separate shafts and having their axes in alinement, an internal combustion engine, a counter-shaft between the axial line of the motor and generator and the axis of the engine crank shaft, power transmitting connections between the crank shaft and said counter-shaft, power transmitting connections between said counter-shaft and the generator shaft, and means whereby said engine may be driven from said motor and automatically operatively disconnected therefrom when the generator rotates at or above a predetermined speed.

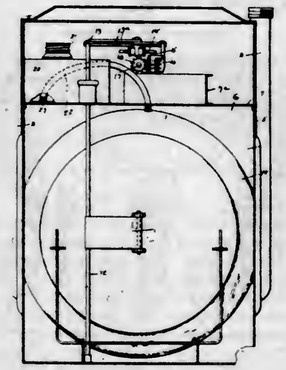
1,348,556. APPARATUS FOR SUBMARINE SIGNALING. REGINALD A. FESSENDEN, Brookline, Mass., assignor to Submarine Signal Company, Portland, Me., a Corporation of Maine. Filed Sept. 7, 1918. Serial No. 253,101. 6 Claims. (Cl. 181—0.5.)

4. A submarine signaling apparatus comprising a fluid tank, a plurality of signaling means located in said tank, and fixed sound screens located to insulate each signaling means from all the others, said plurality of signaling means being separated at a distance from said sound screens and the walls of said tank.



1,348,557. VENTILATING SYSTEM. WILLIAM G. FORCIER, Wollaston, Mass. Filed July 31, 1919. Serial No. 314,405. 3 Claims. (Cl. 98—27.)

1. In building construction, a wall having an outer air space constantly open to the atmosphere at its lower end and normally closed at its upper end, a plurality of dead-air spaces at the inner side of the first-mentioned air space, and upper and lower ventilators in the wall, the upper ventilator extending through the first-mentioned air space and through all the dead-air spaces and the lower ventilator extending through the dead-air spaces and opening into the first-mentioned air space.

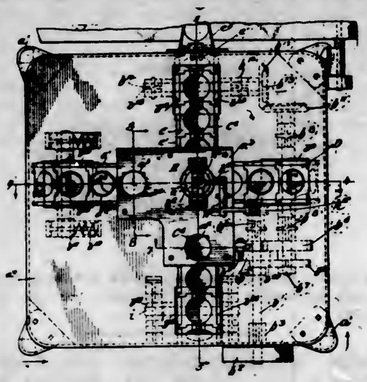


1,348,558. TRACTOR. HENRY GARNER, Moseley, JAMES PARKER GARNER, Birmingham, and WILLIAM JAMES PARKER, Moseley, England; said Parker assignor to said Henry Garner and said James Parker Garner. Filed May 15, 1918. Serial No. 234,766. 8 Claims. (Cl. 180—9.1.)

1. In a tractor the combination of a chassis frame; a pair of track frames pivoted to said chassis frame; a transversely disposed spring member pivoted to the chassis frame and having its extremities connected to the track frames; a pair of guides carried by said chassis frame; and a vertically disposed slide carried by each of said

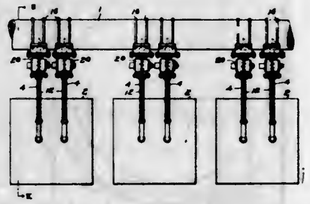
track frames operating in said guides and being connected to said transverse spring member; for the purpose specified.

1,348,559. METER-LUBRICATOR. JOHN M. GOW and FRANK S. DAVIS, Lansing, Mich. Filed Jan. 5, 1917. Serial No. 140,861. 2 Claims. (Cl. 184—64.)



1. In combination, a gas meter having a horizontal partition providing an upper valve chamber and a lower chamber, bellows having oiled leathers or diaphragms located in said lower chamber, a hermetically sealed container located in the valve chamber, arcuate siphon tubes having their intake ends positioned in the container at points in close proximity to the bottom and one side wall thereof and curving upwardly and laterally from said points in the direction of the opposite side wall of the container and passing through said opposite side wall adjacent the top wall of the container, the tubes thence curving downwardly and forwardly and passing through said partition to position their discharge ends in said lower chamber directly above the leathers or diaphragms, and wicks filling said tubes substantially throughout the length thereof and passing beyond the discharge ends of the tubes and contacting with the leathers or diaphragms of the bellows.

1,348,560. CAN-END-LINING MACHINE. CHARLES W. GRAHAM, Crestwood, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Mar. 29, 1916. Serial No. 87,390. 22 Claims. (Cl. 113—80.)

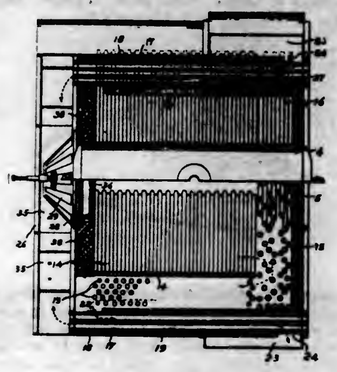


1. In a machine for applying can end liners to the flanges of shouldered can ends, for the production of interfolded hermetic seams with flanged can bodies, in combination: can end feed mechanism and can end liner feed mechanism comprising intermittently movable end-

less belt conveyers moving in horizontal planes one above the other, and having an intersecting station where a can

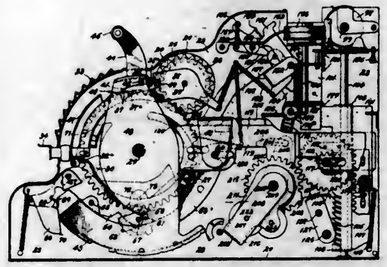
end and a can end liner are brought into assembling position, and means for assembling a can end and a can end liner at the said station.

1,348,561. CONTROLLING PROPORTIONS OF PULVERIZED-FUEL MIXTURE. WILBER E. HARVEY, Glenshaw, Pa. Filed Mar. 7, 1919. Serial No. 281,287. 5 Claims. (Cl. 302—59.)



1. The combination with a main conduit for carrying a flowing stream of combustion-supporting gas having solid combustible particles suspended therein, a burner, and a branch conduit extending from said main conduit to said burner, of an orifice member for abstracting from the main conduit a portion of said stream of gas and particles and delivering said portion to said branch conduit, and means for rendering said orifice member effective to vary the relative quantities of said gas and particles abstracted from the main conduit through the branch conduit.

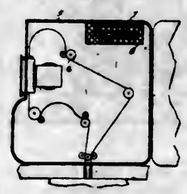
1,348,562. WATER-STOP. ALBERT H. HAUSER, Columbus, Ohio. Filed Sept. 19, 1919. Serial No. 324,768. 1 Claim. (Cl. 251—126.)



The herein described valve or stop for conduits, the same comprising a ring approximating a diagonal section of a tube and having a portion removed from its inner side and adapted to occupy the lowest point, a plate secured to a side of the upper portion of the ring diagonally opposite the cut-away portion thereof, and a leaf secured to the plate, a gate hinged to the leaf and adapted to close against a side of the ring, and a weight on the outer side of the gate.

1,348,563. OIL-BURNING BOILER. ALGERNON S. DE W. HEERSHOFF, Bristol, R. I. Filed July 13, 1917. Serial No. 180,477. 3 Claims. (Cl. 122—236.)

1. In a boiler, the combination of a shell, an upper and a lower compartment, series of inner tubes establishing communication between said compartments, the tubes of each series being in close relation for forming a combustion chamber and passageways for the products of combustion between the combustion chamber and shell, an uptake having an opening for receiving the products of combustion from said passageways of larger cross sectional area adjacent the lower portion of the boiler than at the upper portion of the boiler, and a series of separated water-tubes in the shell between the combustion chamber and uptake.

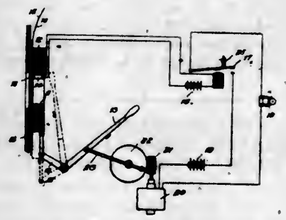


1,348,564. LISTING-ADDER. WILLIAM M. HOLLOWAY, Maywood, Ill., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Apr. 1, 1916. Serial No. 88,264. 11 Claims. (Cl. 235—60.)

1. In a multiple-order calculating machine having registering mechanism, transferring devices and printing mechanism, a forwardly extending individually oscillatable key-lever in each order adjustable in vertical planes, an oscillatable means extending laterally across and common to all the orders of the machine, pivotally supported at each side of the series of said orders and engageable with all set key levers of said orders, for effecting the prime movements of the registering mechanism during one portion of its movements, connected with the printing mechanism for actuating the latter after the said prime movements of the registering mechanism have been effected, and arranged to actuate the transferring devices during another portion of its movements; substantially as specified.

8. The combination of orders of finger key levers, accumulating mechanism which may be set by said key levers, totalising mechanism, printing mechanism including type carriers, and means for actuating the accumulating mechanism and the type carriers according to the setting of said key levers, said totalising mechanism comprising a differential gearing, an element which actuates said differential gearing and whose movement is limited by the position of the accumulating mechanism, and an element which is actuated by the differential gearing and is connected with and actuates said type carriers.

1,348,565. FIRE-EXTINGUISHER FOR MOTION-PICTURE APPARATUS. CHARLES FRANCIS JENKINS, Washington, D. C. Filed Nov. 15, 1917. Serial No. 202,200. 3 Claims. (Cl. 169—26.)



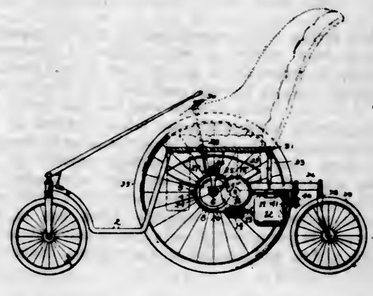
1. A container for fire extinguishing fluid made up of separable parts united, fluid-tight, by material the connecting function of which is destroyed by the relatively low heat of ordinary film combustion within a motion picture machine.

2. A container for fire extinguishing fluid made up of separable parts united, fluid-tight, by material the connecting function of which is destroyed by the relatively low heat of ordinary film combustion within a motion picture machine, said material extending, along the joints, outwardly from the body of the container, whereby it is more quickly affected by combustion.

3. The combination with a container, for fire extinguishing fluid, having discharge apertures below, of outwardly projecting closures for said apertures, a highly combustible band retaining said closures in position, and a metal netting at some distance outside the band to protect the same from contact with other bodies while permitting free access of flame thereto.

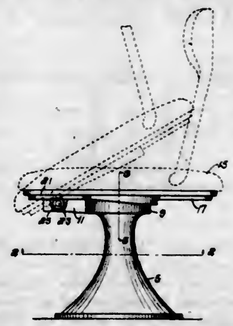
1,348,566. MOTION-PICTURE FRAMING. CHARLES FRANCIS JENKINS, Washington, D. C. Filed Oct. 5, 1918. Serial No. 257,079. 6 Claims. (Cl. 88—17.)

1. The combination with a picture framing member of picture projecting apparatus, of devices responsive to variations of intensity of light and of signal devices controlled by said light responsive devices.



1,348,567. CLOSURE FOR SANITARY CANS. AXEL JOHNSON, Oakland, Calif., assignor to American Can Company, San Francisco, Calif., a Corporation of New Jersey. Filed Feb. 25, 1916. Serial No. 80,487. 2 Claims. (Cl. 220—81.)

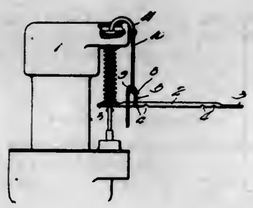
1. A can end for the closure of sanitary cans, having an outwardly projecting flange formed with a curled edge, for the seaming of the can end to the flanged end of a can body, and formed with a shoulder for entering the can body and engaging the interior walls thereof, and a ring liner loose on the under side of said outwardly projecting flange of the can end having its inner edge separated by a clearance space from the said shoulder of the can end,



said loose liner being movably held under the said curled edge of the can end, whereby portions of the liner are prevented from being squeezed between the can end and the interior vertical wall of the can body or forced into the interior of the can.

1,348,568. ELECTRICALLY-PROPELLED VEHICLE. DUSTON KEMBLE, Cortland, Ohio. Filed Mar. 10, 1919. Serial No. 281,827. 12 Claims. (Cl. 180—21.)

1. In an electrically propelled vehicle, an axle, a pair of speed changing gears loosely mounted upon said axle, a clutch member splined to slide upon said axle to engage either gear, a motor and speed-reducing gears adapted to operate said speed-changing gears, a frame journaled on said axle supporting said motor and housing said gears, and means internally of said housing having a controlling device externally of said housing adapted to shift said clutch member, said motor and clutch member being arranged on a central line of said frame and vehicle and said gears being arranged in balanced relation on opposite sides of said central line.

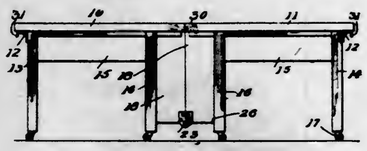


1,348,569. ADJUSTABLE SUPPORT. GEORGE L. KNIGHTS, Amesbury, Mass., assignor to Hodge & Graves Company, Amesbury, Mass., a Corporation of Massachusetts. Filed Dec. 26, 1917. Serial No. 208,762. 6 Claims. (Cl. 155—10.)

1. In a device of the class described, a base, a support swiveled thereon and comprising a split collar having

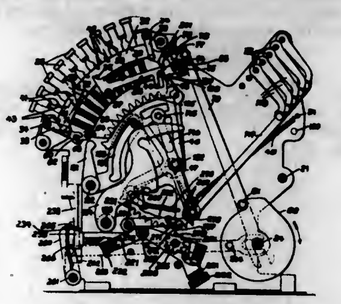
arms, a bottom member hinged to said arms and having associated therewith a cam to press said arms and clamp the collar to the base.

1,348,570. VALVE-SPRING LIFTER. PAUL ALBERT KNIGHT, Baltimore, Md. Filed Sept. 18, 1919. Serial No. 324,460. 1 Claim. (Cl. 29—86.3.)



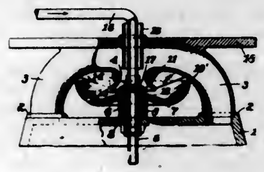
A valve spring lifter comprising an engine engaging member, a chain carried by said member, a triangular link detachably connected to the free end of said chain, a flat metal bar slidable through said link, the intermediate portion of the bar being straight and the ends being enlarged to provide heads which are laterally offset in opposite directions and are slotted to permit them to straddle a valve stem, said bar being further provided in its underside adjacent the offset ends with a plurality of longitudinally spaced transverse grooves to permit said link to be seated therein, whereby when one of the slotted heads is permitted to straddle a valve stem beneath the spring and the other end pushed down, the spring will be lifted.

1,348,571. MANUFACTURE OF FLOOR-COVERING AS A SUBSTITUTE FOR LINOLEUM. JOHANNES HENDRIKUS PHILIPPUS LIGTERINK, Utrecht, Netherlands. Filed Nov. 23, 1918. Serial No. 263,922. 1 Claim. (Cl. 91—68.)



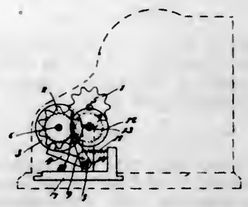
An improved method of manufacturing a floor covering as a substitute for linoleum consisting in adding a fundamental color for the finished product to the paper pulp, in rolling the said paper pulp to the thickness of common linoleum, in treating the surfaces of said rolled product with liquid consisting of equal quantities of boiled and unboiled linseed oil, drying the same, coating both sides of said product with linseed oil, and applying a pattern to one surface of the product.

1,348,572. CONVERTIBLE TABLE-BED. JESSE M. MCGHEE, Estancia, N. Mex. Filed Oct. 30, 1919. Serial No. 334,392. 8 Claims. (Cl. 5—17.)



1. A convertible table bed comprising end sections, hinged sections connecting the end sections, said end and hinged sections having compartments adapted to receive and house bedding, and leaves carried by the end sections adapted to be raised when the latter are extended to expose the bedding and adapted to be lowered to cover the bedding when said sections are brought together and to form the top of the table.

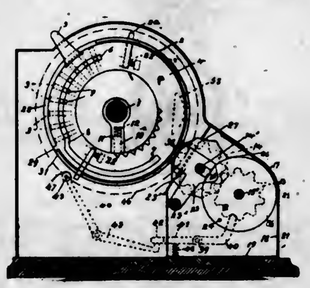
1,348,573. REGISTERING-MACHINE. HAAKON A. MARTIN, Dayton, Ohio, assignor to The National Cash Register Company, Dayton, Ohio. Filed June 26, 1915. Serial No. 36,467. 102 Claims. (Cl. 235—3.)



65. In a machine of the class described, the combination with a rotatable totalizer element, of a main driving mechanism constructed to be given a variable period of movement, and means whereby the rotatable element controls the length of period of movement of the driving mechanism.

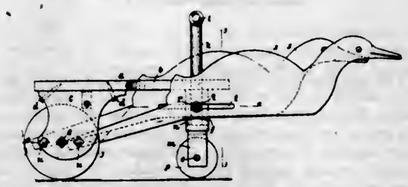
1,348,574. BURNER. SAMUEL WILSON MORROW, Baltimore, Md. Filed May 12, 1919. Serial No. 296,438. 2 Claims. (Cl. 158—91.)

1. In combination in a burner, a conical distributer having an upwardly directed oil conduit at its center, an overlying conical spreader forming a narrow space between itself and the conical distributer for the discharge of the oil laterally in a thin sheet, air supply means having a downwardly directed flared discharge portion encircling the upper portion of the spreader, the wall of the said flared portion being disposed in proximity and at an acute angle to the distributer for causing a current of air to impinge upon the thin film of oil as it issues from beneath the spreader.



1,348,575. CALCULATING-MACHINE. VALENTIN JAKOB ODHNER, Stockholm, Sweden. Filed Apr. 24, 1919. Serial No. 292,459. 1 Claim. (Cl. 235—131.)

In a calculating machine the combination with the indicating disks, a shaft carrying the said disks and adapted to reset the same to zero, catches locking the said indicating disks in adjusted position, and a cam disk,

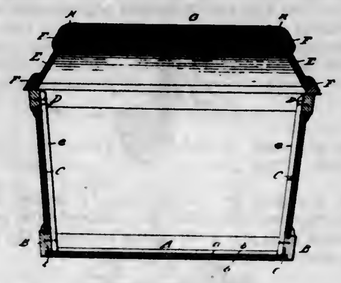


of a shaft carrying the said cam disk independently of other parts of the calculating machine, a motion transmitting device provided between the resetting shaft and the cam disk, an arm coöperating with the cam disk, and a common shaft carrying the said arm and the catches fixed to the said common shaft, substantially as described and for the purpose set forth.

1,348,576. CALCULATING-MACHINE. VALENTIN JAKOB ODHNER, Stockholm, Sweden. Filed Apr. 26, 1919. Serial No. 292,981. 3 Claims. (Cl. 235—79.)

1. In a calculating machine the combination with calculating wheels, pins provided on the said calculating wheels, means for shifting the said pins, wheels engaged by said pins and brought into operative position and rotated by the pins during the rotation of the calculating wheels, indicating disks rotated by the said engaged wheels, deflectable "ten" pins, "hundred" pins, etc., on the said calculating wheels, star-wheels coöperating with the calculating wheels respectively and locking the indicating disks, except at such unit pins as have been brought in operative position, of a movable piece at the "ten" pin, etc., which piece normally locks the said star-wheel, while the "ten" pin, etc., passes the same and means for moving the said piece out of locking position, as the "ten" pin is deflected into operative position.

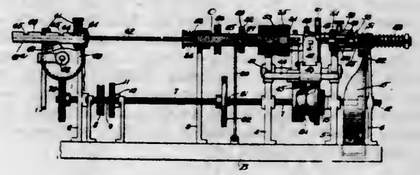
1,348,577. TOY VEHICLE. JOHN W. OLSSON, York, Pa. Filed Nov. 19, 1919. Serial No. 339,127. 4 Claims. (Cl. 208—165.)



1. A frame including a substantially horizontal plate forming a seat at its rear portion and having its forward portion a substantially central forward extension of the seat and narrower than the same, rigid means depending from the seat part of the plate, a rigid substantially inverted T-shaped member depending from the extension, the arms of the T extending beyond the sides of the extension and forming foot-rests, in combination with wheel-supports arranged in said rigid depending means and member.

1,348,578. FERTILIZER. JAMES RIDDICK PARTINGTON and LESLIE HENRY PARKES, London, England. Filed Dec. 12, 1918. Serial No. 266,466. 5 Claims. (Cl. 71—9.)

2. A fertilizer comprising ammonium nitrate in the form of a dry powder and bone meal.



1,348,579. BURIAL-CASKET. ELISHA A. POST and EMIL F. SCHMITZ, Allegan, Mich. Filed May 17, 1919. Serial No. 297,737. 6 Claims. (Cl. 27—3.)

5. In a burial casket, the combination of top and bottom margin moldings rabbeted along their edges, unitary panels formed of plastic material having their edges fitted into the rabbits formed along the edges of said moldings to inclose and protect the same, and reinforcing battens arranged transversely of the bottom panels and having their ends anchored in the bottom moldings, as and for the purpose set forth.

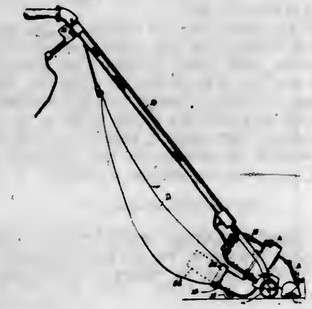
6. In a burial casket, top and bottom margin moldings rabbeted along their edges, side panels formed of plastic material having their edges inclosed and protected by being fitted into the rabbets formed along the edges of said moldings, vertically-arranged battens disposed along the side panels and fastened to the inner faces of said moldings, handles, and securing means for said handles extending through the side panels and anchored in the said battens, as and for the purpose set forth.

1,348,580. CLAY-TURNING MACHINE. LILLIAN L. RANDALL and EDWARD A. FRIES, Boston, Mass. Filed June 12, 1916. Serial No. 103,081. 13 Claims. (Cl. 144—46.)

1. A machine for turning plastic material comprising a tube adapted to have an elongate rod of plastic material fed therethrough, the tube being arranged closely to confine the rod of plastic material throughout the entire length of the rod, means at the forward end of the tube yieldingly to grip said rod throughout an extensive area, a tool in operative relationship to the end of said rod projecting from the forward end of said tube, and means for producing relative angular motion between the tube and the tool to cause the tool to operate upon the rod.

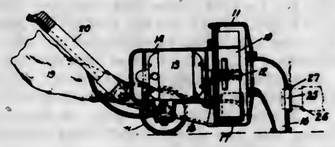
13. The method of forming tubular articles from plastic material comprising rotating a blank of the plastic material, boring the blank along its axis of rotation, and turning the exterior of the blank while the boring tool is extended thereinto, the plastic blank being supported by the boring tool while being turned.

1,348,581. SHOCK-ABSORBER. JESSE T. RICHARDS, Warrington, Fla. Filed Nov. 19, 1919. Serial No. 339,145. 3 Claims. (Cl. 267—60.)



1. In a vehicle shock absorber, a bracket having an outstanding part at one end thereof, a clip at the opposite

end of the bracket for engagement with the frame of a vehicle, parallel hanger straps formed at the forward end of the outstanding part and extending obliquely toward the clip, the ends of the parallel strap terminating in clips



adapted to engage the vehicle frame, a member slidably engaged with the outstanding part adapted to be attached to a vehicle axle, and a coil spring encircling the slidable member and urging the same upwardly.

1,348,582. SUCTION-CLEANER. WILLIAM W. ROSENFIELD, New York, N. Y., assignor to Electric Vacuum Cleaner Company, Inc., a Corporation of New York. Filed May 24, 1915. Serial No. 29,968. 15 Claims. (Cl. 15—60.)

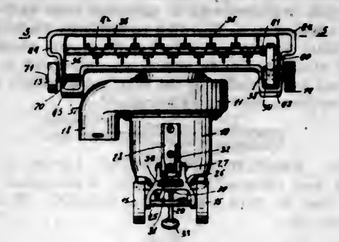
2. The combination with a suction cleaning nozzle, of a thread-disturbing member mounted within the mouth of the nozzle and adjustable into and out of operative position, said member projecting slightly beyond the plane of the nozzle lips when in operative position, and means for holding the carpet away from the nozzle lips mounted to move into and out of operative position with the thread-disturbing member.

1,348,583. SUCTION-CLEANER. WILLIAM W. ROSENFIELD, New York, N. Y., assignor to Electric Vacuum Cleaner Company, Inc., a Corporation of New York. Original application filed July 1, 1912, Serial No. 706,843. Divided and this application filed August 13, 1915. Serial No. 45,288. 4 Claims. (Cl. 15—60.)

1. A self-contained suction cleaner having a nozzle casing extending forwardly and downwardly from the front wall of the fan casing to provide an in-take passage communicating directly with the fan chamber through a central opening in the front wall of the fan casing concentric with the fan axis, said nozzle casing being extended laterally at its lower end to form a floor cleaning nozzle having an elongated in-take opening, and said nozzle casing having a normally closed in-take opening in the wall above said elongated in-take opening for connecting a tube leading from a cleaning tool with the in-take passage through the nozzle casing.

1,348,584. SUCTION CLEANING-NOZZLE. WILLIAM W. ROSENFIELD, New York, N. Y., assignor to Electric Vacuum Cleaner Company, Inc., a Corporation of New York. Filed July 21, 1916. Serial No. 110,476. 20 Claims. (Cl. 1560.)

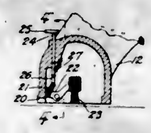
20. The combination with a suction cleaning nozzle, of a frame rotatably mounted within the nozzle and having a brush and a notched side bar adapted to project slightly beyond the plane of the nozzle lips when in operative position.



1,348,585. SUCTION-CLEANER. WILLIAM W. ROSENFIELD, New York, N. Y. Filed Sept. 19, 1916. Serial No. 121,077. 5 Claims. (Cl. 15—60.)

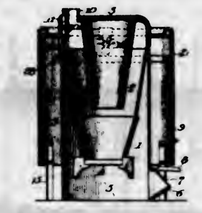
1. The combination with a suction cleaning nozzle having lips which lie all in the same plane, of a rigid, non-rotatable thread-disturbing member within the nozzle adjacent one of its longitudinal edges, means supporting said member whereby it may have a limited amount of vertical movement, means operable from outside the nozzle for forcing said member to its lowermost position and rigidly holding it there, means located in the nozzle which is movable with said member to a position where it projects slightly beyond the plane of the nozzle lips and serves to hold the fabric being cleaned from sealing engagement with one lip of the cleaner nozzle, rollers for supporting said nozzle in spaced relation to the surface to be cleaned, and means for adjusting said rollers to bring the nozzle toward and away from the surface to be cleaned.

1,348,586. SUCTION-CLEANER. WILLIAM W. ROSENFIELD, New York, N. Y., assignor to Electric Vacuum Cleaner Company, Inc., a Corporation of New York. Filed Oct. 5, 1917. Serial No. 194,851. 2 Claims. (Cl. 15—60.)



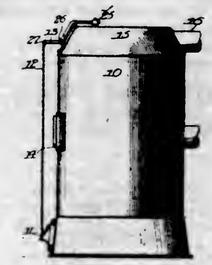
1. The combination of a suction cleaner nozzle provided with rearwardly projecting hollow extensions adjacent to its two ends, a rotary disturbing member in said nozzle, and

a support for said member comprising a frame pivoted in said extensions and extending forwardly into said nozzle,



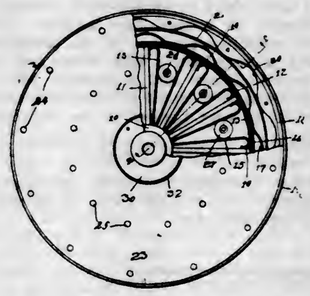
said rotary member being journaled at its ends in said frame and said frame being adapted to swing on its pivots to bring said rotary member outside the nozzle.

1,348,587. SUCTION CLEANING-NOZZLE. WILLIAM W. ROSENFIELD, White Plains, N. Y., assignor to Electric Vacuum Cleaner Company, Inc., a Corporation of New York. Filed Aug. 13, 1915, Serial No. 45,289. Renewed Dec. 24, 1919. Serial No. 347,198. 8 Claims. (Cl. 15—60.)



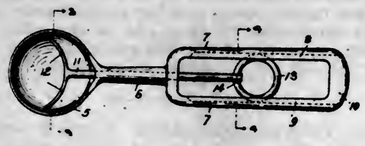
1. The combination with a suction cleaning nozzle having a lip formed to provide a passage for the flow of a surface cleaning current of air between the nozzle lip and the surface to be cleaned, of means movable into and out of operative position formed to close said passage when in operative position, the lips of said nozzle and said means being arranged to make continuous contact with the surface to be cleaned when said means is in operative position, and a thread disturbing member movable into and out of operative position within the nozzle.

1,348,588. STOVE. ERWIN W. SEEGER, Milwaukee, Wis., assignor to Seeger Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 15, 1917. Serial No. 142,417. 4 Claims. (Cl. 236—10.)



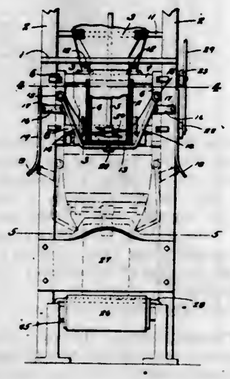
4. A device of the character described comprising a fuel burning stove having a grate, a shell surrounding said stove forming a clear channel between said shell and the outer wall of said stove extending substantially throughout the full vertical length of said stove, said channel being substantially fully open at the bottom and at the top to thereby afford an unobstructed passage for an air current upwardly through said channel to thereby heat the air current passing through said channel and cause circulation of the air in the compartment where said device is placed, regulating means for said stove, thermal means within the air current in said channel and responsive to the temperature of the air in said channel for controlling said regulating means, and means for adjusting the relationship between said thermal means and said regulating means, said thermal means including an air chamber substantially surrounding the stove and an expansible and retractable pneumatic device communicating with the chamber and adapted to actuate the regulator.

1,348,589. FURNACE-REGULATOR. ERWIN W. SEEGER, Milwaukee, Wis. Filed June 28, 1917. Serial No. 177,496. 2 Claims. (Cl. 236—10.)



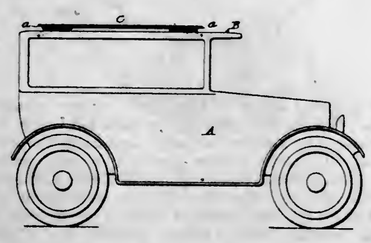
1. A regulating system for hot air furnaces comprising a furnace, a fire control door for the furnace, a hot air drum surrounding the furnace, a corrugated air chamber mounted upon and within the drum, a bellows mounted interiorly of the chamber and having one wall rigidly secured to the drum, a lever operatively connected to the door, and a rod connecting the free wall of said bellows to said lever, the interior of the bellows being open to atmospheric pressure.

1,348,590. SPRING-WHEEL. DAVID J. SHEA, Marianna, Ark. Filed Nov. 12, 1919. Serial No. 337,538. 2 Claims. (Cl. 152—28†)



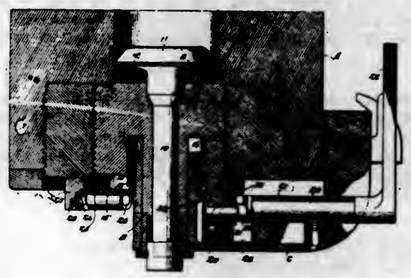
1. In a spring wheel, a hub, spring spokes extending from the hub radially and having inturned outer ends, spacing members between the main portions of the spring spokes and including rollers mounted to turn therebetween, spacing means between the inturned portions of the spokes, an inner rim, an outer rim, corrugated members between said rims, resilient means therebetween and including resilient bands, a tire on the outer rim, a plurality of plates at the sides of the wheel, and means for connecting said plates against lateral displacement, certain thereof serving as mountings for the rollers.

1,348,591. MEASURING SPOON OR DIPPER. ACALLIOUS ELBERT SHUTTERLY, Indianapolis, Ind. Filed May 17, 1919. Serial No. 297,740. 5 Claims. (Cl. 73—62.)



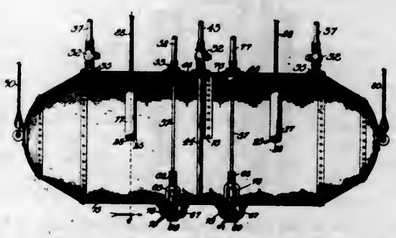
1. A device of the character described, comprising a bowl, a handle therefor provided with a longitudinal hole, and a rod reciprocable but non-rotatable in said hole and provided at its outer end with striking-off arms projecting laterally over the bowl.

1,348,592. BAG-FILLING MACHINE. CHARLES F. SPARKS, Alton, Ill. Filed Oct. 24, 1919. Serial No. 332,963. 10 Claims. (Cl. 226—58.)



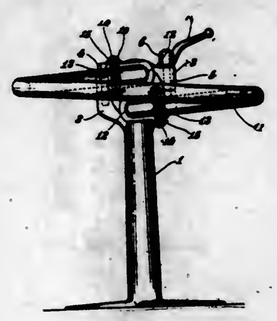
1. The combination with a bag filling machine, having a discharge spout and a packing member arranged for operation therein, of a vertically movable framework mounted for operation adjacent to the discharge spout of the filling machine, and a drop bottom bag receiving platform associated with said framework, which framework and platform are adapted to move downward by the pressure of the packing member on the material packed into the bag.

1,348,593. AUTOMOBILE-TOP. EDWARD SPIEGEL, Brooklyn, N. Y. Filed Apr. 6, 1918. Serial No. 226,971. 1 Claim. (Cl. 296—137.)



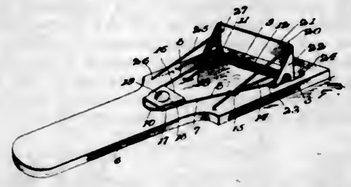
In an automobile body a two part top, one part forming a central rectangular portion, the other part comprising a surrounding frame, the meeting points of said central portion and surrounding frame being rabbeted and and adapted to fit snugly together, each corner of the central portion provided with a confining slide and carrier block *c*, adapted to be operated to adjusted positions and held in place by a screw with handle *s*, said block being attached at one end to an arm E, the other end of which is attached to the frame of the roof, substantially as and for the purposes shown and described.

1,348,594. BREECH MECHANISM. HENRY J. STAMBAUGH and GEORGE M. MCCANN, Washington, D. C. Filed Dec. 8, 1919. Serial No. 343,295. 33 Claims. (Cl. 89—25.)



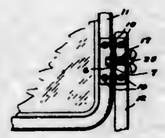
11. In a gun, the combination of a movable carrier, a breech plug mounted on the carrier for both rotatable and longitudinal movements with respect to the carrier, a rotatable member on the carrier operatively connected with the plug to rotate the latter, a cam device operated during closing movement of the carrier to rotate the member and thereby rotate the plug, and a second cam device operating during rotation of the plug to move the latter longitudinally with respect to the carrier.

1,348,595. APPARATUS FOR RAISING SUNKEN VESSELS. FERNANDO STAUD Y XIMENEZ, deceased, late of New York, N. Y., by Francisco Javier Salas, New York, N. Y., administrator of said Fernando Staud y Ximenes, deceased; Alejandro Berea administrator de-bonis non, vice Francisco Javier Salas, resigned. Filed June 28, 1919. Serial No. 307,409. 10 Claims. (Cl. 114—53.)



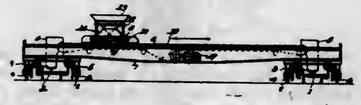
1. A submergible pontoon comprising a shell equipped with a valve-device having an upper air-pressure inlet, a valve controlling said inlet, a lower water-valve and a stem connecting said valves and maintaining them in consant operative position thereon relative to the air and water ports they respectively control.

1,348,596. TIRE-MAKING DEVICE. EDWARD STERNS, St. Louis, Mo., assignor, by mesne assignments, to Surety Tire & Rubber Company, Wilmington, Del., a Corporation of Delaware. Filed Sept. 4, 1917. Serial No. 189,691. 7 Claims. (Cl. 154—9.)



1. A tire making device comprising, a base, a split tire mandrel, and means for detachably connecting said mandrel with said base adapted to permit endwise removal of the tire from said mandrel.

1,348,597. GAME APPARATUS. CLARENCE R. STEWART, Spokane, Wash. Filed Sept. 27, 1919. Serial No. 326,719. 5 Claims. (Cl. 124—1.)



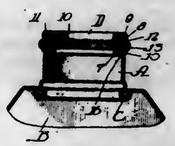
1. A toy catapult including a base, a projectile throwing member having a transverse bearing arm and a pair of arms, means to rotatably connect said transverse arm to said base, a spring for tensioning the said projectile throwing member, and a projectile supporting plate having its end portions formed with flanges secured about the rear end portions of said arms, said projectile supporting plate being provided with a centrally arranged projectile receiving recess.

1,348,598. HINGE. ARTHUR J. STRETCH, Seattle, Wash. Filed Sept. 20, 1919. Serial No. 325,251. 1 Claim. (Cl. 296—92.)

A hinge of the class described, comprising two concavo-convex plates, the concave sides of said plates each having an annular flattened friction surface and said plates being adapted to be disposed side by side with the concave surfaces turned toward each other, integral base members arranged at right angles to said plates and protruding from the convex sides thereof, a friction disk interposed between said plates and arranged to be engaged by the flattened friction surfaces of said plates, a pivot bolt extending transversely through said plates, a flanged sleeve on said pivot bolt to serve as a bearing for the plate opposite the head of said bolt, a washer on said bolt, means for preventing said washer from turning, a helical compression spring interposed between said washer and the side of one of said plates, and a nut arranged to screw against said washer.

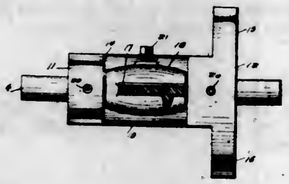
1,348,599. RECLAIMING AND CONVEYING APPARATUS. FRANCIS LEE STUART, Washington, D. C., assignor to International Conveyor Corporation, New York, N. Y. Filed Dec. 5, 1917. Serial No. 205,607. 1 Claim. (Cl. 193—4.)

Apparatus for reclaiming and conveying material, comprising two parallel main conveyer belts, trucks mounted to move parallel with said belts, motors for driving the trucks, hoppers carried by the trucks and delivering to the main conveyer belts, a reclaimer frame supported by said trucks, a conveyer belt mounted in said frame and delivehing to either of said hoppers, a motor for driving said belt in either direction, a track on the reclaimer frame, a truck supported thereon, a motor for driving said truck, and a hopper carried by said truck and delivering to the conveyer belt of said reclaimer frame.



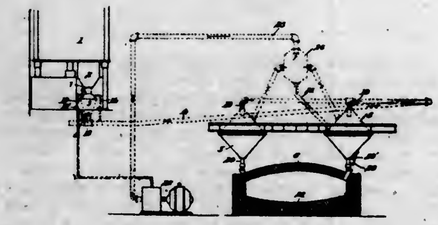
1,348,600. EMBROIDERING DEVICE. MANLIO TERRAGNI and TEOBALDO BOLDIZZONI, New York, N. Y. Filed Aug. 30, 1919. Serial No. 320,888. 6 Claims. (Cl. 112—80.)

1. An embroidering device comprising a tubular body, a pair of legs, a presser foot connected to the body by said legs, a plunger movable in said body, a holder secured to one end of the plunger, a thread-actuating element affixed to the holder, said legs having inclined rear edges to be engaged by the holder and effect a feeding movement of the device to enable said element to make a stitch, a member to make variable portions of said edges ineffective to regulate the length of stitch made by said element, and a slidable head at the opposite end of the plunger, said head having a passage and the plunger having openings to register with the passage on the forward stroke of said element to permit thread to be drawn therethrough, said passage and said openings being out of registry on the return stroke of the element to bind the thread against movement.



2. In an embroidering device, a body having legs with inclined edges, a holder, a thread-actuating element, said holder having lateral projections to engage said edges to effect a feeding movement of the device, a locking cam to secure the thread-actuating element thereto, and a thread guide thereon.

1,348,601. CONTAINER-CLOSURE. SWAN N. TEVANDER, Maywood, Ill., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Feb. 18, 1916. Serial No. 79,040. 7 Claims. (Cl. 220—27.)

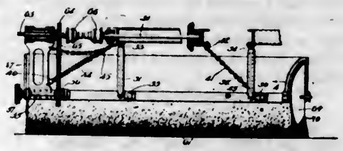


1. A container having a nozzle provided with an inwardly extending flattened head, a frangible seal seated on said head, the upper edge of said nozzle being curled down thereupon to secure it in place, and a slip cover having a depressed central portion bearing on said seal and having a flange engaging the exterior of the nozzle frictionally and removably.

1,348,602. ROCKER-STUD BEARING. WILLIAM T. THACKER, Greenville, S. C. Filed Oct. 3, 1919. Serial No. 328,192. 1 Claim. (Cl. 64—10.)

A sword shaft bearing comprising a unitary body provided at its ends with upwardly extending lugs adapted to receive a shaft for rocking movement, the portion of the body lying between the lugs being provided with an upper concaved surface forming an oil retaining pan underneath the lay sword, the body being provided at each end of one of the lugs thereof with wings adapted to be used for attaching the body to the frame of a loom.

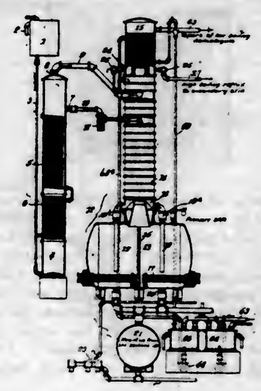
1,348,603. ORE-FEEDING APPARATUS FOR FURNACES. LEONARD S. THILL, Great Falls, Mont. Filed Dec. 4, 1916. Serial No. 135,029. 2 Claims. (Cl. 302—22.)



1. In apparatus for delivering ore from a roaster to a furnace, the combination of a chamber for receiving roasted ore from the roaster, a hopper connected to the furnace, a conduit between the chamber and the hopper, means for charging the chamber independently of the conduit, a pneumatic medium for passing the charge through the conduit into the hopper, means for separating the pneumatic medium from the charge in the hopper, means for returning the pneumatic medium for passing another charge through the conduit, and means for discharging the hopper independently of the said conduit and said medium.

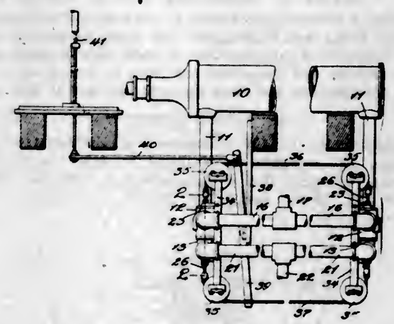
1,348,604. PRESSURE THROTTLE CONTROL. FRANK M. TITUS, Bradford, Pa., assignor to The United States and Cuban Allied Works Engineering Corporation, a Corporation of Delaware. Filed July 1, 1919. Serial No. 307,965. 1 Claim. (Cl. 103—92.)

A device of the character described, comprising a housing having a fluid passage extending therethrough, a valve passage extending therethrough having an open end of a diameter equal to the diameter of the passage, a valve in the last mentioned passage and controlling the fluid passage, a cap closing the open end of the valve passage, the valve having a stem passing loosely through the cap and extending beyond it, the extended end of the valve stem having an adjustable screw-nut, an expanding spiral spring between the cap and the nut and holding the cap in position and the valve stem outward, a cylinder supported beyond the valve stem, and a piston in the cylinder extending therefrom and engaging the end of the valve stem, the cylinder having a pressure communication, the parts operating as and for the purpose described.



1,348,605. STREET-SWEEPER. DANIEL M. TODD, Elgin, Ill., assignor to Elgin Street Sweeper Co., a Copartnership consisting of said Daniel M. Todd, James Todd, and Charles A. Whiting, Elgin, Ill. Filed Feb. 5, 1919. Serial No. 275,135. 5 Claims. (Cl. 15—17.)

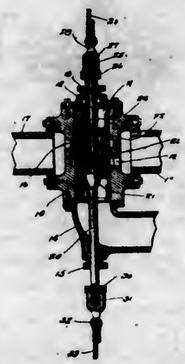
1. In a street sweeper, the combination with a wheeled carriage, of means for driving the same along the pavement, a sweeping brush, a frame wherein said brush is journaled, means for suspending such frame from the carriage to permit oscillation of the frame lengthwise of the roller, a spring tending to move the frame sidewise to carry the sweeping roller toward the curb, means for limiting such movement, and means for driving the roller for sweeping purposes in any lateral position of the frame with respect to the carriage, substantially as described.



1,348,606. RECOVERY OF CRUDE PRODUCTS FROM BENZOL LIGHT OILS. FREDERICK TSCHUDY, Fairfield, Ala. Filed July 5, 1917. Serial No. 178,611. 1 Claim. (Cl. 196—25.)

The process of recovering crude products from benzol light oils which consists in continuously distilling the mass in a primary still at the highest required temperature to drive off all the vapors of the low boiling homologues and fractionating the vapors therefrom and redistilling in another still the high boiling constituents of the vapor that are liquefied by such fractionating and treating

the vapors of the lower boiling homologues that are uncondensed by such fractionating directly by dephlegmation in successive stages to recover the desired products.

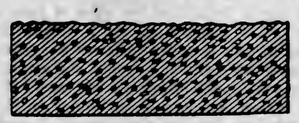


1,348,607. STEAM-FEED-VALVE CONTROL MECHANISM. DANIEL VANZILE, Vredenburgh, Ala. Filed Mar. 24, 1919. Serial No. 284,713. 1 Claim. (Cl. 121—45.)

In combination with a steam feed cylinder, pipes connected to the ends thereof, valve housings connected to said pipes, a steam supply pipe connected to both valve housings, exhaust pipes leading from said housings, each housing being provided with a valve chamber, a valve stem arranged for operation in each housing, a valve carried by each stem for controlling the passage of steam through the valve housing, cables connecting the adjacent ends of both valve stems, pulleys over which said cables are adapted to pass, a lever fulcrumed intermediate its ends, said ends being connected to an adjacent cable, an operating lever spaced apart from the first-mentioned lever, and a rod connecting the lower end of the operating lever with the upper end of the first-mentioned lever.

1,348,608. STEAM-FEED VALVE. DANIEL VANZILE, Vredenburgh, Ala. Filed May 28, 1919. Serial No. 300,358. 1 Claim. (Cl. 121—45.)

In a valve of the class described, a housing provided with ports and a valve chamber, a valve arranged for operation within said valve chamber for communicating with said ports, a valve stem passing through said valve and having bearings in the upper and lower portions of the housing, the ends of the stem being screw-threaded, a shoulder on said valve stem against which the valve engages, a sleeve on the upper portion of the valve stem,

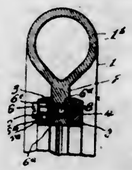


which sleeve bears against the valve and is arranged to slide through the bearing in the upper portion of the housing, a nut for locking said sleeve and valve upon the stem, and a nut provided with an eye or loop on each end of the stem to which may be secured operating cables.

1,348,609. ALARM FOR MOTION-PICTURE-FILM REELS. MOSES F. WALKER, Cadiz, Ohio. Original application filed Mar. 14, 1918, Serial No. 222,436. Divided and this application filed Sept. 25, 1918. Serial No. 255,718. 6 Claims. (Cl. 242—57.)

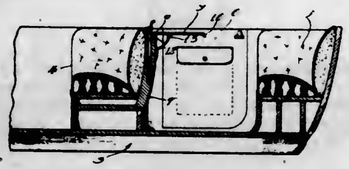
1. In a film reel, a bell carried by said reel, a striker element for coaction therewith, and means for actuating the striker element, the striker element being arranged to be actuated automatically when all but a predetermined length of the film has been unwound from the reel.

1,348,610. CONCRETE FLOOR. GEORGE C. WEBB and THOMAS T. POTTENGER, Pittsburgh, Pa. Filed Mar. 2, 1917. Serial No. 151,879. 1 Claim. (Cl. 94—22.)



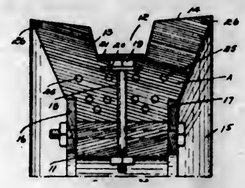
The method of forming a wearing surface for concrete floors which consists in grinding the surface of the floor first in the presence of abrasive materials and second in the presense of a grout of cement and water, for the purpose described.

1,348,611. MACHINE FOR BURNING IN BEARINGS AND LIMBERING UP MOTORS. ADDISON O. WHITE, High Point, N. C. Filed Oct. 8, 1919. Serial No. 329,356. 9 Claims. (Cl. 29—1.)



1. An apparatus of the character described, including a support, a main shaft journaled on the support, and having a driven pulley intermediate its ends, fly wheels adjacent to the ends of the main shaft, a pair of extension shafts co-axial with, and at opposite ends of, the main shaft, clutch members carried by the extension shafts and movable into and out of engagement with the said fly wheels, and crank shaft engaging means carried by the said extension shafts.

1,348,612. SEPARABLE CORE. GLENN HARLAN WILLIS, Akron, Ohio, assignor to The Miller Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Jan. 17, 1920. Serial No. 351,985. 9 Claims. (Cl. 18—45.)

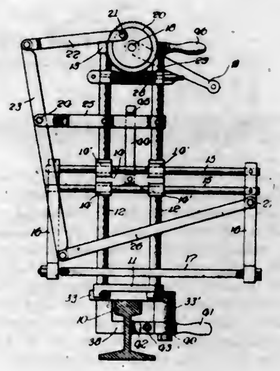


1. A device of the character described comprising a plurality of arc-shaped sections adapted to abut against each other to form a separable core or mandrel, a locking ring adapted to overlie the inner portions of said sections, and headed members carried by said inner portions, said ring having elongated openings providing enlarged portions to receive said headed members and narrower portions to engage beneath the heads on shifting the ring circumferentially.

1,348,613. TONNEAU-TABLE FOR AUTOMOBILES AND THE LIKE. FRANK M. WILLS, Elgin, Ill. Filed Mar. 29, 1920. Serial No. 369,547. 4 Claims. (Cl. 45—51.)

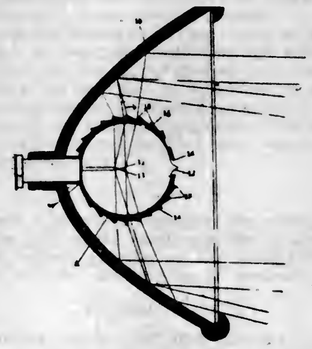
3. The combination with an automobile body having a front seat with a vertical back, there being a vertically extending slotted opening in the back portion of said seat, and having a horizontally extending robe rail on the back face of the upper portion of the back of said seat, of a sheet metal table adapted to work within the slotted opening and having a width substantially equal to the depth of the slotted opening, a hooked portion on the inner edge of the table, and means on the back of the seat adapted to engage said hooked portion when the table is raised into working position, the robe rail and said means being located at substantially the same elevation, whereby when the table is raised into the working position its inner edge will coöperate with said means, and its under face will rest upon and be supported by the robe rail, substantially as described.

1,348,614. TIRE. LEANDER W. WOOD, Fontanelle, Iowa. Filed Sept. 15, 1919. Serial No. 323,980. 2 Claims. (Cl. 152—1.)



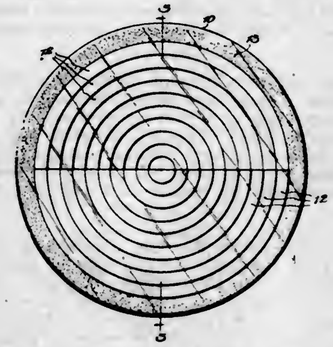
1. In a device of the class described, an annular resilient tire designed to fit on a wheel rim, said tire being broader at its outer tread portion than at its portion adapted to fit the rim, said tire having a circumferential, central, annular, external groove, the walls of said groove being inclined from the perpendicular, the groove being narrower at its bottom than at its outer portion, the tread portion of said tire being inclined from the edges of said groove laterally and radially outwardly, and a flat reinforcing band received in said groove, said band being of resilient material.

1,348,615. METHOD OF MANUFACTURING GROMETS. WILLIAM A. YOUNG, New York, N. Y. Filed May 29, 1919. Serial No. 300,568. 4 Claims. (Cl. 28—5.)



4. A method of constructing gromets consisting in winding a strand upon a form in parallel convolutions, to form a ring; then rolling said ring about its annular axis for wrapping a continuation of said strand about said convolutions and transverse the same to completely cover said convolutions and form the outer surface of said ring.

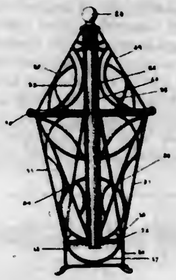
1,348,616. RAIL-SAW. CLARENCE C. ZIMMERMAN, Chicago, Ill., assignor to National Surface Guard Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 19, 1919. Serial No. 277,981. 6 Claims. (Cl. 29—73.)



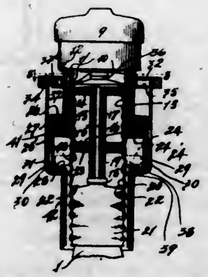
1. In a rail saw, the combination with a frame comprising a base member, two parallel uprights rising from said base member, and a cross-connecting member rigidly uniting the upper ends of said uprights, of a carriage mounted to slide on said uprights, a saw reciprocably mounted on said carriage, a driving shaft journaled in the cross-connecting member of said frame, and power-transmitting connections between said driving-shaft and said saw.

1,348,617. ELECTRIC HEADLIGHT. WILLIAM H. ZORGER, Champaign, Ill. Continuation in part of application Serial No. 169,824, filed May 21, 1917. This application filed June 29, 1918. Serial No. 242,536. 4 Claims. (Cl. 240—48.6.)

3. In a headlight, the combination of a reflecting surface having a center focus, a source of illumination, and means interposed between the source of illumination and the reflecting surface to produce two downwardly directed equal half cones of light when the source of light is in center focus, and to produce an enlarged half cone of light by one half of the reflecting surface and a "spot light" effect by the other half of the reflector surface when the source of light is forward or in rear of center focus.



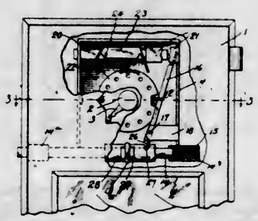
1,348,618. LENS FOR AUTOMOBILES. WILLIAM H. ZORGER, Champaign, Ill. Filed Sept. 24, 1918. Serial No. 255,453. 7 Claims. (Cl. 240—48.4.)



1. A lens for headlights comprising a disk having its entire light emitting area provided with two series of semi-annular elements arranged concentric with a common center, and having faces parallel throughout the entire series and inclined to the plane of the body of the disk, for the purpose described.

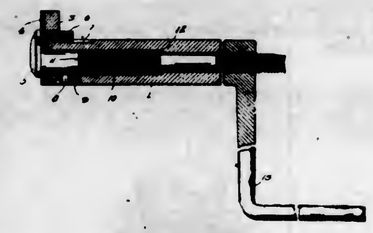
1,348,619. HALL UTENSIL. ALFONS ZYCKI, Baltimore, Md. Filed June 18, 1919. Serial No. 305,047. 2 Claims. (Cl. 45—33.)

1. In a device of the class described, the combination with a cylindrical base having imperforate walls, and means for supporting said base, of a perforate plate removably engaged in the upper portion of said base, a pan disposed therebelow, means for supporting said pan within said base, a rod removably engageable within said plate, a tube surrounding said rod, spring actuated means for holding said spring rod in a raised position, and a plurality of brace elements engaged with said tube, said brace elements being engageable with the marginal edge of said base.



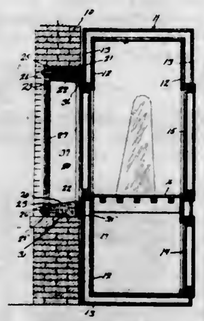
1,348,620. PROTECTIVE SOCKET. SAMUEL L. ADELSON, New York, N. Y. Filed May 9, 1919. Serial No. 295,830. 6 Claims. (Cl. 173—356.)

3. In combination with a standard socket for electric light bulbs, a plug to engage said socket, a sleeve to engage said plug, arranged to have screwed thereinto the threaded end of an electric light bulb, means to cause the threads of the bulb and sleeve to jam to produce a tight fit, a casing inclosing said sleeve having an opening for the passage of the fingers to grasp said sleeve to prevent the rotation of same while a bulb is being applied to or detached therefrom, an outer casing applied to the casing first named, having an opening to aline with the opening in the casing first named, arranged to be moved to cause its opening to be carried out of alinement with the opening in the casing first named, and means to lock the outer casing to the socket.



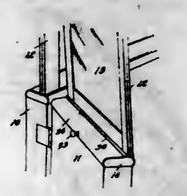
1,348,621. AUTOMATIC COMBINATION-LOCK. FRED B. ASHTON, Chicago, Ill. Filed Mar. 22, 1920. Serial No. 367,977. 4 Claims. (Cl. 70—53.)

1. In an automatic combination lock, the combination with a door, a door bolt held in engagement with the door frame by a coiled spring in a housing integral with



the door, a dial on the door, an indicator shaft the outer end of which forms a knob and indicator, with a section of said shaft constructed in an octagon shape to actuate a tumbler, and two tumblers; of a sleeve around the door bolt with a slot to receive a screw pin inserted in the door bolt, a screw pin so inserted to limit the movement of the door bolt, with a knob extending to the outside of the door riveted to the sleeve, the sleeve's two upturned sides notched at the rear end to receive and actuate a vertical lever, said lever being adapted to actuate an automatic bolt at its other end, said bolt carrying a dog adapted to engage the two tumblers and actuate them, substantially as specified.

1,348,622. SAW-SET. OMAR BISSON, Callaway, Minn. Filed May 3, 1919. Serial No. 294,509. 1 Claim. (Cl. 76—60.)

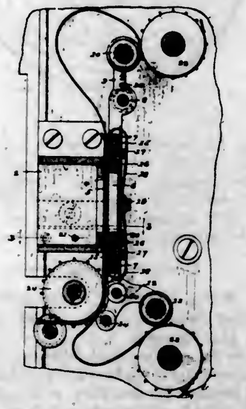


A device of the type described, including a holder having a laterally projecting flange, a stub-ended screw, a guiding recess or groove for said screw, and a crank-equipped mandrel received within said holder, and having a laterally projecting head coöperating with said screw for engaging an interposed object, one end of said holder and said lateral flange thereof having formed therein a continuous depression of approximately Y outline, receiving the projected end of said screw and said mandrel head, said holder having a longitudinal slot opening through one end thereof and said mandrel having a lateral stud received and guided by said slot to retain said mandrel against turning.

1,348,623. CONCRETE CONSTRUCTION. ALBERT G. BORCHERT, Cleveland, Ohio. Filed Oct. 23, 1919. Serial No. 332,691. 8 Claims. (Cl. 189—46.)

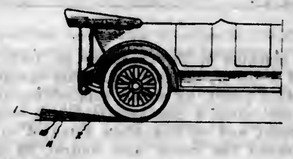
1. The combination, with a wall having an opening, of a concrete frame set in said opening, there being a recess around the outer-surface of said frame, packing in said recess making a tight connection between the frame and wall, and a refrigerator making a rigid connection with the inner side face of the frame.

1,348,624. CONVERTIBLE-AUTOMOBILE-BODY CONSTRUCTION. LOUIS BRESIN, New York, N. Y., assignor to Adams-Williams Manufacturing Corporation, New York, N. Y., a Corporation of New York. Filed Aug. 12, 1919. Serial No. 316,989. 20 Claims. (Cl. 296—45.)



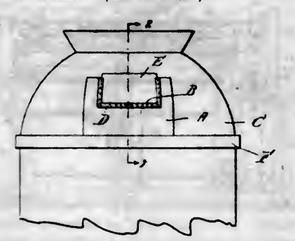
1. A vehicle body wall section, having a plurality of lug sockets, a removable panel having lugs adapted to enter said sockets, and an operating member for simultaneously securing all of said lugs in their respective sockets.

1,348,625. DEVICE FOR REPAIRING FENDERS OF AUTOMOBILES. FRANK A. BRIGGS, Bellingham, Wash. Filed Sept. 2, 1919. Serial No. 321,256. 1 Claim. (Cl. 280—154.)



As an article of manufacture, a fender repairing device comprising a plate that is curved to fit the lower side of a fender and provided with perforations for the reception of securing means, and a relatively deep narrow internal channel formed on one edge of said plate and arranged to fit over the flange of a fender, said channel having perforations to permit the passage of securing means.

1,348,626. FILM-GATE FOR MOTION-PICTURE MACHINES. LOUIS COATSWORTH, Chicago, Ill., assignor to Safety Projector & Film Co., Portland, Me., a Corporation of Maine. Original application filed Nov. 7, 1916, Serial No. 129,977. Divided and this application filed Mar. 31, 1917, Serial No. 159,010. Renewed Mar. 27, 1919. Serial No. 285,647. 3 Claims. (Cl. 88—17.)

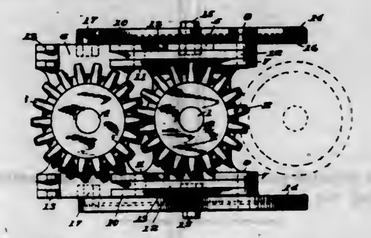


1. In a motion picture machine, a main frame, a fixed apertured guide plate for a picture film, a film feeding sprocket drum associated with the lower end of said guide plate, an upper film supply sprocket drum and a lower film take-up sprocket drum associated with the respective upper and lower ends of said guide plate and located to the rear of the film feeding sprocket drum, and a film confining gate pivoted to the main frame near the upper end of the guide plate and having pivotal movement in a vertical plane, said gate having an extension above its pivot point carrying a bearing roller adapted to bear against a forward side of the film supply sprocket drum and a forked extension at its lower end with the forks of said extension carrying bearing rollers adapted to bear against an upper side of the film take-up sprocket drum and a rear side of the film feeding sprocket drum respectively, substantially as set forth.

1,348,627. JACK FOR AUTOMOBILES. JOSEPH S. COOK, Tacoma, Wash. Filed Sept. 15, 1919. Serial No. 323,889. 3 Claims. (Cl. 254—89.)

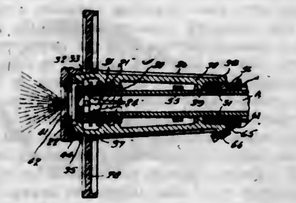
1. A vehicle jack comprising a block having an inclined upper surface and an inclined runway member adapted to be supported by one end on the block and when placed on end to engage the vehicle axle to support it.

1,348,628. IDENTIFICATION-MARKER FOR RECEPTACLES SUCH AS MILK-CANS. BINNY FRANK COMBS-East Berkshire, Vt. Filed Aug. 11, 1919. Serial No. 316,561. 2 Claims. (Cl. 40—16.)



1. An identification marker for milk cans, consisting of a metal holder for cards, the holder being made to conform superficially to the contour of the dome-shaped top of the can to which it is to be applied, to serve as additional means for holding the cards therein, and having an opening to expose descriptive matter upon the card when inserted; the portion of the marker surrounding said opening being provided with a raised bead at the inner limit of the projecting edge to reinforce it against external pressure.

1,348,629. GARMENT-BUTTON. SARAH W. CUSHMAN, Norwich, N. Y. Filed Jan. 15, 1920. Serial No. 351,575. 7 Claims. (Cl. 24—104.)

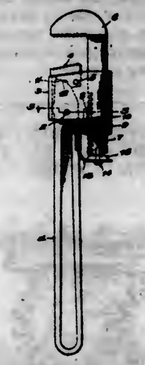


1. In a garment button, an attaching member provided with garment-attaching means and with outwardly extending tongues, a disk, a button-head secured to said disk, a hollow cylindrical element fixedly united with the periphery of said disk, and helical cams united with said cylindrical element and facing inwardly thereof toward said disk and being engageable and coöperative with said outwardly extending tongues to fasten said hollow cylinder to said attaching member.

1,348,630. TRACTOR-STEERING DEVICE. JOHN M. CUSTENBORDER, Mackinaw, Ill. Filed Apr. 22, 1918. Serial No. 229,992. 8 Claims. (Cl. 74—101.)

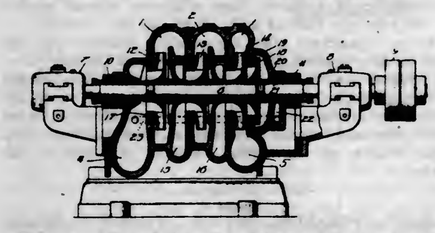
1. In a motion transmitting device the combination of a driving shaft, a driven shaft, a driving element carried by the adjacent ends of each shaft and each driving element in engagement with the other, a housing adjacent each driving element, and a connection between said housings having a pivotal point of attachment to one housing in line with the tangent to the circle of engagement between the driving elements on one side of the axis of one of the shafts and a pivotal point of connection to the other housing at the opposite side of said axis of the shaft.

1,348,631. SPRAYING DEVICE. WILLIAM L. DEMING and CHARLES CORNWALL, Salem, Ohio, assignors to The Deming Company, Salem, Ohio, a Corporation of Ohio. Filed Jan. 20, 1919. Serial No. 271,977. 12 Claims. (Cl. 299—114.)



1. In a nozzle, the combination of a tubular stem, having an external thread of greater diameter than the unthreaded portion, and a sleeve member having an orifice and an internal thread of uniform pitch which engages the external thread of the stem, there being a lateral opening from the stem adapted to discharge independently of the internal thread or through a portion of it according to the relative position of the sleeve and stem, and there being a chamber for whirling fluid of substantially the diameter of the threads with which the thread groove of the sleeve member communicates.

1,348,632. WRENCH. HORACE L. DICKSON, Toronto, Ontario, Canada. Filed Apr. 8, 1920. Serial No. 372,207. 4 Claims. (Cl. 81—103.)

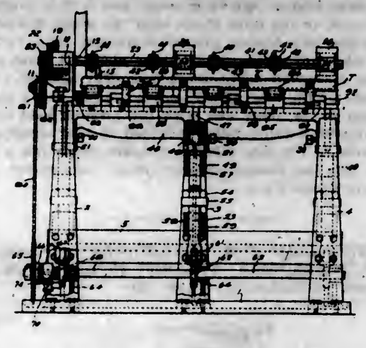


1. A wrench comprising a carrier frame carrying a jaw, a handle connected therewith, a coöperating movable jaw

having a shank slidable through the frame, a spring secured to the end face of the shank and having one end

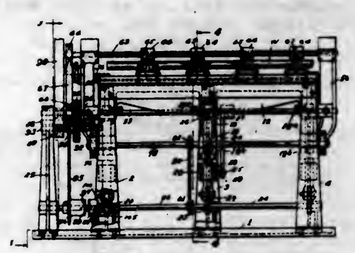
portion deflected and bearing on the handle, and means for adjusting the movable jaw.

1,348,633. CENTRIFUGAL PUMP AND THE LIKE. WILLIAM C. DOWD, Quincy, Ill. Filed Apr. 24, 1919. Serial No. 292,443. 1 Claim. (Cl. 253—188.)



In a machine of the class described the combination of a multi-stage centrifugal pump, a shaft extending through the same, a plurality of impellers located on said shaft and working in tandem, an end balancing chamber surrounding said shaft, an axial passage connecting the last stage with said balancing chamber, a circular valve seat in the balancing chamber surrounding said passage, a balance disk on the shaft in the balancing chamber, a peripheral seat on said disk adapted to engage the valve seat aforesaid when the balancing disk is forced thereagainst, another axial passage leading from the opposite side of the balancing chamber to a point of discharge, a relatively small valve seat surrounding said passage and facing the balancing chamber, a relatively small disk on the shaft adjacent to said seat, and a peripheral seat on said relatively small disk adapted to engage the seat surrounding the discharge passage when the shaft moves in said direction, substantially as described.

1,348,634. VEHICLE-BUMPER. ROLLIN B. FAGBOL, Oakland, Calif. Filed Jan. 5, 1920. Serial No. 349,433. 7 Claims. (Cl. 293—55.)

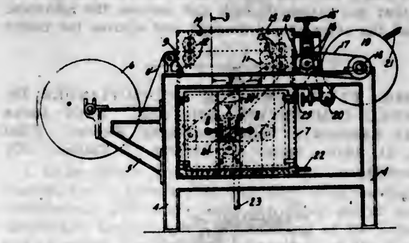


2. In combination with a vehicle bumper disposed transversely of the vehicle, of a pair of multiple leaf vehicle springs supporting the vehicle, certain leaves of said springs extending beyond the others, and providing a support for said bumper.

1,348,635. CUT-OFF MACHINE. NATHAN F. FRETTER, Cleveland, Ohio. Filed June 18, 1917. Serial No. 174,459. 22 Claims. (Cl. 164—60.)

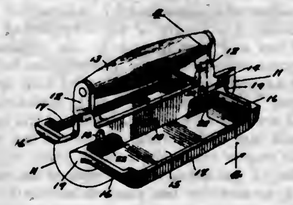
1. In a machine of the character set forth, the combination of a cutter, driving mechanism operatively connected to said cutter, an article support movable toward and from the cutter, a cam sustaining the weight of the article support and serving when actuated to move the support toward the cutter and control its gravitation therefrom, and separable connections between said cam and the driving mechanism.

1,348,636. TOOL FOR CUTTING TUBES AND THE LIKE. NATHAN F. FRETTER, Cleveland, Ohio. Filed Apr. 29, 1918. Serial No. 231,525. 24 Claims. (Cl. 164—38.)



1. In a machine of the character set forth, the combination of a work support, a tool, one of said elements being movable toward and from the other, means for obtaining such movement, driving means shiftable into engagement with the work for moving it with respect to the tool, thereby to cause the tool to operate on the work, and means operating automatically for shifting the driving means.

1,348,637. RULING-PEN. HARVEY R. FULLER, Kirksville, Mo. Filed June 5, 1919. Serial No. 302,035. 4 Claims. (Cl. 120—109.5.)



1. A ruling pen comprising two blades, one of said blades having a longitudinal channel constituting a reservoir, and an outstanding flange extending along one side of said channel.

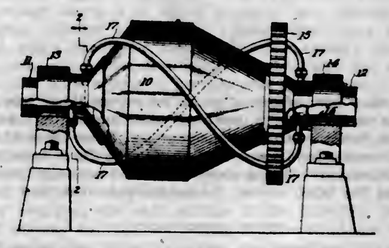
1,348,638. MACHINE FOR MAKING STRETCHABLE CRINKLED PAPER. EDWIN D. GRUNDMANN, New York, N. Y., assignor to Arkell Safety Bag Company, New York, N. Y., a Corporation of New York. Filed June 13, 1919. Serial No. 303,835. 20 Claims. (Cl. 92—69.)

1. In a machine for making stretchable crinkled paper, the combination with a smooth faced receiving roll adapted to have paper deposited thereon and a doctor associated with the roll against which the paper is carried for crinkling, of a steam chest in advance of the receiving roll through which the paper passes for moistening, and means for squeezing into the paper the moisture deposited thereon by the steam.

1,348,639. CONCRETE-FINISHING TOOL. WILLIAM GRUNDMANN, St. Louis, Mo. Filed Mar. 10, 1919. Serial No. 281,790. 2 Claims. (Cl. 72—138.)

1. In a tool of the class described, a vertically disposed blade, a handle secured thereto, a horizontally disposed plate adjustably secured to said blade, the outer edge of said plate being provided with a vertically disposed flange and the inner edge of said plate being provided with a depending blade engaging flange.

1,348,640. PISTON-RING. FREDERICK HACHMANN, St. Louis, Mo., assignor of one-half to Herman Stiefel, St. Louis, Mo., one-eighth to David M. Hutchinson, Ferguson, Mo., and one-sixteenth to Philip E. Moody, one-sixteenth to Chauncey R. Watson, and one-sixteenth to H. A. Wright, Detroit, Mich. Filed Dec. 5, 1918. Serial No. 265,381. 4 Claims. (Cl. 74—108.)

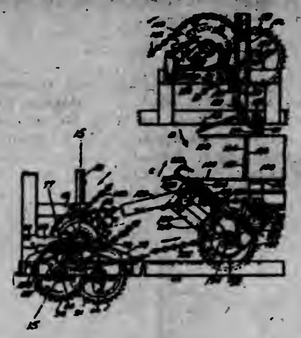


1. A piston ring composed of two independent and finished rings each of which is slitted and the slitted opening of one ring being overlapped by the body portion of the other ring, the contacting faces of each ring being provided with a bore passing partially through the ring, and a soft metal rivet located in the bores for connecting said rings together, said rivet forming an invisible connection in the completed ring.

1,348,641. PISTON-RING. FREDERICK HACHMANN, St. Louis, Mo., assignor of one-half to Herman Stiefel, St. Louis, Mo., one-eighth to David M. Hutchinson, Ferguson, Mo., and one-sixteenth to Philip E. Moody, one-sixteenth to Chauncey R. Watson, and one-sixteenth to H. A. Wright, Detroit, Mich. Filed Feb. 5, 1919. Serial No. 275,137. 1 Claim. (Cl. 74—109.)

A one piece piston ring provided with a lapped portion and with parallel grooves extending throughout the periphery of the ring and into the lapped portions, a cut-away portion formed at each end of the lapped portion and extending from the parallel grooves to the interior face of the ring, a metallic ring of softer material than the piston ring seated in each groove, and inwardly bent ends formed on each end of the metallic ring for holding the metallic ring against rotation, said inwardly bent ends being seated in the grooves formed in the lapped portion.

1,348,642. TUBE-MILL. HARRY W. HARDINGE, New York, N. Y. Filed Sept. 12, 1916. Serial No. 119,612. 3 Claims. (Cl. 83—9.)

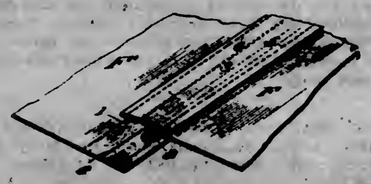


2. In a tubemill, in combination, a rotatable drum having an inlet and a conical outlet portion, means comprising a conduit rotatable with said drum for conveying material from the outlet of said drum to the inlet thereof, said conduit being in the form of a spiral of increasing then diminishing radius, and means at the delivery end of the outlet for causing only the coarser particles to enter said conduit.

1,348,643. PACKAGE CLOSING AND LOCKING MECHANISM. ARTHUR W. HARRIS, Sleepy Eye, Minn. Filed Mar. 17, 1919. Serial No. 283,180. 31 Claims. (Cl. 93—6.)

1. The combination, with means for holding a carton having closing flaps thereon provided with tongues and

ables for interlocking said flaps one with the other, of means for gripping the edges of the tongue-carrying flap

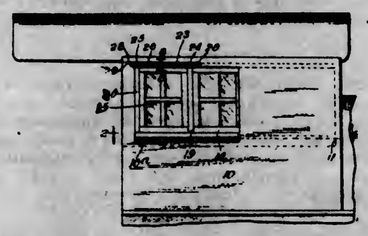


and bending the flap to position the tongue thereon to enter the slits of the other flap.

1,348,644. INNERSOLE FOR BOOTS AND SHOES AND METHOD OF MAKING THE SAME. JOHN L. HAWKINS, Cincinnati, Ohio, assignor to Armstrong Cork Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Dec. 13, 1916. Serial No. 136,637. 6 Claims. (Cl. 154—2.)

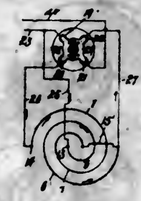
1. As a new article of manufacture, an inner sole for shoes consisting of a layer of cork composition having woven fabric united to the upper and lower faces of the cork composition by pressure, portions of the intermediate cork composition being pressed into and partially impregnating the fabric layers, substantially as described.

1,348,645. DOUBLE LAP-SEAM FOR SEWED ARTICLES. JESSE J. HEAP, New York, N. Y., assignor to Union Special Machine Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 8, 1918. Serial No. 261,649. 2 Claims. (Cl. 112—262.)



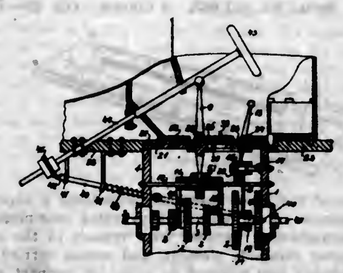
1. A lap seam for sewed articles comprising two fabric sections, one of which has its edge folded and has a reentrant fold back from the edge forming from the fabric section in appearance a tape, said reëntrant fold terminating at one side of and spaced from the folded edge, the other section underlying the folded edge, and reëntrant fold, and two parallel lines of stitches adjacent the edges of the tape appearing part and passing through and joining the fabric sections, said lines of stitches being so located that one passes through and secures the reëntrant fold and the other passes through and secures the folded edge.

1,348,646. FLUID-PUMP FOR MULTICYLINDER INTERNAL-COMBUSTION ENGINES. KNUT JONAS ELIAS HESSELMAN, Saltsjö-Storängen, Sweden. Filed Jan. 21, 1919. Serial No. 272,251. 3 Claims. (Cl. 123—139.)



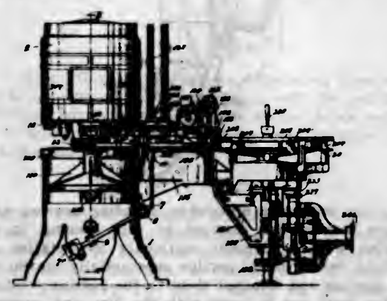
1. The combination with a multi-cylinder internal combustion engine, of a shaft connected to the crank shaft of an engine, gears secured to said shaft, a plunger secured to the shaft by a rod and cross-head, said plunger reciprocating in a pump casing, a suction valve and pressure valve provided in said pump casing, a distributing box communicating with the pump casing and controlled by the pressure valve, a suction pipe communicating with the pump casing and controlled by the suction valve of the pump casing, a plurality of pipes connected with the distributing box and leading each to one cylinder of the engine, a spring-controlled valve provided in each of the pipes, a rod adapted for opening each of said spring-controlled valves, and an auxiliary shaft, connected to the shaft that is secured to the crank shaft of the engine for operating said last named rods, whereby when one revolution of the engine crank shaft takes place, each of the spring valves of the pipes will be opened in succession, substantially as and for the purpose set forth.

1,348,647. LOCOMOTIVE-CAB WINDOW. HARRY C. HOGLE, Chicago, Ill. Filed June 4, 1918. Serial No. 238,164. 6 Claims. (Cl. 20—40.)



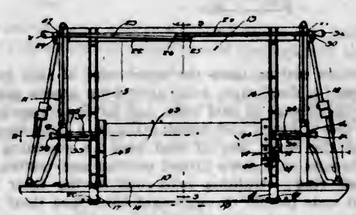
1. An interchangeable sashed vestibule and sliding sash construction, comprising in combination a window frame inclosing an opening providing tracks extending across and beyond said opening, a series of sashes, the terminal ones of the series having pivotal sliding relation to said tracks, and pivotally supporting an intermediate sash or sashes whereby the series may be brought into a single plane to slide across or from the opening, and the pivoting of the terminal sashes may project the intermediate sash or sashes through the opening and parallel therewith to constitute a vestibule.

1,348,648. ELECTRIC HEATING ELEMENT AND WIRING THEREFOR. SHERMAN L. KELLY, Toledo, Ohio. Filed Oct. 23, 1916. Serial No. 127,166. 4 Claims. (Cl. 219—37.)



1. In an electric heating element, a line circuit, a switch therein, and a plurality of resistance coils having their convolutions alternating, with the inner end of one coil electrically connected to the outer end of the other coil and in switch connection with one side of the line, and with the other ends of said coils in connection with the other side of the line, one of said last connections through the switch.

1,348,649. LOCKING DEVICE FOR MOTOR-VEHICLES. PETER OVE JULIUS KNUDSEN, Copenhagen, Denmark. Filed Dec. 20, 1918. Serial No. 267,594. 5 Claims. (Cl. 70—126.)

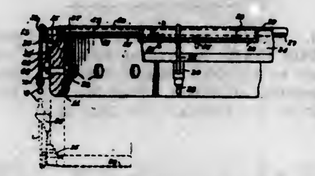


1. In a motor-driven vehicle having a speed-changing mechanism, a driving gear, and a lever for operating said speed-changing mechanism, the combination of a slidable, non-rotatable toothed sector, a lever for sliding said sector into engagement with said gear, and means for simultaneously locking said levers against operation.

1,348,650. CAN-CLOSING MACHINE. ALFRED L. KRONQUEST, Chicago, Ill., and JOHN C. TALIAFERRO, Baltimore, Md., assignors to Continental Can Co., Incorporated, Syracuse, N. Y., a Corporation of New York. Filed May 23, 1918. Serial No. 236,145. 51 Claims. (Cl. 113—14.)

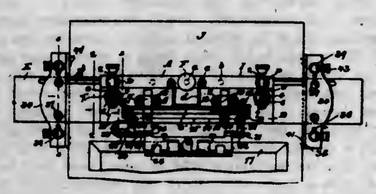
1. The combination with a seaming mechanism having continuously traveling seaming devices, each including seaming means, a chuck and a coöperating rotatable member having a movement relative to each other for seating a can end in a can body, at a housing for said chuck having a half mold associated with each chuck, of a continuously rotating assembling mechanism for positioning a can end relative to a can body and for delivering the same to a seaming device in alinement with the chuck and rotatable member and a series of half molds carried by the assembling mechanism and coöperating successively with the half molds of each seaming device for rounding up the can body preparatory to the seating of the end in the can body by the chuck.

1,348,651. SHOVELING-BOARD FOR WAGON-BODIES AND THE LIKE. ALEXANDER F. KUHNEN, Dixon, Ill., assignor to American Wagon Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 11, 1918. Serial No. 261,987. 2 Claims. (Cl. 296—51.)



1. The combination with the floor and side walls of a wagon body, of a shoveling board therefor, comprising an end section adapted to occupy the space between the side walls of the wagon body, a pair of vertical reinforcement bars on the back face of said shoveling board, pivotal connections between the lower ends of said bars and the wagon body permitting the shoveling board to swing rearwardly and downwardly, means for normally locking the shoveling board in vertical position between the side walls of the wagon body, there being a rectangular opening in the lower portion of the shoveling board and immediately adjacent the floor of the wagon body when the shoveling board is in raised position, said opening extending between the vertical reinforcement bars aforesaid, and a closure for said opening comprising a door of the same size and contour as the opening, said door being provided with a pair of vertical end reinforcement bars adapted to lie adjacent to and between the shoveling board and reinforcement bars when the door is in closed position, the opening extending beneath one of the shoveling board reinforcement bars, one end of the door being adapted to extend into the space beneath said reinforcement bar, the reinforcement bar on the other end of the door overlying the back surface of the shoveling board, and thereby limiting the closing movement of the door, and means for locking the door in closed position with respect to the shoveling board, substantially as described.

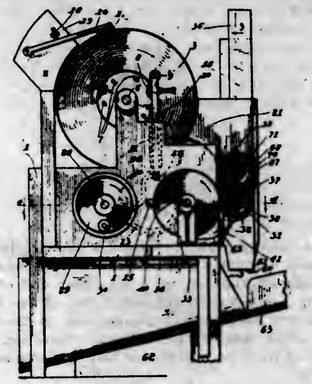
1,348,652. BANJO. WILLIAM L. LANGE, New York, N. Y. Filed Apr. 30, 1919. Serial No. 293,832. 18 Claims. (Cl. 84—270.)



18. In a musical instrument of the character described, the combination of a rim provided at its upper and outer edge with a beveled face terminating at its lower part with an annular shoulder; a plurality of spacing plates disposed vertically and radially around and projecting outwardly from said rim, each plate being provided with a horizontal lower face engaging said shoulder, and provided with an inclined intermediate face engaging said beveled face, and provided at the upper part with an inward spacing extension engaging over the upper face of said rim, and provided with a downward and outward

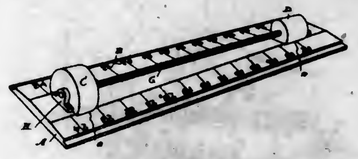
projection from the extension engaging in said rim for holding the spacing plate in place; a plurality of tensioning lugs disposed around the outer face of the rim and each provided with a vertical hook-rod bore; a plurality of bolts passing radially through said rim in the lower part thereof and having threaded engagement with said lugs for holding the lugs to the rim; a hoop having its lower edge resting upon said lugs, and having its inner face held spaced from the rim by the outer edge of said spacing plates, and its upper edge slightly rounded and projecting above said spacing plates; a pressure ring of circular

cross-section resting upon the upper edge of said spacing extensions; a diaphragm head stretching across said rim and the upper edge of said hoop, and having its peripheral portion down-turned and terminating in a flesh ring surrounding the outer face of said hoop; a straining hoop placed around said down-turned portion and resting upon said flesh ring; straining hook-rods having their lower threaded ends passed through said bores and their hooks disposed over said straining hoop; and nuts secured at the lower ends of said straining rods.



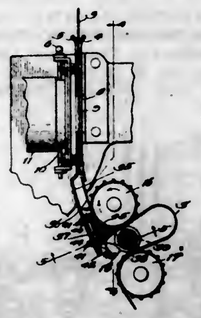
1,348,653. SHADING-MACHINE. WILLIAM HENRY MARGETTS, Toronto, Ontario, Canada. Filed June 4, 1919. Serial No. 301,685. 7 Claims. (Cl. 41—4.5.)

1. A machine of the class described comprising front and back plates; a movable supporting member to which the said back plate is firmly coupled; two adjusting screws, each provided with a suitable graduated scale, positioned one at each end of the said plates; alined supporting members carried by said plates with which said adjusting screws are adapted to co-act so that said front plate may be moved toward or away from said back plate the same distance at each end; an adjusting rod provided with a suitable graduated scale, and threaded at one end, and extending at each end through a movable plate positioned above said front plate, and means carried by said front plate in which said adjusting rod has bearing and with which the thread of said rod co-acts in order that said movable plate may be shifted longitudinally of said front plate in either direction.



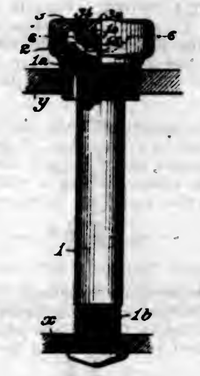
1,348,654. CUSHION-SPRING-ASSEMBLING MACHINE. CHARLES C. MEUTSCH, Chicago, Ill., and EMIL A. CHRISTOPH, Buffalo, N. Y. Filed Nov. 10, 1919. Serial No. 337,010. 18 Claims. (Cl. 29—87.1.)

1. A machine of the type described comprising in combination, a reciprocating means for compressing a coil spring in an axial direction, a guideway for retaining said spring, an ejecting slide arranged to reciprocate in said



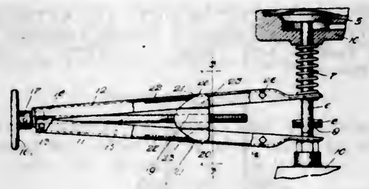
guideway for radial action on said spring while in a compressed state.

1,348,655. ROLLING PERSPECTIVE-RULE. WALTER ALBERT MOORE, Welland, Ontario, Canada. Filed Sept. 4, 1919. Serial No. 321,663. 4 Claims. (Cl. 33—77.)



1. A rule of the class described comprising a tapered rotatable element; a suitable scale-provided base-member having a straight-edge inclined with respect to the axis of said tapered rotatable element, and means carried by said base-member and adapted to rotatably support said tapered element with part thereof extending below said base-member, the whole adapted to co-act as set forth.

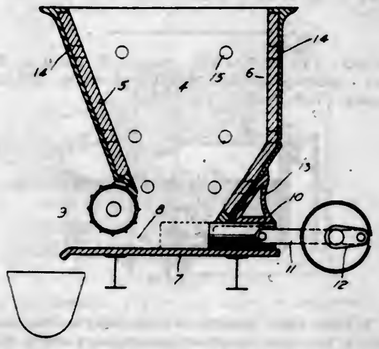
1,348,656. PICTURE-PROJECTION APPARATUS. ALBERT B. MUELLER, Chicago, Ill. Filed Nov. 7, 1917. Serial No. 200,689. 1 Claim. (Cl. 88—18.)



Picture projection apparatus including gearing and a picture bearing film engaged by said bearing, in combination with a normally stationary non-rotating shoe having a curved facial portion substantially coaxial with said gearing and disposed close to the gearing where the gearing teeth are in mesh with the film, and means for bodily moving said gearing and shoe together to adjust the film.

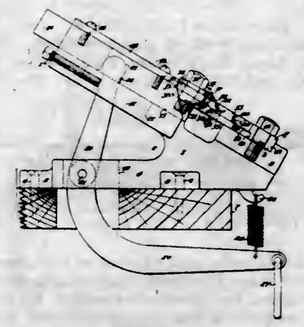
1,348,657. FLEXIBLE STAYBOLT FOR STEAM-BOILERS. ALFRED C. NEGUS, Schenectady, N. Y. Filed Sept. 13, 1919. Serial No. 323,449. 3 Claims. (Cl. 85—1.5.)

3. The combination of a flexible stay bolt having a head which is in the form of a section of a sphere included between two planes, and is recessed, at its top, in the form of an end section of a sphere, the major transverse dimension of which is nearly equal to that of the bolt head; a sleeve in which said head is socketed; and a cap, closing said sleeve and having a projection, on its inner side, in the form of an end section of a sphere, which enters the recess of the head, and depends below the cap only sufficiently far as to permit the interposition of a clear space between it and the bolt head, throughout its entire surface.



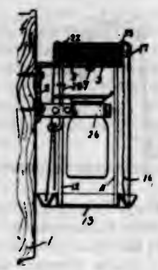
1,348,658. VALVE-LIFTER. OTTO NELSON, Chicago, Ill. Filed Jan. 29, 1919. Serial No. 273,802. 5 Claims. (Cl. 29—87.1.)

1. A valve lifter comprising two coöperating jaws with a slot in one end of each jaw dividing said jaw end into two prongs, there being a shoulder at the inner end of each of said slots; and a wedge disposed between said jaws and engaging said shoulders.



1,348,659. ASH-DISCHARGE MECHANISM. FRANK T. NICHOLSON, Cambridge, Mass., and JOHN M. NICHOLSON, New York, N. Y., assignors to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 18, 1918. Serial No. 217,909. 9 Claims. (Cl. 110—165.)

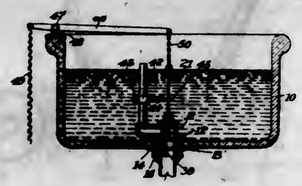
2. A refuse discharge mechanism for stokers, comprising a well structure having poke holes formed in the sides thereof and provided with a lateral discharge opening near the bottom thereof, a grinder roll partially closing



said aperture and plungers operating on the bottom of the well structure for impelling fuel through said aperture.

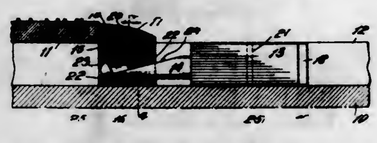
1,348,660. MACHINE FOR TIPPING SHOE-LACES. SVAN NORDEN, Cranston, R. I. Filed Mar. 20, 1919. Serial No. 283,758. 13 Claims. (Cl. 153—1.5.)

1. In a machine for tipping corset- or shoe-laces, the combination of a set of dies arranged to act against the opposite edges of the tip-blank to roll the latter around the lace, a substantially flat rest on which the blank lies, means to operate said dies, means engaging the marginal edge of the blank to hold it flat against the rest while its other edge is curled around the lace, and means to release the edge-holding means as the dies come into register.



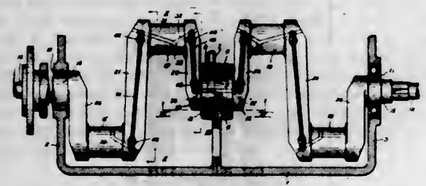
1,348,661. MILK-BOTTLE HOLDER AND COOLER. GERTRUDE V. OBERMAN, Modesto, Calif. Filed Apr. 7, 1919. Serial No. 288,419. 2 Claims. (Cl. 45—132.)

1. An evaporation refrigerator comprising a water pan, a shelf supported below the pan, a fabric supported from



the pan and extending to the shelf, and a framework for holding the upper portion of the fabric in the pan and extending to the shelf outside the fabric to hold the latter in place.

1,348,662. FLUSH-VALVE. ABRAM N. PASMAN, Waterbury, Conn. Filed May 7, 1919. Serial No. 295,409. 6 Claims. (Cl. 4—5.)

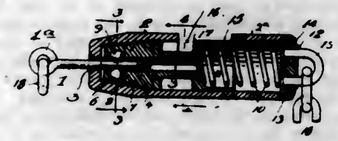


1. A flush valve apparatus comprising a body member having a vent and overflow connection, a valve member adapted to seat on the body member, and a device for covering the orifice of the vent and overflow connection within, and extending approximately to the bottom of the body member so as to provide a constant fixed opening for the passage of air through the chamber in the said body member to the vent and overflow connection.

1,348,663. PRINTER'S PLATE-HOOK. JOHN W. PITT, Bath, and GEORGE SAGUE, Highland, N. Y., Filed Apr. 24, 1918, Serial No. 230,393. Renewed Dec. 22, 1919. Serial No. 346,772. 9 Claims. (Cl. 101—387.)

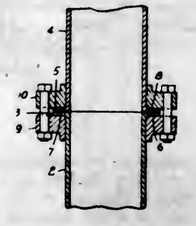
9. A printer's plate hook adapted to the grooves in the beds and the like of presses, comprising a member provided with means for securing it fixedly in the bed groove, a second member having a clamping jaw, a stem or spindle on one of said members entering a longitudinally disposed socket in the other member for swiveling said members together, and means for giving the jaw-carrying member its plate-clamping movement with respect to the fixed member, said means being a beveled face on the spindle and a screw set in the member having a socket impinging on said beveled face.

1,348,664. OILING DEVICE. FRANÇOIS RICHARD, Cleveland, Ohio, assignor to The Richard Auto Mfg. Company, Cleveland, Ohio. Filed Mar. 10, 1917. Serial No. 154,037. 5 Claims. (Cl. 184—6.)



4. An oiling device comprising the combination of a multiple crank shaft having rotary journals and a pair of revoluble journals, each provided with ducts leading to the wearing surfaces thereof, means for conducting oil from said rotary journal to one of said revoluble journals, and a pair of arcuate tubes each communicating with both of the ducts of said revoluble journals and forming in conjunction therewith an approximate circle whereby to counteract centrifugal force and insure a continuous uniform flow therethrough.

1,348,665. LAMP-SUPPORT. FRANCIS M. ROSENFELD, New York, N. Y., assignor, by mesne assignments, to Diamond Electric Specialties Corp., Newark, N. J., a Corporation of New Jersey. Filed Jan. 7, 1920. Serial No. 349,993. 4 Claims. (Cl. 248—42.)



2. In a lamp support, the combination of a coil of resilient material forming a spiral gripping member and a lamp holder mounted on the coil and adjustable with respect to the central axis thereof and in a plane normal to said axis.

1,348,666. FASTENER. WILLIAM A. SCHULER, New York, N. Y. Filed Nov. 3, 1919. Serial No. 335,283. 4 Claims. (Cl. 24—244.)

1. A fastener, comprising a pair of members, one of which is an apertured shell to receive the other member, said shell having a lateral opening, and a spring-pressed endwise-movable clutch carrier, wholly inclosed within the shell and laterally indented to provide means lying opposite to the lateral opening in the shell through which said means may be engaged to release the clutch.

1,348,667. CONNECTION OR JOINT AND METHOD OF MAKING SAME. CHARLES F. SNYDER, Pittsburgh, Pa. Filed June 14, 1919. Serial No. 304,178. 7 Claims. (Cl. 285—140.)

7. A joint structure including a metallic member having a granular contacting surface.

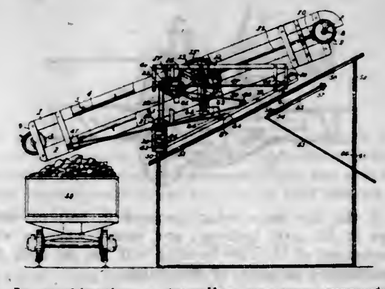
1,348,668. ADJUSTABLE SCREEN FOR THRESHING-MACHINES. ROBERT G. STEELE, Kelso, Saskatchewan, Canada. Filed Jan. 20, 1919. Serial No. 272,168. 2 Claims. (Cl. 130—19.)

1. The herein described screen comprising a supporting frame, a fixed screen section including a frame rigidly

carried by and above said supporting frame and having spaced transverse webs bent upward at one edge to form grain-retarding lips, one end bar of the frame of this section being also bent upward to form a lip, an adjustable screen section including a frame slidably mounted be-

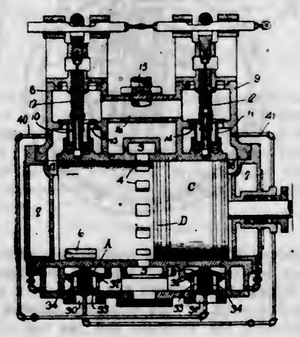
tween said supporting and fixed frames and having transverse webs spaced to correspond with those in the fixed section, and means carried by the supporting frame for altering the position of said adjustable section to set its webs more or less across the spaces between the webs of the fixed section.

1,348,669. MEANS FOR FORMING COMPRESSED OBJECTS. JOHN W. TALBOT, Chicago, Ill. Filed Jan. 28, 1918. Serial No. 214,153. 5 Claims. (Cl. 18—5.)



1. In an apparatus of the character described, the combination of a plurality of compression cylinders, a hydraulically-actuated compression device adapted to fit said cylinders, an abutment member movable into and out of alinement with the cylinders when in operative position, and means for supporting said cylinders so that they may be moved successively into operative relation with said compression device and abutment member.

1,348,670. ARTIFICIAL BAIT. PAUL VIEHWEGER, Milwaukee, Wis. Filed May 27, 1919. Serial No. 300,081. 4 Claims. (Cl. 43—35.)

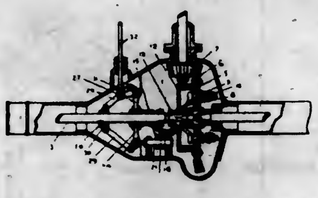


1. A device of the class described comprising a body member provided near one end thereof with a centrally disposed elongated recess, a hook member adapted to be normally concealed within said recess and having one end pivoted therein, spring means normally urging the free end of the hook member outwardly of said recess, a substantially U-shaped spring member carried by the body member and extended into said recess to engage the hook member and releasably secure the same against the action of its spring, and means for releasing the keeper from engagement with the hook member.

1,348,671. CONVEYER. WILLIAM J. VOELKER, Waterloo, Iowa. Filed June 2, 1919. Serial No. 301,166. 3 Claims. (Cl. 193—3.)

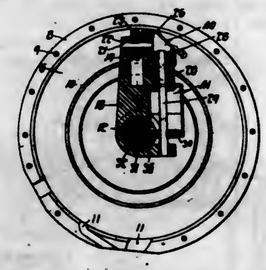
1. In combination, a traveling conveyer supported for both longitudinal and lateral displacements, mechanism for shifting the conveyer laterally, and other mechanism containing disconnectibly connected elements adapted for alternate coactions to either shift the conveyer longitudinally or to raise and lower its receiving part vertically.

1,348,672. UNIFLOW STEAM-ENGINE. CHARLES WAINWRIGHT, Erie, Pa. Filed Apr. 26, 1919. Serial No. 292,789. 1 Claim. (Cl. 121—125.)



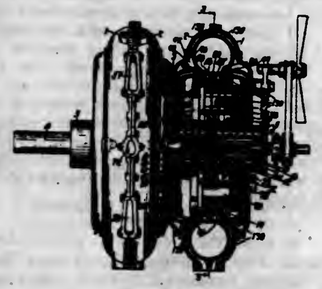
The combination in a uniflow steam engine, of a cylinder having exhaust means at an intermediate point in its length, and also having auxiliary exhaust means adjacent to its ends, a piston in said cylinder, valve-controlled conduits intermediate a source of steam supply and the ends of the cylinder, an exhaust chamber having an eduction orifice and surrounding the cylinder in communication with the first-named exhaust means, auxiliary exhaust valves intermediate said auxiliary exhaust means and said chamber, said valves having tubular stems closed at their outer ends and open at their inner ends, receptacles receiving and guiding said stems, springs sheathed in the stems and interposed between the closed ends thereof and opposed abutments, a conduit intermediate one of the valve-controlled conduits and the valve receptacle remote from said conduit, and a conduit intermediate the other valve-controlled conduit and the valve receptacle remote from said valve-controlled conduit, the conduit connections to the valve receptacles being arranged at the outer ends of said receptacles.

1,348,673. AUTOMATIC CLUTCH-DIFFERENTIAL ESPECIALLY FOR MOTOR-CARS. ROBERT WILLIAM ALLISON WARREN, Katanning, Western Australia, Australia. Filed Aug. 7, 1919. Serial No. 315,939. 6 Claims. (Cl. 74—7.)



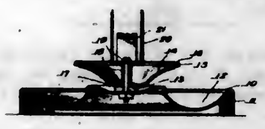
1. An automatic friction clutch differential comprising a live axle; a clutch member secured upon the inner end

of one part of the live axle; a complementary clutch member rotatable with but movable slightly endwise upon the inner end of the second part of the live axle, the two



parts of the live axle being mounted in ball or roller bearings in the axle housing; and means whereby sidewise movement of the axle housing with the car body disengages the two members of the clutch.

1,348,674. CYLINDER-FORMING PROCESS. HOWARD L. WEED, Detroit, Mich., assignor to Weed Differential-Rotary Motor Company, Detroit, Mich., a Corporation of South Dakota. Original application filed May 11, 1917, Serial No. 167,994. Divided and this application filed Apr. 4, 1918. Serial No. 226,606. 3 Claims. (Cl. 29—148.)



1. The process of forming a cylindrical surface, parts of which are located on two separate members, which consists in interposing between the members a tool rotatable about the axis of the surface, causing relative movement between the members and the tool along said axis, and causing the two members to approach the interposed tool.

1,348,675. ROTARY ENGINE. HOWARD L. WEED, Detroit, Mich., assignor to Weed Differential-Rotary Motor Company, Detroit, Mich., a Corporation of South Dakota. Filed Aug. 3, 1918. Serial No. 248,186. 17 Claims. (Cl. 123—11.)

1. A rotary engine comprising a casing, a main shaft mounted therein, said casing including an annular cylinder, a pair of rotors angularly movable about the main shaft, each of the rotors including a pair of pistons arranged to travel in the cylinder, the pistons of the two pairs alternating, a crank shaft carrier between the rotors and rigid with the main shaft, crank shafts mounted in said carrier, and having their axes parallel to that of the main shaft, said crank shafts each having a gear on one end and a crank on the other and alternate crank shafts being reversely arranged, gears fixed to the casing and with which the first named gears are in mesh, and a link connecting each crank with the rotor which is on the same side of the crank shaft carrier.

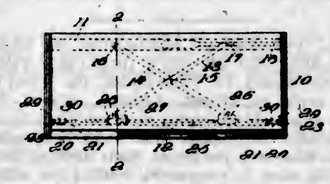
1,348,676. ASH-TRAY. JOHN W. WILLINGHAM, Honolulu, Hawaii. Filed June 24, 1919. Serial No. 306,315. 2 Claims. (Cl. 131—51.)

1. An ash tray comprising a main member provided with a circumferential groove in its upper face serving as a receptacle for ashes and the like, a cupped member secured centrally upon said main member and having its sides extending upwardly in diverging relation to the top of said main member whereby to provide an inwardly constricted circumferential opening.

1,348,677. PROCESS OF MANUFACTURING METALLIC SHAPES. CLAUDE A. WITTER, Philadelphia, Pa. Filed Oct. 4, 1919. Serial No. 328,454. 6 Claims. (Cl. 29—169.)

1. The process herein described of manufacturing metallic shapes, said process consisting in making an ingot, flattening the same and punching it to form a hole therein, then enlarging the bloom thus formed to form a ring, reducing the ring in cross section, then cutting the ring and straightening it.

1,348,678. RAILROAD-RAIL. CLAUDE A. WITTER, Philadelphia, Pa. Filed May 22, 1920. Serial No. 383,405. 2 Claims. (Cl. 238—150.)



1. As an article of manufacture, a railroad rail made of wrought and rolled metal, in which the metal decreases in density from the head of the rail to the flanges thereof.

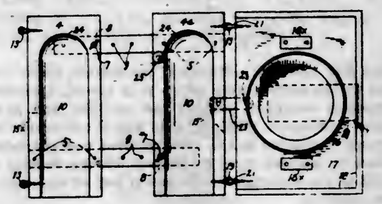
1,348,679. WING. HARRY M. WOLFE, New York, N. Y. Filed Mar. 15, 1920. Serial No. 366,021. 7 Claims. (Cl. 244—31.)

1. A wing for aerial machines, comprising a frame formed of members extending fore and aft and each of curved shape when viewed in plan, the members having contacting portions and secured together, and a covering for inclosing the said frame.

1,348,680. DOOR-EQUALIZER. ALBERT M. WOLTZ, Baltimore, Md., assignor to Solomon Himmel, Baltimore, Md. Filed Sept. 17, 1918. Serial No. 254,527. 7 Claims. (Cl. 45—78.)

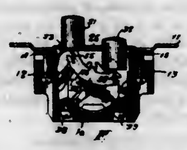
1. The combination with a slidable and swinging door, of brackets attached to the door, a rod having a loose engagement with said brackets, equalizer members each having one end loosely engaging said rod, means normally preventing movement of one of said ends longitudinally of the rod, and means for supporting the other ends of said equalizer members, said rod being disengageable from said brackets and said equalizer arms by a longitudinal movement.

1,348,681. FOUNTAIN-BRUSH. WILFRED J. WRIGHT, Summit, N. J., assignor to Ida C. Wright, Summit, N. J. Filed Feb. 28, 1920. Serial No. 362,083. 1 Claim. (Cl. 15—49.)



A fountain brush comprising a hollow handle which has removably secured thereto a cap member, said member having a perforated wall and a threaded bore; a brush structure including an attaching member having a threaded nipple adapted for threading engagement with said bore and a passage, a brush element embodying a core, said core having a threaded bore and a passage therein, a second nipple on said attaching member adapted for threading engagement with said bore in the core of said brush element, the end of the first mentioned nipple and the wall of said cap member coacting to control and regulate the flow of liquid.

1,348,682. SHIPPING-PACKAGE. STEFAN ZIELBINSKI, Boston, Mass. Filed Jan. 27, 1920. Serial No. 356,033. 9 Claims. (Cl. 217—56.)

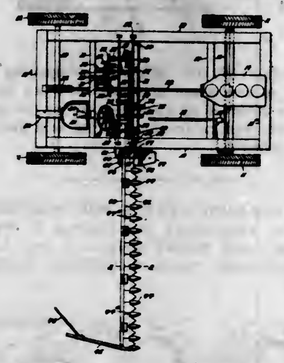


1. A shipping case provided with an opening in a wall thereof; an address plate pivotally mounted therein and adapted to be reversed by movement about the axes of the pivots thereof; and means for locking said address plate in adjusted position.

1,348,683. ROLLING DEVICE FOR SCRUBBING, &c. HERBERT G. ALDENBRUCK and LEONARD E. WEBBER, St. Paul, Minn.; said Webber assignor to said Aldenbruck. Filed Feb. 3, 1920. Serial No. 355,903. 1 Claim. (Cl. 155—167.)

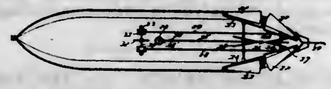
In a device of the kind described, a platform mounted on casters and having its top provided with parallel grooves adapted to receive the knees and legs of a kneeling person; said platform composed of two sections connected together and arranged for separation more or less apart, the grooves being two in number and arranged one in each section.

1,348,684. ELECTRIC SWITCH. CARL ERIC ANDERSON, Bridgeport, Conn., assignor to The Bryant Electric Company, Bridgeport, Conn., a Corporation of Connecticut. Filed June 14, 1917. Serial No. 174,743. 10 Claims. (Cl. 200—72.)



1. In an electric switch, a frame comprising a pair of standards spaced apart and notched in register at their upper edges to form open bearings, and having therebelow alined bosses forming trunnions, in combination with a rocker pivoted in said open bearings and a switch bar pivoted on said trunnions, a switch spring operatively interposed between the rocker and switch bar and having an associated guide seated at one end against the switch bar and in sliding engagement at its other end with the rocker, together with means for oscillating the rocker to shift the end of the switch spring engaged thereby from one side to the other of the axis of oscillation of the switch bar.

1,348,685. MOWING-MACHINE. MARMADUKE H. P. ARCHER, Conshohocken, Pa. Filed Oct. 24, 1919. Serial No. 333,047. 2 Claims. (Cl. 56—25.)



1. The combination with a power mowing machine and the drive shaft therefor, of a mowing attachment sup-

ported by and adapted to project laterally from one side of the machine, a cutter frame, a shoe on the inner end of the cutter frame, means for operating the cutter of the mowing attachment including a connecting rod and crank mechanism and means for starting and stopping the same, a crank arm associated with and operatively connected to the shoe and means for moving said crank arm to swing

the shoe and mowing attachment accurately up or down relative to the surface over which it is moved, a crank lever pivotally mounted beneath the machine and having operative connection with the shoe and a bell-crank lever operatively connected to the cranked lever and adapted for actuation by a hand lever to accomplish the raising and lowering of the movement attachment out of and into operative position.

1,348,686. UNDERWATER BOAT. JOHN A. ARCHIBALD, South Pekin, Ill. Filed Nov. 12, 1918. Serial No. 262,231. 2 Claims. (Cl. 114—16.)

1. A submersible craft having its hull provided in the side walls thereof with opposed guides arranged in pairs, those of one pair being inclined upwardly toward the stern and those of the other pair being inclined downwardly toward the bow, blades or planes arranged in pairs and pivotally mounted in said guides at one end for lateral extension from the sides of the hull, arms carried by said blades and projecting inwardly of the hull, and operating means for said blades whereby those inclined in one direction will be extended and the others simultaneously withdrawn into their guides.

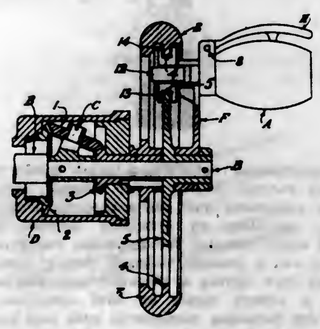
1,348,687. PROCESS OF PREPARING OR TREATING COCOANUT AND PRODUCT OBTAINED THEREBY. FRANKLIN BAKER, Jr., Philadelphia, Pa. Filed Oct. 31, 1917. Serial No. 199,489. 8 Claims. (Cl. 99—8.)

6. The process of preserving cocoanut in a natural moist condition, which consists in finely dividing the kernel, packing the same in receptacles, heating the open receptacles *in pleno* to a temperature of approximately 212° F. to 225° F., introducing the heated receptacles into a vacuum chamber whereby the air may be extracted therefrom, closing the receptacles *in vacuo*, subjecting the filled and sealed receptacles to a temperature sufficient to completely sterilize the contents thereof, and suddenly cooling the receptacles and their contents by introducing them into a cooling fluid immediately upon leaving the final heating chamber.

8. As a new article of manufacture, a hermetically sealed package of completely sterilized cocoanut kernel in a finely divided state confined *in vacuo* and from which the bulk of the air has been excluded.

1,348,688. PROCESS OF PREPARING OR TREATING COCOANUT AND PRODUCT OBTAINED THEREBY. FRANKLIN BAKER, Jr., Philadelphia, Pa. Filed Oct. 14, 1918. Serial No. 257,994. 3 Claims. (Cl. 99—8.)

1. The process of preserving cocoanut in a natural moist condition, which comprises separating the milk from the kernel, finely dividing the kernel, packing the same in receptacles, providing a solution of sugar and water, heating the same, introducing a portion of the heated sugar solution into the receptacles with the prepared cocoanut kernel, heating the open receptacles *in pleno* to a temperature of approximately 212° F., to 225° F., introducing the heated receptacles into a vacuum chamber whereby the air may be extracted therefrom, hermetically closing the receptacles *in vacuo*, subjecting the filled and sealed receptacles to a temperature sufficient to completely sterilize the contents thereof, and suddenly cooling the receptacles and their contents by introducing them into a cooling fluid immediately upon leaving the final heating chamber.



3. As a new article of manufacture, a hermetically sealed completely sterilized package of cocoanut kernel in a finely divided state without the milk together with a sugar solution confined *in vacuo* and free from air.

1,348,689. PROCESS OF PREPARING OR TREATING COCOANUT AND PRODUCT OBTAINED THEREBY. FRANKLIN BAKER, Jr., Philadelphia, Pa. Filed Oct. 14, 1918. Serial No. 257,995. 3 Claims. (Cl. 99—8.)

1. The process of preserving cocoanut in a natural moist condition with the original milk, which comprising separating the milk from the kernel, finely dividing the kernel, packing the same in receptacles, heating the milk of the cocoanut to a temperature approximating 212° F., introducing a portion of the heated cocoanut milk into the finely divided mass of the kernel, heating the open receptacles *in pleno* to a temperature of approximately 212° F. to 225° F., introducing the heated receptacles into a vacuum chamber whereby the air may be extracted therefrom, hermetically closing the receptacles in which the finely divided cocoanut and milk are placed *in vacuo*, subjecting the filled and sealed receptacles to a temperature sufficient to completely sterilize the contents thereof, and suddenly cooling the receptacles and their contents by introducing them into a cooling fluid immediately upon leaving the final heating chamber.

3. As a new article of manufacture, a hermetically sealed completely sterilized package of cocoanut kernel in a finely divided state together with its original milk confined *in vacuo* and free from air.

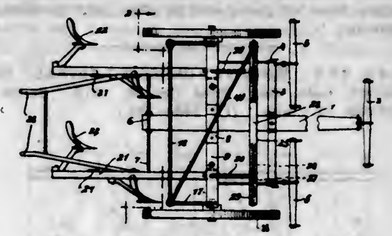
1,348,690. VARIABLE-SPEED HAND-DRIVING MECHANISM. ARCHIBALD BARR and WILLIAM STROUD, Anniesland, Glasgow, Scotland, assignors to Barr and Stroud, Limited, Anniesland, Glasgow, Scotland. Filed Sept. 30, 1919. Serial No. 327,490. 4 Claims. (Cl. 74—34.)

1. Hand driven variable speed mechanism consisting of a driving handle to be revolved by hand, a driven part,

change speed gearing in driving connection with the driven part, the change speed gearing having driving members, one for each different speed, friction clutch mechanism carried by the driving handle for disconnecting the driving members from or frictionally connecting them separately with the driving handle, and controlling means provided on the driving handle movable laterally relative to the axis of the handle for actuating the friction clutch mechanism, for the purposes set forth.

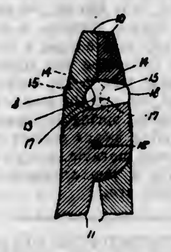
1,348,691. SHEAVE-CARRIER. ROBERT H. BEAUMONT, Philadelphia, Pa., assignor to R. H. Beaumont Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Apr. 13, 1920. Serial No. 373,628. 3 Claims. (Cl. 254—190.)

1. The combination of a pivoted carrier having a weight at one end; a sheave at the opposite end; and a swivel connection between the sheave and the body of the carrier.



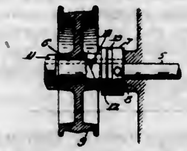
1,348,692. SUCKER-ROD JOINT. CYRUS BELL, Whittier, Calif. Filed July 14, 1919. Serial No. 310,757. 2 Claims. (Cl. 287—105.)

1. The combination of sucker-rod sections having intermeshing transverse surfaces formed at their adjoining ends and contoured to form, when said surfaces are intermeshed, a tapered cylindrical rod portion having a screw-thread at its larger end, and a sleeve having a tapered bore engaging said tapered rod portion and having an internal screw-thread at the larger end of said bore engaging the screw-threaded portion of the rod.



1,348,693. WALKING-CULTIVATOR. DAVID BLASER, Taylor Ridge, Ill. Filed Jan. 12, 1920. Serial No. 350,834. 3 Claims. (Cl. 97—35.)

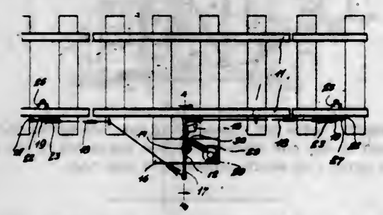
1. In a straddle-row walking cultivator, the combination of an arch frame, outer and inner upright rock-shafts journaled in said frame, the outer shafts having rearwardly directed arms at their upper ends, and the inner shafts having forwardly directed arms on their upper ends, spindles carried by the outer rock-shafts, ground wheels mounted on said spindles, beams connected and adapted to swing laterally with the inner rock-shafts and equipped with ground-working devices, a transverse rod connecting the rearwardly directed arms of the outer rock-shafts, a transverse spring carrier connected with the arms of the inner rock-shafts, springs disposed in said carrier and at opposite sides of the arms of the inner



rock-shafts, and a rod connected to the said spring carrier adjacent to one end thereof and also connected to the arm of the outer rock-shaft remote from said end.

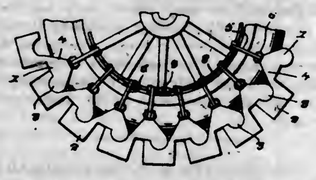
1,348,694. WIRE CUTTING AND TWISTING TONGS. JOSEPH B. BRADLEY, Miami, Fla. Filed Dec. 6, 1919. Serial No. 342,931. 1 Claim. (Cl. 7—8.)

A device of the character described comprising a pair of members pivoted in crossed relation and formed at one end as handles and at their other ends as jaws, said jaws being provided with openings extending therethrough of wedge-shape, and removable blades associated with the jaws and wedge-shaped for conforming engagement with said openings, the inner ends of said blades being reduced and concaved and the outer ends of the blades projecting beyond the jaws.



1,348,695. POWER-DRIVE FOR CREAM-SEPARATORS. ARTHUR NEIL BRECKENRIDGE, Rockford, Ill. Filed May 4, 1918. Serial No. 232,588. 1 Claim. (Cl. 192—8.)

A power pulley attachment for a cream separator or other machine adapted to be driven either by a hand crank or by power and having a projecting driving shaft, comprising a stub shaft having a bore at one end for the reception of said projecting shaft and permitting quick mounting and dismounting of the stub shaft, means for detachably securing the stub shaft to said projecting shaft, a pulley revoluble on said stub shaft, means preventing outward displacement of the pulley on the stub shaft, an annular collar or the like fixed to the inner end of the stub shaft, a sleeve loose on the stub snaft and interposed between said collar and the pulley, inclined surfaces between the hub of the pulley and said sleeve, and a friction surface between the sleeve and annular collar



for permitting frictional engagement therebetween when the sleeve is moved longitudinally on the stub shaft by reason of rotation of the pulley in such direction as will cause its inclined faces to press inwardly the complementary faces on the sleeve to effect said frictional engagement.

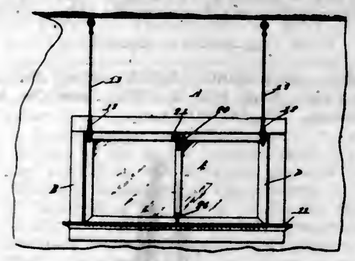
1,348,696. HIGHWAY-CROSSING SIGNAL. OSCAR BROWN, Lula, Ga. Filed Oct. 6, 1919. Serial No. 328,939. 1 Claim. (Cl. 246—294.)

A railway crossing signaling device having a base, a standard revolubly mounted upon the base and provided with a lateral signaling arm and a depending spindle, a spring connected with said spindle for yieldingly holding the standard in its normal position, a cross arm carried by the standard, a trip arm having a roller arranged in the path of wheels traversing the track rails, yielding means for holding said trip in its normal position, connections between said trip and the cross arm of the standard and having cushioning spring attachment to the latter, and an audible signaling means carried by the base and having an operating arm movable in a plane perpendicular to and provided with a cam arranged in the path of movement of said cross arm.

1,348,697. TRACTION-GRIPPING DEVICE. ROBERT L. CARLINE, Pittsburgh, Pa. Filed Mar. 6, 1920. Serial No. 363,749. 4 Claims. (Cl. 152—16.)

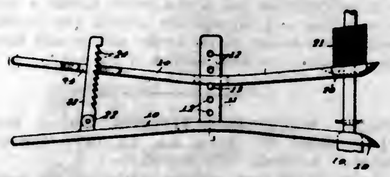
1. In a device of the character described, a plurality of members adapted to fit about a tire each provided at one end with an outwardly projecting block having a transversely extending substantially semi-cylindrical recess and at its other end with a transversely extending rounded element adapted to fit into the recess of the succeeding member, and means for securing said members in assembled condition about the tire.

1,348,698. CONSTRUCTION OF ILLUMINATING DEVICES. WILLIAM THOMAS COULSON, Anerley, London, England. Filed Apr. 11, 1919. Serial No. 289,360. 5 Claims. (Cl. 240—106.)



5. An illuminating device comprising spaced prisms of a length much greater than their width, a lens connecting said prisms and a source of light positioned in the space between said prisms and adjacent said lens.

1,348,699. BUTTON-SNAP. LEILA S. DAVIS, Madison, Fla. Filed Mar. 28, 1920. Serial No. 368,104. 3 Claims. (Cl. 24—106.)



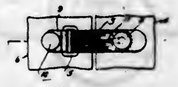
1. Securing means for a button provided with a plurality of holes comprising a wire member bent and rebent at one end to pass through opposite ones of the holes in the button and having its other end terminating in a tapered head defining a retaining shoulder, in combination with a base member having a hole through which said head is adapted to pass, a spring within said base member having its arms crossed and recrossed to define a loop engageable about said wire member beneath said shoulder, and means whereby said loop may be expanded to permit withdrawal of said head.

1,348,700. WINDOW CONSTRUCTION. JESSE F. ETCHISON, Clovis, N. Mex. Filed Sept. 30, 1919. Serial No. 327,369. 2 Claims. (Cl. 20—53.)

1. In combination with a window frame and a sash adapted to fit within the same, a mounting system for the sash comprising hangers disposed at the upper corners of the sash, cords connected with said hangers and secured at a point above the frame whereby to support the sash in inwardly inclined position with the bottom rail thereof engaged upon the sill of the frame, a lifter member at the lower rail of the sash, a securing member on the lower rail of the sash, and a securing member at the top of the frame engageable by said first named securing member for holding the sash in inwardly extending horizontal position at the top of the frame.

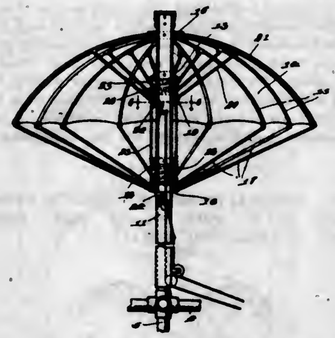
1,348,701. VALVE-SPRING COMPRESSOR. CYRUS EVERITT, Sidney, Ill. Filed June 23, 1919. Serial No. 306,036. 1 Claim. (Cl. 29—87.1.)

A valve spring compressor comprising a base, a standard rising therefrom and fixed to the base, said standard having a plurality of openings, a pivot adapted to be interchangeably fitted in said openings and to project beyond the opposite sides of the standard, a lever of a length substantially equal to that of the base, said lever being curved from the ends and having an elongated slot in its central lowermost portion for the reception of the standard, said lever resting upon the pivot at opposite sides of the



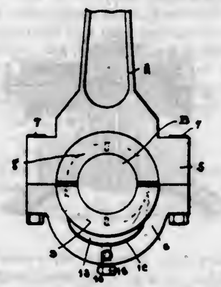
standard and capable of rocking movement thereon, one and corresponding extremities of the base and said standard being oppositely dished and forked, a rack bar rising from the base in parallelism with the standard, said rack bar being pivotally mounted upon the base, a lever having a second elongated slot for the reception of the rack bar, and the edge of the latter mentioned slot being adapted to engage the teeth of said bar for holding the lever fixed in a given position.

1,348,702. MACHINE-GUN AND OTHER FIREARM. HUGH WILLIAM GABBETT-FAIRFAX, London, England. Filed May 18, 1920. Serial No. 382,341. 3 Claims. (Cl. 42—75.)



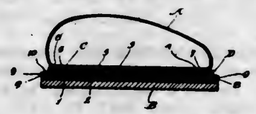
2. A firearm comprising a framing, a breech piece carried thereby and formed with a socket, a barrel detachably mounted in the breech socket, said barrel having external grooves or slots, and the breech piece having internal grooves or slots forming seatings for pairs of wedges, wedges inserted in said grooves or slots, one acting face of each pair of combined wedges bearing against the corresponding face of the slot in the barrel and the other bearing against the corresponding face of the slot in the breech piece, and means for tightening and slacking the wedges.

1,348,703. SHOE-FASTENER. PHILOMENE FERRIS, Westwood, Calif. Filed Jan. 23, 1920. Serial No. 353,442. 2 Claims. (Cl. 24—203.)



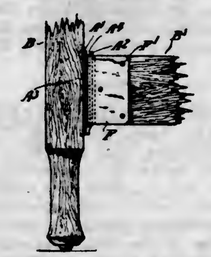
2. A shoe fastener, comprising a loop, means for securing the loop to the outer surface of one side of the shoe, a flexible connecting member having one end secured to the outer surface of the other side of the shoe, and means for removably securing the free end of the flexible member after it is passed through the loop.

1,348,704. SAFETY ATTACHMENT FOR AIRPLANES. RALPH P. FOX, Harrisburg, Pa. Filed Sept. 5, 1919. Serial No. 321,746. 3 Claims. (Cl. 244—21.)



1. An attachment for airplanes comprising a plurality of collapsible parachutes, spring means for normally holding the parachutes in open position, latching means for each parachute, for preventing the same from closing, a lever, flexible means for connecting the lever with the latch means of all the parachutes to release the same, a drum, flexible means connecting the drum with the parachutes for simultaneously collapsing the parachutes when the drum is rotated, a handle on the drum and ratchet mechanism for the drum.

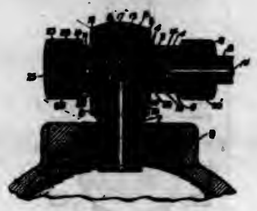
1,348,705. QUICK-ADJUSTING BEARING. WALTER M. FRANCE and LEROY B. JONES, Meshoppen, Pa. Filed Aug. 12, 1919. Serial No. 316,972. 1 Claim. (Cl. 64—55.)



A quick adjusting bearing for shafts comprising in combination with a box and cap therefor, a pair of semi-cylindrical babbitts, each having an outer peripherally grooved edge to interfit the box and cap and adapted to embrace a shaft and spaced apart thereby, a pin carried by the box and engaged in one of the babbitts, a follower fitted in the cap and working against the other babbitt, a pin carried by the follower and engaged in said other babbitt, an adjusting screw carried by the cap and working against the follower and having its inner end seated in said follower, and means engaged in the cap to co-act with the adjusting screw to lock the same in adjusted position, the follower being seated in the outer peripherally grooved edge of the babbitt adjacent thereto.

1,348,706. FLEXIBLE AND RESILIENT SHOE-SOLE. JOHN B. FRECHETTE, Valparaiso, Ind. Filed Dec. 11, 1919. Serial No. 344,066. 4 Claims. (Cl. 36—44.)

1. A shoe sole of the type described including an inner and an outer sole, a rubber layer between the inner and outer soles, a cork layer adjacent the rubber layer, a canvas layer adjacent the cork layer, and means secured to the outer sole and the shoe upper for retaining the layers in place.



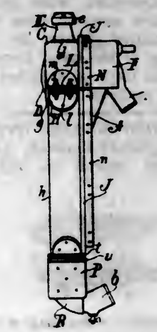
1,348,707. POST AND SIDE BAR OF BEDS, FURNITURE, AND THE LIKE. STANLEY BENJAMIN GAMBLE, West Perth, Western Australia, Australia. Filed Dec. 13, 1919. Serial No. 344,725. 3 Claims. (Cl. 5—55.)

1. A bed rail fastener, comprising a bracket adapted to be attached to a post and having vertical spaced members,

one of which is formed with a tapering tongue and a clip adapted to be attached to a rail and having a tapering opening corresponding to the tongue of the bracket.

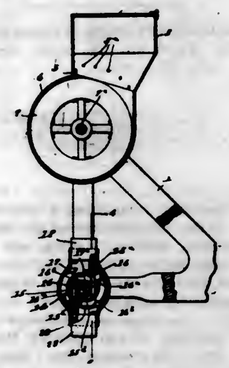
1,348,708. STEMLESS SELF-CLOSING VALVE FOR HIGH-PRESSURE TANKS. EDWARD E. GARLAND, New York, N. Y. Filed June 26, 1919. Serial No. 306,927. 3 Claims. (Cl. 251—78.)

1. A stemless high pressure valve comprising a casing having a chamber therein, a threaded neck extending from said casing having a passageway extending therethrough in communication with said chamber, a restricted outlet passage at one end of said chamber, an annular beveled portion connecting the chamber with the restricted passage and forming a valve seat, a plug threaded in the other end of said chamber having a passage therethrough communicating with said chamber, a recess in one end of said plug, a valve body having one end thereof guided within said recess and the other end thereof guided within said restricted passage, a portion of the end guided within the recess of the plug being cut away to form a passage at all times between the passage within the plug and the chamber of the valve, the other end of the valve body guided within the restricted passage having a passage therein extending laterally of the valve body and through its end said passage being normally closed by the walls of the restricted chamber, and a beveled annular shoulder on said valve body adapted to be seated on the annular beveled portion of the valve chamber.



1,348,709. COMBINATION-STOVE. CHARLES M. GENTHNER, Reading, Pa., assignor to The Reading Stove Works, Orr, Painter & Co., Reading, Pa., a Corporation of Pennsylvania. Filed Sept. 30, 1919. Serial No. 327,484. 7 Claims. (Cl. 126—36.)

1. The combination in a stove, of a pivoted burner structure, a valve controlling the flow of gas to the burner, a flame deflecting plate located above the burner and means actuated by the valve for turning the burner and elevating the deflecting plate when gas is admitted to the burner.

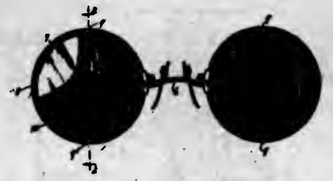


1,348,710. AUTOMOBILE-RADIATOR CASING. MARTIN GRABER, Iowa City, Iowa. Filed Feb. 12, 1920. Serial No. 358,113. 3 Claims. (Cl. 180—68.)

1. In a radiator casing, the combination with a sheet metal top portion having a filler tube collar and a front apron, the said top portion having an externally projecting stiffening corrugation extending from side to side thereof and in rear of the said collar, of vertical sheet metal side members each having a stiffening corrugation extending longitudinally and in line with the said corrugation of the top when the parts are assembled, means for securing the sides and top together, a bottom member comprising angular ends and a sheet metal trough-like member connecting the said ends, the said trough having

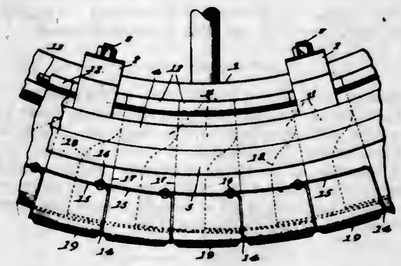
a depending, curved, hollow portion open rearwardly to receive the outflow pipe of a radiator, and means for connecting the sides and the said ends of the bottom.

1,348,711. NAILING MECHANISM. JOHN H. GIBSON, Little Falls, Minn. Filed Sept. 15, 1919. Serial No. 323,688. 3 Claims. (Cl. 1—45.)



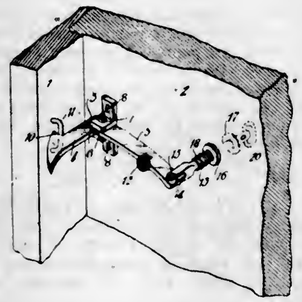
3. In a nailing mechanism, the combination of a frame, a revoluble hammer casing mounted therein and carrying magnetized hammer heads, means for delivering nails one by one and head foremost to the upper most head of the hammer, means for rotating the hammer casing through a part of a revolution caused by the striking of a hammer head against an object, and means operable by rotation of the hammer casing to actuate the nail-delivering means.

1,348,712. SPECTACLE-SHADE. KURT R. GITTERMAN, Brooklyn, N. Y. Filed Oct. 22, 1919. Serial No. 332,387. 2 Claims. (Cl. 88—41.)



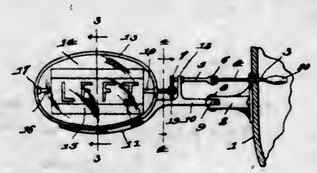
1. A detachable shade for spectacles consisting of a thin flexible transparent member adapted to fit over the lens, and integral hooks formed on said member adapted to engage the edges of the lens for retaining the same in place.

1,348,713. SPECTACLES. KURT R. GITTERMAN, Brooklyn, N. Y. Filed Feb. 17, 1920. Serial No. 359,292. 5 Claims. (Cl. 88—41.)



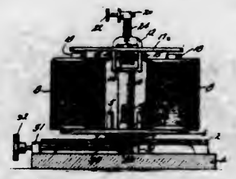
5. A flexible binder rim for lenses, comprising a rim adapted to be snapped in position over the perimeter of a lens, and diametrically opposed hooks formed on said ring for the reception of a protective shade, whereby to position the same over the lens.

1,348,714. TIRE. THOMAS GORDON, Vancouver British Columbia, Canada. Filed Nov. 29, 1919. Serial No. 341,447. 3 Claims. (Cl. 152—10.)



1. A tire comprising clips adapted to straddle a wheel rim from within and to be connected to said rim, annular stepped metallic members surrounding and opposed to the ends of the clips and arranged in lapped relation thereto, annular stepped buffers surrounding and opposed to the outer edges of the said members and lapped therewith, lapped metallic sections having eyes at their ends opposed to the inner edges of the annular members, and endless metallic rings occupying said eyes and arranged within the clips.

1,348,715. GATE-LATCH. EDWIN J. GRENDING, Colfax, Ill. Filed Jan. 31, 1916. Serial No. 75,371. 1 Claim. (Cl. 292—127.)

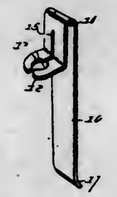


A latch of the character described, comprising a latch member of substantially bell crank shape having one arm of hook form to provide a latch portion and the other arm constituting an operating portion, a bracket pivotally supporting the latch member adjacent to the point of juncture of the latching and operating portions thereof and adapted to be secured to a movable part, a staple adapted to be secured in a fixed part and engageable by the latch portion of said latch member, an actuating rod adapted to be slidably fitted through the movable part and having a forked extremity straddling the operating portion of said lach member, a pivot connecting the forked extremity of the rod to the free extremity of the latch portion, a spring active upon the rod and the movable part for normally sustaining the latching portion of the latch member in position for positive engagement with the staple, a knurled enlargement formed on the operating portion of the latch member spaced from the end pivotally connected with the rod and on the outermost edge thereof.

1,348,716. DIRECTION-SIGNAL. DAVID I. GRIFFITHS, Frostburg, Md. Filed Nov. 24, 1919. Serial No. 340,355. 1 Claim. (Cl. 116—48.)

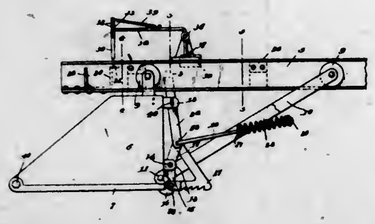
The combination in a direction signal of the side wall of an automobile body, said wall having a transverse opening therein, a bracket on the outer side of said wall below said opening and having a knuckle connected in hinged manner to the knuckle of the bracket, a casing superimposed upon and connected to said support and having front and rear openings, a rotatable sign-bearing body journaled in the casing and having a trunnion extended through the inner end of the casing and journaled in the support and equipped with a spur gear, a shaft section extended through the opening in the wall of the automobile body, and a shaft section connected by a hinge with the first-named shaft section and having a pinion intermeshed with said spur gear, the pintle of said hinge being disposed in vertical alinement with the pintle connecting said knuckles.

1,348,717. TELEGRAPH INSTRUMENT. JOSÉ VARGAS GUERRA, Santiago de Cuba, Cuba. Filed Mar. 31, 1920. Serial No. 370,287. 5 Claims. (Cl. 175—336.)



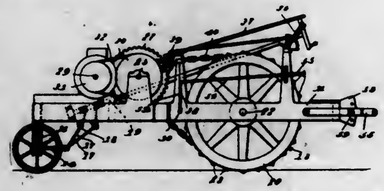
1. A telegraph instrument, comprising a base, a bridge above the base, magnets supported on the bridge, an armature above the magnets, means for guiding the vertical movement of the bridge, and means for adjusting the bridge vertically.

1,348,718. SAFETY INSTRUMENT-HOLDER. WILLIAM R. HOFFMANN, New York, N. Y. Filed Sept. 9, 1919. Serial No. 322,652. 3 Claims. (Cl. 24—3.)



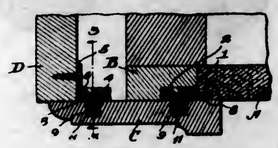
1. A safety attachment for watches, pedometers, ammeters, and similar measuring instruments having a yield-

ing tongue and means for securing the same to an instrument casing, one end of the tongue being slitted longi-



tudinally and off-set at an angle to form complementary jaws having registering seats.

1,348,719. STEAM-SHOVEL TRIP. CARLEY E. HOUGHTON, Mulberry, Kans. Filed Jan. 20, 1920. Serial No. 352,736. 3 Claims. (Cl. 212—137.)

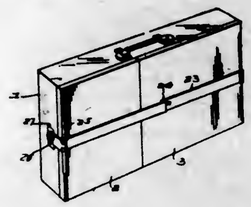


1. In combination with a boom, a dipper movable longitudinally thereon, a hinged door closing the bottom of the dipper and a pivoted spring influenced latch for locking the door closed; of tripping means for releasing the latch, including a rocker bar pivoted to the latch, and pivoted to the dipper, a weight influenced beam pivotally connected to the boom, an adjustable contact member secured on the beam, guide means for the contact member carried by the boom, and said contact member designed to be brought in the path of engagement with the upper end of the rocker bar when the boom and buckets have been swung to an upward inclination and the bucket has been moved outward of the boom to bring the rocker bar in engagement with the contact member.

1,348,720. TRACTOR. LUDWIG JOHNSON, Helena, Mont. Filed Nov. 10, 1919. Serial No. 336,775. 3 Claims. (Cl. 180—25.)

1. A tractor comprising a frame, having spaced side and end members, steering wheels, a comparatively large tractor wheel journaled between said side members and including end disks and an intermediate groove disk, ground engaging elements connecting said disks, a motor driven shaft, pulleys fixed upon said shaft, said pulleys being of different diameters, a drive chain trained over said intermediate disk and one of said pulleys, a lever mounted for vertical and horizontal swinging movement, an eye carried by one end of the lever through which the adjacent run of the chain passes, said chain normally holding one end of the lever elevated, said lever being operable to shift the chain from one of said pulleys to the other to vary the speed of the tractor.

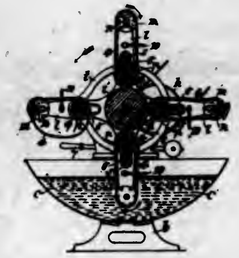
1,348,721. FASTENER FOR TRIMS AND JAMBS. WILLIAM K. KETTERINGHAM, Jr., Jackson, Miss. Filed Nov. 20, 1917. Serial No. 202,957. 1 Claim. (Cl. 20—12.)



The combination with a wall, jamb and trim, a plate set in the wall and having openings connected by a slot for receiving the head of a screw, an angled plate one member of which is secured to the back of the jamb and the other of which is slotted with screw-head receiving openings at the ends of the slot, and screw carrying plates secured to the back of the trim, the screws carried by said plates having projecting heads adapted to engage the slots respectively of the first mentioned plates.

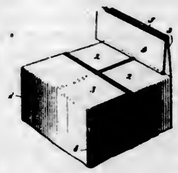
1,348,722. PURIFICATION OF CARBAZOLE. WILLIAM KIRBY, London, England, assignor to South Metropolitan Gas Company, London, England. Filed Dec. 9, 1919. Serial No. 343,665. 1 Claim. (Cl. 23—24.)

A process of purifying carbazole which consists in causing a solution of the crude carbazole in sulfuric acid to absorb water from an atmosphere until the carbazole has separated from the solution.



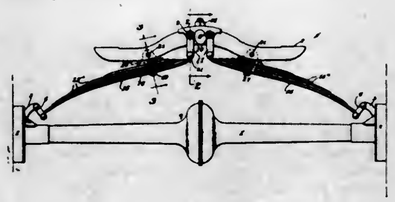
1,348,723. GOCART-SUITCASE. WILLIAM HENRY LESTER, New York, N. Y. Filed Oct. 25, 1917. Serial No. 198,437. 4 Claims. (Cl. 280—37.)

1. In a device of the kind described, a casing, a folding cover member therefor, a pair of wheels, supports on which the wheels are journaled, the said supports being hingedly mounted with reference to the casing, and means for shifting the position of one of the hinged supports, whereby the two wheels may be axially alined or thrown out of axial alinement to permit the one being folded down beside the other.



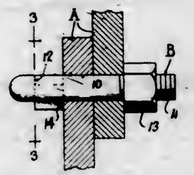
1,348,724. MACHINE FOR DYEING, WASHING, SCOURING, SIZING, BLEACHING, AND MERCERIZING YARN IN HANK FORM. JOSEPH SPENCER LORD and SAM SPENCER LORD, Manchester, England. Filed Apr. 11, 1919. Serial No. 289,159. 5 Claims. (Cl. 8—17.)

1. A machine for dyeing, washing, scouring, sizing, bleaching and mercerizing yarn, comprising a frame, a driving shaft mounted thereon, a central roller secured to, and a set of intermittently rotatable radial arms mounted on said shaft near each end thereof, a pair of horizontally projecting rotary yarn carrying members on each radial arm, the inner members being in frictional con-



tact with said central rollers and a liquid tank located below each set of said arms and yarn carrying members, for the purpose specified.

1,348,725. COLLAPSIBLE BOX. LUNDY SHANNON LUNDY, Niagara Falls, Ontario, Canada, assignor to A. van den Boom and J. W. Slate, Walnut Cove, N. C. Filed Oct. 16, 1919. Serial No. 331,083. 1 Claim. (Cl. 229—43.)

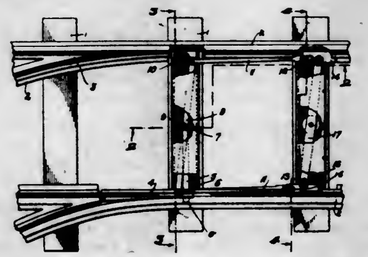


A collapsible box provided with inwardly folding sealing flaps upon opposite parallel walls and inwardly folding duplex sealing flaps upon the other opposite parallel walls, such duplex sealing flaps being provided with an intermediate foldable joint extending substantially along a central line parallel with the line of union with the wall and said foldable joints meeting along the center and said flaps covering the entire surface at one end of the box when sealed.

1,348,726. VEHICLE-SPRING. MICHAEL M. MCINTYRE, Cleveland, Ohio, assignor, by mesne assignments, to The Standard Parts Company, Cleveland, Ohio, a Corporation of Ohio. Filed July 29, 1915. Serial No. 42,502. 16 Claims. (Cl. 267—41.)

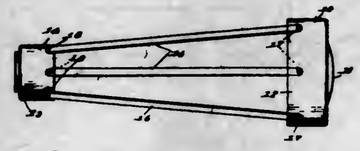
1. The combination, with an axle, of a member spaced from and extending in the same direction as the axle, a pair of springs, means connecting one end of each spring to the axle, means connecting the opposite end of each spring to the central portion of said member, at least one of such connections being a flexible connection, and means connecting an intermediate portion of each spring to said member.

1,348,727. BOLT. JAMES R. MCKINLAY, Seattle, Wash. Filed Feb. 23, 1918. Serial No. 218,758. 1 Claim. (Cl. 85—9.)



The combination with a headless bolt threaded at one end, of a member having inclined plane side faces to provide a transversely tapered key adapted to be removably positioned in a slot extending longitudinally of the bolt, said bolt having inclined side walls to provide a transversely tapered opening.

1,348,728. MEDICATED PESSARY. LEON MARTOCCI-PISCULLI, New York, N. Y. Filed Oct. 8, 1919. Serial No. 329,263. 5 Claims. (Cl. 128—260.)

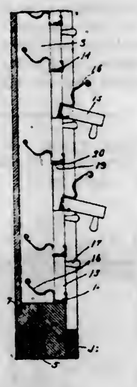


1. A pessary, including a stem formed with a central bore extending throughout its entire length, and a container formed with an opening, said stem being adapted to project through the container opening, said stem being provided with means permitting of a communication between the container and the bore of said stem.

1,348,729. SWITCH-LOCK. PHILIP H. MYERS, Philadelphia, Pa. Filed July 23, 1919. Serial No. 312,717. 5 Claims. (Cl. 246—337.)

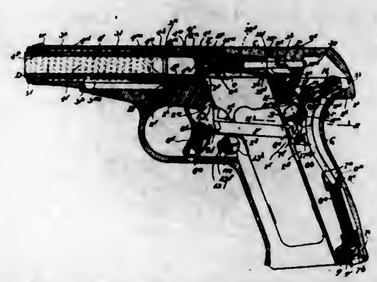
1. A switch lock, comprising a switch, including rails, a movable point, a bar secured to such point and adapted to hold or move the same, a rocker arm for shifting such bar, and means associated with the outer ends of the rocker arm for normally preventing any longitudinal movement of said bar.

1,348,730. FOLDING TELESCOPE. EMIL NORMAN, Holmquist, S. D. Filed Oct. 20, 1919. Serial No. 331,987. 2 Claims. (Cl. 88—32.)



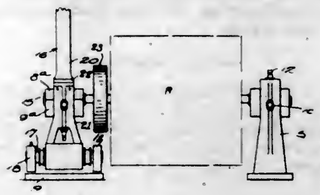
2. A folding telescope comprising an open ended objective frame having a lens therein, an open ended eye-piece frame of less diameter than the objective frame and having a lens therein, and a plurality of spring strips pivoted at one end within the first named frame and pivoted at their other ends within the second named frame, said strips normally holding said frames in spaced relation, partial relative rotation of said frames resulting in twisting of said strips into spiral form with said second named frame disposed within said spiral and within said first named frame.

1,348,731. PROCESS OF DISSOLVING CELLULOSE. ZENO OSTENBERG, San Jose, Calif., assignor to International Cellulose Company, Reno, Nev., a Corporation of Nevada. Original application filed Jan. 31, 1916, Serial No. 75,356. Patent No. 1,218,954, dated Mar. 13, 1917. Divided and this application filed Nov. 1, 1916. Serial No. 128,962. 4 Claims. (Cl. 127—10.)



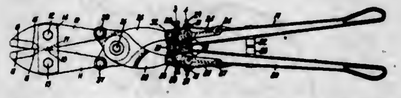
4. In the process of dissolving cellulose in highly concentrated hydrochloric acid the replacement of part of the hydrochloric acid by concentrated sulfuric acid at a ratio of 1½ parts of concentrated sulfuric acid to take the place of one part of hydrogen chlorid at a temperature below 50° C.

1,348,732. DRILL-CABINET. FRANK M. PEARMAN, Watertown, S. D. Filed Apr. 4, 1919. Serial No. 287,572. 1 Claim. (Cl. 211—8.)



In a drill cabinet, a flat rectangular frame, one flat side of said frame closed, the opposite flat side of said frame provided with downwardly opening horizontally disposed doors, each of said doors provided with a sheet metal plate facing the bottom edge thereof and extending upwardly on the outer face of the door and embedded in a groove in the outer face of the door, said metal plates extending inwardly from each of said doors and forming a trough shaped retainer for a drill, and a rod at the lower outer corner of each door and within said metal plate and forming the hinge of the door.

1,348,733. AUTOLOADING FIREARM. JOHN D. PEDERSEN, Jackson, Wyo. Filed July 30, 1915, Serial No. 42,774. Renewed July 17, 1919. Serial No. 311,689. 262 Claims. (Cl. 42—3.)

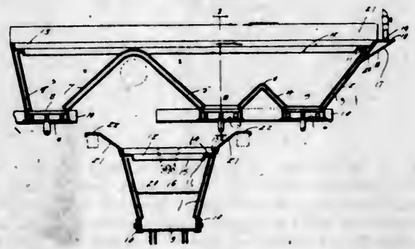


36. In an auto-loading firearm, in combination, a frame having guides for a power-slide and for a power-slide-actuating breech-lock, and having an abutment-face in position for limiting the power-stroke of, and thereby initially stopping said block; a sliding-and-tilting breech-block in position and arranged for having a non-tilting power-stroke and provided with a power-stroke-limiting face for engaging said stroke-limiting abutment-face of the frame at the termination of the power-stroke, and having a power-transmitting face for engaging and actuating the power-slide during the power-stroke thereof; and a series of coacting block-actuating devices on and connecting the slide and breech-block, and in position and arranged for only coming into operative engagement after the power-slide has moved backward through a distance and a time-interval for allowing the projectile to be discharged and the gas pressure to be reduced subsequently to the initial stopping of the breech-block, and also arranged for first tilting and then further retracting the breech-block along with the power-slide through a loading-stroke.

1,348,734. SAND-REEL SUPPORT. MERL R. PONTIUS and ALVER L. WEST, El Dorado, Kans. Filed May 31, 1919. Serial No. 301,005. 1 Claim. (Cl. 64—52.)

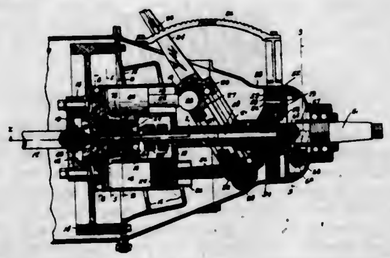
In a well drilling rig constructed entirely of metal, a drive wheel, a stationary and a pivoted standard, each having an opening to receive a shaft bearing, a sectional shaft bearing mounted in each opening, said opening being of a size to permit a relatively wide range of adjustment of the bearing therein, means for supporting each bearing in adjusted position, the pivoted standard being composed of detachably connected sections separably connected at the opening therein, a sand reel shaft mounted in said bearings, a friction pulley carried by said shaft, a ball and socket joint between the shaft and the bearing of said stationary standard to allow a limited swinging movement of the shaft sufficient to permit of the adjustment of the friction pulley carried by the shaft to cause it to engage said drive wheel.

1,348,735. CUTTING-TOOL. HENRY K. PORTER, Brookline, Mass. Filed Dec. 20, 1918. Serial No. 267,579. 3 Claims. (Cl. 81—199.)



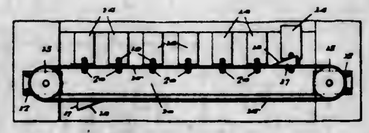
1. A cutting tool having, in combination, a pair of cutter levers, a pair of handle levers pivotally connected to each other and an adjustable member on each of said handle levers and forming, in effect, a part thereof, means to adjust said members toward and away from each other and a pair of levers pivotally connected together and crossing each other intermediate said cutter and handle levers, the opposite ends of said intermediate levers being pivotally connected to said cutter levers and to said adjustable members, respectively.

1,348,736. PRODUCTION OF SULFURIC ACID. KENNETH BINGHAM QUINAN, Somerset West, Cape Province, South Africa. Filed Mar. 25, 1919. Serial No. 285,020. 3 Claims. (Cl. 23—1.)



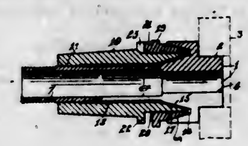
1. The process of producing sulfuric acid involving the intervention of nitric oxid which comprises conducting the process as a whole or certain stages of the process by distributing the liquids entering into reaction with gases, over the surface of a permeable diaphragm so as to form a layer of liquid thereon, and causing the gases entering into reaction with the liquid to pass through the layer of liquid and to support the liquid above the diaphragm.

1,348,737. STEAM-BOILER ASH-PAN. JASPER N. RALSTON, Fitzgerald, Ga. Filed Feb. 19, 1918. Serial No. 218,122. 5 Claims. (Cl. 110—171.)



5. In an ash pan of the class described having interiorly arranged water spaces provided with open upper ends, a shield arranged to extend over the open ends of the water spaces, whereby cinders or the like will be prevented from entering said spaces.

1,348,738. POWER-TRANSMISSION APPARATUS. ELWYN M. RAYBURN and ALDEN G. RAYBURN, Sausalito, Calif. Filed May 20, 1918. Serial No. 235,517. 22 Claims. (Cl. 60—53.)



1. A variable speed power transmission apparatus comprising a driving member, a driven member, a fluid pump carried by the driven member, means on the driving member for operating said pump, and a fluid operated motor carried by the driven member and receiving fluid from said pump and applying power to the driven member.

1,348,739. SIGN. WILLIAM REID, Atlanta, Ga. Filed July 1, 1919. Serial No. 307,932. 5 Claims. (Cl. 40—125.)

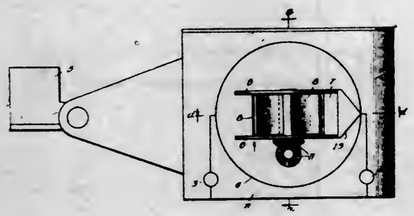
1. A sign comprising an elongated member having a plurality of pockets open at one end, letter blocks slidably fitted in each pocket, and horizontally movable means operable to elevate said blocks within said pockets at predetermined intervals, said blocks gravitating to normal position when released.

1,348,740. CHUCK. GEORGE REISINGER, Rochester, N. Y. Filed Mar. 12, 1919. Serial No. 282,232. 12 Claims. (Cl. 279—50.)

1. A lathe chuck comprising a collet having spring jaws formed with clamping faces for engaging the exterior of a work piece and also with clamping faces for engaging the interior of a work piece, and two devices selectable at will, one for moving the spring jaws outwardly to engage the interior of a work piece and the other for moving the spring jaws inwardly for engaging the exterior of a work piece.

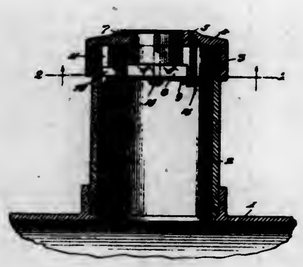
1,348,741. GELATINIZATION OF CELLULOSE NITRIC ESTERS IN THE MANUFACTURE OF EXPLOSIVES. WILLIAM RINTOUL and THOMAS JOSEPH NOLAN, Stevenston, Scotland, assignors to Nobel's Explosives Company Limited, Stevenston, Ayrshire, Scotland. Filed May 19, 1919. Serial No. 298,135. 11 Claims. (Cl. 52—3.)

1. Nitrocellulose containing explosives for propellent, blasting or detonant purposes, having as ingredients at least one member of the sub-class of urethanes characterized by containing attached to the nitrogen atom two aromatic groups, one of which is a benzyl group.



1,348,742. LEVEL AND TUBE-HOLDER THEREFOR. WILLIAM A. ROESKE, McKee City, N. J. Filed Oct. 16, 1918. Serial No. 258,373. 1 Claim. (Cl. 33—211.)

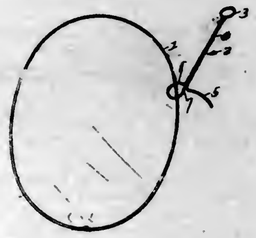
As a new article of manufacture a spirit level tube holder comprising a single piece of tubular material having a central sight opening and having the end portions thereof provided with diametrical slits and longitudinal slits communicating with the diametrical slits forming partially severed pieces integral with the tubular portion, said pieces being flattened out with portions ex-



tended farther to one side of the tubular portion than to the other, said pieces being bent at angles to said tubular portion and away therefrom.

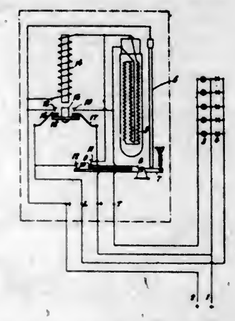
1,348,743. FLYING-MACHINE. ALEXANDER B. RONEY, Chicago, Ill. Filed Dec. 8, 1919. Serial No. 343,369. 1 Claim. (Cl. 244—16.)

An aeroplane fuselage in combination, a one-piece propeller and motor assembly comprising lateral propeller frames, each frame pivotally shouldered to opposite sides of said fuselage, worm-gear adjusting means for said propeller frames, paddle wheel propellers pivotally mounted in said frames and driving means for said propellers.



1,348,744. TANK-LOCK. FREDERICK HENRY RUNDALL, Fall River, Mass. Filed Sept. 5, 1919. Serial No. 321,762. 1 Claim. (Cl. 70—90.)

The combination with a tank having an outer externally threaded cylindrical spout thereon and a threaded cap adapted to be screwed over the end of the spout of a series of lugs fixed to the inner face of the spout, a plate spaced from the top of the cap, a bolt casing carried by the plate, a lock casing carried by the cap, a sliding bolt in the bolt casing, a rotary barrel in the lock casing having a key hole therein, a lever operated by the barrel and operating the sliding bolt to move it into engagement with said lugs, a spring holding the lever in its extreme positions, said barrel adapted to be operated by an operating means inserted through the top of the cap and said cap adapted to be locked on the spout when either partially or entirely screwed home.

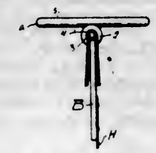


1,348,745. HOOP-ROLLER. CHARLES W. RUSSELL, Sioux Falls, S. D. Filed Nov. 21, 1918. Serial No. 263,545. 2 Claims. (Cl. 46—38.)

1. A device of the character described formed from a single piece of metal bent to provide a handle ring, a twisted shank continuing from the handle ring, a curved batting arm projecting at right angles from the longitudinal axis of the shank, and a resilient open ring

formed at the end of the shank and projecting in a direction opposite the arm.

1,348,746. SWITCH FOR THE CLOSING OF AN ELECTRIC CIRCUIT FOR A CERTAIN PERIOD. HERMAN AXEL SCHEPELER, Copenhagen, Denmark, assignor to A/S Mekano, Copenhagen, Denmark. Filed Oct. 30, 1918. Serial No. 260,348. 14 Claims. (Cl. 161—1.)



1. In an electric light system, a light circuit; an electro-magnetic device for closing said light circuit; an electric heating unit electrically connected with said electro-magnetic magnetic device; heat-controlled means controlling by its expansion and contraction the lighting-period; and means operated by said heat-controlled means for closing said light circuit independently of the closing of the circuit effected by said electro-magnetic device to permit the electro-magnetic device to assume a circuit opening position without opening the light circuit.

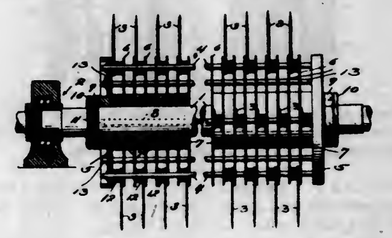
1,348,747. BELT-FASTENER. FRANK D. SCHILLING, Emington, Ill. Filed Jan. 2, 1920. Serial No. 348,862. 4 Claims. (Cl. 24—33.)

2. A belt coupling of the type described comprising end members for attachment to the terminals of a belt, plates having hinged loops thereon, hinge loops on the end members for alinement with the hinge loops on the plate members, pins removably carried in the hinge loops for securing the plates to the end members and to each other, resilient means for holding the pins in position in the loops, and removable substantially frusto-conically shaped facing members on the plate members between the loops for the purpose set forth.

1,348,748. CLEANING DEVICE. HERMAN T. SCHNEIDER, Garner, Iowa. Filed Feb. 13, 1920. Serial No. 358,488. 1 Claim. (Cl. 83—64.)

A cleaning device of the character described comprising a handle having a bearing on one end, a pair of wings, each wing having a knuckle on one side thereof, and a recess in its intermediate portion for the reception of a portion of said bearing, said knuckles being disposed in alinement with each other and the bearing, a pintle disposed through the bearing and the knuckles, and a rod secured to said bearing and extending beyond the bearing in right angular relation thereto, whereby pivotal movement of said wings in one direction is limited.

1,348,749. THERMOMETER. RALPH F. SCHNEIDER, Brooklyn, N. Y., assignor to Charles J. Tagliabue Manufacturing Co., Brooklyn, N. Y., a Corporation of New York. Filed Jan. 16, 1917. Serial No. 142,594. 6 Claims. (Cl. 73—52.)



1. A thermometer comprising an insulating tube, a capillary tube therein, a scale member located in co-operative relation to said capillary tube and disconnected therefrom, and retaining devices carried by said scale member in spaced relation to each other lengthwise thereof, said devices extending between the scale member and said insulating tube under tension whereby the scale member is pressed toward said capillary tube.

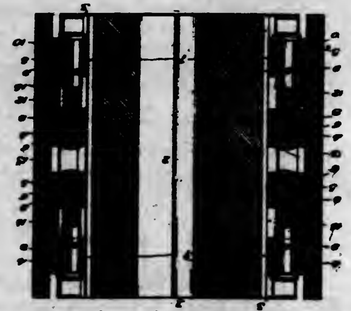
1,348,750. CHOKE ATTACHMENT FOR SHOTGUNS. FRANCIS XAVIER SCHUSTER, Raber, Mich. Filed Dec. 19, 1918. Serial No. 267,523. 1 Claim. (Cl. 42—79.)

The combination with a gun barrel the outer diameter of which adjacent the muzzle end is gradually reduced to form a forwardly extending taper, the barrel being provided with longitudinally arranged slits in this tapered portion, of a correspondingly shaped sleeve telescoped over the tapered end and formed with an ear, an adjusting rod formed with a reduced portion passing loosely through the said ear and having a head abutting the ear on one side and the shoulder abutting the ear on the other side, a threaded socket fixed with reference to the stock and receiving the other end of the said rod which is correspondingly threaded, and manually operable means for rotating the rod whereby relative longitudinal movement between the barrel and the sleeve is effected for the purpose specified.

1,348,751. ROTARY CANE-CUTTER. WILLIAM SEARBY, Puunene, Hawaii. Filed Aug. 15, 1917. Serial No. 186,380. 2 Claims. (Cl. 146—30.)

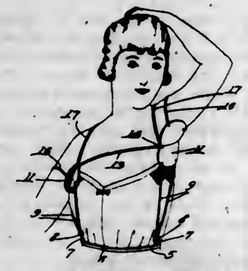
1. In a rotary cane cutter, the combination with a rotor comprising a driven shaft, a pair of plates, constituting heads, mounted on the shaft, other plates arranged between the heads and disposed at regular intervals, spacing blocks fitted on the shaft between said plates and rods extending between the heads, the plates and heads having openings through which said rods are passed, relatively short and thin resilient knives singly arranged and loosely pivoted on the rods for movements in the directions of their planes, and a series of spacing rings for each knife loosely fitted on the respective rods on each side of said knife and between adjacent plates, said rings having sufficient relative looseness to permit a certain measure of lateral play of the knives.

1,348,752. EXTENSIBLE ELECTRICAL FIXTURE. ROY E. SHAW, Spearfish, S. D. Filed July 26, 1918. Serial No. 246,864. 1 Claim. (Cl. 173—367.)



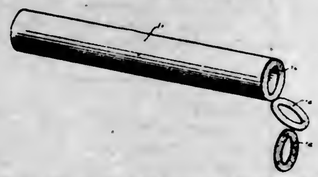
A device of the character described comprising a bracket, resilient strips carried by the bracket, insulating blocks carried by the strips, conical contact members carried by the blocks, a reel having an insulating axle provided with pointed terminals seated in the contact members, conductors having electrical connection with the contact members, and conductors wound upon the reel and extended through the axle into contact with the contact members to establish an electrical connection therewith.

1,348,753. CUTTER-HEAD. ELMER S. SHIMER, Milton, Pa., assignor to Samuel J. Shimer & Sons, Inc., Milton, Pa., a Corporation of Pennsylvania. Filed Feb. 3, 1920. Serial No. 356,108. 7 Claims. (Cl. 144—224.)



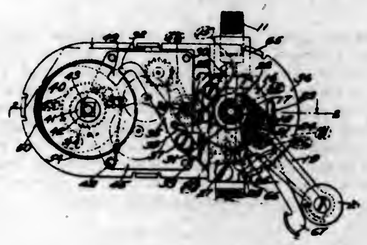
1. The combination with the body portion of a cutter head including head sides in which tracks or ways are

formed and having a bevel guide adjacent thereto, of a knife provided with dove-tailed webs on the base, the



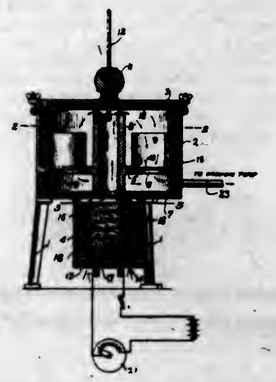
forward edge of the knife including the webs being beveled so that the edge fits the bevel guide, and means fitted to the tracks or ways for clamping the webs.

1,348,754. DRESS-SHIELD SUPPORTER. ETHEL SHRADER, Salina, Kans. Filed June 17, 1919. Serial No. 304,814. 1 Claim. (Cl. 2—34.)



A dress protector comprising a pair of shields, a waist-band, tabs secured to said waist-band, eyelets carried by said tabs, a pair of elastic tapes secured to each of said eyelets, means carried at the ends of said tapes for detachably securing the same to the dress shields for retaining a half of the shields flat and in contact with the body of the wearer, elastic shoulder-bands adapted to be detachably secured to the dress shields midway intermediate the ends thereof, elastic arm-bands adapted to be detachably secured to one end of the shield whereby the one half of said shields are retained in contact with the arms of the wearer, a front-band and back-band adapted to encircle the body of the wearer for retaining the dress shields in close contact with the body of the wearer, said front-band and back-band being secured to said shields midway intermediate the ends thereof, and means for detachably connecting one end of said front-band to one of the shields.

1,348,755. CLUTCH-FACING AND PROCESS OF MAKING THE SAME. SUMNER SIMPSON, Bridgeport, Conn., assignor to The Raybestos Company, Bridgeport, Conn., a Corporation of Connecticut. Filed Feb. 6, 1919. Serial No. 275,467. 9 Claims. (Cl. 154—2.)

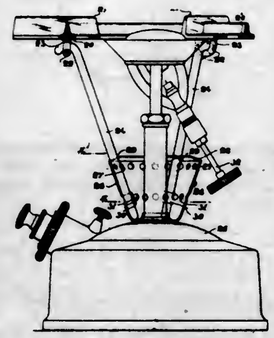


1. The process of making clutch facings which consists in winding sheets of asbestos paper under tension to form tubes, saturating the tubes in a hardening solution after winding, baking, and then slicing the tubes into rings to form clutch facings.

1,348,756. CONTROL MECHANISM FOR TENSION-OPERATED DEVICES. RAYMOND D. SMITH, Arlington, Mass., assignor to Tremont Products Company, Boston, Mass., a Corporation of Massachusetts. Filed Apr. 9, 1917, Serial No. 160,876. Renewed Sept. 16, 1919. Serial No. 324,226. 9 Claims. (Cl. 161—9.)

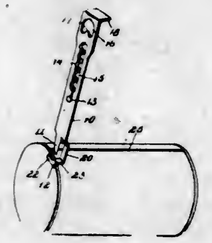
1. The combination with a rotatable, tension-actuated device, of a manually operable, concentrically pivoted, and oscillatory, actuating member therefor, having abutting contact therewith and a spring connection thereto arranged yieldingly to maintain said abutting contact; a movable detent arranged normally to intercept said device and to yield for permitting the movement thereof; timing mechanism for governing said detent, operatively adjustable independently thereof, and including a reinforcing element for said detent, manually movable into and out of an inoperative position, and adapted automatically to be impelled to said position,—the said element being further arranged, only when displaced from its said position, to intercept said detent thereby to render the latter operative to arrest said device for a predetermined time; and a manually retractable latch for locking said member rotatively displaced from said abutting contact with said device when the latter is arrested by said detent, whereby tension is established in said spring connection for actuating said device upon release of the latter by said detent.

1,348,757. DRIER. GUILFORD L. SPENCER, Cambridge, Mass. Filed July 24, 1919. Serial No. 312,942. 6 Claims. (Cl. 34—39.)



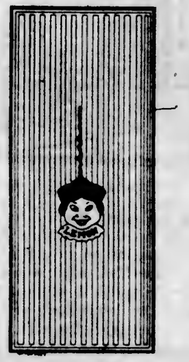
6. A drier, including a casing, a housing positioned below such casing, a tube extending from the lower end of such casing and terminating adjacent the top of the same and communicating at its lower end with the housing, a partition dividing the casing into an upper and a lower compartment, said partition being formed with openings, capsules positioned within such openings, and a source of suction connected to the lower of these compartments, said capsules seating against the opening in said partition in such a manner as to form an air-tight joint.

1,348,758. DOOR-HANGER. BERNHARD SPITZFADEN, Brooklyn, N. Y. Filed Feb. 4, 1919. Serial No. 274,959. 1 Claim. (Cl. 16—91.)



A door hanger, comprising a bracket having spaced parallel members and adapted to be secured to a door, a hub formed of sections contacting at the median line of the hub, said hub being of a thickness equal to the distance between the members of the bracket, the sections of the hub being recessed at their contacting faces to form a peripheral annular groove or ball race at the center of the thickness of the hub, screws securing the sections of the hub together, a wheel mounted on the hub and having an interior annular groove or ball race at the center of the thickness of the same, the ball race in the hub being deeper than that in the wheel, balls in said ball races, and a bolt passing through the members of the bracket and the hub and clasping the said members against the hub to prevent the same from turning.

1,348,759. VAPOR-STOVE. RICHARD HENRY STEPHENS, Birmingham, England, assignor of one-half to Kynoch Limited, Birmingham, England. Filed Jan. 23, 1920. Serial No. 353,474. 1 Claim. (Cl. 126—44.)



In a vapor stove, the combination with a fuel container of a preheater cup carried by the top thereof and having a flange at its upper end, a grid having eyes upon its underside, rod supports inclined downward toward the center of the container and passed through holes in the flange of the preheater, arch parts carried by the side of the preheater cup and engaged by the rod supports, and hooks at the upper ends of the rod supports engaged with the eyes of the grid.

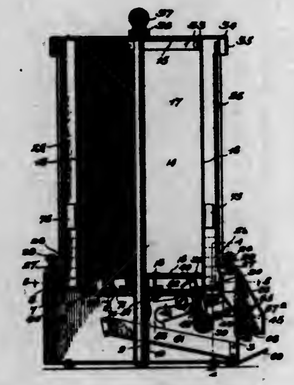
1,348,760. CAN-OPENER. RICHARD M. STEWART, Chicago, Ill. Filed Oct. 27, 1919. Serial No. 333,602. 1 Claim. (Cl. 30—3.)

A can opener having a flat shank provided at one end with a longitudinally extending blade having an inner cutting edge, a transversely extended foot overlying and offset from the plane of the tip of the blade and having a neck offset in the opposite direction from the plane of the blade and arranged in parallelism therewith, said foot being connected with its neck by an offset shoulder intersecting the plane of the blade at an intermediate point of the length of its cutting edge.

1,348,761. CANDY-WRAPPER. WINIFRED SACKVILLE STONER, New York, N. Y., assignor to Newark Paraffine & Parchment Paper Co., New York, N. Y., a Corporation. Filed Oct. 23, 1919. Serial No. 332,664. 3 Claims. (Cl. 46—40.)

1. A candy wrapper comprising a sheet of material having a pictorial illustration about in the middle thereof; said wrapper adapted to be folded around a candy form to produce an article having some of the characteristic qualities of a doll, the said candy form providing a filler for the pictorial illustration and the remainder of the sheet arranged to provide a skirted body portion for the said pictorial illustration.

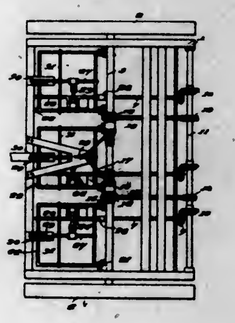
1,348,762. COMBINATION SPOON AND FORK. SOSAKU SUZUKI, Tokyo, Japan. Filed Mar. 12, 1919. Serial No. 282,159. 2 Claims. (Cl. 30—22.)



1. A device of the type described comprising a concave body formed to serve as a spoon, one of the faces of the

body being grooved and provided with an open recessed portion communicating with the grooves, the sides of the grooves and recess being formed with a bevel constituting

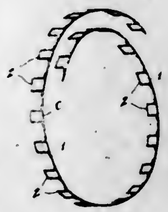
a track for receiving the tines and body of a fork the handle of which constitutes a handle for the spoon shaped body.



1,348,763. VENDING-MACHINE. WILLIAM G. TEMPLETON, Colorado Springs, Colo. Filed June 1, 1917. Serial No. 172,259. 2 Claims. (Cl. 211—8.)

1. The combination of an ejector, means for imparting an operating stroke to the ejector, a horizontal table, a drum mounted for rotation on a vertical axis with respect to said table and provided with a plurality of vertical compartments, each adapted to support a stack of articles to be ejected with the lowermost article of each stack positioned to be shifted into the path of the ejector upon rotary movement of the drum into different positions on its axis, a plurality of movement arresting devices on the table each coöperating to determine a properly adjusted position of the drum for article delivery, a resilient depending arm mounted on the drum with its lower end adjacent the table, a spring interposed between the bottom of the drum and the arm, and a roller carried on the lower end of the arm adapted to register with one of said arresting devicea when the drum is rotated to an adjusted position.

1,348,764. COTTON-CHOPPING MACHINE. JAMES O. THORNHILL, Jelle, Minn. Filed Dec. 26, 1917. Serial No. 208,818. 1 Claim. (Cl. 97—45.)

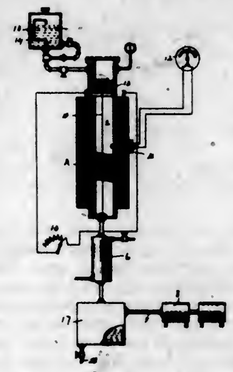


In a cotton chopper, a main frame having a live axle journaled therethrough for mounting traction wheels, an auxiliary frame hung to and below the main frame, a transverse drive shaft mounted on the auxiliary frame and operatively connected with the live axle carried by the main frame, a plurality of vertically swinging frames arranged side by side relative to each other transversely throughout the extent of the width of the auxiliary frame, crank shafts journaled longitudinally of the swinging frame, driven shafts disposed in longitudinal alinement with the crank shaft, universal joint connections between

the alined shafts, said driven shafts operatively associated with the transverse drive shaft, chopping members swingably mounted in the auxiliary frames, crank rods connecting the crank shafts with the chopping members below their point of mounting, means for regulating the transmission of power from the live axle to the drive shaft, and means for vertically adjusting the swinging frames independently of each other to vary the depth of the cut made by the chopping members

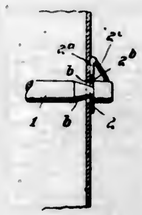
---

1,348,765. PICKET-FENCE STRAND. JOHN B. WEEKS, Corinth, Miss. Filed July 15, 1919. Serial No. 311,105. 3 Claims. (Cl. 256—46.)



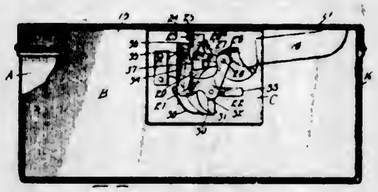
1. A picket carrying strand comprising a straight strand and picket carrying loops, the said loops being formed of separate strands and fixedly secured on said straight strand.

1,348,766. APPARATUS FOR MANUFACTURE OF GAS. MILTON C. WHITAKER and WALTER F. RITTMAN, New York, N. Y., assignors to Synthetic Hydro-Carbon Company, Pittsburgh, Pa., a Corporation of Delaware. Filed Feb. 28, 1916. Serial No. 80,956. 9 Claims. (Cl. 196—25.)



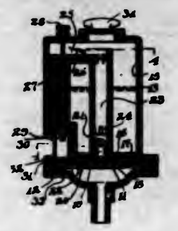
3. In an apparatus for treating materials in a gaseous phase, the combination of means for feeding the material to be treated, a plurality of small spaced surfaces, arranged in the line of the flow of the material, means for

heating the objects forming the surfaces, to a temperature above the gasifying temperature of such material and an



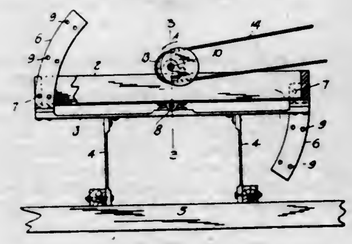
unobstructed chamber for receiving the gas and means for heating the walls of such chamber.

1,348,767. THREADLESS ROD OR BOLT. FRED E. WHITE, Gardner, Mass., assignor to Central Oil & Gas Stove Co., Gardner, Mass., a Corporation of Massachusetts. Filed Feb. 24, 1920. Serial No. 360,902. 1 Claim. (Cl. 85—7.)



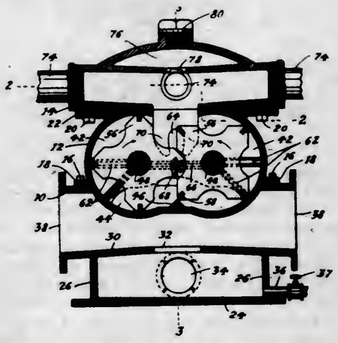
In a fastening for tie rods and the like, a rod having an undercut end portion and a fastening clip comprising a plate having an opening with a portion of a size to permit the passage of the said end and a reduced portion to engage said undercut portion, said plate having an angularly turned flange bendable into engagement with the rod end to hold the undercut portion in the reduced portion of the opening.

1,348,768. SAVINGS SAFETY-BOX. EDWARD HUGH WILLIAMS, New Orleans, La. Filed June 2, 1919. Serial No. 301,214. 7 Claims. (Cl. 194—51.)



1. A safe-deposit box having a hinged lid, a partition within said box forming compartments therein, a casing within the box having a hinged lid located in one of said compartments, means for locking the lid of said inner casing, and means carried within said inner casing for locking the lid of the box, substantially as set forth.

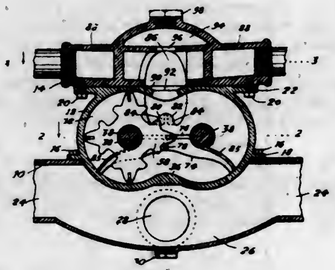
1,348,769. LUBRICATING DEVICE. CHARLES W. WYMAN, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Dec. 7, 1916. Serial No. 135,627. 41 Claims. (Cl. 184—29.)



21. In a lubricating device, a cylinder, a piston therein, a reservoir constituting a source of lubricant supply, a supplemental reservoir communicating with said cylinder, means for subjecting each of said reservoirs to cylinder pressure, and means actuated by the variations in pressure in said cylinder for delivering lubricant from said source of supply to said supplemental reservoir.

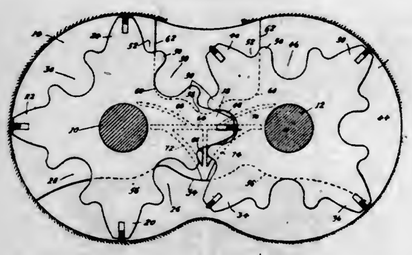
1,348,770. VIBRATORY MOVEMENT. GUY L. ALLEN, Boulder, Colo., assignor of one-half to John G. Clark, Boulder, Colo. Filed Jan. 19, 1918. Serial No. 212,643. 2 Claims. (Cl. 83—56.)

1. The combination of springs capable of swinging in opposite directions from perpendiculars passing through fixed points of support, horizontal springs mounted on the others, a body carried on the horizontal springs, and an unbalanced weight rotating about a fixed center of motion on the body.



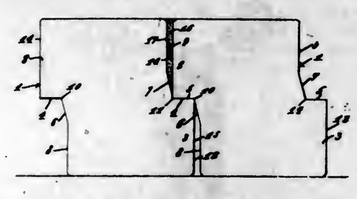
1,348,771. ROTARY PUMP. JOSEPH T. AUGER, Minneapolis, Minn., assignor of three-eighths to E. M. Ferguson, St. Paul, Minn., and three-eighths to E. Dulac, Minneapolis, Minn. Filed Apr. 22, 1918. Serial No. 229,988. 4 Claims. (Cl. 103—44.)

1. A rotary pump comprising a base member provided with an inlet chamber, an intermediate chamber con-



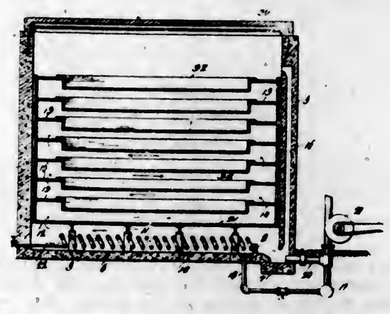
taining overlapping piston chambers connected with said inlet chamber, a top member having discharge openings in connection with said piston chambers, a partition in the upper portion of said top member, said partition being provided with a port whereby an air chamber is formed above said partition, the outer wall of said air chamber being provided with a priming opening, and a plug for closing said priming opening.

1,348,772. ROTARY PUMP. JOSEPH T. AUGER, Minneapolis, Minn., assignor of three-eighths to E. M. Ferguson, St. Paul, Minn., and three-eighths to E. Dulac, Minneapolis, Minn. Filed Feb. 7, 1919. Serial No. 275,543. 6 Claims. (Cl. 103—44.)



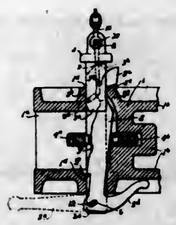
3. A rotary pump comprising a casing containing two overlapping piston chambers provided with lateral intake and discharge openings, bridges separating said intake and discharge openings, rotary pistons having intermeshing blades in said piston chambers, and shafts for said rotary pistons extending through said piston chambers, said bridges being provided with grooves extending in an inclined direction downwardly and outwardly from the lower sides of said shafts to the lower sides of the ends of said bridges.

1,348,773. ROTARY PUMP. JOSEPH T. AUGER, Minneapolis, Minn., assignor of three-eighths to E. M. Ferguson, St. Paul, Minn., and three-eighths to E. Dulac, Minneapolis, Minn. Filed Mar. 24, 1919. Serial No. 284,562. 7 Claims. (Cl. 103—44.)



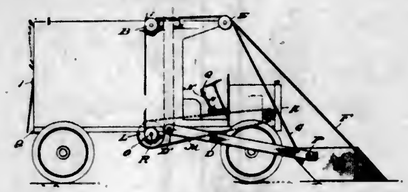
7. A rotary pump comprising a casing containing two overlapping piston chambers provided with lateral intake and discharge openings, bridges separating said intake and discharge openings, and rotary pistons having intermeshing blades in said piston chambers, each of said bridges being provided with a horizontal groove extending between the shafts of said pistons, a vertical groove extending from the middle of said horizontal groove to the intake opening, grooves extending from near the ends of said horizontal groove to the lower portion of said vertical groove, and grooves leading from near the tops of said shafts to said horizontal groove.

1,348,774. PAVING-BLOCK. ALTON L. BAUGHMAN, Wolf Lake, Ind. Filed June 26, 1919. Serial No. 306,883. 2 Claims. (Cl. 94—13.)



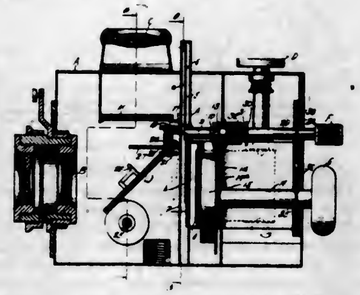
1. A paving block having upper and lower offsets on its respective sides, the upper offset defining a downwardly facing shoulder, and the lower offset defining an upwardly facing shoulder, the block being provided with approximately parallel laterally slanting surfaces leading respectively from the downwardly facing shoulder to the adjacent side surface of the block below the downwardly facing shoulder, and from the upwardly facing shoulder to the adjacent side surface of the block above the upwardly facing shoulder.

1,348,775. METHOD OF CURING CONCRETE AND LIKE PLASTIC MATERIALS. LEONARD A. BELLONBY, Montpelier, Vt. Original application filed June 1, 1917, Serial No. 172,274. Divided and this application filed Nov. 26, 1919. Serial No. 340,917. 7 Claims. (Cl. 25—133.)



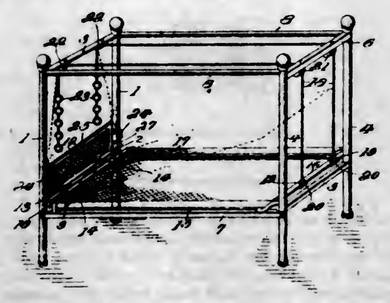
1. The method of curing concrete and analogous self setting plastic material, the same consisting of subjecting the same to a heated vapor bath, then to a bath of hot water and finally subjecting the same to hot air.

1,348,776. CAR-COUPLING. OBED C. BILLMAN, Cleveland, Ohio. Filed July 29, 1918. Serial No. 247,163. 52 Claims. (Cl. 213—10.)



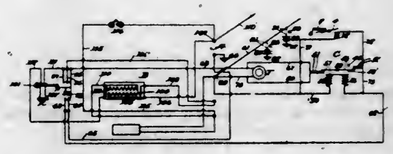
1. In a car coupling, a coupler head, a knuckle, a lock, a knuckle actuator, and bell-crank lock-to-the-lock means for moving the latter with the movements of said lock.

1,348,777. SELF-LOADER FOR AUTOTRUCKS. CHARLES A. BLANK, Miller, Ind. Filed Dec. 16, 1916. Serial No. 137,425. 1 Claim. (Cl. 214—78.)



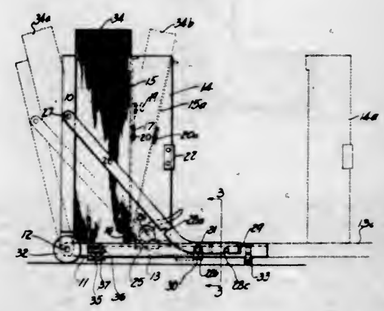
The combination, with a motor car, of arms pivoted to the middle part of the car frame, a shovel secured to the free end portions of the arms and adapted to engage with the ground in front of the car, a winding shaft operatively connected with the driving motor of the car, winding barrels secured on the winding shaft and arranged one on each side of the car frame, front and rear guide sheaves supported above the front and middle portions of the car frame, the rear guide sheaves being arranged to the rear of the pivots of the said arms, and flexible connections wound on th winding barrels and passing over the guide sheaves and operating to raise the shovel so as to discharge its contents at the rear part of the motor car.

1,348,778. REFLEX FOCAL-PLANE CAMERA. MALCOLM BOYD BOYCE, Haverhill, Mass. Filed July 8, 1918. Serial No. 243,830. 8 Claims. (Cl. 95—61.)



1. A camera including a shutter having relatively rotatable and axially movable sections, a device for rotating and axially moving the sections relatively one to the other, coöperating locking means on the sections and controlled by the axial movement thereof, and a motor for turning the sections.

1,348,779. ADJUSTABLE INCLINED BED. VIRGINIA M. BROUN, Washington, D. C. Filed Dec. 19, 1919. Serial No. 345,941. 4 Claims. (Cl. 5—12.)

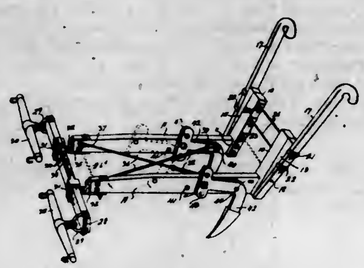


8. The combination of a bed frame; of a spring frame pivotally connected thereto at the head of the bed, said bed frame having cross frames and side frames arranged above the spring frame, guiding and supporting pulleys carried by said cross frames, ropes attached to the spring frame at the foot end thereof, and running over said guiding and supporting pulleys and having their free ends adjacent the head end of the bed whereby the same are readily accessible to a person in the bed, the free ends of said ropes being provided with weighted rings to facilitate the adjustment of the spring frame, and said bed frame having downwardly turned knobs adapted to be engaged by said rings whereby the springs may be held in various adjusted positions.

1,348,780. TELEPHONE SYSTEM. BRYANT D. CAMPBELL, Oakland, Calif. Filed Apr. 3, 1917. Serial No. 159,440. 5 Claims. (Cl. 179—6.3.)

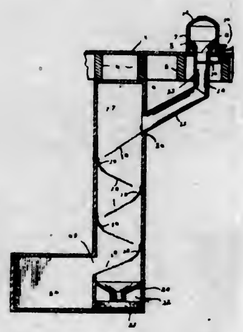
1. In a central controlled pay telephone, a coin mechanism, means whereby the transmitter of the calling party is made inoperative until the calling and called parties are connected, and the coin mechanism set to receive the coin of the calling party, and means whereby the coin mechanism may be actuated by the calling party to collect and register his coin when the calling and called parties are connected.

1,348,781. POSTING-TRAY AND RECORD-BINDER. RICHARD R. CARDALL, Salt Lake City, Utah, assignor of one-half to Harry Shepherd, Salt Lake City, Utah. Filed June 8, 1918. Serial No. 239,049. 8 Claims. (Cl. 129—1.)



5. In a posting-tray and record binder, the combination with a primary leaf portion, of a secondary leaf portion pivotally connected thereto along adjacent edges thereof, an adjustable follower suitably mounted on one of the said leaf portions, and means for adjustably limiting the angular opening between the said leaf portions.

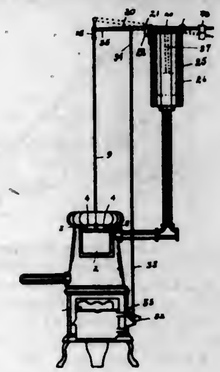
1,348,782. PLOW AND CULTIVATOR CONVERTING ATTACHMENT. GORMAN R. COOK, Alpine, Ala. Filed Oct. 27, 1919. Serial No. 333,451. 11 Claims. (Cl. 97—20.)



1. A plow attachment including a pair of standards adapted to be engaged with the rear ends of a pair of plow beams, handles coacting with the standards, means

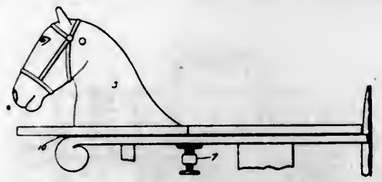
connecting the standards and adapted to hold them in parallel, upwardly convergent or downwardly convergent

relation, and means whereby the handles may be disposed and held in an upwardly convergent, upwardly divergent, or parallel relation to said standards.



1,348,783. ASH-SIFTER. PETER CORLEY, Brooklyn, N. Y. Filed June 14, 1917. Serial No. 174,737. 1 Claim. (Cl. 83—60.)

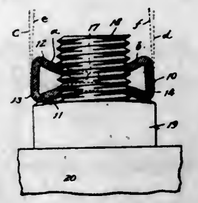
An ash sifting device comprising a vertical L-shaped casing, the horizontal leg of which is divided from the vertical leg thereof by a vertical partition, said partition having its upper end disposed in spaced relation to the lower end of one wall of the vertical leg, a series of curved plates secured to opposite walls of the vertical leg in staggered relation and extending in a direction toward the center of said leg, downwardly inclined screen plates secured to the inner end portions of the plates, said curved plates being imperforate, the lowermost of the screen plates having its other end secured to the upper end of the said partition, said vertical leg having an ash inlet opening immediately above the upper end of the uppermost screen plate.



1,348,784. HEATER FOR INCUBATORS. VERNER F. DAVIS, Orange, N. J., assignor to Percy D. Peters, Little Falls, N. Y. Filed Apr. 5, 1919. Serial No. 287,780. 3 Claims. (Cl. 236—6.)

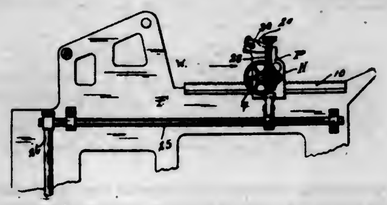
3. In a heater for incubators or brooders having a coal fire, a draft door under the fire, a throttle valve over the fire, a check door adapted for use as a coal feed door and located between the fire and the throttle valve, a float, a lever operatively governed by said float and so arranged

as to open the check door when the draft door under the fire and the throttle valve are closed.



1,348,785. ROCKING-HORSE. WILLIAM DICKINSON, Spokane, Wash. Filed Feb. 20, 1919. Serial No. 278,108. 9 Claims. (Cl. 46—22.)

1. As an article of manufacture, an attachment comprising a board shaped to provide a seat, an upright formed to simulate a horse's head secured to said board forwardly of said seat, and a clamp extending beneath said board to attach the same to the arm of a chair, consisting of an arm extending beneath and parallel to said board but spaced therefrom and a clamp screw threaded through the end of said arm.

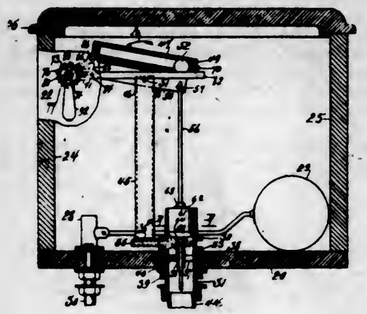


1,348,786. [WITHDRAWN.]

1,348,787. NUT-LOCK. ALFRED DU PUY, Oak Park, Ill. Filed May 7, 1917. Serial No. 166,810. 5 Claims. (Cl. 151—21.)

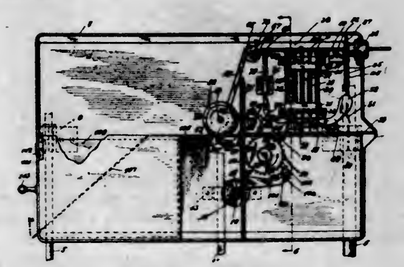
2. A nut-lock, comprising concave inner and outer walls having a space therebetween and being integrally connected together at two opposite sides thereof, said inner and outer walls being provided with alined screw-threaded bolt holes, and one of said walls being split along a line extending through the bolt hole therein and interposed between the means connecting said inner and outer walls.

1,348,788. PUNCHING-MACHINE. ORVILLE V. DUTRO and ARTHUR S. BURROUGHS, Spokane, Wash. Filed Apr. 21, 1919. Serial No. 291,675. 4 Claims. (Cl. 164—96.)



1. The combination in a punching machine with the two pairs of transverse bars forming a carriage frame, of a punching device supported on the carriage frame and comprising a die member and a punch member in reciprocal relation thereto, means for reciprocating the punch member, one of said bars being tubular, and actuating means including a coöperating member in the tubular bar for moving the carriage frame.

1,348,789. LUMBER COMPOSITION. JOHN N. EHR, WALTER J. EHR, and GUY W. MATTESON, Moose Lake, Minn. Filed Feb. 2, 1918. Serial No. 215,108. 4 Claims. (Cl. 106—34.)

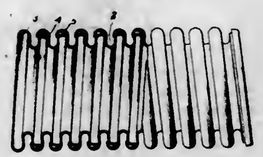


1. The described composition including paper pulp and plaster and swamp moss pulp, said paper pulp being waste paper repulped.

1,348,790. FLUSH-TANK VALVE AND APPURTENANCES. PHILIP M. ENGLISH, Bayonne, N. J.; Ada J. English executrix of said Philip M. English, deceased. Filed Feb. 16, 1918. Serial No. 217,690. 2 Claims. (Cl. 4—5.)

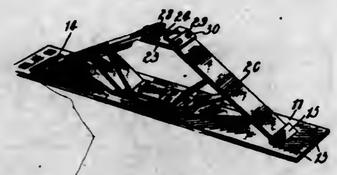
1. The combination of a tank, a sleeve extending through the bottom of the tank, the upper face of the sleeve constituting a valve seat, the sleeve having an extension with a cavity that leads to the opening through the sleeve, means to secure the sleeve in place to the bottom of the tank, a hollow column with slots at its upper end supported on said extension with its interior in connection with said cavity, an oscillating beam comprising a barrel with a flange parallel to the longitudinal axis thereof, the said flange located in the slots in the upper end of said hollow column, a hinge pin extending through the column and the flange of the barrel to allow the latter to oscillate, a counter-balancing ball in the barrel, a rigid valve stem with one end pinned to the flange of the barrel, a valve and a non-collapsible float secured to the other end of the valve stem coacting with said valve seat, an arm to tip the beam and an operating handle to actuate the arm.

1,348,791. RECORDING-MACHINE FOR LIQUID FUEL AND THE LIKE. FRED EVANS, Summit, N. J. Filed Oct. 15, 1918. Serial No. 258,261. 4 Claims. (Cl. 234—34.)



3. In a machine for dispensing liquids in measured quantities, of recording mechanism associated therewith, adapted for recording the quantities of liquid dispensed upon a record receiving member, said recording mechanism comprising a plurality of sets of perforating members adapted to perforate said record receiving member, means for selectively operating the perforating members of one set to produce a record upon said record receiving member, and means for operating the other set of perforating members in unison, whereby one or more of them is caused to produce a record upon said record receiving member.

1,348,792. DISH-DRIER. BERNARD FEINGOLD, New York, N. Y. Filed June 19, 1919. Serial No. 305,217. 1 Claim. (Cl. 141—11.)

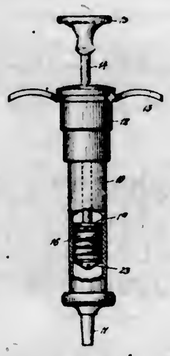


A device of the character described comprising a pan having a channel passage at the bottom thereof, a series of rungs attached to sides of said pan and a series of rungs hingedly attached to said pan and adapted to fit over said channel passage.

1,348,793. TUBE. WILLIAM H. FULTON, Irvington, N. J., assignor to Titeflex Metal Hose Corporation, a Corporation of New York. Filed May 15, 1917. Serial No. 168,653. 5 Claims. (Cl. 137—75.)

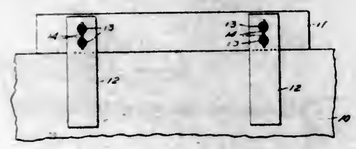
1. A tube comprising a helically disposed strip having a longitudinal groove adjacent one edge and a longitudinally extending portion of zigzag section adjacent the other edge, the said portion of zigzag section being within the said groove and having its relatively deflexed portions overlying each other radially of the tube.

1,348,794. RAIL-CHAIR. NAZZARENO GIACOMELLI, Newburgh, N. Y. Filed Mar. 15, 1920. Serial No. 365,967. 3 Claims. (Cl. 238—272.)



1. A rail chair comprising a base plate, said plate adapted for connection to a tie, a truss member adjustably connected to the base plate, and a plurality of spring plates interposed between the truss member and base plate.

1,348,795. BOW-FASTENER. RAOUL GIRAUDIAS, Montreal, Quebec, Canada. Filed May 10, 1920. Serial No. 380,142. 2 Claims. (Cl. 24—243.)

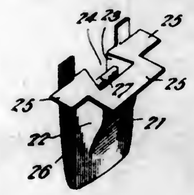


1. A bow fastener of the character described, comprising a concave convex ring, projections formed with the outer edges of said ring, and a leaf spring adapted to be retained between said projections whereby the bow may be retained between said leaf spring and the concave face of said ring.

1,348,796. SYRINGE. CHRISTIAN E. A. GRONBECH, New York, N. Y., assignor to Charles J. Tagliabue Manufacturing Co., Brooklyn, N. Y., a Corporation of New York. Filed Oct. 9, 1918. Serial No. 257,461. 1 Claim. (Cl. 128—219.)

In a syringe, the combination of a glass barrel, a piston comprising a corrugated, tubular, metallic shell and devices at opposite ends thereof, said devices being adjustable toward each other whereby said shell is transversely expanded and means for actuating said piston.

1,348,797. CLOTHES-WRINGER ATTACHMENT FOR WASHTUBS. JACOB J. HESS, Toronto, Ontario, Canada. Filed Nov. 5, 1918. Serial No. 261,289. 1 Claim. (Cl. 68—32.)



A protecting device for the edge of a washtub comprising an elongated block of a thickness to correspond to the thickness of the edge of the tub, and depending legs secured to opposite sides of the block, adjacent the ends thereof, and in opposite pairs.

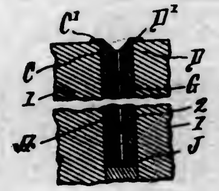
1,348,798. POSTERIOR INTERCHANGEABLE TOOTH AND BACKING FOR BRIDGEWORK. DAVID S. HIGHKIN, Baltimore, Md. Filed Feb. 10, 1920. Serial No. 357,543. 7 Claims. (Cl. 32—12.)

1. In dental bridge work, a supporting backing of metal having a socket that opens through its front face and through its outer end, said outer end constituting a boxing and a porcelain tooth facing having a projection on the outer portion of its rear side that fits in the outer portion of the socket and is inclosed by the boxing of the backing, said projection having its end face exposed to biting action, and a reinforcing brace between the facing and extension and integral therewith.

1,348,799. POSTERIOR INTERCHANGEABLE TOOTH AND BACKING FOR BRIDGEWORK. DAVID S. HIGHKIN, Baltimore, Md. Filed May 7, 1920. Serial No. 379,568. 8 Claims. (Cl. 32—12.)

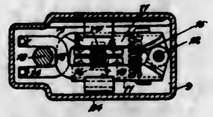
1. In dental bridge work, a supporting backing having a socket that opens through its front face and through its outer end, said backing including boxing walls at its outer end, and a tooth facing having a rearwardly extending projection on its outer portion that is adapted to be inclosed by the boxing walls, said outer portion having its end face exposed to biting action, and a reinforcing brace between the facing and said extension, said brace fitting in the socket of the backing, said backing having a portion projecting into the socket, and said brace having a socket that receives the projecting portion.

1,348,800. WATER-MOTOR. JESSE N. HIPKINS, Wheeling, W. Va., and FRANK C. COSS, Martins Ferry, Ohio. Filed Feb. 6, 1919. Serial No. 275,402. 5 Claims. (Cl. 121—123.)



1. A water motor of the character described, comprising a base, a head pivotally connected with the base, a

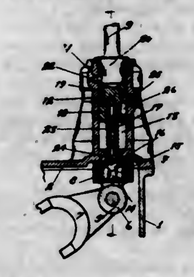
cylinder having detachable engagement at one end with the head, a second head detachably engaging the opposite end of the cylinder, an outlet pipe connected with the second named head, an externally threaded sleeve receiving



the outlet pipe, an internally threaded bearing receiving said sleeve and detachably connected with the base, a piston mounted within the cylinder, and means whereby fluid pressure introduced into the cylinder causes the reciprocation of the piston.

1,348,801. INSERT FOR CONCRETE AND THE LIKE, TO RECEIVE NAILS AND OTHER FASTENERS, OR BUILDING ELEMENTS. HENRY HUDSON, Malvern, Victoria, Australia. Filed June 11, 1918. Serial No. 239,472. 2 Claims. (Cl. 72—105.)

2. An insert of the character described composed of sheet metal shell bent upon itself to provide a pair of curved cheeks lying close together but substantially parallel throughout and separated by a space slightly smaller than articles to be inserted therein, said cheeks having a flaring mouth along one edge thereof, said mouth being formed to receive fastenings which are adapted to enter a concrete form, whereby the end of the insert remote from the form and innermost with respect to the wall being formed will be in a plane higher than the mouth of the insert to allow the concrete to enter beneath the insert with more facility, substantially as described

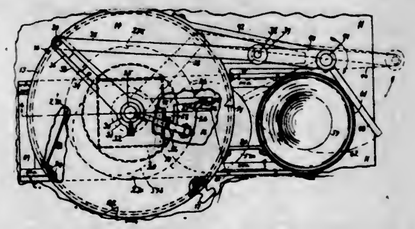


1,348,802. SHIFT-BLOCK LOCK AND RETAINER. GEORGE C. JENSEN, Oakland, Calif. Filed Nov. 12, 1919. Serial No. 337,548. 12 Claims. (Cl. 70—126.)

9. In combination with a gear case provided with a pair of shifter devices, a cover for the case, a lever for selectively operating said devices, a pair of pivoted levers carried by said cover for locking said devices in their adjusted position, a pair of flanged members on said case for overlying said levers, and means for locking said levers from swinging movement and to lie beneath said overlying members whereby said shifter devices are locked from movement and said cover is locked to said case.

1,348,803. LOCK FOR SHIFTER-BLOCKS. GEORGE C. JENSEN, Oakland, Calif. Filed Nov. 12, 1919. Serial No. 337,549. 11 Claims. (Cl. 70—126.)

2. In combination with a gear case, a rod therein, a pair of shifter blocks arranged thereon in end to end relation and adapted for independent eslective sliding movement on said rod, a cover for said case, means carried thereby for selectively operating said blocks, said blocks provided with arms adapted to overlap and said arms provided on adjacent faces with a stop, and lock controlled means carried by said cover extending between



said overlapping arms for engaging said stops to lock said blocks from movement.

1,348,804. PROCESS OF EXTRACTING IRON FROM ITS ORES. CHARLES COLCOCK JONES, Los Angeles, Calif. Filed June 19, 1916. Serial No. 104,523. 2 Claims. (Cl. 75—14.)

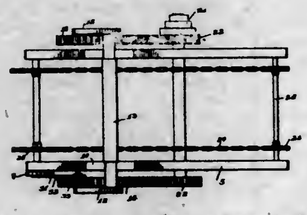
1. A process of reducing iron from iron ore, which consists in mixing the iron with petroleum, embedding the mixture in solid carbonaceous fuel in containers to which air has no access, heating said containers to a temperature below the heat of fusion, but to a sufficiently high temperature to reduce the ore to a metallic state and leaving an appreciable amount of carbon in the interstices of the reduced iron derived from the petroleum, the retention of this carbon and the agglomeration of the reduced iron and such carbon being due to a coking action of the mixed petroleum during the reduction of the iron to the metallic state.

2. The method of producing a body of iron containing carbon which comprises making an intimate mixture of finely divided iron ore and petroleum, of heating said mixture in a suitable container together with carbonaceous fuel without access of air below the heat of fusion, continuing the application of the heat externally of the container until the iron ore is reduced to the metallic state and the contained amorphous carbon from the petroleum is agglomerated with the reduced iron forming a mixture of petroleum coke and iron.

1,348,805. BUTTER CONTAINER AND CUTTER. THOMAS KASKOURAS, St. Paul, Minn. Filed Nov. 28, 1919. Serial No. 341,287. 11 Claims. (Cl. 31—65.)

1. In a device of the kind described, a base, a cylindrical inclosure mounted on the base and spaced above it, and having its bottom provided with an aperture mostly beyond the center of the inclosure, a centrally open disk guided to rotate in horizontal plane upon the inclosure, an angular butter magazine suspended from said disk into the inclosure and being rotatable with the disk, two crossing wires fixed in the lower end of the magazine, a radially disposed wire fixed across the aperture in the bottom of the inclosure intermediate said bottom and the crossed wires, a piston movable up and down in the magazine and having an upwardly extending piston rod with ratchet teeth at one side of it, a rocker arm and means operated by the rocker arm for rotating the disk one-fourth revolution at each forward stroke of the arm, and means

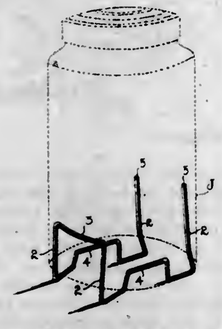
for feeding the piston rod downward a predetermined amount automatically at the end of each full revolution of the disk and the magazine.



5. The structure specified in claim 4, and lateral guiding means upon the base for guiding the moved dishes to and beyond the butter delivering opening of the butter magazine.

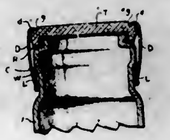
7. The structure specified in claim 1, said feeding means for the piston rod comprising a swinging lever having a dog engaging the piston rod, and said rod having teeth for the dog to engage only so far as there is butter for the piston to move.

9. The structure specified in claim 8, and means for varying the distance the said finger may depress said lever, and automatic means for returning the rack-feeding lever to normal position.



11. The structure specified in claim 10, said rack-moving dog being arranged to act on the rack only once during each full rotation of the disk.

1,348,806. METAL-BENDING MACHINE. HENRY KESSEN, Coldwater, Ohio. Filed Mar. 11, 1920. Serial No. 364,995. 3 Claims. (Cl. 153—21.)

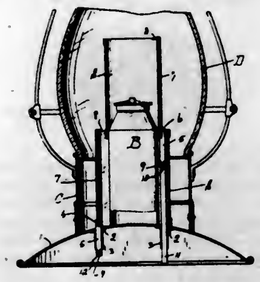


1. In a metal bending machine, a frame including side sections, a stationary die supporting table supported by the frame, a reciprocating ram coöperating with the die supporting table, an endless carriage supported by the frame, sprocket wheels for supporting the endless carriage, a gear wheel carried by each side section, each gear wheel having an integral rib provided with an elongated slot, a roller support including a bolt passing through the slot, said bolt adapted to permit adjustment of the roller longitudinally of the rib, and means within the path of travel of the roller, and having connection with the sprocket wheels at one end of the frame for causing an intermittent movement of the endless carriage.

1,348,807. JAR-RACK. JOHN L. KIVLAN, Boston, Mass. Filed Jan. 15, 1920. Serial No. 351,740. 1 Claim. (Cl. 53—1.)

A jar rack comprising a single piece of wire bent to form two elevated parallel spaced bottom supporting members, and a horizontal wall engaging member, the free ends of the wire being bent upwardly to form vertical resilient members oppositely disposed from the horizontal member.

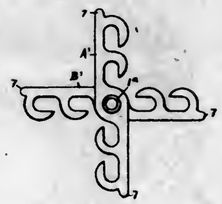
1,348,808. CANNING PROCESS. JOHN L. KIVLAN, Boston, Mass. Filed Apr. 28, 1920. Serial No. 377,206. 1 Claim. (Cl. 226—82.)



In a canning process, the clamping of a cover on a heated filled jar with an external mechanical pressure equal to, but not exceeding, normal atmospheric pressure, allowing the jar to cool and the substitution of atmospheric pressure for said mechanical pressure as a sealing force, and the maintenance of said mechanical pressure potentially as a substitute for said atmospheric pressure.

1,348,809. RHEOSTAT. JOHN G. KJELLGREN, Cleveland, Ohio, assignor to The Electric Railway Improvement Company, Cleveland, Ohio, a Corporation of Ohio. Filed Jan. 6, 1917, Serial No. 140,953. Renewed Nov. 13, 1919. Serial No. 337,866. 3 Claims. (Cl. 219—48.)

1. A rheostat resistance element comprising a series of resistance wires strung zigzag without crossing, arranged in substantially vertical, transversely spaced planes and forming V-shaped reaches opening alternately upward and downward, the angle between opposed bends being a predetermined constant, and sufficiently great to prevent the material heating of the upper reaches of the wires by the radiation heat rising from the lower reaches thereof, substantially as described.



1,348,810. LANTERN. JOSEPH N. KLEMA, Austin, Minn. Filed Aug. 30, 1919. Serial No. 320,840. 2 Claims. (Cl. 240—23.)

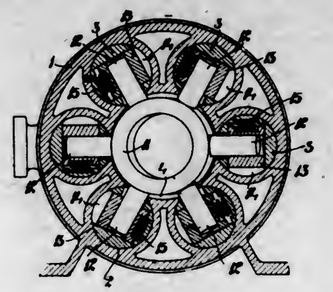
1. A lantern comprising a base provided with an opening, a sleeve depending from the base and substantially defining the opening, a burner supported by the base, a transparent member surrounding the burner, an arm depending from the member and extending within the sleeve when the member is in its lowermost position, said sleeve being provided with an opening in a wall thereof, an operating lever pivotally engaged with the lower end portion of the arm, an arm carried by the lever, means for constantly urging the inner end portion of the arm toward the lever, said inner end portion being provided with an

inwardly curved extension, said inwardly curved extension engaging within the opening in the wall of the sleeve when the lever is moved upwardly through the sleeve to raise the transparent member.

1,348,811. MULTIPLE COUPLING. THEODORE C. KREMER, Sharpsburg borough, Pa., assignor to Lightning Coupler Link Company, Sharpsburg, Pa., a Corporation of Pennsylvania. Filed Apr. 18, 1919. Serial No. 290,924. 6 Claims. (Cl. 24—232.)

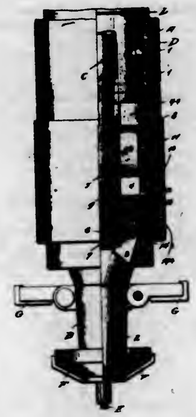
5. A coupler consisting of a pair of flat plates pivoted together face to face and adapted to be swung into and out of overlapping registration, each plate beyond its pivotal connection being provided with a plurality of open sided hooks and the hooks on one plate being oppositely disposed to the corresponding hooks on the other plate whereby when the said plates are in registration said hooks coact in pairs to form inclosures of varying distances from the pivot for the purpose specified.

1,348,812. COPYING-PAD. LOUIS V. LANDAU, Los Angeles, Calif., assignor to Landau's Instantaneous Duplicator Company, Los Angeles, Calif., a Corporation of California. Filed Dec. 4, 1919. Serial No. 342,499. 4 Claims. (Cl. 41—31.6.)



1. A composition for a copying pad for making copies of printed or written matter, comprising kaolin, glycerin, barium sulfate and dextrin.

1,348,813. HINGE-LOCK. PETER N. LANDINE, Milford, Conn., assignor to The Rostand Manufacturing Company, Milford, Conn., a Corporation of Connecticut. Filed Sept. 3, 1919. Serial No. 321,333. 2 Claims. (Cl. 16—110.)

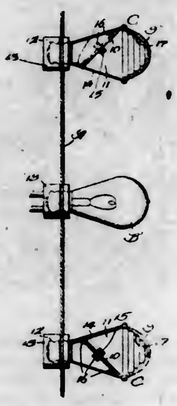


1. In a device of the character described, two members hinged together, a clamping element carried by one member and adapted to engage the other member for securing the members in position relatively to each other, and a cam carried by one member for causing the clamping element to engage said other member, said cam being below the surface of its carrying member.

1,348,814. MACHINE APPLICABLE AS PUMP, COMPRESSOR, OR MOTOR. SVEN LARSSON, Stockholm, Sweden. Filed Dec. 23, 1919. Serial No. 346,998. 2 Claims. (Cl. 103—44.)

2. In a machine of the kind described, the combination of a drum having a central boring and axially disposed cylinder chambers, reciprocating pistons in said cylinder chambers said pistons having transverse borings, plugs slidably and rotatably mounted in said transverse borings, springs interposed between the bottom of said borings and said plugs, arms engaging in said plugs, and means in said central boring of the drum for operating the arms to cause the same to reciprocate the pistons.

1,348,815. ROTARY DRILL. JULIAN C. LEWIS, St. Louis, Mo. Filed Feb. 16, 1920. Serial No. 358,896. 25 Claims. (Cl. 255—24.)

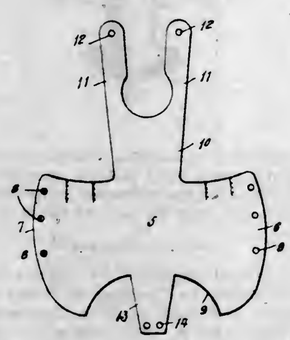


1. A rotary drill, comprising a head provided with a cutting means, and a water pump or propeller built into said head and comprising stationary blades and revolving blades that rotate with the head of the drill.

1,348,816. ILLUMINATED SIGN. ALEXANDER S. LIMPERT, Pittsburgh, Pa., assignor to Golden Glow Sign Corporation, New York, N. Y., a Corporation of New York. Filed June 4, 1919. Serial No. 301,711. 8 Claims. (Cl. 40—132.)

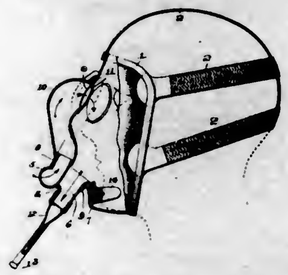
1. In a sign, the combination of a face plate having on its outer face a source of illumination arranged substantially centrally of the character to be outlined thereupon, coöperating character outlining lenses and reflectors

grouped in pairs about said source, each pair comprising an outer lens and an inner reflector, and means disposed



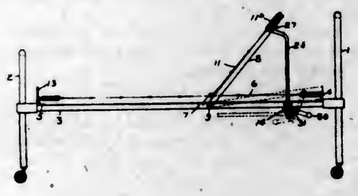
in advance of said face for operatively associating the members of each of said pairs with reference to said source.

1,348,817. GAME. RICHARD L. LLOYD, Minneapolis, Minn. Filed Sept. 16, 1919. Serial No. 324,157. 7 Claims. (Cl. 46—54.)



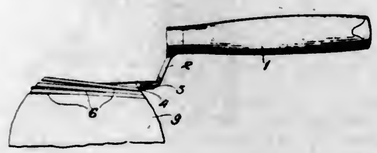
4. In a game or other amusement apparatus, a target field having a series of magnets arranged with faces in a plane of the field, and targets each having an armature piece with a countersunk face, the said face forming a seat for a removable tension member.

1,348,818. WATERPROOF GARMENT. DOROTHY L. MACCALLUM, Cambridge, Mass. Filed Aug. 31, 1917. Serial No. 189,165. 2 Claims. (Cl. 305—4.)



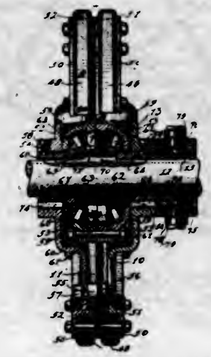
1. A garment including a body portion, lateral flaps, carried thereby, said body and flaps being adapted to fit about the lower portion of a person's body, and upper and lower extensions carried by said body centrally thereof and adapted to be passed over the shoulders and between the limbs of the wearer and secured to said flaps so as to support the garment and hold it in proper position.

1,348,819. GAS-MASK. ELTON W. MILLER, Washington, D. C. Filed Dec. 2, 1918. Serial No. 264,926. 10 Claims. (Cl. 128—141.)



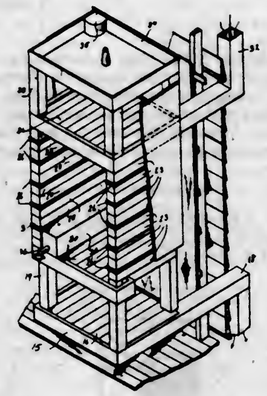
1. A gas mask comprising a face cover provided with a pair of transparent eyepieces, means for admitting incoming air at a point between the said eyepieces and means for deflecting the incoming air across the inner surfaces of said eyepieces.

1,348,820. BED OR ATTACHMENT THEREFOR. MOSES C. NIXON, Chicago, Ill. Filed July 25, 1913, Serial No. 781,148. Renewed Sept. 29, 1917. Serial No. 194,087. 14 Claims. (Cl. 5—43.)



12. A bed having a pivoted member, gears at each side of the bed, means forming an operative connection between the pivoted member and said gears, a shaft extending across beneath the bed and adapted to operate said gears, and a pivoted support for said shaft, gear and operative connection.

1,348,821. FOOD-CUTTING DEVICE. JAN PALINSKI, Jersey City, N. J. Filed Dec. 8, 1919. Serial No. 342,150. 2 Claims. (Cl. 146—7.)

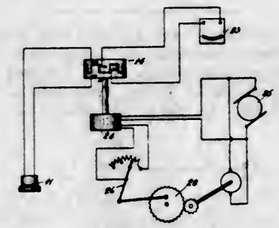


1. A device of the class described comprising a substantially U-shaped frame, a plurality of spaced apart, downwardly inclined blades releasably retained between the legs of said U, and means for retaining said blades comprising inclined spring members rigid to said legs.

1,348,822. POWER-TRANSMISSION MEANS AND CONTROL THEREFOR. JAMES R. RICKETTS, Long Beach, Calif. Filed May 7, 1917. Serial No. 168,304. 14 Claims. (Cl. 74—36.)

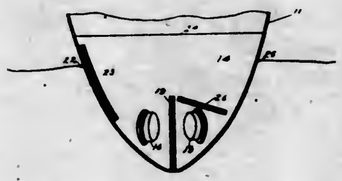
1. In a transmission mechanism, a driven shaft, a plurality of driven elements concentrically on and for rotating said shaft, differential gearing connecting said driven elements, and means for holding said driven elements in abutting positions for inclosing said gearing.

1,348,823. ICELESS REFRIGERATOR. GARRETT J. STANTON, Los Angeles, Calif. Filed Jan. 14, 1919. Serial No. 271,005. 8 Claims. (Cl. 45—134.)



1. An iceless refrigerator comprising shelves having baffle plates therein whereby an endless channel is formed, a connection from one end of the channel in the lowermost shelf to atmosphere and from the other end of said channel to one end of a similar channel in a superposed shelf, the other end of said last channel being connected to atmosphere; means to maintain a constant level of water in said channels whereby air passing therethrough will cool said water.

1,348,824. CANNING FOOD PRODUCTS. JOSE FELIX TRONCONI, Buenos Aires, Argentina. Filed Aug. 27, 1919. Serial No. 320,265. 1 Claim. (Cl. 99—8.)

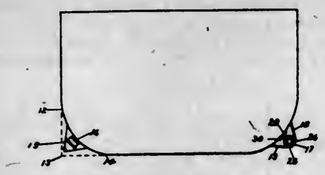


The improvement in the process of canning food products, including meat as a main ingredient, substantially consisting in providing the can or container with a lining of gut in its interior, in such a way that after introducing the product to be preserved, the latter will be entirely wrapped in the lining of gut, thereby preventing the direct contact of the preserved product with the can and providing at the same time a means for extracting the contents from the cans as an entirely wrapped block, adapted to be readily cut into slices as common cold cuts, substantially as described and for the purposes set forth.

1,348,825. METHOD AND APPARATUS FOR DETECTING LOW-FREQUENCY IMPULSES. REGINALD A. FESSENDEN, Brookline, Mass., assignor to Submarine Signal Company, Portland, Me., a Corporation of Maine. Filed May 21, 1917. Serial No. 169,830. 7 Claims. (Cl. 177—352.)

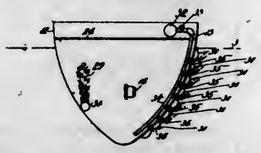
1. The method of detecting electrical impulses whose frequency may lie between certain limits which consists in passing such electrical impulses through a commutating device and varying the commutator frequency of such commutating device gradually from one limit to the other and observing the indication of a continuous current indicator operated by the commutated current from said commutating device.

1,348,826. METHOD AND APPARATUS FOR SUBMARINE SIGNALING AND DETECTION. REGINALD A. FESSENDEN, Brookline, Mass., assignor to Submarine Signal Company, Portland, Me., a Corporation of Maine. Filed Feb. 1, 1918. Serial No. 214,849. 2 Claims. (Cl. 181—0.5.)



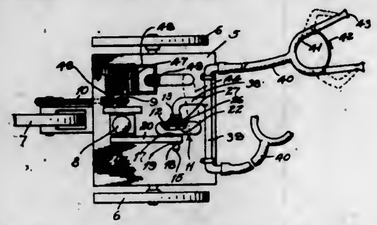
1. The method of submarine signaling and detection which consists in locating the signaling and detecting means in a partially-submerged, liquid-filled tank and below the level of the surface of the water in which the tank is partially submerged and acoustically insulating said means from the surface noises only of the submerging water whereby the sound waves originating at a distance may reach the signaling and detecting means without interference from water noises originating at or near the surface of the water.

1,348,827. METHOD AND APPARATUS FOR SUBMARINE SIGNALING. REGINALD A. FESSENDEN, Brookline, Mass., assignor to Submarine Signal Company, Portland, Me., a Corporation of Maine. Filed Nov. 29, 1918. Serial No. 264,607. 1 Claim. (Cl. 116—27.)



In a submarine signaling system, the combination of means for submarine signaling and a ship's hull, said

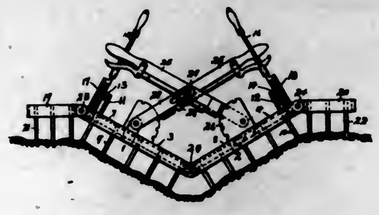
means being within the area bounded by the vertical prolongation of the ship's side; the outward prolongation of



the ship's bottom, and the line joining the lower extremity of the ship's side to the outward extremity of the ship's bottom.

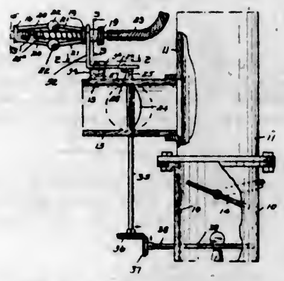
1,348,828. METHOD AND APPARATUS FOR SOUND INSULATION. REGINALD A. FESSENDEN, Brookline, Mass., assignor to Submarine Signal Company, Portland, Me., a Corporation of Maine. Filed Feb. 1, 1919. Serial No. 274,562. 4 Claims. (Cl. 181—0.5.)

4. That method of screening from the effects of compressionable waves in liquids which consists in maintaining a stream of discontinuous air bubbles in the liquid, the distance between adjacent air bubbles in the stream being less than one quarter wave length of the compressionable wave whose lengths are to be screened.



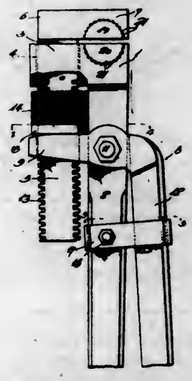
1,348,829. COTTON-PICKER MECHANISM. THOMAS RING GABEL and HALL H. HOLDAWAY, Los Angeles, Calif., assignors of two-thirds to Henry P. Jones, Los Angeles, Calif., and one-third to said Gabel. Filed Dec. 16, 1916. Serial No. 137,304. 2 Claims. (Cl. 193—10.)

1. In a cotton picking machine, a suction blower casing having a central inlet opening and a peripheral outlet, a fan in said casing and arranged to provide a space between the fan and the entrance side wall of said casing, a plate on the side of said fan with an opening therethrough in register with the opening into said casing, and a conical fender over said opening formed of smooth wires extended, at a space apart, from the outer small end of said conical fender to the inner edge of the side plate and projecting outwardly into the opening into said casing and forming a smooth deflecting guide for matter entering said opening whereby to guide it outwardly between the plate on the side of said fan and the inside wall of said fan casing, substantially as shown and described.



1,348,830. HARROW. HARRY GILLIS, Egypt, Tex. Filed May 13, 1919. Serial No. 296,805. 2 Claims. (Cl. 55—80.)

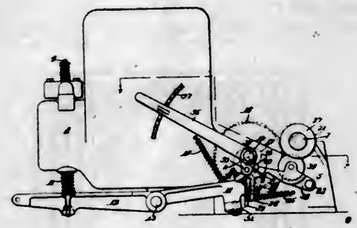
1. A harrow composed of independent sections hinged together, each section consisting of a frame work and adjustable depending harrow teeth, a rack-and-dog arrangement secured to each section, a lever pivotally se-



cured to each rack, one lever having a slot therein, a pin carried by the other lever, which operates in said slot to permit the movement of the levers relatively to each other.

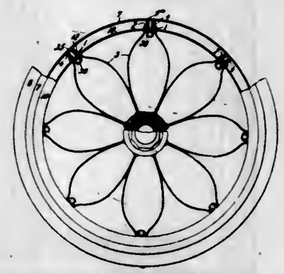
1,348,831. SPEED LIMITING DEVICE. EDWARD G. HODGES, Marshalltown, Iowa. Filed Aug. 11, 1919. Serial No. 316,901. 5 Claims. (Cl. 123—124.)

1. In a device of the class described; a fuel mixture passage; an air passage communicating therewith; a valve in said air passage; a governor designed to be connected with a moving part of an engine; and means for connecting said valve with said governor for actuating said valve after the governor has reached a certain speed of movement.



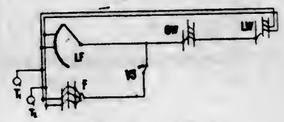
1,348,832. WRENCH. AUGUST MAGNAN, Great Falls, Mont. Filed Aug. 11, 1919. Serial No. 316,630. 1 Claim. (Cl. 81—85.)

A device of the class described comprising an L-shaped member having a long shank serving as a handle and a short shank provided at its inner end with a jaw face adapted to engage the inner side of a pipe or the like and



with an opening through its outer end, a second L-shaped member having a threaded long shank extending through said opening and a short shank provided at its outer end with a jaw face adapted to engage the inner side of a pipe or the like and disposed opposite the jaw face carried by the short shank of the first member, the corresponding shanks of said members being arranged in parallel relation and said short shanks projecting in opposite directions, an L-shaped lever having its short arm pivoted to the long shank of the first member and provided with an opening through which the threaded long shank of the second member extends, the long arm of said lever being disposed alongside the long shank of the first member to form a complementary handle, and a nut threaded upon the long shank of the second member and disposed between the short arm of said lever and the short shank of the first member.

1,348,833. SPEED-REGULATOR FOR ENGINES. WILLIAM A. NORTH, Rockford, Ill., assignor to Emerson-Brantingham Company, Rockford, Ill., a Corporation of Illinois. Filed Feb. 23, 1917. Serial No. 150,424. 3 Claims. (Cl. 123—113.)



1. In a device of the character described, the combination with an internal combustion engine having a valve-actuating part, a manually adjustable lever, the pivot axis of which is fixed with respect to the engine frame, a notched segment also fixed with respect to the engine frame and with which the lever coöperates to be held in any adjusted position, a detent carrier pivotally mounted upon and supported by said lever, with its pivot axis eccentric to that of the lever, the detent carrier being movable about its pivot axis, independently of the lever, to bring its detent into and out of engagement with said valve-actuating part, and governor-actuated means for moving the detent carrier on its pivot to bring its detent into engagement with the valve-actuating part, the lever being manually adjustable to vary the operative relation of the detent carrier and valve-actuating part.

1,348,834. SPRING-WHEEL. JOHN E. STRIETELMEIER, Cincinnati, Ohio, assignor to The Ideal Wheel Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Nov. 3, 1913. Serial No. 798,905. 9 Claims. (Cl. 152—50.)

5. A vehicle wheel comprising a hub and a felly, flat metal spokes (3) arranged in outwardly bowed pairs, the outer ends (12) of the spokes of each pair at the felly being bent at an obtuse angle to lie flat along the felly, the ends of the bent portions (12) of each pair fitting against each other, means (11) on said felly for supporting said spokes on the outer sides extending inwardly toward the hub a short distance from the bend, a clamping member fitting flat against the bent ends and its ends bearing against the inner sides of said spokes at the bends, whereby the spokes will be held against end movement or turning, and detachable means at the hub for rigidly securing each pair of spokes thereto.

1,348,835. SWITCHING APPARATUS. FRITZ ALDENDORFF, Wilmersdorf, Berlin, Germany. Filed Mar. 16, 1914, Serial No. 825,102. Renewed Feb. 3, 1920. Serial No. 356,000. 29 Claims. (Cl. 179—18.)

1. A system for interconnecting calling and wanted telephone lines by electromechanically controlled switches comprising a group of comparatively quick-acting switches, a group of comparatively slow-acting switches, a group of selecting switches for selecting desired lines, and means for connecting any quick-acting switch directly to any selecting switch.

2. A system for interconnecting calling and wanted telephone lines comprising a group of switches containing a plurality of quick-acting switches, a plurality of slow-acting switches, a plurality of selecting switches for selecting wanted lines, means for connecting a calling line to a selecting switch through a quick-acting switch, and means for subsequently connecting the said calling line to a selecting switch through a slow-acting switch and for dissolving the connection through the said quick-acting switch.

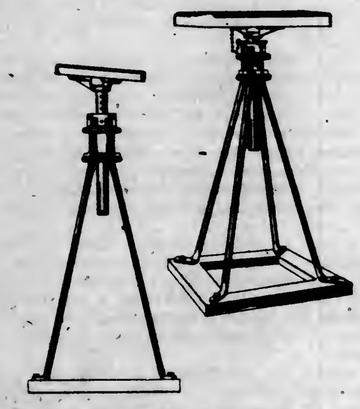
3. A system for interconnecting calling and wanted telephone lines by electromechanically controlled switches comprising a group of quick-acting line finders, a group of comparatively slow-acting line finders, a group of selecting switches for selecting desired lines and means for connecting any quick-acting switch directly to any selecting switch.

4. A system for interconnecting calling and wanted telephone lines comprising a group of switches containing a plurality of quick-acting line finders, a plurality of slower-acting line finders, a plurality of selecting switches for selecting wanted lines, means for connecting a calling line to a selecting switch through a quick-acting line finder, and means for subsequently connecting the said calling line to a selecting switch through a slow-acting finder and for dissolving the connection through the said quick-acting finder.

5. A system for interconnecting calling and wanted telephone lines by electromechanically controlled switches comprising a group of quick-acting switches having fixed and movable contacts, a group of slow-acting switches having fixed and movable contacts, a group of selecting switches for selecting desired lines and subscriber's line connected to fixed contacts in each switch of each said group of switches.

1,348,836. TOY RATTLE. MARTIN PATREMIO, Lodi, N. J., assignor of one-half to Anthony Barbery, Lodi, N. J. Filed Dec. 16, 1919. Serial No. 345,281. 4 Claims. (Cl. 46—46.)

1. A rattle having a cylindrical head, end disks having peripheral flanges overlapping and secured to the ends

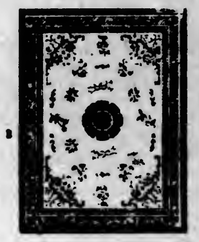


of said head, there being depressions in said disks with ledges surrounding them, and panels having inwardly

turned peripheral flanges fitted within and secured to said ledges of said depressions for the purpose specified.

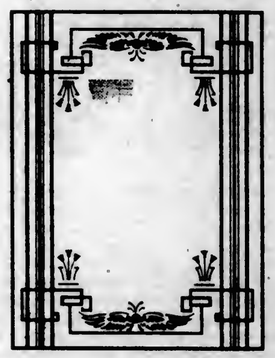
DESIGNS.

55,927. ADJUSTABLE INDUSTRIAL SEAT. EDGAR W. ALLEN, Campbell, Calif. Filed Mar. 25, 1920. Serial No. 368,812. Term of patent 7 years.



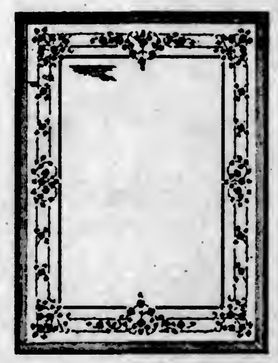
The ornamental design for an adjustable industrial seat as shown.

55,928. BED. LANVILLE A. BROWN, Kansas City, Mo. Filed June 18, 1919. Serial No. 305,186. Term of patent 14 years.



The ornamental design for a bed, as shown.

55,929. GRASS MAT. WILLARD T. CASE, New Brunswick, N. J., assignor to Deltox Grass Rug Company, Oshkosh, Wis., a Corporation of Wisconsin. Filed Oct. 17, 1919. Serial No. 331,473. Term of patent 7 years.



The ornamental design for a grass mat, as shown.

55,930. GRASS MAT. WILLARD T. CASE, New Brunswick, N. J., assignor to Deltox Grass Rug Company, Oshkosh, Wis., a Corporation of Wisconsin. Filed Oct. 17, 1919. Serial No. 331,474. Term of patent 7 years.

The ornamental design for a grass mat, as shown.

DECISIONS

OF THE

COMMISSIONER OF PATENTS

AND OF

UNITED STATES COURTS IN PATENT CASES.

OPINION OF THE SOLICITOR OF THE DEPARTMENT OF THE INTERIOR.

1. TRADE-MARKS—ACT OF MARCH 19, 1920, CONSTRUED—MARKS REGISTERABLE UNDER ACT OF 1905 NOT REGISTERABLE UNDER SECTION (*b*).

Marks which are registerable under the Trade-Mark Act of February 20, 1905, are not registerable under section (*b*) of the act of March 19, 1920.

2. SAME—SAME—MARKS NOT REGISTERABLE UNDER SECTION (*b*).

In the act of March 19, 1920, providing that the Commissioner shall keep a register of "(*b*) all other marks not registerable under the act of February 20, 1905, as amended, except those specified in paragraphs (*a*) and (*b*) of section 5 of that act," etc., the provision "except those specified in paragraphs (*a*) and (*b*)" was intended to include those scheduled under (*a*) as consisting of or comprising immoral and scandalous matter and those scheduled under (*b*), consisting of or comprising the flag or coat-of-arms or other insignia of the United States, States, municipalities, or foreign nations and designs, etc., adopted by fraternal and other societies.

3. SAME—SAME—PROVISO CLAUSE OF SECTION 1 (*b*) CONSTRUED.

The proviso clause of section 1 (*b*) of the act of March 19, 1920, construed as if it read: "*Provided*, That trade-marks which are *so nearly* identical with a known trade-mark owned and used in interstate and foreign commerce, or commerce with the Indian tribes by another and appropriated to merchandise of the same descriptive properties as to be likely to cause confusion or mistake in the mind of the public or to deceive purchasers, shall not be placed on this register."

4. SAME—TRANSFER OF FILING FEE FROM ONE APPLICATION TO ANOTHER.

The filing fee of ten dollars paid in connection with an application filed under the act of February 20, 1905, may be transferred to an application for registration under the act of March 19, 1920.

DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SOLICITOR,
Washington, D. C., July 13, 1920.

The honorable the Secretary of the Interior.

DEAR MR. SECRETARY: By letter of June 17, 1920, the Commissioner of Patents requested my opinion respecting certain questions arising under the recent act of March 19, 1920, (Public No. 163,) entitled "An Act to Give Effect to Certain Provisions of the Convention for the Protection of Trade-Marks and Commercial Names, Made and Signed in the City of Buenos Aires, in the Argentine Republic, August 20, 1910, and for other Purposes."

Section 1 of said act provides:

That the Commissioner of Patents shall keep a register of (*a*) all marks communicated to him by the international bureaus provided for by the Convention for the Protection of Trade-Marks and Commercial Names, made and signed in the city of Buenos Aires, in the Argentine Republic, August 20, 1910, in connection with which the fee of $50 gold for the international registration established by article 2 of that convention has been paid, which register shall show a facsimile of the mark; the name and residence of the registrant; the number, date, and place of the first registration of the mark, including the date on which application for such registration was filed and the term of such registration, a list of goods to which the mark is applied as shown by the registration in the country of origin, and such other data as may be useful concerning the mark.

(*b*) All other marks not registerable under the act of February 20, 1905, as amended, except those specified in paragraphs (*a*) and (*b*) of section 5 of that act, but which have been in *bona fide* use for not less than one year in interstate or foreign commerce, or commerce with the Indian tribes by the proprietor thereof, upon or in connection with any goods of such proprietor upon which a fee of $10 has been paid to the Commissioner of Patents and such formalities as required by the said Commissioner have been complied with: *Provided*, That trade-marks which are identical with a known trade-mark owned and used in interstate and foreign commerce, or commerce with the Indian tribes by another and appropriated to merchandise of the same descriptive properties as to be likely to cause confusion or mistake in the mind of the public or to deceive purchasers, shall not be placed on this register.

The questions asked are, in effect, as follows:

(1) Whether marks registerable under the act of February 20, 1905, can be registered under section (*b*) of the act of March 19, 1920?

(2) What is the scope or limitation of paragraph (*b*) of section 5 of the act of February 20, 1905, (33 Stat., 724,) as amended, when considered in connection with the interpretation of the recent act?

(3) Whether the filing fee of ten dollars paid in connection with an application under the act of February 20, 1905, may be transferred to an application for registration under the act of March 19, 1920, or must a new fee be required?

(4) Must a trade-mark be "identical" with a known trade-mark to be subject to rejection, or need it be only so nearly similar to a registered or known trade-mark to justify rejection?

Section 5 of the said act of February 20, 1905, has been amended by the following acts: March 2, 1907, (34 Stat., 1251;) February 18, 1911, (36 Stat., 918;) January 8, 1913, (37 Stat., 649,) and section 9 of the recent act, now under consideration.

My answer to the first question is in the negative,

as no reason has been called to my attention, and I see none, for ignoring the express provision of this law that the (*b*) register shall be kept for—

all other marks *not* registerable under the act of February 20, 1905, as amended, except those specified in paragraphs (*a*) and (*b*) of section 5 of that act, etc.

The doubt pertaining to the second question is expressed by the Commissioner, as follows:

Paragraph (*b*) after referring to State, national or society insignia goes on to specify what marks shall not be registered as well as some that may be registered. Hence the act is not clear as to what is referred to in paragraph (*b*).

In my opinion the recent act of March 19, 1920, as applied to register (*b*) therein provided should be construed as if it more specifically read as follows:

All other marks not registerable under the act of February 20, 1905, as amended, except those specified *as not registerable* in paragraphs or schedules (*a*) and (*b*) of section 5 of that act, etc.

This is the plain meaning of the law, as it was undoubtedly the intention to continue to deny registration to those marks prohibited registration by paragraphs or schedules (*a*) and (*b*) of section 5 of the act of February 20, 1905. In other words, my view is that register (*b*) provided by the recent act is not intended for any trade-mark registerable under any part of the act of February 20, 1905, nor for registration of any mark not registerable as specified in paragraphs or schedules (*a*) and (*b*) of section 5 of that act. The doubt will be relieved and a rational construction of the law will be subserved by considering the reference in the recent act to "paragraphs (*a*) and (*b*)" of section 5 of the amended act of February 20, 1905, as meaning *schedules a* and *b* rather than paragraphs strictly and as comprising the following matters specified as not registerable, viz:

(*a*) Consists of or comprises immoral or scandalous matter.

(*b*) Consists of or comprises the flag or coat-of-arms or other insignia of the United States or any simulation thereof, or of any State or municipality or of any foreign nation, or of any design or picture that has been or may hereafter be adopted by any fraternal society as its emblem, or of any name, distinguishing mark, character, emblem, colors, flag, or banner adopted by any institution, organization, club, or society which was incorporated in any State in the United States prior to the date of the adoption and use by the applicant: *Provided*, That said name, distinguishing mark, character, emblem, colors, flag, or banner was adopted and publicly used by said institution, organization, club, or society prior to the date of adoption and use by the applicant.

This was the evident intention, as shown by the congressional hearings on the recent act, and with such construction a field will exist for the operation of the new law; otherwise none would remain.

Replying to question 3, I can see no objection to applying the fee paid in connection with an application under the old law to an application under the new law. The amount of the fee is the same in either case, and it would seem it could be applied in perfecting the registration even though the applicable law be other than that originally invoked. If it be deemed necessary to amend the application, that will be merely a detail of procedure.

The fourth question arises from the language of the proviso to section 1 of the recent act above quoted. The word "identical" in its strictest sense means "exactly alike" or "the same in all respects." It is apparent that the word cannot properly be used in this sense as applied in two different objects, because it is axiomatic that no two things are exactly alike; but the word is sometimes used more loosely to mean very similar or the same in essential characteristics. I have no doubt that it is to be so understood in this case. The language of the said proviso would perhaps justify the conclusion that a comparative term, such as "so nearly," was intended to accompany the positive term "identical," so as to harmonize with the further expression "as to be likely to cause confusion or mistake in the mind of the public or to deceive purchasers." This view is strongly supported by a similar provision contained in the act of 1905, which prohibits registration of names identical or which so nearly resemble a registered or known trade-mark as to be likely to cause confusion, etc.

Cordially yours,

(Sgd.) CHARLES D. MAHAFFIE,
Solicitor.

DECISIONS OF THE U. S. COURTS.

Court of Appeals of the District of Columbia.

FRENCH BATTERY & CARBON COMPANY *v.* THE PREST-O-LITE COMPANY, INC. THE PREST-O-LITE COMPANY, INC., *v.* FRENCH BATTERY & CARBON COMPANY.

Decided May 3, 1920.

1. TRADE-MARKS — SIMILARITY — "RAY-O-LITE" AND "PREST-O-LITE."

The word "Ray-O-Lite," for storage batteries, *Held* not registrable in view of the prior use of "Prest-O-Lite" on the same goods.

2. SAME — SAME — SAME — REGISTRATION BY OTHERS OF SIMILAR MARKS.

Held that "Ray-O-Lite" may be registered for electric lamps notwithstanding the prior use by the opposer of "Prest-O-Lite" on storage batteries where other marks about as near to "Prest-O-Lite" as is "Ray-O-Lite" had been registered by others for electric lamps prior to its use by the opposer for storage batteries.

Mr. D. B. Cheever for the appellant.

Mr. E. W. Bradford for the appellee.

ROBB, *J.*:

These appeals are from a decision of the Patent Office sustaining the opposition of the Prest-O-Lite Company, Inc., to the registration by the French Battery & Carbon Company of the words "Ray-O-Lite," in connection with the sale of storage batteries, and permitting such registration as to electric lamps. The French Battery & Carbon Company appeals from the former ruling, while the Prest-O-Lite Company, Inc., appeals from the latter.

When "Ray-O-Lite" was adopted in 1917, "Prest-O-Lite" had been in extensive use on storage batteries by the Prest-O-Lite Company, Inc., for several years, and many thousands of dollars had been expended in advertising these batteries. We agree with the Commissioner that the registration of "Ray-O-Lite" for use on storage batteries would

be likely to cause confusion. (*Thomas Mfg. Co.* v. *Aeolian Co.*, 47 App. D. C., 376.) But since it appears that before the Prest-O-Lite Company extended its business to include storage batteries, other concerns had registered marks for electric lamps which, as found by the Commissioner, "are about as near to Prest-O-Lite as is Ray-O-Lite," we also agree with the Commissioner that the Prest-O-Lite Company is not in a position to prevent the registration of "Ray-O-Lite" for use on electric lamps. (*Alaska Packers Assoc.* v. *Admiralty Trading Co.*, 43 App. D. C., 198.)

The decision of the Commissioner is affirmed.

Affirmed.

Court of Appeals of the District of Columbia.

IN RE ZENK.

Decided June 2, 1920.

PATENTS—DOUBLE PATENTING—PROCESS AND PRODUCT.

A patent for a commutator comprising metal commutator-bars and a body of heat-hardened resinous condensation product holding said bars in place is not a bar to the allowance to the same inventor of a patent for the process of producing the article, involving the conception of softening the moldable material, positioning the bars radially and longitudinally, and forming a complete insulating-body simultaneously under heat and pressure, which was foreign to the processes of the prior art.

Mr. E. B. H. Tower, Jr., and *Mr. R. O. Hinkle* for the appellant.

Mr. T. A. Hostetler for the Commissioner of Patents.

VAN ORSDEL, *J.*:

This appeal is from the decision of the Commissioner of Patents rejecting the application of appellant Zenk for a patent for a mold and method or process of making commutators for electric generators and motors. Of the seven claims, the following three are illustrative:

1. The method of making a commutator which consists in arranging commutator segment bars circumferentially in spaced relations, surrounding certain sides of said bars with insulating material having the property of hardening under the action of heat and pressure, and applying heat and pressure to harden said material and unite it into a solid body for insulating the bars and holding them together.

6. The method of making a commutator which consists in arranging commutator segment bars circumferentially in spaced relation with a strip of insulating material between each of the bars, surrounding the inner edges and ends of the bars with an insulating material having the property of hardening under the action of heat and pressure, and applying heat and pressure to harden said material into a body which insulates said bars and firmly holds them in position.

7. A commutator mold comprising an annular outer shell having spaced notches in its inner periphery for receiving strips of insulation, an inner shell having notches therein for receiving the inner edges of commutator segment bars, the outer edges of said bars being received between the strips of insulating material positioned on the inner periphery of the outer shell, and means for supporting said shells and holding them in position so that the spaces between the commutator bars may be filled with insulating material and heat and pressure applied thereto.

In the prior art commutators were constructed of circumferentially-arranged bars or segments supported by strips of insulation and held together by clamping-rings or bolts or screws. Appellant was the first to successfully produce a purely molded commutator wherein the molded insulating material served both to insulate and hold the bars in place, dispensing entirely with mechanical support.

A patent was granted for the article produced, and the present application is confined to the process and mold. The scope of the claims of the patent, as affecting the present application, is stated by the Assistant Commissioner in his opinion, as follows:

Applicant has been allowed a patent, No. 1,255,681, on the article. Claim 1 of the patent, which was granted on the application of which the present application is a division, reads as follows:

"1. A commutator comprising metal commutator bars and a body of heat hardened resinous condensation product holding said bars in place."

Claim 4 includes the limitation that the body of resinous condensation product is molded about the bars.

These claims were allowed in view of evidence presented that no one prior to this applicant had been able to make a successful molded commutator, and that there was therefore invention in using a resinous condensation product specifically, "bakelite," as the insulating material.

We think the allowance of these claims in the Patent Office does not foreclose appellant from making the present method or process claims, unless barred by the prior art. We are of opinion that appellant's mold contains nothing patentable over the prior art. As held by the Assistant Commissioner:

Claim 7 is for the commutator mold and and the only feature of this claim not found in the mold of Lundell (September 8, 1891) is the slots in the inner and outer shell by which the commutator segments are held in position. As pointed out by the Examiners-in-Chief the slots shown in the patent to Lorimer (March 5, 1912) perform the same function as is performed by applicant's slots.

Therefore, claim 7 should be disallowed; but as to the process claims, we feel constrained to differ from the holding of the Patent Office. The present application was a division of, and was copending with, the application which resulted in the patent for the article. The patent is, therefore, not a bar even if the method or process was disclosed, inasmuch as it was not claimed. (*The Suffolk Co.* v. *Hayden*, 3 Wall., 315; *Ide* v. *Trorlicht Carpet Co.*, 115 Fed., 137, 145.)

The mere fact that the process and product claims might have been consolidated in a single patent furnishes no ground for the rejection of the process claims. Separate patents may be issued for the product and the process.

A single exercise of the inventive faculties may produce both a process and its product, a machine and the manufacture it creates, a composition of matter and the art by which it is applied to its intended use. In all such cases, if the inventions are truly separable, the inventor is entitled to a monopoly for each, although neither could have been discovered and been made available without the other. A patent for but one, though it may necessarily describe the other, is thus no hindrance to an application for a patent for the unsecured invention; but the new application must be judged according to its own intrinsic merits, as if no previous patent had been granted. (Rob. on Pats., sec. 466.)

Leaving out of consideration the product patent, and considering the process claims independently, we are of opinion that this feature of the invention is not anticipated in the prior art. Appellant's process produced the first successful molded commutator. The success over the prior art consisted in producing a commutator which would withstand the rigorous use required of it without the support of

rings, bolts or screws. This was accomplished by the novel method of manufacture devised by appellant. After the assembled bars and rings in which the bars are circumferentially spaced are placed in the mold, "powdered 'bakelite'" is forced "into the crevices and recesses of the mold." When this is completed, the mold is subjected simultaneously to pressure and a high degree of heat, resulting in the softening of the moldable material, the accurate positioning of the bars and the forcing of the moldable material into a compact solid "body which insulates said bars and firmly holds them in position." The basis of the Commissioner's disallowance of the process claims is stated in his opinion as follows:

> Claims 1 to 6 cover a process of making a commutator. Claim 7 is for the mold used in making this commutator. Claims 1 to 5 differentiate from the patent to Lundell only by the statement that the insulating material which is placed between the segment bars has the property of hardening under heat and pressure and that the heat and pressure are applied to harden this material.

It is this step in the process which, we think, constitutes invention.

Coming to the references, the Lieb patent of September 2, 1890, discloses a process in which the insulating material is first prepared "as a fluid, a plastic, or a semi-plastic mass," and when the bars are spaced—

> the insulating material is allowed to flow in or is pressed in to the interior of the ring of bars.

It will be observed that the conception of softening the moldable material, positioning the bars radially and longitudinally, and forming a complete insulating-body simultaneously under heat and pressure, was totally foreign to Lieb.

The disclosure of Lundell is still more remote. When he has the sections or segments arranged in the form of a ring, the ring is forced into a receptacle, when, as he states—

> having thus arranged the several parts, I pour into the annular space a suitable insulating material, which, on cooling or drying, becomes hard.

He had no conception of accomplishing the result by simultaneous heat and pressure.

While the question of patentability is not entirely free from doubt, we are disposed, in accordance with our rule in such cases, to resolve the doubt in favor of the inventor.

The decision of the Commissioner of Patents is affirmed as to count 7, and reversed as to counts 1 to 6, inclusive, and the clerk is directed to certify these proceedings as by law required.

Affirmed as to count 7, and reversed as to counts 1 to 6, inclusive.

ADJUDICATED PATENTS.

(U. S. D. C. N. D.) The McMillan patent, No. 1,136,885, for a support for automobile-beds, *Held* infringed by a structure which differs only in the substitution of mechanical equivalents. *McMillan* v. *Fischer Auto Bed & Camp Co.*, 264 Fed. Rep., 671.

Disclaimers.

861,183.—*Harry L. Ide*, Springfield, Ill. AUTOMOBILES. Patent dated July 23, 1907. Disclaimer filed July 12, 1920, by the assignee, *Elmer Stewart*.

Enters this disclaimer to—

"A—that part of claim 1 referred to in line 4 thereof as 'a tubular connection between said cases' excepting as if the same were limited to include the following after the word 'cases' in line 5: 'one end of said tubular connection being connected to said gearing casing and the other end having a universal support from said shaft case, said tubular connection being made with telescopic sections intermediate said ends.'

"B—that part of claim 3 specified as a 'tubular connection' in line 5 thereof excepting as limited to include the following inserted after 'case' in the last line of claim 3: 'at one end, a fixed connection with the gearing case at the other end and intermediate telescopic portions.'

"C—that part of claim 4 referred to in lines 5 and 6 as 'a tubular connection formed in telescoping sections' excepting as if including the following limitation thereon inserted after the word 'shaft' in the last line in the claim: 'one of said telescoping sections having connection with the gearing case and the other section having universal connection with the shaft case.'

"D—that part of claim 5 which includes the 'shaft having driving engagement with said gearing and said motor' excepting as if limited to the following inserted before 'said motor' in line 5: 'a sliding universal connection with'; to that part of claim 5 referred to as a 'tubular connection formed in telescoping sections' in lines 5 and 6, excepting as limited by the insertion of the word 'rotatable' before 'telescoping' in line 6; and to that part of the tubular connections made in sections referred to in lines 5 and 6 of claim 5 excepting as limited by the insertion of the following before 'said' in the next to the last line of the claim: 'one section of.'

"E—to that part of claim 6 referred to in line 1 as a 'frame mounted upon wheels' excepting as limited by the insertion of the word 'spring' before 'mounted' line 1; and to that part of claim 6 referred to in lines 5 and 6 thereof as a 'tubular connection formed in relatively rotatable sections' excepting as if limited by the addition of the following after the word 'shaft' in the last line of the claim: 'one end of one of said sections having universal connection with said shaft case.'

"F—to that part of claim 7 referred to in the next to the last line thereof as 'the tubing having universal connection with the shaft case' excepting as if limited by the insertion of the words 'at one end' after the word 'connection' in the next to the last line of the claim.

"G—to that part of claim 8, referred to in lines 4 and 5 as 'a shaft having driving connection with said gearing and said motor' excepting as if the same were limited to include the word 'sliding' before 'driving' in line 4, and also to that part of claim 8 referred to in the last four lines thereof as a tubular connection arranged as specified excepting as if limited to include the following after the word 'shaft' in the last line of claim 8: 'one end of one of said sections being universally supported.'

"H—that part of claim 9 referred to in lines 4 and 5 thereof as a 'shaft having driving connection with said gearing and said motor' excepting as if the same were limited to include the following after the word 'motor' in line 5: 'said connection including a universal joint'; and also that part of claim 9 referred to in the last five lines as a tubular connection as specified excepting as if limited by the insertion of the following words after the word 'case' in the last line of the claim: 'at one end of one of said sections.'

"I—to that part of claim 13 referred to in line 4 thereof as a 'shaft having driving connection with said gearing and said motor' excepting as if limited by the insertion of the word 'sliding' before 'driving' in line 4 and 'including a universal joint' inserted after the word 'motor' in line 5, and also to that part of claim 13 referred to in the last three lines thereof as a tubular connection as specified excepting as if limited by the insertion of the following after the word 'shaft' in the last line of the claim: 'and formed of relatively sliding sections one end of one of said sections being universally supported from the shaft case.'

"J—to that part of claim 23 referred to in line 4 as a tube as specified excepting as if limited by the insertion of the words 'surrounding the shaft' after the word 'tube' and to that part of claim 23 referred to as 'telescoping sections having a support independent of the shaft' excepting as limited by the insertion of 'one end of one section' before the word 'having' last line of the claim and the word 'universal' before the word 'support' same line.

"K—to that part of claim 24 referred to as a tube made in sections and supported as specified in the last two lines of the claim excepting as if limited by the insertion of the words 'one end of one section' before the word 'having' in the next to the last line in the claim and by the insertion of the word 'universal' before the word 'support' in the same line.

"L—to that part of claim 25 referred to in the last three lines as a tube having a support as specified excepting as if the words 'one end of one section' were inserted before the word 'having' in the next to the last line of the claim and the word 'universal' were inserted before the word 'support' in the same line."

1,306,824.—*Fritz Lubberger*, Chicago, Ill. SEMI-AUTOMATIC TELEPHONE-EXCHANGE SYSTEM. Patent dated June 17, 1919. Disclaimer filed July 15, 1920, by the assignee, *Automatic Electric Company*.

Enters this disclaimer—

"To claims 41 and 42 in the said specification, which are in the following words, to wit:

"41. In a telephone system, means for setting up a talking circuit between a calling and a called subscriber's line, a connector switch for seizing the called line controlled over two sides of the talking circuit in series, means controlled by the calling subscriber for releasing said switch, and means for preventing a calling subscriber from releasing said switch.

"42. In a telephone system, a calling and a called line, means including a trunk line and a connector switch for connecting the subscribers on said lines in conversation, said connector being controllable over the two sides of said trunk line in series, and means for releasing said connector controlled by whichever one of said subscribers who last replaces his receiver."

An Act to Give Effect to Certain Provisions of the Convention for the Protection of Trade-Marks and Commercial Names, Made and Signed in the City of Buenos Aires, in the Argentine Republic, August 20, 1910, and for Other Purposes.

[Public—No. 163—66th Congress.]

[H. R. 9023.]

An act to give effect to certain provisions of the Convention for the Protection of Trade-Marks and Commercial Names, made and signed in the city of Buenos Aires, in the Argentine Republic, August 20, 1910, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Commissioner of Patents shall keep a register of (a) all marks communicated to him by the international bureaus provided for by the Convention for the Protection of Trade-Marks and Commercial Names, made and signed in the city of Buenos Aires, in the Argentine Republic, August 20, 1910, in connection with which the fee of $50 gold for the international registration established by article 2 of that convention has been paid, which register shall show a facsimile of the mark; the name and residence of the registrant; the number, date, and place of the first registration of the mark, including the date on which application for such registration was filed and the term of such registration, a list of goods to which the mark is applied as shown by the registration in the country of origin, and such other data as may be useful concerning the mark.

(b) All other marks not registerable under the act of February 20, 1905, as amended, except those specified in paragraphs (a) and (b) of section 5 of that act, but which have been in bona fide use for not less than one year in interstate or foreign commerce, or commerce with the Indian tribes by the proprietor thereof, upon or in connection with any goods of such proprietor upon which a fee of $10 has been paid to the Commissioner of Patents and such formalities as required by the said Commissioner have been complied with: Provided, That trade-marks which are identical with a known trade-mark owned and used in interstate and foreign commerce, or commerce with the Indian tribes by another and appropriated to merchandise of the same descriptive properties as to be likely to cause confusion or mistake in the mind of the public or to deceive purchasers, shall not be placed on this register.

Sec. 2. That whenever any person shall deem himself injured by the inclusion of a trade-mark on this register, he may at any time apply to the Commissioner of Patents to cancel the registration thereof. The Commissioner shall refer such application to the Examiner in Charge of Interferences, who is empowered to hear and determine this question, and who shall give notice thereof to the registrant. If it appear after a hearing before the Examiner that the registrant was not entitled to the exclusive use of the mark at or since the date of his application for registration thereof, or that the mark is not used by the registrants or has been abandoned, and the Examiner shall so decide, the Commissioner shall cancel the registration. Appeal may be taken to the Commissioner in person from the decision of the Examiner in Charge of Interferences.

Sec. 3. That any person who shall wilfully and with intent to deceive, affix, apply, or annex, or use in connection with any article or articles of merchandise, or any container or containers of the same, a false designation of origin, including words or other symbols, tending to falsely identify the origin of the merchandise, and shall then cause such merchandise to enter into interstate or foreign commerce, and any person who shall knowingly cause or procure the same to be transported in interstate or foreign commerce or commerce with Indian tribes, or shall knowingly deliver the same to any carrier to be so transported, shall be liable to an action at law for damages and to an action in equity for an injunction, at the suit of any person, firm, or corporation doing business in the locality falsely indicated as that of origin, or in the region in which said locality is situated, or at the suit of any association of such persons, firms, or corporations.

Sec. 4. That any person who shall without the consent of the owner thereof reproduce, counterfeit, copy, or colorably imitate any trade-mark on the register provided by this act, and shall affix the same to merchandise of substantially the same descriptive properties as those set forth in the registration, or to labels, signs, prints, packages, wrappers, or receptacles intended to be used upon or in connection with the sale of merchandise of substantially the same descriptive properties as those set forth in such registration, and shall use, or shall have used, such reproduction, counterfeit, copy, or colorable imitation in commerce among the several States, or with a foreign nation, or with the Indian tribes, shall be liable to an action for damages therefor at the suit of the owner thereof; and whenever in any such action a verdict is rendered for the plaintiff the court may enter judgment therein for any sum above the amount found by the verdict as the actual damages, according to the circumstances of the case, not exceeding three times the amount of such verdict, together with the costs.

Sec. 5. That it shall be the duty of a registrant under this act of a mark falling within class (a) of section 1, to comply with the law of the country in which his original registration took place, in respect to giving notice to the public that the trade-mark is registered, in connection with the use of such trade-mark in the United States of America, and in any suit for infringement by a party failing to do this, no damages shall be recovered except on proof that the defendant was duly notified of the infringement and continued the same after such notice.

Sec. 6. That the provisions of sections 15, 17, 18, 19, 20, 21, 22, 23, 25, 26, 27, and 28 (as to class (b) marks only) of the act approved February 20, 1905, entitled "An act to authorize the registration of trade-marks used in commerce with foreign nations or among the several States, or with Indian tribes, and to protect the same," as amended to date, and the provisions of section 2 of the act entitled "An act to amend the laws of the United States relating to the registration of trade-marks," approved May 4, 1906, are hereby made applicable to marks placed on the register provided for by section 1 of this act.

Sec. 7. That written or printed copies of any records, books, papers, or drawings belonging to the Patent Office and relating to trade-marks placed on the register provided for by this act, when authenticated by the seal of the Patent Office and certified by the Commissioner thereof, shall be evidence in all cases wherein the originals could be evidence, and any person making application therefor and paying the fee required by law shall have certified copies thereof.

Sec. 8. That the same fees shall be required for certified and uncertified copies of papers and for records, transfers, and other papers, under this act, as are required by law for such copies of patents and for recording assignments and other papers relating to patents.

On filing an appeal under this act to the Commissioner of Patents from the decision of the Examiner in Charge of Interferences, awarding ownership of a trade-mark, canceling or refusing to cancel the registration of a trade-mark, a fee of $15 shall be payable.

Sec. 9. That section 5 of the Trade-Mark Act of February 20, 1905, being Thirty-third Statutes at Large, page 725, as amended by Thirty-fourth Statutes at Large, page 1251, Thirty-sixth Statutes at Large, page 918, Thirty-seventh Statutes at Large, page 649, is hereby amended by adding the following words thereto: "And if any person or corporation shall have so registered a mark upon the ground of said use for ten years preceding February 20, 1905, as to certain articles or classes of articles to which said mark shall have been applied for said period, and shall have thereafter and subsequently extended his business so as to include other articles not manufactured by said applicant for ten years next preceding February 20, 1905, nothing herein shall prevent the registration of said trade-mark in the additional classes to which said new additional articles manufactured by said person or corporation shall apply, after said trade-mark has been used on said article in interstate or foreign commerce or with the Indian tribes for at least one year provided another person or corporation has not adopted and used previously to its adoption and use by the proposed registrant, and for more than one year such trade-mark or one so similar as to be likely to deceive in such additional class or classes."

Approved, March 19, 1920.

Adverse Decisions in Interference.

PATENT No. 1,273,180.

On March 28, 1920, a decision was rendered that Fred Schoenwolf was not the first inventor of the subject-matter covered by claim 12 of his Patent No. 1,273,189, subject, "Telephone-exchange system," and no appeal having been taken within the time allowed such decision has become final.

PATENT No. 1,296,104.

On May 28, 1920, a decision was rendered that Harry W. Munsell was not the first inventor of the subject-matter covered by claim 16 of his Patent No. 1,296,104, subject, "Semi-automatic telephone system," and no appeal having been taken within the time allowed such decision has become final.

PATENT No. 1,297,942.

On July 9, 1920, a decision was rendered that William Frederick Wahrenberger was not the first inventor of the subject-matter covered by claim 1 of his Patent No. 1,297,942, subject, "Wheel-carrier for demountable wheels," and no appeal having been taken within the time allowed such decision has become final.

PATENT No. 1,320,057.

On July 6, 1920, a decision was rendered that Rudolf E. Hellmund was not the first inventor of the subject-matter covered by claims 1 and 2 of his Patent No. 1,320,057, subject, "System of control," and no appeal having been taken within the time allowed such decision has become final.

Notice of Cancelation.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE.
Washington, D. C., July 19, 1920.

Alfred Victor Brokhahne, his assigns or legal representatives, take notice:

An application has been filed in this Office by Sigmund Isaacs, of New York, N. Y., to effect the cancelation of the trade-mark registration of Alfred Victor Brokhahne, of New York, N. Y., No. 12,417, dated July 21, 1885. The Office having been unable to secure service upon said Alfred Victor Brokhahne at the said address, notice is hereby given that unless said Alfred Victor Brokhahne, his assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the cancelation will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

R. F. WHITEHEAD,
First Assistant Commissioner.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., August 2, 1920.

Ampere Manufacturing Co., its assigns or legal representatives, take notice:

A cancelation proceeding having been instituted by this Office upon the application of Diamond Electric Specialties Corporation, 103 South Orange avenue, Newark, N. J., to effect the cancelation of the trade-mark registration of Ampere Manufacturing Co., Nos. 408–412 West Thirteenth street, New York, N. Y., No. 65,605, dated October 8, 1907, and the notice of such proceeding sent by registered mail to the said Ampere Manufacturing Co. at the said address having been returned by the post-office undeliverable, notice is hereby given that unless said Ampere Manufacturing Co., its assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the cancelation will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

R. F. WHITEHEAD,
First Assistant Commissioner.

Changes in Classification.

(ORDER No. 2,598.)

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., August 3, 1920.

It is hereby directed that class 187, Elevators, be transferred from Division IV to Division XLVII, to take effect immediately.

R. F. WHITEHEAD,
Acting Commissioner.

Briefs in Appealed Cases.

All briefs filed in this Office should have conspicuously printed thereon a statement designating the particular tribunal of the Patent Office to which the brief is addressed.

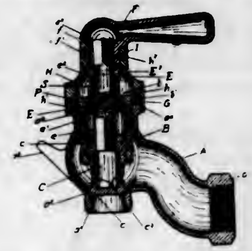
PATENTS

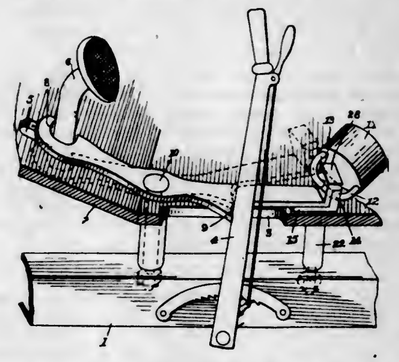
GRANTED AUGUST 10, 1920.

1,348,837. STERILIZING DEVICE. LEWIS H. ALLEN, West Springfield, Mass. Filed Feb. 14, 1919. Serial No. 276,907. 2 Claims. (Cl. 167—3.)

1. In a sterilizing device in which the steam is used as the sterilizing agent, the combination of a container having a curved bottom in which the liquid to supply the sterilizing vapor is placed and there evaporized by heat applied to the basin, a cover for the container, spaced lugs on the inside surface of the container to support a basket-like member to receive the articles to be sterilized, said member having closed sides, an open top and a perforated bottom to permit the vapor from the liquid to pass directly into said member and come in contact with the articles to be sterilized and to pass up around the side of said member and into the open top.



1,348,838. STOVE-DOOR. JOSEPH L. ANTHONY, Taunton, Mass., assignor to Weir Stove Company, Taunton, Mass., a Corporation of Massachusetts. Filed May 15, 1918. Serial No. 234,601. 2 Claims. (Cl. 126—200.)

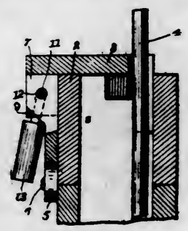


1. A stove door comprising a body having an opening therein, one or more grooved bars crossing said opening, a transparency covering said opening and comprising a plurality of glass sections disposed in a common plane with their adjacent edges abutting opposite said bar or bars, an outer retaining plate laid over said glass sections and having one or more grooved bars disposed opposite the bar or bars of said body, the adjacent faces of said body and plate being provided with peripheral grooves, pads of yielding heat-resisting material in the grooves of said body, plate and bars, said pads engaging the edges of said glass sections, and means for securing said plate to said body.

1,348,839. DISPENSING-FAUCET. LINNAEUS E. BAKER, Fort Wayne, Ind., assignor to Wayne Oil Tank and Pump Company, Fort Wayne, Ind., a Corporation of Indiana. Filed Feb. 9, 1920. Serial No. 357,233. 1 Claim. (Cl. 251—48.)

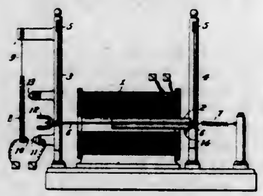
A valve comprising a casing made up of a body, a bonnet, a unitary valve-stem and a handle, a valve-guide having an inwardly extending flange with an axial opening and adapted to be clamped in axial relation to the body by the union of the body and bonnet, a valve threaded to the valve-guide and adapted to be raised and lowered by the rotation of the valve stem, said unitary valve-stem having an annular boss intermediate of its ends, a packing-ring compressed between said annular boss and said valve-guide flange, a removable collar on the valve-stem, a spring normally compressed between said collar and said valve-guide flange, said handle adapted to be used in rotating said valve-stem and means for permanently securing the handle to the bonnet in such a manner as to permit free interrotation.

1,348,840. MULTIPLE-LEVER LOCK FOR AUTOMOBILES. LOUIS BALESTRINO, Brooklyn, and GIACINTO MERIGONE, New York, N. Y. Filed Oct. 14, 1919. Serial No. 330,585. 3 Claims. (Cl. 70—126.)



1. The combination with the floor and an under frame rail of an automobile, of a bolt secured to said rail and extending up through the floor, a control lever locking member pivoted on said bolt, a tube mounted around said bolt and also extending up through the floor to support said member above the upper surface thereof and means for securing said member in locking position.

1,348,841. AUTOMOBILE-LOCK. LOUIS BALESTRINO, Brooklyn, and GIACINTO MERIGONE, New York, N. Y. Filed Oct. 14, 1919. Serial No. 330,586. 2 Claims. (Cl. 70—131.)

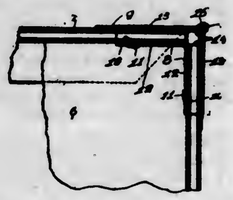


1. The combination with the transmission case of an automobile having a slot therein, and a control lever

movable in said slot, of a locking member having a notch to fit around said lever when in neutral position, lugs on said member to enter the slot at opposite sides of the lever, a laterally extending lug on said member project-

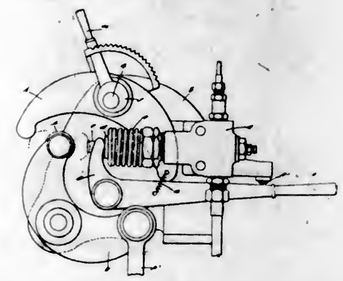
ing beyond the side of the transmission case, a bracket secured to the same side of said case, and means for locking the laterally extending lug on the locking member to said bracket for retaining it in locking position.

1,348,842. ELECTRIC RELAY OR CIRCUIT-CLOSING DEVICE. WILLIAM N. BARLOW, Yonkers, N. Y. Filed Mar. 18, 1918. Serial No. 223,151. 7 Claims. (Cl. 200—98.)



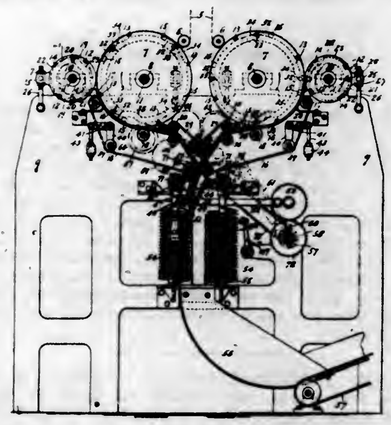
3. In an electric relay or circuit closing device, the combination of a solenoid coil, a plunger or core movable axially of said coil, and an electric circuit controlling means comprising a permanent magnet and armature, one of said parts being secured to the solenoid core.

1,348,843. METHOD OF OBTAINING TITANIC OXID. LOUIS E. BARTON, Niagara Falls, N. Y., assignor to The Titanium Alloy Manufacturing Company, New York, N. Y., a Corporation of Maine. Filed Feb. 27, 1919. Serial No. 279,614. 7 Claims. (Cl. 134—58.)



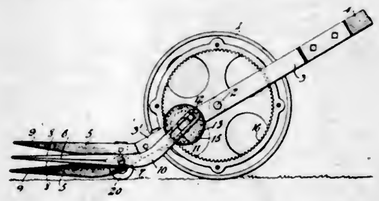
1. In obtaining titanic oxid concentrates by aid of acid treatment of material comprising both compounds of titanium and also sulfids containing iron, the step which consists in, prior to such acid treatment, converting such sulfids into oxygenated compounds.

1,348,844. HINGE FOR CORRUGATED BOXES. HARRY L. BORDERS and ELWOOD A. LEWIS, St. Louis, Mo., assignors to Standard Corrugated Box Co., St. Louis, Mo., a Corporation of Missouri. Filed Apr. 19, 1919. Serial No. 291,311. 2 Claims. (Cl. 16—104.)



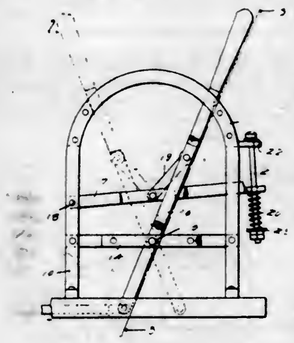
1. A hinge for corrugated boxes comprising a pair of metallic strips, teeth formed on each end of said strips, one set of teeth being longer than the other set, an eye formed in each of said strips by folding the ends of said strips being so arranged that one will project beyond the other, the faces of said strips when folded being spaced apart and parallel to each other, the teeth of the longer projecting end being adapted to extend entirely through the material of which the box is formed and folded upon the shorter end for holding the same against withdrawal from the box, and a rivet passed through the eyes of said strips for securing them side by side.

1,348,845. MEANS FOR CONTROLLING THE SUPPLY OF LIQUID FUEL TO INTERNAL-COMBUSTION ENGINES. HERBERT BROOKS, Yeovil, England, assignor to Petters Limited, Yeovil, England. Filed Nov. 29, 1918. Serial No. 264,680. 4 Claims. (Cl. 123—139.)



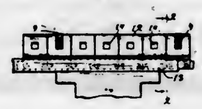
1. In internal combustion engines, of the single cylinder or multi-cylinder type the combination with means for injecting fuel into each cylinder when the piston is at or near the end of the compression stroke, of means for delivering an early injection of fuel in any one of said cylinders by means of fuel pumps corresponding to each cylinder at a predetermined time, with or without the main injection for the purpose set forth.

1,348,846. SHEET-INTERFOLDING MACHINE. GOUVERNEUR G. BROWN, New York, and PAUL A. SCHUCHART, Rockville Center, N. Y., assignors to Paper Service Company, a Corporation of New York. Filed Sept. 28, 1916. Serial No. 122,591. 18 Claims. (Cl. 270—39.)



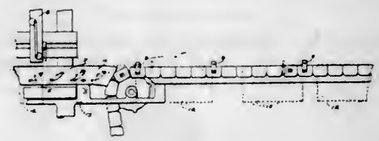
1. In combination with apparatus for creasing a plurality of webs and cutting the webs into sheets and bringing the sheets together in overlapped relation, means for interfolding the sheets, and a plurality of rotating spring spirals for receiving said interfolding sheets and feeding them away from the folding means.

1,348,847. EDGE-TRIMMER. WILLIAM HULL BROWNING, New York, N. Y. Filed Aug. 13, 1919. Serial No. 317,370. 7 Claims. (Cl. 56—247.)



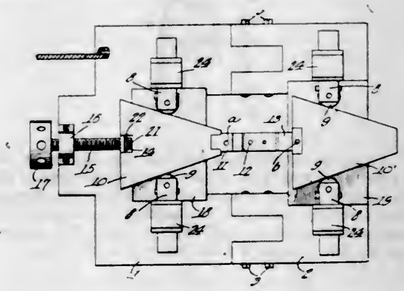
1. An edge cutter, comprising a roller, a fork connected to the roller, a handle on the fork, shears carried by one member of the fork, and a roller supporting the shears.

1,348,848. SWITCH-STAND. ROBERT T. BUTLER and HARRY E. THOMPSON, Flushing, Ohio. Filed Apr. 20, 1920. Serial No. 375,309. 5 Claims. (Cl. 246—410.)



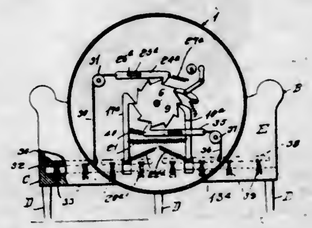
1. A switch stand having a hand lever and a spring actuated retaining lever to which the hand lever is connected by a toggle link movable to reversed position relative to the hand lever to lock the latter alternately in its adjusted positions.

1,348,849. CONVEYER FOR BOOK-STITCHING MACHINES. MARTIN CHRISTENSEN, Racine, Wis., assignor to Christensen Machine Company, Racine, Wis., a Corporation of Wisconsin. Filed May 28, 1917. Serial No. 171,442. 4 Claims. (Cl. 193—8.)



4. In a device of the class described, the combination with an endless conveyer provided with a plurality of spaced seats, of pusher members engageable in said seats and having substantially rigid and interchangeable connection with the seats but being capable of ready detachment therefrom.

1,348,850. SIGNATURE-STITCHING MACHINE. MARTIN CHRISTENSEN, Racine, Wis., assignor to Christensen Machine Co., Racine, Wis., a Corporation of Wisconsin. Filed Mar. 2, 1920. Serial No. 362,873. 3 Claims. (Cl. 1—7.)



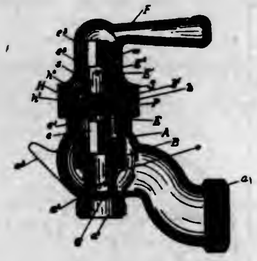
2. In a signature stitching machine, the combination with a stitcher and a feeding mechanism for presenting signatures in succession to the stitcher, of means for conveying the signatures in succession to the feeding mechanism alternately late and early whereby the stitches of alternate signatures will be in staggered relation.

1,348,851. AUTO-JACK. WILLIAM M. COOK, Warren, Ohio. Filed Oct. 1, 1919. Serial No. 327,630. 2 Claims. (Cl. 254—89.)

1. A lifting jack comprising a pair of triangular members, a bar connecting said members, means for moving said members, four housings, a wedge sliding in each housing having its inner end in contact with said triangular members, and a lifting post in each of said housings having its lower end in engagement with a wedge.

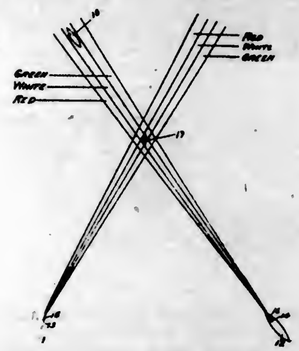
1,348,852. AUTOMATIC ADVERTISING-BENCH. GASPAR GARCIA DIAZ, New York, N. Y. Filed Aug. 13, 1918. Serial No. 249,711. 2 Claims. (Cl. 40—28.)

1. In advertising means, a bench provided with a plurality of seats hingedly secured thereto adjacent their front edges, a casing mounted on the back of said bench and provided with a display opening through its front wall, a stub shaft rotatably mounted in said casing, a display disk secured on said shaft for movement across the display opening and adapted to have advertisements inscribed upon its surface for display purposes through said opening, a ratchet wheel secured on said stub shaft, pawls engaging



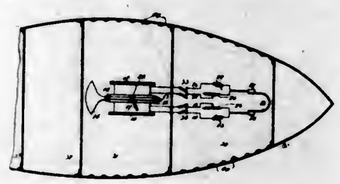
said ratchet wheel, means for normally maintaining the seat in raised position, and means for actuating said pawls so as to cause predetermined rotary movement of the ratchet wheel when certain of said seats are depressed and certain others of the seats are raised.

1,348,853. UNDERREAMER. CHARLES L. DUNHAM, Pennsboro, W. Va. Filed May 15, 1920. Serial No. 381,721. 5 Claims. (Cl. 255—76.)



1. A reamer comprising a body portion having its lower end bifurcated and further provided with peripheral slideways, cutters having shanks extended into the furcation of and pivotally connected to the body portion, spreaders engaging the cutters, and spring controlled actuating means for the spreaders shiftable in the slideways.

1,348,854. DISPENSING-FAUCET. FRANK B. EILERS, Fort Wayne, Ind., assignor to Wayne Oil Tank & Pump Company, Fort Wayne, Ind., a Corporation of Indiana. Filed Aug. 8, 1918. Serial No. 248,909. 1 Claim. (Cl. 251—48.)



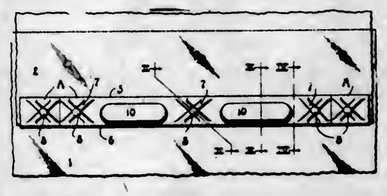
In a dispensing faucet, the combination with a valve body, a bonnet fitted to the upper end thereof, a rotatable reciprocating valve seating on said body and having an upper extension, a tubular guide element for the valve, said element having a closed top pierced at its center, and a valve stem passing through the top of said guide element and engaging the extension of said valve, said stem having a fixed flange and a fixed collar, of a coiled spring surrounding said stem and seating below on the top of the guide element, a packing between the under side of the top of the guide element and said fixed flange, and a non-rotating friction washer on the stem between the top of the spring and the fixed collar, said washer having slots in its sides and said bonnet having guide ribs on its inner surface engaged by the slots of the washer.

1,348,855. METHOD AND APPARATUS FOR LOCATING SUBMARINES. REGINALD A. FESSENDEN, Brookline, Mass., assignor to Submarine Signal Company, Portland, Me., a Corporation of Maine. Filed Sept. 26, 1917. Serial No. 193,352. 4 Claims. (Cl. 161—26.)

2. A method of indicating to a second station the presence of submarines or similar bodies, which consists in determining the direction of the submarine or similar body by a submarine direction finder from a first station, and at the first station maintaining as an optical indicator to said second station an optical beam in the direction indicated by the submarine direction finder.

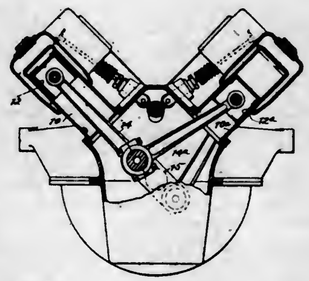
1,348,856. APPARATUS FOR DIRECTIVE SIGNALING. REGINALD A. FESSENDEN, Brookline, Mass., assignor to Submarine Signal Company, Portland, Me., a Corporation of Maine. Filed Dec. 26, 1918. Serial No. 268,231. 7 Claims. (Cl. 181—26.)

2. The combination of a ship, a liquid-containing chamber etxending the full width of the ship, sound-insulating chambers located between said liquid-containing chamber and the bow and stern of the ship, and submarine-acoustic means located within said body of liquid.



1,348,857. CLOSURE. LOUIS M. FORD, Vandalia, Ill. Filed Nov. 23, 1917. Serial No. 203,530. 1 Claim. (Cl. 206—59.)

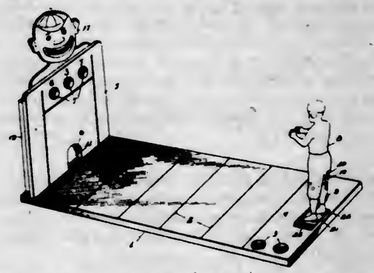
In a closure for the central opening in a roll of sheet material, a sheet metal closure member having a central circular web, an annular wall extending outwardly from said circular web and an annular flange extending from said annular wall to engage the end face of the roll of sheet material, said circular web and annular wall being adapted to lie within the central opening in the roll of



sheet material, and said annular wall being provided with oppositely disposed anchor-receiving openings; and a double-pointed flexible wire anchor which is primarily V-shaped with its pointed end portions deflected away from each other to provide diverging anchor members, said diverging anchor members being extended through said oppositely disposed openings so that they may be forced into the roll of sheet material and away from each other in opposite directions by hammering the V-shaped wire anchor.

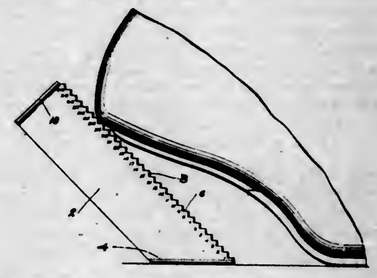
1,348,858. CLEAT FOR SECURING AND PROTECTING SHEET-ROOFING. LOUIS M. FORD, Vandalia, Ill. Filed Mar. 4, 1918. Serial No. 220,275. 2 Claims. (Cl. 108—7.)

1. In a device for securing the lapped margins of sheet roofing, an elongated pressed metal cleat having X-shaped reinforcing elements each comprising comparatively narrow arched intersecting ribs, the top faces of the intersecting ribs being inclined upwardly to a point much higher than the metal of the body of the cleat surrounding said X-shaped reinforcing elements and being provided with a nail-receiving opening at the elevated center of each of said X-shaped reinforcing elements, and elongated longitudinal arches being formed between said X-shaped reinforcing elements.



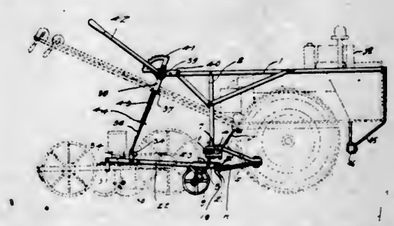
1,348,859. V-TYPE MOTOR. THEODORE W. FRECH, Cleveland, Ohio, assignor to The Peerless Motor Car Company, Cleveland, Ohio, a Corporation of Ohio. Filed Dec. 18, 1918. Serial No. 267,249. 4 Claims. (Cl. 121—120.)

1. A method of minimizing certain vibrations in an internal combustion engine of the V-type having two rows of cylinders of the same diameter whereof the cylinders of one row are set at 90° to the cylinders of the other row, which consists in making the moving parts associated with each cylinder in one row heavier than the moving parts associated with the opposed cylinder in the other row.



1,348,860. TOY. JOHN LEWIS FRIEND, Wilkinsburg, Pa. Filed July 30, 1918. Serial No. 247,410. 3 Claims. (Cl. 46—59.)

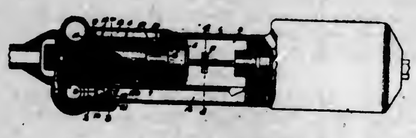
1. In game apparatus, the combination of a base representing a field, a head piece rising from one end of the base and formed with a plurality of openings therethrough, a projectile actuating member arranged at the opposite end of the base and adapted by manual manipulation to hurl a projectile toward said head piece, and a free projectile adapted to be thrown by said projectile actuating



member, the latter consisting of a figure having a leg, and a leaf spring terminally fastened at one end to the figure and at its other end to said leg and forming the sole connection between said leg and figure.

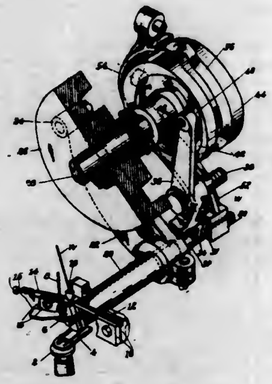
1,348,861. MEASURING DEVICE. DANIEL M. FRYE, Jr., Philadelphia, Pa., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Nov. 17, 1916. Serial No. 131,940. 9 Claims. (Cl. 33—168.)

2. A device of the class described comprising a base adapted to rest on a flat surface, a portion arranged to extend upwardly in an inclined direction from the base and provided with notches spaced to indicate the number of units of heel height measurement of the heel required for a heeless shoe being measured, said notches being adapted to support the heel end of the shoe when its forepart is in proper tread relation to said flat surface, a second base, and another graduated portion arranged to extend perpendicularly to said base and marked to afford direct reading of the number of units of heel height measurement of a shoe heel.



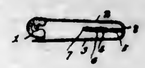
1,348,862. MULTIPLE-SEEDER ATTACHMENT FOR GARDEN-TRACTORS. CHARLES W. GENUNG, Madison, Ohio. Filed May 24, 1919. Serial No. 299,514. 5 Claims. (Cl. 97—85.)

1. In seeder attaching means, an attaching frame adapted to fit about a tractor, depending arms carried by



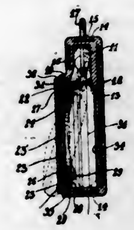
said frame in rear of the tractor, a supporting bar secured to said arms, attaching arms carried by the bar and extending forwardly thereof, rearwardly extending resilient attaching arms secured at their forward ends to the forward ends of the first mentioned attaching arms, a pull rod carried by said resilient arms at the rearward ends thereof, and means for attaching a plurality of seeders to the pull rod in parallel spaced relation so as to permit independent rise and fall thereof when the seeders are in lowered position, said means being adapted to permit raising of the seeders into inoperative position.

1,348,863. FLUID-MOTOR. GEORGE H. GILMAN, Claremont, N. H., assignor to Sullivan Machinery Company, Boston, Mass., a Corporation of Massachusetts. Filed Jan. 3, 1916. Serial No. 69,937. 38 Claims. (Cl. 121—15.)



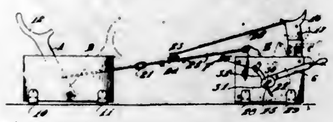
1. A direct acting fluid motor having reciprocatory means presenting two pressure reciving portions adapted to receive pressure to move said reciprocatory means in one direction, conduit means for conducting pressure fluid to both of said portions, and fluid control means providing dissimultaneous cutoffs of the supply of pressure fluid to said portions during a single stroke of said reciprocatory means.

1,348,864. MACHINE FOR MAKING FASTENINGS. GEORGE GODDU, Winchester, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Jan. 29, 1916. Serial No. 75,080. 13 Claims. (Cl. 10—44.)



1. In a machine for making fastenings from wire, a shearing mechanism constructed to cut the wire to form simultaneously the head of one fastening and the point of the next succeeding fastening, said mechanism including shaping members having their active faces formed to make on each fastening a wedge shaped point terminating in a thin flat tip having substantially parallel sides.

1,348,865. SAFETY-PIN. SOLOMON H. GOLDBERG, Chicago, Ill., assignor to The Hump Hairpin Manufacturing Company, Chicago, Ill., a Corporation of West Virginia. Filed Dec. 23, 1916. Serial No. 138,542. 1 Claim. (Cl. 24—161.)

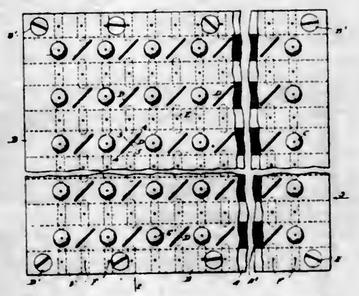


A safety pin comprising a head and a body portion, the body portion being formed of a single piece of wire, having a pair of substantially parallel outer legs and an inner leg portion the latter being formed of a twisted upper end and a hump portion, and a relatively flat terminal portion taking the form of a closed loop.

1,348,866. WATCH-PROTECTOR. PAUL GOMIL, Brooklyn, N. Y. Filed Feb. 20, 1920. Serial No. 360,205. 4 Claims. (Cl. 58—105.)

1. A watch protector, comprising in combination, a one-piece insulating casing having inlays of magnetic metal, a casing cover in waterproof connection with the casing, and means provided in said cover for firmly holding a watch within the casing.

1,348,867. LIFTING-JACK. ALEXANDER WILBERFORCE GORDON, Crossfields, Alberta, Canada. Filed July 24, 1919. Serial No. 313,126. 10 Claims. (Cl. 254—89.)

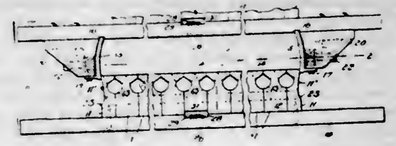


1. In a lifting jack and in combination, a power lever adapted to be engaged by the front axle of an automobile, a lifting member adapted to engage the rear axle thereof, a rack on the lifting member, a gear engaged with the rack, an operating lever, a pawl on the operating lever engaging the gear, and means for operating the operating lever from the power lever.

1,348,868. LOCK FOR MOTOR-CAR GEAR-SHIFTING LEVERS. GEORGE GREEN, Toronto, Ontario, Canada. Filed Mar. 11, 1920. Serial No. 365,010. 2 Claims. (Cl. 70—128.)

1. The combination of a shifting lever; a ball-and-socket joint for said lever to one member of which the lever is rigidly connected, holes being formed in the members of the ball-and-socket joint which are in alinement when the lever is in predetermined position; a slide movable longitudinally on the lever; a pin secured to said slide adapted to enter the holes aforesaid to lock the ball-and-socket members together; a collar on the lever; and releasable means adapted to be locked in position between the collar and slide to hold the aforesaid pin in engagement with both members of the ball-and-socket joint.

1,348,869. OIL-PRESS. MICHAEL B. GREEN, Memphis, Tenn. Filed Nov. 19, 1919. Serial No. 339,010. 5 Claims. (Cl. 100—54.)



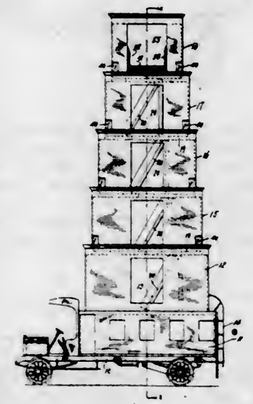
2. The combination with a plane metal base having ribs above separated by wide grooves, of a mat-supporting plate covering the base, resting on said ribs, having in its lower face recesses directly above the ribs and in open communication with the adjacent grooves, and further having perforations leading through the plate into said recesses and apertures leading through the plate directly into the grooves, substantially as set forth.

3. In a support for mats of material in an oil press, a base having in its upper surface primarily open oil carrying channels, and a plate superposed on said base and provided with a series of narrow slots oblique with respect to the warp and woof of the usual press mats laid upon the plate, and all leading into said channels.

1,348,870. OIL-PRESS. MICHAEL B. GREEN, Memphis, Tenn. Filed Mar. 6, 1920. Serial No. 363,755. 7 Claims. (Cl. 100—54.)

1. In an oil press, a mat support having its body made up of rigidly united bars laterally contacting at their upper sides in the same plane and having their meeting faces provided with registering grooves forming oil passages from end to end of the bars, each bar having in its upper side narrow oblique grooves extending downward on each side into said passages, and from the lateral margins of the bars approximately to their medial lines.

2. In an oil press, the combination with mat supports to be superposed, of plates pivotally engaged with a support above and fitting respectively against opposite lateral faces of the next support below to support the margins of the intermediate mat, and means whereby the plates are moved outward from the mats as the limit of compression is reached.



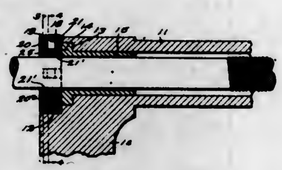
1,348,871. AUTOMOBILE-TIRE. WILLIAM A. GRIFFITHS and EDWARD J. GRIFFITHS, Homestead, Pa. Filed Dec. 20, 1919. Serial No. 346,315. 2 Claims. (Cl. 152—18.)

1. The combination with the tread portion of a tire, an outer set of segment shaped plates arranged in spaced relation and embedded in said tread portion, said set of plates arranged in a concentric row an inner set of segment shaped plates arranged in spaced relation and embedded in said tread portion inwardly with respect to and spaced from the plates of the outer set of plates, said inner set of plates arranged in a concentric row the plates of the outer set overlapping the plates of the inner set, transverse rows of studs carried by said plates and flush with the periphery of the said tread portion, the outer transverse rows of studs carried by the inner plates extending through the ends of the outer plates and coupling the two sets of plates together.

1,348,872. FIRE-ESCAPE OR LIFE-SAVING TOWER. GREGOR GULICH, New York, N. Y. Filed July 21, 1919. Serial No. 312,287. 1 Claim. (Cl. 227—20.)

A portable fire-escape comprising a truck, a tower thereon made of a plurality of box-shaped sections, each section being provided with a bottom but open at its upper end, one section of said tower being fixed to said truck and

the others being adapted to telescope into said fixed section, means for raising said movable sections in succession in relation to said stationary section, each of said bottoms but that of the outer-most section being provided with an opening, said openings being in alinement, a ladder secured to each movable section but the outer-most section, said ladders being fixed to the respective bottoms of said sections and slanting from the top of the respective section to its bottom in alinement with the opening in the bottom of the next section, said ladders being of different widths and staggered in relation to each other, thereby permitting the same to be nested when said tower is telescoped.

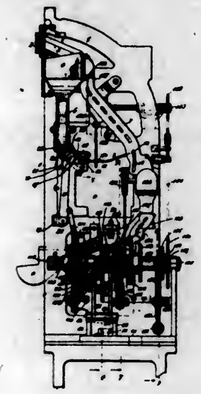


1,348,873. MANUFACTURE OF CONCENTRATED NITRIC ACID. PHILIPPE AUGUSTE GUYE, Geneva, Switzerland, assignor to Ferdinand Gros & Bouchardy, Paris, France, a Firm. Filed May 9, 1918. Serial No. 233,567. 4 Claims. (Cl. 23—1.)

1. A process for the manufacture of concentrated nitric acid by causing an aqueous solution of nitric acid to react with nitric anhydrid at the moment of its formation, formed in immediate proximity to the solution by the reaction between nitric peroxid and ozone.

1,348,874. MANUFACTURE OF NITRIC ANHYDRID. PHILIPPE AUGUSTE GUYE, Geneva, Switzerland, assignor to Ferdinand Gros & Bouchardy, Paris, France, a Firm. Filed May 9, 1918. Serial No. 233,568. 4 Claims. (Cl. 23—1.)

1. A process for making continuously nitric anhydrid N_2O_5, by the reaction of ozone on an oxid of nitrogen of a degree of oxidation lower than N_2O_5 and higher than N_2O, wherein two gaseous currents, one containing at least one of the said oxids of nitrogen, the other containing ozone, are caused to react in such proportion to each other that there is present an excess neither of ozone nor of oxid of nitrogen, the nitric anhydrid which is formed being recovered from the gaseous current at a temperature below —20° C.



1,348,875. MICROMETER. JAMES E. HASTINGS, Athol, Mass. Filed July 11, 1919. Serial No. 310,232. 10 Claims. (Cl. 33—164.)

1. In a micrometer gage, the combination with a spindle casing having the usual bore, of posts carried by the casing and arranged upon opposite sides of said bore, an eccentric washer having an extension provided with a high point mounted intermediate said posts, a ring having an annular groove therein arranged about said posts, the extension of said eccentric washer engaging in the groove of said ring when the bore of said washer is alined with the bore of said spindle casing.

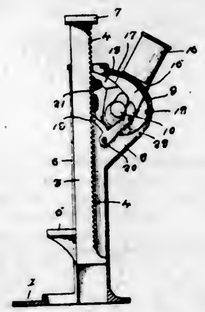
1,348,876. COIN-CONTROLLED VENDING-MACHINE. CLARENCE W. HOBBS and EUGENE A. COPELAND, Worcester, Mass., assignors to Hobbs Manufacturing Company, Worcester, Mass., a Corporation of Massachusetts. Filed June 22, 1916. Serial No. 105,274. 22 Claims. (Cl. 194—10.)

1. In a coin-controlled vending machine, the combination comprising a delivery-actuating means, a power-operated means for operating said delivery-actuating means, means whereby said power-operated means may be connected to said delivery-actuating means for operating the same under conditions governed by a coin of a determinate

character, said last-named means including a coin detector, and means for actuating said coin detector to function by said power-operated means.

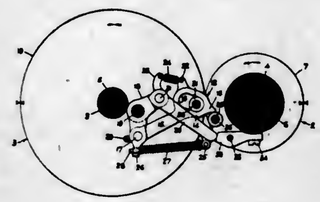
1,348,877. TRACTION-ENGINE. EPHRAIM M. HOLMES, Minneapolis, Minn., assignor to Daniel E. French, Stuart, Fla. Filed Feb. 23, 1918. Serial No. 218,711. 2 Claims. (Cl. 180—14.)

1. A traction engine comprising a wheel supported frame having drive wheels at the front and steering wheels at the rear thereof, an arched axle connecting said steering wheels, a pivotal connection between said axle and said frame, and a removable bar connecting the ends of said axle.



1,348,878. HINGED BOX. FRANK S. HYATT, Brooklyn, N. Y. Filed Apr. 6, 1920. Serial No. 371,636. 4 Claims. (Cl. 220—31.)

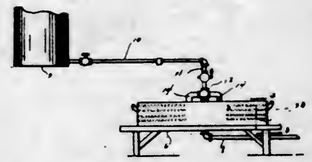
1. A box having curved walls and comprising a body and a cover, a bead around the periphery of the body, a bead around the periphery of the cover, said beads forming the continuous curved shape of the box, a flat wall on one side of the box between said beads and a hinge disposed in said flat wall.



2. An oval box comprising a body and a cover, beads around the body and cover maintaining a continuous oval contour to the box, a flat wall on the long side of the box between said beads and a hinge formed on the flat wall.

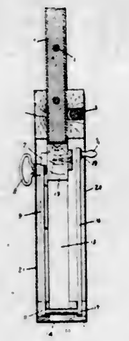
1,348,879. JACK. RONALD B. JESTER, New Cumberland, W. Va. Filed Aug. 25, 1919. Serial No. 319,543. 12 Claims. (Cl. 254—111.)

1. In a jack, a lifting bar, an operating shaft adjustable into either one of two operative positions, and means associated with said shaft and controlled by the adjustment thereof for raising the bar when the shaft is in one position and lowering the bar when said shaft is in its other position.



1,348,880. MECHANICAL MOVEMENT. JOHN HETTRICH, Lincoln, Nebr. Filed Sept. 8, 1919. Serial No. 322,329. 2 Claims. (Cl. 74—14.)

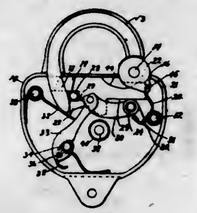
1. A mechanical movement comprising a spool keyed on a driving shaft, and carrying a driving-pin and a contact block, a spool keyed on a countershaft, a reciprocable wedge seated in the last-mentioned spool and adapted to engage the driving-pin, and a push-bar carried by the same spool in operative connection with the wedge, and adapted to engage the contact block.



1,348,881. DEVICE FOR WASHING PHOTOS. ELISEE EUGENE KLEINE, Rosthern, Saskatchewan, Canada. Filed Sept. 18, 1919. Serial No. 324,478. 1 Claim. (Cl. 95—98.)

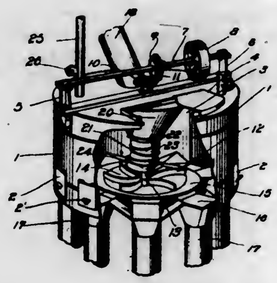
A washing device for photographic productions or the like consisting of a wash container adapted to be suitably positioned on a table, an outlet preferably formed centrally in the bottom of said wash container, a flow pipe from said outlet, feed pipe and controlling means on said feed pipe, the free end of said feed pipe being provided with a T-head, spreaders connected to said T-head,

said spreaders each having a closed lower end and small openings adapted to spread water in all directions when forced through the same, a float mounted between said spreaders, and a plunger frictionally held in said float in a predetermined position and having a stopper at its lower end adapted to close said outlet in said wash container.



1,348,882. AUTOMOBILE-DOOR LATCH. FREDERICK KLEINSMITH, Indianapolis, Ind. Original application filed May 17, 1918, Serial No. 235,121. Divided and this application filed Nov. 24, 1919. Serial No. 340,150. 4 Claims. (Cl. 296—44.)

4. An extensible automobile door having a hollow body, a member movable vertically therein and adapted to be extended above said body, a latch, an operating handle for said latch having a rocking shaft located below the space adapted to be occupied by the movable part when in lowered position, a latch connecting lever fixed on said shaft on one side of said space, and an operating lever fixed on said shaft on the opposite side of said space.



1,348,883. [WITHDRAWN.]

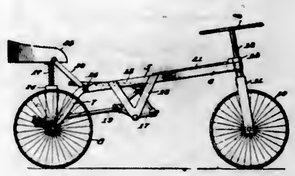
1,348,884. PADLOCK. NELS KAOHN, Chicago, Ill., assignor to The Adams & Westlake Company, a Corporation of Illinois. Filed May 17, 1919. Serial No. 297,751. 16 Claims. (Cl. 70—105.)

3. In a padlock, in combination, an oscillating shackle, a reciprocating spring-advanced bolt for securing the shackle, spring advanced and key retracted means movable transversely to the path of the bolt for holding the bolt in advanced position, any key-releasable means carried by the last-named means for securing the same in engagement with the bolt.

1,348,885. PROPORTIONAL DISTRIBUTER. JAMES F. LAFFOON, Kansas City, Mo. Filed Oct. 12, 1918. Serial No. 257,909. 3 Claims. (Cl. 83—44.)

1. A distributer for finely divided material comprising a circular table, a spout having a concentric discharge opening adapted to be adjusted eccentrically to direct the material onto the circular table, means for evenly distributing the material to the periphery of the table, and material-receiving devices about the periphery of the table and having inlet openings below the same.

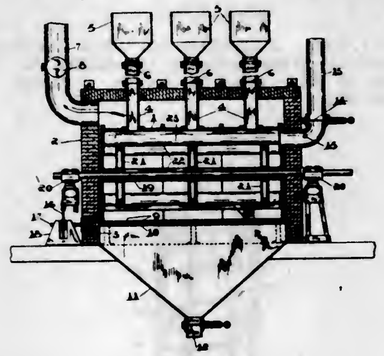
1,348,886. SPARK-PLUG. OSCAR M. LEICH, Genoa, Ill., assignor to Leich Electric Company, Genoa, Ill., a Corporation of Illinois. Filed Mar. 19, 1919. Serial No. 283,566. 6 Claims. (Cl. 123—169.)



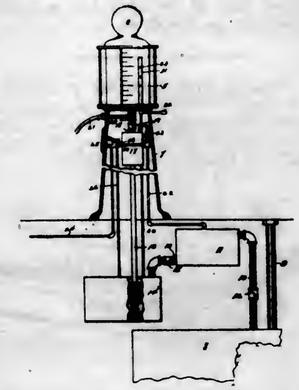
1. A spark plug of the character described having main electrodes and an auxiliary electrode, a mental sleeve carrying one of said main electrodes, a porcelain mounting for the other of said main electrodes, and insulating means carrying said auxiliary electrode fixedly carried by said metal sleeve independently of said porcelain mounting.

1,348,887. WEEDING-HARROW. JOHN MCKEAG, Hamlin, Alberta, Canada. Filed Feb. 12, 1919. Serial No. 276,614. 1 Claim. (Cl. 55—84.)

A weeding harrow comprising a pair of sections, each section including spaced parallel bars, transversely disposed arcuate shaped tooth elements secured to the underside of said bars, a handle connected with the center bar of ach section, an arcuate shaped end member for each section, a U-shaped member connecting said end member and central bar of each section, and flexible elements terminally connected with the U-shaped members, whereby said sections are adaped for independent movement.



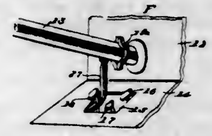
1,348,888. OCCUPANT-PROPELLED VEHICLE. JACOB P. METZLER, Geneva, N. Y. Filed Apr. 24, 1919. Serial No. 292,426. 3 Claims. (Cl. 208—33.)



1. An occupant propelled car comprising a frame formed of a single continuous bar strip, said strip providing side body portions having rearward and downward extensions providing journal bearings, and the front portion of the strip providing a steering head, tractor wheels journaled in said journal bearings, a steering wheel mounted in the steering head, and a treadle journaled in said side portions and located substantially in the plane of the body portions of the frame for propelling the car through the weight of the occupant thereon.

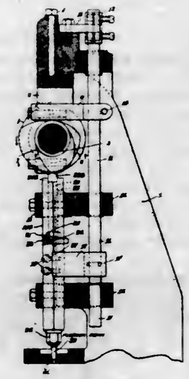
1,348,889. PROCESS AND APPARATUS FOR THE REDUCTION OF METALLIC OXID ORES. JAMES WILLIAM MOFFAT, Toronto, Ontario, Canada. Filed Aug. 15, 1919. Serial No. 317,759. 13 Claims. (Cl. 263—25.)

1. A furnace for the reduction of metallic oxid ores comprising a stationary horisontal cylindrical reduction chamber; charge feeding means located at the top of the reduction chamber provided with a substantially air tight gate; a discharge outlet located at the bottom of the reduction chamber and provided with a substantially air tight gate; means moving in closed orbits adapted to lift and re-lift the charge from the bottom of the furnace without endwise movement in the furnace, and drop it again from the upper part of the furnace.



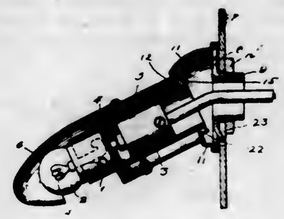
1,348,890. DISPENSING APPARATUS. HOWARD M. NICHOLSON, GEORGE B. NICHOLSON, and ARTHUR D. NICHOLSON, Pittsburgh, Pa. Filed Oct. 21, 1919. Serial No. 332,189. 5 Claims. (Cl. 221—100.)

4. In a device of the character described the combination with an elevated dispensing receptacle, of a storage tank, a first suction tank, a connection leading from the storage tank to the first suction tank, a supply tank below the first suction tank, a connection leading from the suction tank to the supply tank, means for alternately supplying air under pressure to and venting the supply tank, a connection leading from the supply tank to the dispensing receptacle, means effected by the rise and fall of liquid in the said connection for creating a vacuum in the first suction tank and means for venting said first suction tank to permit the liquid therein to flow by gravity into the supply tank.



1,348,891. LOCK FOR AUTOMOBILES. CHARLES WILLIAM NIXON, New Orleans, La. Filed July 23, 1919. Serial No. 312,695. 2 Claims. (Cl. 70—128.)

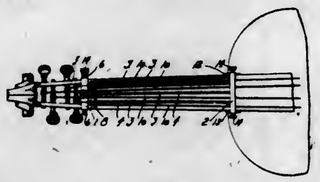
2. In combination, a steering post, a sectional ring embracing the steering post, a yoke, a collar movably connected to the yoke, said ring being movably connected to said collar, a pedal, a pair of gripping arms pivotally connected to said yoke and adapted to embrace said pedal,



means for wiasing the arms out of engagement with said pedal, and means carried by the arms for locking the same in embracing position.

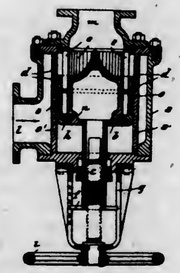
1,348,892. EYELET-MACHINE. WILLIAM D. PIERSON, Waterbury, Conn., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn., a Corporation of Connecticut. Filed July 17, 1919. Serial No. 311,513. 8 Claims. (Cl. 74—1.)

1. In a machine of the character described, the combination with the operating pushdown cam, the plunger for carrying the working tool, and the bumper having a shank engaging in a longitudinal hole in the plunger and having a head diametrically larger than its shank and projecting beyond the plunger to be engaged on its projecting end by said cam; of means for relatively adjusting the plunger and bumper longitudinally, said bumper head being T-shaped and said plunger having a slot across its top in a direction across the working face of said cam; said slot being dimensioned to receive said T-head and having a depth greater than the possible relative adjustment of plunger and bumper, all whereby the T-head will be supported by the walls of said slot against the bending action on it by said cam at any and all adjustments of the plunger and bumper.



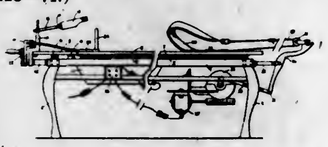
1,348,893. DASHBOARD LAMP-SOCKET. EDWARD S. PRESTON, Chicago, Ill. Filed May 11, 1918. Serial No. 233,868. 8 Claims. (Cl. 240—7.)

8. In a lamp socket mounting, a collar having means for connection to a support at one end and having its



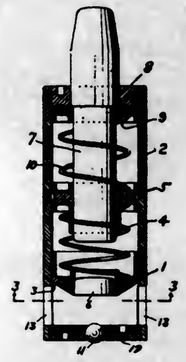
other end provided with an abutment, a shell engaged at one end with the said other end of the collar, a casing having one end engaged with said abutment, means to adjust the shell relative to said collar, and a connection between the shell and casing whereby upon adjustment of the shell the casing will be tightly impinged against abutment.

1,348,894. FINGER-BOARD FOR VIOLINS. RUDOLF GOTTFRID NILSON RAHNE, Gottenborg, Sweden. Filed Jan. 2, 1919. Serial No. 269,329. 3 Claims. (Cl. 84—87.)



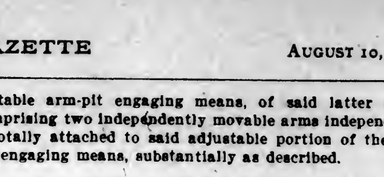
3. A finger guide for violins comprising a plurality of tangibly marked ribbons applied to the finger board of the violin alongside the strings thereof and having the ends bent angularly, clamping members attached to the finger-board near the ends of the ribbons, each including a stationary member and a movable member, the bent ends of the ribbons being arranged between the stationary and movable parts of the clamping members and set screws for forcing the movable clamping members toward the bent ends of the ribbons so as to hold the bent ends of the ribbons against the stationary members of the clamping members, substantially as described and for the purpose set forth.

1,348,895. DEVICE FOR SUPERHEATING STEAM. GIUSEPPE RESTUCCI, Naples, Italy. Filed Sept. 28, 1918. Serial No. 256,031. 7 Claims. (Cl. 122—459.)



1. A device for superheating steam comprising expanding nozzles, means for supplying heat to the steam while expanding, and blades arranged to impart centrifugal action to the expanded steam.

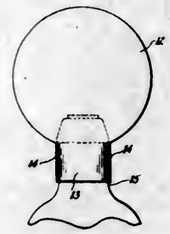
1,348,896. ANATOMICAL DEVELOPING AND ADJUSTING MACHINE. DANIEL W. RIESLAND, Duluth, Minn. Filed Dec. 16, 1919. Serial No. 345,435. 4 Claims. (Cl. 128—71.)



2. The combination with a table of the character described including stationary head-holding means and adjustable arm-pit engaging means, of said latter means comprising two independently movable arms independently pivotally attached to said adjustable portion of the arm-pit engaging means, substantially as described.

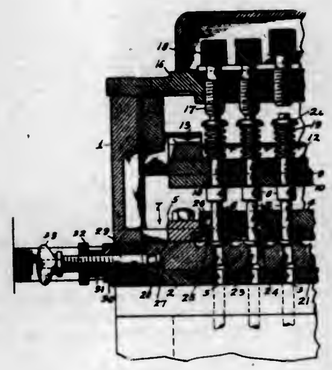
1,348,897. PORTABLE BRINNELL HARDNESS-TESTER. ALBERT RINGLAND, Philadelphia, Pa. Filed July 28, 1919. Serial No. 313,765. 4 Claims. (Cl. 265—12.)

1. A portable Brinnell hardness tester provided with a recoil absorbing anvil in combination with a plunger adapted to strike the anvil and with a ball adapted to receive the transmitted blow of the anvil and to transmit said blow, substantially as described.



1,348,898. MEANS FOR MAKING PLASTER-BOARD. ORVILLE L. ROUTT, Los Angeles, Calif., assignor to Plastoid Products, Incorporated, Los Angeles, Calif., a Corporation of California. Filed June 30, 1919. Serial No. 309,223. 7 Claims. (Cl. 154—1.)

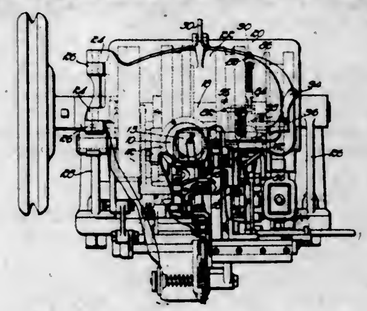
5. Means for forming plaster board having spaced parallel channels therein comprising a base member having spaced longitudinal portions to serve as bearing members, and adapted to support paper folded longitudinally with its folds spaced to correspond with said longitudinal portions of said base member, whereby said folded paper overlies said portions and also has folded portions between said longitudinal base portions, and means moving longitudinally over and upon said base portion and folded paper for pressing plastic material into the folds of said paper longitudinally theerof.



1,348,899. ADVERTISING DISPLAY DEVICE. FRED W. SARGENT, Brockton, Mass., assignor to Tolman Print, Incorporated, Brockton, Mass., a Corporation of Massachusetts. Filed Nov. 24, 1919. Serial No. 340,083. 1 Claim. (Cl. 40—4.)

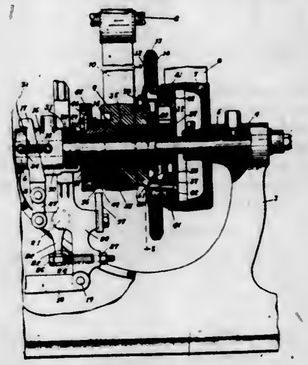
As an advertising display device, a normally flat body of sheet material having a display portion and a wing, said wing including a central portion joined to, and projecting from one edge of the display portion, and end portions projecting oppositely from said central portion, and adapted to be bent and connected to form, with said central portion, a tubular sleeve, adapted to surround a bottle neck, the display portion being formed to project wholly from one edge of said sleeve, and to stand beside and project in a substantially vertical plane above the neck to

which the sleeve is applied, so that advertising matter may be conspicuously displayed in a vertical plane, in space above a bottle on exhibition, the display portion being wider above the ring than at its junction with the wing, so that the display portion is not flexed by the operation of bending the wing to form a sleeve.



1,348,900. INKING MECHANISM. LOUIS A. SCHMIDT, New York, N. Y., assignor to R. Hoe and Co., New York, N. Y., a Corporation of New York. Filed Oct. 11, 1919. Serial No. 330,086. 16 Claims. (Cl. 101—365.)

1. In an inking mechanism, the combination of a plurality of separate ink delivery conduits, for delivering an independent supply of ink for different columns or sections of the form, a plurality of pumps, one for supplying each conduit with ink, and means whereby the supply of ink from the pumps to certain of the conduits may be simultaneously varied without affecting the supply to other conduits.



1,348,901. SEWING-MACHINE. THOMAS H. SEELY, Boston, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Sept. 25, 1916. Serial No. 122,002. 7 Claims. (Cl. 112—60.)

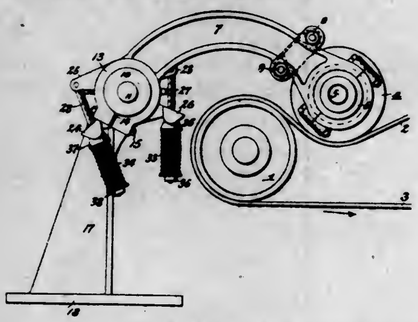
1. A two-thread sewing-machine having, in combination with sewing-instrumentalities including a holder, for locking-thread, accessible at the front of the machine: a cover, for inclosing forward parts of the machine; and a

retainer for said holder united with said cover so as to cooperate with the holder when the cover is in operative position.

1,348,902. SPEED-CHANGING MECHANISM. THOMAS H. SEELY, Malden, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Dec. 28, 1916. Serial No. 139,378. 21 Claims. (Cl. 74—35.)

1. A speed changing mechanism having a driving member, a driven member, a clutch between said driving and driven members, manual means movable to operate the clutch to cause the driven member to be driven from the driving member at the same speed, and connections between the clutch and the driven member to drive the driven member at another speed, said connections being normally inoperative and constructed and arranged to be rendered operative by further movement of the manual means in the same direction.

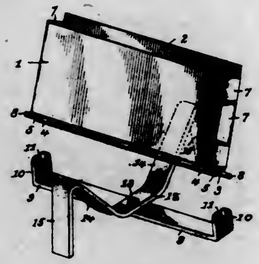
1,348,903. STEEL-TREATMENT-TRANSFERRING SYSTEM AND APPARATUS THEREFOR. DAVID J. SIMPSON, Chicago, Ill., assignor to Noah Steiner Amstutz, Valparaiso, Ind. Filed Apr. 5, 1915, Serial No. 19,312. Renewed Dec. 29, 1919. Serial No. 348,051. 6 Claims. (Cl. 214—18.)



1. A furnace, closable openings at both ends, storage supports at one end, transferring tracks at the other end,

removable rails adapted to be inserted and withdrawn from the furnace, and means for automtically guiding the entering end of such rails through the furnace and into alinement with the transfer tracks.

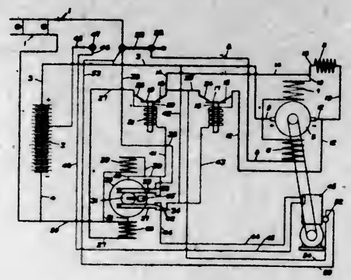
1,348,904. PAINT. DAVID C. SMITH, Schenectady, N. Y. Filed Jan. 28, 1920. Serial No. 354,653. 5 Claims. (Cl. 134—46.)



1. A paint adapted for use at high temperature comprising magnesia, whiting, water and a water-soluble glue binder.

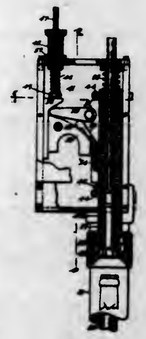
1,348,905. AUTOMATIC BELT-TIGHTENER. HARRY J. SMITH, Lakewood, Ohio. Filed Oct. 21, 1918. Serial No. 259,108. 11 Claims. (Cl. 64—5.)

1. A belt tightener comprising a rock arm, a pulley mounted on said arm and adapted to engage a belt, a rotatable drum upon which said arm is mounted and upon which said arm is adjustable circumferentially, and a spring operatively associated with said drum and a fixed part and adapted to turn said arm in a direction for pressing said pulley against said belt.



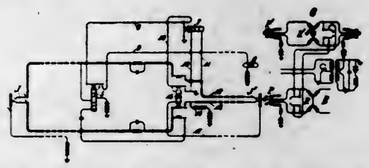
1,348,906. LOOSE-FILE-CARD HOLDER. SWANTE J. P. SWALLENDER, Chicago, Ill. Filed Oct. 24, 1919. Serial No. 332,921. 4 Claims. (Cl. 129—16.)

1. In a loose file card holder, the combination of a pair of cover plates, each formed with interengaging stop flanges at its respective sides and with longitudinal bottom web or flange having at its end a pivot eye, a pivot rod engaging the pivot eyes of the bottom flanges aforesaid, and supporting studs associated with the cover plates adjacent to their point of pivotal connection, substantially as set forth.



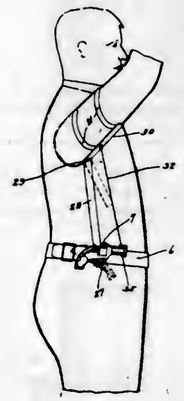
1,348,907. ELECTRIC POWER SYSTEM. IRA T. SWARTZ, Indianapolis, Ind., assignor to Swartz Electric Company, Indianapolis, Ind., a Corporation of Indiana. Filed June 23, 1917. Serial No. 176,643. 12 Claims. (Cl. 290—35.)

3. In an electric power system, in combination with a storage battery, a dynamo electric machine, a prime mover, a single switch having rotatable armature and shunt and differential series windings for controlling the ignition



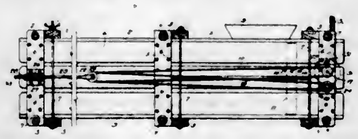
and motor circuits, means to manually close the switch and means to prevent flow of current through the switch when the dynamo electric machine is out of operation.

1,348,908. BOTTLE-CAPPING APPARATUS. SAMUEL W. TAYLOR, Baltimore, Md., assignor to The Crown Cork and Seal Company of Baltimore City, a Corporation of Maryland. Filed July 31, 1917. Serial No. 183,682. 6 Claims. (Cl. 226—84.)



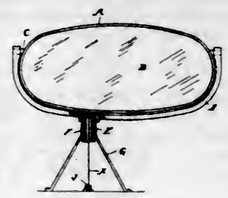
1. In a bottle-capping apparatus, the combination, with a capping head and a bottle support having relative movement, of a capping throat device carried by the capping head and movable relative thereto, and a yielding resistance device for retaining the capping throat device in fixed relation to the capping head within a predetermined limit of pressure and for giving a decreased resistance after the initial movement of the throat device relative to the capping head.

1,348,909. TELEPHONE TOLL-CIRCUITS. JOHN F. TOOMEY, New York, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Feb. 20, 1919. Serial No. 278,174. 7 Claims. (Cl. 179—41.)



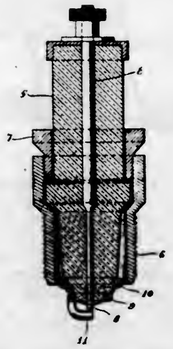
1. In a telephone system, a toll trunk, talking conductors for said trunk, a cord circuit for answering calls incoming over said trunk, a second cord circuit for completing local connections, and means including a relay bridged across the talking conductors of said trunk whereby a talking connection may be established with said first mentioned cord circuit only.

1,348,910. FIREARM. SAMUEL VLANCH, Sioux City, Iowa. Filed Mar. 26, 1920. Serial No. 368,933. 7 Claims. (Cl. 42—94.)



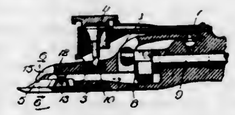
4. A device of the class described comprising a base plate adapted to be secured to a person's body, a revolver support pivoted on the plate to swing upwardly and downwardly, an element on the plate to engage and operate the revolver trigger when the support is swung upwardly, and means for swinging the support upwardly including a tractile member secured to the support and adapted to be secured to a person's limb.

1,348,911. HAY-PRESS. JOHN L. WALLIS, Andalusia, Ala., assignor to William C. Fritter, Dothan, Ala.; Nellie E. Fritter administratrix of said William C. Fritter, deceased. Filed June 14, 1919. Serial No. 304,101. 4 Claims. (Cl. 100—12.)



1. A baling press having a chamber formed therein, a compressing member adapted to move within the said chamber, a cable having each end thereof attached to the said compressing member, a series of oppositely arranged pulleys over which the said cable passes, means including screw-threaded rods for longitudinally adjusting some of said pulleys, and means for imparting rotary movement to another of said pulleys for moving the compressing member in the chamber.

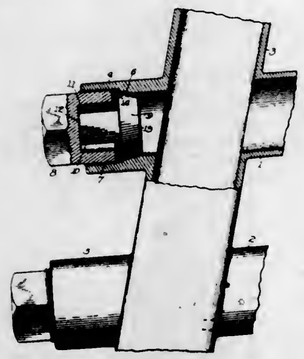
1,348,912. BOAT-SAIL. WILLIS C. WARD, Orchard Lake, Mich. Filed Dec. 5, 1919. Serial No. 342,576. 7 Claims. (Cl. 114—103.)



1. A boat sail comprising a sheet of rigid material, and an adjustable frame in which said sheet is mounted.

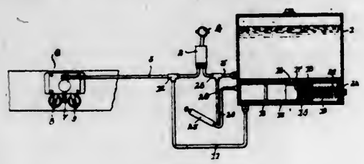
1,348,913. SPARK-PLUG. SAMUEL P. WELCH, Atlantic City, N. J., assignor to Ojus Spark Plug Works, Atlantic City, N. J., a Partnership composed of John Burt and Samuel P. Welch. Filed July 12, 1919. Serial No. 310,514. 2 Claims. (Cl. 123—169.)

1. A spark plug comprising an insulating core, a metallic shell carrying the core, a main electrode rod carried by the core, and a pair of conductor rings carried by the core and spaced to produce a spark gap between said rings, one of the rings having a laterally projecting electrode which is so positioned with respect to the terminal of the main electrode rod as to produce a spark gap between said electrode and the rod and said laterally projecting electrode being pliable to permit bending into contact with the main electrode rod, and the other ring being spaced from the shell to produce a spark gap between said ring and the shell.



1,348,914. SHEEP-SHEARS. FRANK N. L. WILLETT, Aurora, Ill. Filed Sept. 19, 1919. Serial No. 324,751. 1 Claim. (Cl. 30—1.)

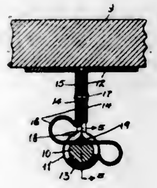
In a sheep shearing machine having a stationary and a vibrating cutter and an operating arm for oscillating the vibrating cutter, said vibrating cutter being provided with a plurality of teeth each having outwardly and downwardly flaring side walls, and also provided with openings at each end, a pair of pins carried by said operating arm and adapted to seat in the openings in said



vibrating cutter and thereby connect said arm with said cutter, and a plurality of presser and operating fingers loosely mounted in pairs on said operating arm, each presser finger having means on its outer ends adapted to engage the flaring sides of a cutter tooth and thereby prevent transverse and vertical movement.

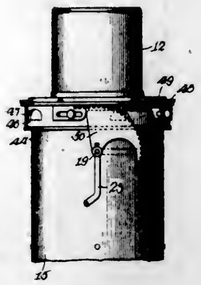
1,348,915. REMOVABLE PLUG FOR BOILERS AND THE LIKE. WILLIAM H. WINSLOW, Chicago, Ill., assignor to Winslow Safety High-Pressure Boiler Company, Chicago, Ill., a Corporation of Illinois. Filed July 26, 1915. Serial No. 41,812. 14 Claims. (Cl. 220—39.)

1. In combination a hollow boss having an internally threaded portion and a conical seat adjacent said threaded portion, an internal conical plug in said seat, guiding means on the rear of said conical plug for guiding the same upon said conical seat, a screw-plug engaging said conical plug and clamping the same against said seat, the lateral walls of the boss being imperforate.



1,348,916. FUEL-FEED SYSTEM. WILLIAM H. WINSLOW, River Forest, Ill., assignor to Winslow Safety High-Pressure Boiler Company, Chicago, Ill., a Corporation of Illinois. Filed July 14, 1919. Serial No. 310,778. 10 Claims. (Cl. 158—36.)

1. In a fuel feed system, a supply tank, a delivery pipe, pumping means for pumping fuel from said supply tank to said delivery pipe, an elastic reservoir having connection with said pumping means, said elastic reservoir comprising a movable member having positions corresponding to the maximum and minimum capacities of said reservoir, and means actuated by said movable member only when in its position of maximum capacity for by-passing the fuel from said reservoir to said tank.

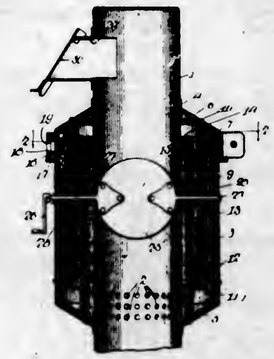


1,348,917. FASTENING DEVICE FOR VEHICLE-TOPS. HENRY T. WITTICH, Ashtabula, Ohio. Filed Aug. 31, 1918. Serial No. 252,256. 4 Claims. (Cl. 279—79.)

1. In a device of the character described, the combination of a stud, a bracket consisting of a unitary sheet-metal stamping bent upon itself and forming an opening at its outer end adapted to fit over such stud; and a

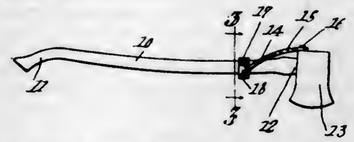
spring secured at one end between the parts of such stamping and bent to normally intersect such opening.

1,348,918. FUEL-SAVING APPARATUS. MICHAEL WOLFE, Chicago, Ill., assignor, by mesne assignments, to Wolff Coal Saver Company, a Corporation of Delaware. Filed Nov. 29, 1916. Serial No. 134,027. 1 Claim. (Cl. 110—58.)



In combination, a flue member having openings therein; a casing encircling the flue member and inclosing said openings, there being perforations in said casing opening into the outside atmosphere; a tubular member having perforations therein coöperating with the perforations of said casing, the tubular member being mounted for rotation upon the casing and adapted to regulate the flow of air through the perforations in said casing; a damper spindle mounted in the flue member and said casing; a damper on the damper spindle in the said flue member; gear teeth on the tubular member; and a gear fixed on the damper spindle meshing with the gear teeth and adapted to rotate said tubular member on said casing upon rotation of the damper spindle and damper.

1,348,919. FUEL-SAVER. CHARLES WOLFF, Chicago, Ill., assignor, by mesne assignments, to Wolff Coal Saver Company, a Corporation of Delaware. Filed Mar. 28, 1917. Serial No. 157,870. 1 Claim. (Cl. 110—58.)



In combination, a flue having openings therein spaced around the periphery thereof, a casing surrounding said flue to form an air preheating chamber and having openings therethrough spaced around the periphery thereof, means for varying the size of said openings through said casing to regulate the amount of air permitted to pass into said preheating chamber, means for fixing said regulating means in adjusted positions, a damper within said flue above said openings for admitting air to said flue, said damper being operable to regulate the size of the passage through said flue independently of the regulation of the openings for admitting air into said preheating chamber, and a plurality of baffle walls within said preheating

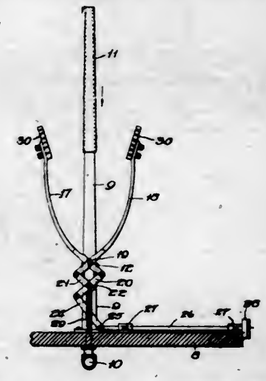
chamber arranged with the opposite ends of alternating walls spaced from the ends of said chamber so that air

entering said chamber must pass substantially the entire length thereof a plurality of times before entering said flue.

1,348,920. AX. JOHN H. YOUNG, Bartlesville, Okla. Filed Mar. 5, 1920. Serial No. 363,434. 4 Claims. (Cl. 145—2.)

1. An ax comprising a head, a handle having a curved portion adjacent to the helve thereof extending away from the edge of the head, a brace detachably connected to the head and extending toward the handle, and a clamp mounted on the handle and connected to the brace.

2. The combination with an ax comprising a head having a handle and curved adjacent to the head toward the rear face thereof; of a brace between the handle and the head at the side opposite to the cutting edge.



1,348,921. TOY DEVICE. ISIDOR ZION, Ridgefield, N. J. Filed Aug. 15, 1919. Serial No. 317,660. 3 Claims. (Cl. 46—40.)

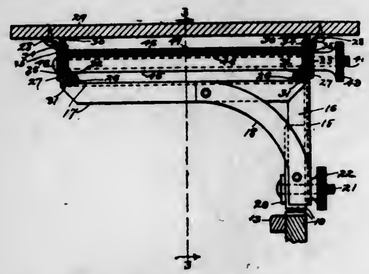
2. A toy device of the class described comprising a frame, a disk rotatably mounted on and spaced from one side of said frame, said side of the frame being provided with a plurality of spaced and radially arranged projecting members, a plurality of figure devices detachably and movably connected with said disk, cam-shaped shoe members on said devices adapted to operate in connection with said projecting members to give said devices a rotary oscillatory movement and a member on the other side of said frame and in operative connection with said disk for rotating said disk to move said figure devices over said projecting members.

1,348,922. STOCKING-HOLDING DEVICE. FREDERICK J. ASH, Phoenixville, Pa. Filed July 21, 1919. Serial No. 312,112. 4 Claims. (Cl. 223—17.)

1. A device of the character described including a stocking form; two arms pivotally connected together between their ends; two links directly pivoted together and respectively pivoted to adjacent ends of said arms; means for moving said links together and apart on their pivots whereby said arms are moved on their pivots to move their

opposite ends toward and from opposite faces of said form; and means for guiding the pivotal connections of said arms to control the movement of said links; substantially as described.

1,348,923. PLANE. CYRUS BAILEY, Western Springs, Ill. Filed Mar. 12, 1919. Serial No. 282,140. 10 Claims. (Cl. 145—5.)



1. A plane comprising a body, a blade holder pivoted on said body and provided with a rearwardly extending rigid bottom portion overlying the body in rear of said pivot, a blade adjustably mounted on said holder in front of said pivot, so that the cutting edge of the blade will be raised and lowered by up and down tilting motion of said rigid bottom portion of the holder, and a handle adapted for operating the plane and connected at its lower end to said rearwardly extending portion for tilting said holder about its pivot to raise the blade when the plane is pulled backward and to lower the blade when the plane is pushed forward, the handle thereby having rearward and downward movement to lift the blade, and forward and upward movement to lower the blade.

1,348,924. TABLE ATTACHMENT FOR SEATS. FRANK S. BASKIN, Cleveland Heights, Ohio. Filed Dec. 22, 1919. Serial No. 346,667. 7 Claims. (Cl. 155—128.)
